

Meet CIA-linked ANSER, responsible for the Vaccine rollout that's becoming a detriment to the freedom of the people all over planet earth

Who has been coordinating the contracts of the US government with the overt companies like Pfizer + J&J ? You guessed it, another Non-profit

1. PROJECT WARP SPEED: ANSER (non-profit contractor)

ANSER is an independent public service institute incorporated in California in 1958 as a not-for-profit corporation. In January 2017, ANSER acquired Advanced Technology International (ATI) of Summerville, South Carolina, a nonprofit company that organizes and manages research and development consortia on behalf of the federal government. The company was created by the South Carolina Research Authority; ANSER purchased it from the state of South Carolina. ATI Builds Technology Development Teams with Organizations of All Sizes and Types, an example being Medical CBRN Defense Consortium (MCDC).

The Medical CBRN Defense Consortium (MCDC) is a well-established community of industry, academia, and government focused on rapid prototyping and maturing medical countermeasures to prevent, detect and treat exposure to CBRN threats. Through an Other Transaction Agreement with the JPEO-CBRND (Joint Program Executive Office for Chemical, Biological, Radiological and Nuclear Defense), the MCDC is developing life-saving medical pharmaceutical, diagnostics and therapeutics to safe-guard and enhance the mission effectiveness of our soldiers.

The MCDC scope spans development of medical countermeasure prototypes to include vaccines (COVID-19, Marburg, Ebola, VEE, VEEV, Botulinum, etc.), therapeutics (COVID-19, SNAPP, small molecule antivirals, OPNAs, Smallpox, MDR Bacterial bio threat pathogens, Tularemia, etc.), detection/diagnostics (Meliodiosis, Plague, CRISPR-based, man-portable diagnostics systems, antibody platforms, etc.), autoinjectors (Scopolamine, Naloxone, Diazepam, etc.) and other needs.

Our Collaborations

ATI is helping to lead those agencies' efforts to militarize health care and create a surveillance panopticon (**disciplinary concept brought to life in the form of a central observation tower placed within a circle of prison cells**), that not only monitors the world around us but our physiology as well.

With the Trump Administration's Project Warp Speed, the "secret" vaccine contracts awarded through ATI total approximately \$6 billion, accounting for the majority of Operation Warp Speed's \$10 billion budget. Both Paul Mango, Health and Human Services' (HHS), deputy chief of staff for policy, and Robert Kadlec, HHS assistant secretary for preparedness and response (ASPR), personally signed off on the contracts.

The decision to use a nongovernment intermediary like ATI to issue the Covid-19 vaccine contracts, as opposed to the government itself directly awarding those contracts, permitted Operation Warp Speed to "bypass the regulatory oversight and transparency of traditional federal contracting

mechanisms.” This means that the vaccine contracts awarded under Operation Warp Speed are unlikely to ever be publicly released.

Using such intermediaries to award contracts can result in “significant risks, including potentially diminished oversight and exemption from laws and regulations designed to protect government and taxpayer interests.” In the DOD World of recent years, OTA’s(other transaction agreements) have become a popular way of rushing contracts. Some argue that utilizing this alternative method for awarding contracts significantly hastens the process. However, the Congressional Research Service also noted that the Department of Defense (DOD), which has been increasingly relying on OTAs in recent years, has never tracked the information necessary to determine if OTAs are actually faster than traditional contracting methods. This suggests that claims regarding the alleged ‘speed advantage’ of OTAs are based on assumptions rather than data-based evidence.

J & J, Novavax, Pfizer, and Sanofi are some of the companies that have received these covert vaccine contracts through the OTA authorized by Operation Warp Speed and managed by ATI. Many of these companies, particularly Johnson & Johnson, have been involved in scandals related to selling and marketing products they knew to be unsafe to the public.

Contracting this way protects the United States Government from liability towards the Covid-19 Vaccines, even if mandated

*This concern is further compounded by the fact that, on September 21, HHS Secretary Alex Azar told FOX Business that all Operation Warp Speed vaccine manufacturers would be **exempt from liability** for any damages their vaccines may cause and that those who **administer their vaccines would also not be liable for damages**. “Under the PREP Act, which is a provision in Congress, any treatment or vaccine for purposes of a national emergency pandemic like this comes with liability protection. The PREP Act that Azar referenced was originally signed into law in 2005 but was updated in April 2020, a few weeks before Operation Warp Speed was announced, so that vaccine and therapeutic manufacturers “cannot be sued for money damages in court” over injuries caused by medical countermeasures for COVID-19.*

*Notably, the writer of the controversial April update to the PREP Act, HHS ASPR **Robert Kadlec** is intimately involved in deciding who is awarded Operation Warp Speed contracts. STAT News reported, citing senior HHS officials, that Kadlec “personally signs off” on every business agreement made on behalf of HHS for Operation Warp Speed. In addition to his past activities in lobbying for intelligence and defense contractors, Kadlec also previously worked as a lobbyist for the scandal-ridden biodefense company Emergent Biosolutions, which is also a major player in Operation Warp Speed as well as the manufacturer of the controversial **anthrax vaccine BioThrax**.*

Despite top HHS officials allegedly overseeing every single one of these business agreements, NPR was told by HHS that the department has “no records” of the \$1.6 billion Operation Warp Speed contract with Novavax, which was awarded through ATI. This is a strange response given that HHS is supposedly the lead agency overseeing Operation Warp Speed, yet they somehow lack a copy of a massive vaccine contract at the heart of the operation. NPR also asked the DOD for a copy of the Novavax contract and has yet to receive a response.

