UFO MAGAZINE

The documents contained in this booklet are authentic reproductions. Some are taken from formerly classified intelligence files obtained under the American Freedom of Information Act. We do not retouch or alter any such documents and therefore they are the best available copies.

O. Bimunek, Central Committee President
Secretaries V. Kousky, F. Pene and L.
included government officials, the National Front
Kyselý, DR A. Neuman and DR J. Flošar, general officer and chief

LOUSKY's report was followed by a lengthy address by President
Kovtun in which he stressed responsibilities placed on the officer
corps, denounced the foreign policy and military strategy of the
United States and proudly proclaimed that "Czechoslovakia
society is doing everything possible to ensure that the army
keep abreast of the demands of contemporary military science and to
make its army a thoroughly modern force". (LSDPR, 15 Sep 65)

FLYING SAUCERS OVER SLOVAKIA -- Bratislava, Pravda, 4 Sep 65, p 8

Flying saucers, traveling from south to north, were observed
over Kosice at 1600 hours on 3 September. According to K. L. L. L.
DONATSKI, who was strolling down Kamenky Street with his wife, he
saw a large crowd scanning the sky, he looked up and saw a red,
circular object flying from the direction of the East Slovak
towards Banský. Simultaneously he observed a black colored object
rotating in place at a height of about 3,000 meters and about 7,000
meters from Kosice. When the red circular object passed the rotating
object, the latter moved and disappeared.

The newspaper office has been flooded with calls from citizens
who witnessed the phenomenon. According to information from the
State Airline Administration, the Kosice radar station recorded no
objects in the air at that particular time because they monitor only
the flight routes of incoming and outgoing airplanes. (LSDPR, 15
Sep 65)

**MILITARY MEDICAL CONFERENCE -- Prague, Vojenske Zdravotniche Listy,
No 4, Aug 65, p 145**

A working conference on acupuncture will be held on 29-30
October 1965 at the Slovak National Uprising Military Hospital in
Puzosberok. The session is designed to facilitate the exchange of
experiences and refine the further development of acupuncture under
Czechoslovak conditions. The program will include theoretical reports,
contributions on the mechanism of the effects of acupuncture, and
reports of a clinical nature.

Applications to attend and information on proposed presentations
(exact title, length and required aids) are to be submitted to Richard
Uhlir, Slovak National Uprising Military Hospital, Puzosberok.
(LSDPR, 15 Sep 65)

FLOOD AID CRITICIZED

The 27 August 1965 issue of Bratislava Pravda Ministry of Construction's rebuttal to criticism that is leading the publicly subscribed flood disaster aid. Criticism is being levied by the Slovak Danube River flood victims who are becoming disenchanted with daily press and radio broadcast accounts of accumulated donations and who have yet to see tangible proof in the form of bricks, cement, and various prefabricates.

S. Malik, secretary of the flood commission and the man who keeps the Ministry of Construction informed on disbursements, gave the following explanation: According to plans the flood victims will receive, among other things, a total of 10 million bricks by the end of August and an additional 10 million by the end of September. Between 17 July and 22 August a number of brick kilns have contributed the allotted quota. These were delivered to certain disaster areas in overabundance whereas other areas received none. Responsibility for delivery and distribution does not lie with the Ministry of Construction but with the railroad and business concerns. It has been shown that sufficient amounts of cement have been delivered to the flood areas but because of unsatisfactory storage the cement is hardening. By 17 August the Ministry of Construction issued 870,000 slate shingles, 100,000 pieces of asbestos cement roofing, 34,000 meters of square tiles, 5,933 meters of prefabricates. The Ministry of Construction has been conscientiously fulfilling its tasks. However, it is sending these items where it is told to send by the organs that control the rehabilitation of the devastated areas. (EOPR, 7 Sep 65)

FLYING SAUCER REPORT

[Note: For several weeks, the Hungarian language daily Uj Szó, published in Bratislava, has given extensive, frequently front page, coverage to flying saucer reports, usually from South America but sometimes from other areas, attributing them to the French news service AFP, Reuters, etc. Occasionally, these articles included explanations by Czechoslovak experts who discounted the stories and offered alternatives to the extraterrestrial hypotheses. The 20 August 1965 issue of Uj Szó published a front page CTK (Czechoslovak Press Office) dispatch from San Salvador reporting a photograph of a flying saucer published in Prensa Grafica, Salvador. The following is a full translation of a page 2 CTK story in the same issue of Uj Szó.]

(cont'd)

LUMINOUS OBJECT DETECTED FLOATING IN THE SKY AT MASERAD --
Tehran, Peyghan Ieruz, 13 Jul 65

Source correspondent from Mashhad reports that at 9:30 p.
a sudden luminous object was seen floating over Mashhad. The
course of its direction was from south-east moving toward north-
west. It was clearly visible for a period of 4 minutes and 39
seconds. The local residents were reportedly apprehensive of a
start of a missile attack over Mashhad.

