The only possible reason for British regime to make this absurd nonsensical allegation of Russian nerve agent attack on UK (yet another WMD pretext?) is that they want escalation to point of WW3. IMHO the only question is was it MI6 or Putsch Ukraine's SBU? Logic - who benefits?

Now you know the reason a Circus Show like the one in #Salisbury has been unleashed. The Empire and its Vassals need to get Russia out of the way before they can take on China - and the clock is ticking.

Skripal's poisoning led to the expulsion of Russian diplomats from several Western countries with their greatest numbers being from the US and UK (and Ukraine). Do you think they indicate who's truly behind this particular case of political theater?

#Violin - a fine reason for capital to spit on the will of the people and to review the outcome of the referendum # Brexit retaining Britain as part of the European Union.

The nerve agent "of a type developed by Russia", supposedly 10X more deadly than VX, that evidently has a 7hour onset time and wears off after a week leaving victims alive & hunky dory. This whole farce is looking more & more like an actual false flag.

Why was there no massive Police „national manhunt“ after the #Skripal Event?

This guy asks the exact right questions - #READ! | via @Boson77Higgs |

Complex chemical-biological war in Porton Down, where nearby was poisoned Skripal. The photos show comparative views of the complex in 2012 and 2017. After the story with the "Novice", the center received promises from the Defense Ministry to allocate 48 million pounds.

I'm watching live the briefing of the Russian Foreign Ministry on the case #Skripal

When will the Russians finally learn that the degenerate West is not receptive to rational facts? The Russians are advised the monkey circus #skripal easy to ignore.

Replying to @ianbates74 @RTUKnews @NeilClark66

they are alive means that it wasn't novichok. to MI6 that reads us, it's useless to kill them now, they had to die in minutes after poisoning. good luck with your next #falseflag 😂
