German Pathologist: Fatal Consequences of Vaccinations Underestimated

AUGUST 4, 2021 BY NEWS WIRE

4 COMMENTS

German pathologists like Schirmacher (pictured above) dare to question the official script on vaccine safety.

Dr. Peter Schirmacher, who serves as Director at the Pathological Institute of the University of Heidelberg, is **sounding the alarm on fatal vaccine injuries** after performing over forty autopsies on people who had died within two weeks of receiving their COVID shot.

The German daily, *Augsburger Allgemeine*, **reports**:

“Schirmacher assumes that 30 to 40 percent of them died from the vaccination. In his opinion, the frequency of fatal consequences of vaccinations is underestimated – a politically explosive statement in times when the vaccination campaign is losing momentum, the Delta variant is spreading rapidly and restrictions on non-vaccinated people are being discussed.”

Right on cue, a flurry of criticism has moved on Schirmacher, including from inside Chancellor Merkel’s administration, calling his findings “incomprehensible.”

Schirmacher, who also leads a state-subsidized autopsy project on people who have ‘died from Covid-19,’ recently expanded his work to include the autopsies on people who died after being vaccinated.

GERMAN PATHOLOGIST: FATAL CONSEQUENCES OF VACCINATION UNDERESTIMATED

COVID 19, Featured, Germany, International News, Vaccines

Germany's Federal Association of German Pathologists has stepped up to defend Schirmacher, supporting the urgent need to perform more autopsies on deceased vaccinated people.