ANSER was originally founded as a spin-off from the RAND Corporation in the late 1950s, but it became a much larger part of government operations, particularly in the realm of Homeland Security, after Ruth David became its president and CEO in 1998. Prior to becoming ANSER’s CEO, David had been the deputy director for science and technology at the CIA, where, among other things, she laid the groundwork for what would become In-Q-Tel, the CIA’s venture capital arm responsible for the rise of several Silicon Valley giants such as Google and,” Palantir “, another company involved in Covid-19 Vaccine data tracking, and UK Vaccine Rollout, “using military precision”.

UK vaccine rollout success built on NHS determination and military precision

David led ANSER until 2015. After David took charge, ANSER became an early leader in promoting the use of biometric and facial recognition software by US law enforcement agencies and

became a key driver in pivoting the government toward “homeland defense” and “homeland security” in the years leading up to the events of **September 11, 2001**.

As journalist Margie Burns noted in a 2002 article, the rise of “homeland defense” as a centerpiece of US government policy, including the push to create a new “homeland security” agency, began with former State Department official Richard Armitage’s alleged coining of the term in 1997 in a National Defense Policy document. In the years that followed, this pivot toward seeing the American homeland as a future battlefield was heavily promoted by a web of media outlets owned by South Korean cult leader and CIA asset Sun Myong Moon, including the Washington Times, Insight Magazine, and UPI. All published numerous articles either penned by ANSER analysts or that heavily cited ANSER reports and employees regarding the need for a greatly expanded “homeland security” apparatus.

ANSER ranked sixth in the Bloomberg top 200 federal contractors

Falls Church, VA., June 21, 2021

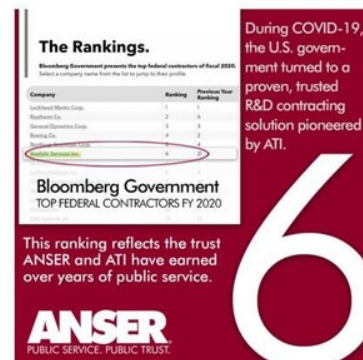

As a not-for-profit, ANSER is humbled to be listed at number six in the Bloomberg Government's annual list of the top 200 federal contractors, also known as the BGOV200. This comes as a sizeable leap from the previous year's ranking, 21.

“While some on the list might look at Analytic Services' ranking as a one-time oddity, it should not be lost that in a time of real national need, the government turned to a proven, trusted R&D contracting solution pioneered by ATI,” said ANSER CEO Steve Hopkins.

According to Bloomberg Government, the top 10 government contractors on the 10th annual BGOV200 won nearly one-third of the record-high \$682 billion in prime contracts awarded in fiscal year 20. For more information on the BGOV200, please visit about.bgov.com.

About Analytic Services, Inc. (ANSER)

ANSER was founded in 1958 as a public service research institute organized as a not-for-profit corporation dedicated to informing decisions that shape the nation's future. We provide program management and objective studies and analyses to the national security, homeland security, and public policy communities. ANSER also builds and leads technology development collaborations through its subsidiary, [Advanced Technology International \(ATI\)](#) specializing in organizing and managing research and development consortia on behalf of the federal government. ANSER's headquarters is in Falls Church, Virginia and has offices in Colorado Springs, Colorado and Belcamp, Maryland. For more information visit: www.anser.org.

In October 1999, at David’s behest, ANSER created the Institute for Homeland Security (ANSER-IHS). Though fully funded and established at that time, for reasons still unclear, the ANSER-IHS was not formally launched until April 2001. The Institute’s first director was **Randall Larsen, who was at that time — and still is today — a close associate of current HHS ASPR Robert Kadlec**. Though ANSER has never explained the reason behind the lengthy delay in officially launching ANSER-IHS, it is possible that the timing was related to the introduction of H.R.1158 in March 2001. That bill called for the creation of the National Homeland Security Agency, which was the foundation of the later Department of Homeland Security.

One month after ANSER-IHS was created, Insight Magazine published an article in May 2001 entitled “Preparing for the Next Pearl Harbor,” which heavily cited ANSER and its Institute for Homeland Security as being among “the nation’s top experts” in warning that a terrorist attack on the US mainland was imminent. It also stated that “the first responders on tomorrow’s battlefield won’t be soldiers, but city ambulance workers and small-town firefighters.”

The following month, ANSER-IHS cohosted the Dark Winter exercise, with two top ANSER-IHS officials, Mark DeMier and Randall Larsen, cowriting the exercise with Tara O’Toole and Thomas Inglesby of the Johns Hopkins Center for Civilian Biodefense Studies (now the Johns Hopkins Center for Health Security). O’Toole, at the time, was on the ANSER-IHS board of advisers.

*As previously detailed in the Engineering Contagion series, several of those involved in **Dark Winter had foreknowledge of the 2001 anthrax attacks**, and Dark Winter itself originated what became the initial, yet false, narrative for those attacks — that Iraq and Al Qaeda were working together to conduct acts of bioterrorism on US soil. **However, the anthrax used in the attacks was quickly determined to have either originated from a US military lab or a US defense contractor.***

*ANSER’s convenient gamble that the US government would imminently pivot toward homeland security soon after April 2001 paid off tremendously. **Thanks largely to the fear stoked by 9/11 and the 2001 anthrax attacks, the Department of Homeland Security was created, and ANSER-IHS quickly became the first government think tank, that is, federally funded research and development center.***