STUDENTS STUDYING IN IRAQ SPENDING VACATION AT HOME -- Tehran,
Peyghan Ieruz, 30 Jul 65

Recently, 72 Iranian students who study in Iraq have arrived
to spend their vacation in Iran. All students are reported boarding
at the Danesh Saray-i-Ali (Teachers College) in Tehran.

AN IRAQI KURD ATTEMPTS TO ASSASSINATE MILITARY OFFICER -- Tehran,
Keyban, 20 Jul 65

An Iraqi Kurd identified as Jeriyyu was apprehended by the
gendarme force stationed on the Iraq-Iran border line when he
attempted to assassinate Major Khantemi stationed at the local
gendarmerie post. During the questioning Jeriyyu confessed to
have aided smugglers moving across the Iraqi borderline.

Source reports that Jeriyyu was apprehended by the gendarme
force stationed on the Iraq-Iran border line when he attempted
to assassinate Major Khantemi stationed at the local gendarmerie
post. During the questioning Jeriyyu confessed to have aided
smugglers moving across the Iraqi borderline.

TITLE: Study of UFO's

SOURCE: Izvestiya news, no. 237, 2 Dec 67, p. 4, cols. 3-4

TOPIC TAGS: unidentified flying object, optics

ABSTRACT:

More than any other person in the USSR, V. Zigel, a doctor at the Moscow Aviation Institute, has uncovered evidence showing that intelligent life probably exists on other planets of our solar system. The astronomer said that UFO's have been appearing in ever-increasing numbers during the last two years, and that they have been observed in 20 countries. It is becoming apparent that this is not an optical illusion. In the USSR there is now a UFO observation service. The observers first establish the speed and acceleration of the UFO, which cannot be achieved by modern aircraft.

TOPIC TAGS: unidentified flying object, optics

ABSTRACT:

The Director of the Station for the Radio Observation of the Ionosphere and Artificial Earth Satellites R. Vitolnitsky reports that recently there are more and more reports in the Soviet and foreign press of strange luminous phenomena. Spherical and convex discs being observed in the sky. As yet, it is impossible to give a definite answer as to the nature of these phenomena. While some have already been explained, the radar observations have sometimes showed objects in the form of an ideal circle tens of kilometers high that could not be compared with any known object, such as Sputniks, meteorological rockets, etc. "Flying saucers" have also appeared many times over the territory of the USSR, and quite recently in Latvia. Eye-witness reports suggest that it was not a mirage, but an actual "flying saucer." According to

Card 1/3

1961 2055

2056
ACC NR ANE000246

astrophysicists, such an object would be of gigantic size with a ball-like core in the center. The object changes color from red to blue, apparently according to its altitude. Its surface is dull (pearly) rather than brilliant. Inasmuch as the body of the UFO is often darker than the surrounding medium, it may be concluded that it is capable, in a certain stage of evolution, of absorbing electromagnetic waves of various lengths which fall on its surface. As a result, under favorable conditions, the object can become practically invisible. When discussing the origin of the UFO a very important point is often forgotten.

Invariably, the flying object is tracked by radar, and it is possible that this could lead to false reports of missile attacks. Therefore, to avoid errors when tracking a flying object, its properties must be known. According to many specialists, the most probable theory is that UFO's are luminescent plasma formations of colossal size, similar to ball lightning. This assumption makes it possible to explain most of their properties, including the cause of their appearance precisely over large cities where the air is saturated with electromagnetic radiation. Regarding hypotheses of UFO's being messengers from other planets, this is still very doubtful, although there is no weighty reason to discard them categorically. At any rate, a thorough research is indicated. That

ABSTRACT:

last November [1967] the Soviet Union formed a committee for the investigation of unidentified flying objects (UFO's). This committee, a part of DOSAAF, is under the command of Air Force Major General Porfir Stolyarov. General Stolyarov recommended that the photographic investigation method be used. The data obtained during this investigation will be correlated by the Pulkovo Astronomical Observatory, and the Crimea Astronomical Observatory. The observations have been entrusted to a chain of astronomical observatories all over the USSR as well as to civil aviation. Orig. art. has: 1 figure. [VII]

TITLE: Unidentified flying object

SOURCE: Soviet life, no. 2, 1968, 27-29

TOPIC TAGS: ^{atmosphere} optic phenomenon, unidentified flying object, meteorite

ABSTRACT: The author (Moscow Aviation Institute) presents several striking and reliable UFO observations and refutes the theory of U. S. astrophysicist Menzel and others that until recently no scientific study of UFOs has been made in the Soviet Union. He claims that the prevailing view that UFOs are common optical phenomena in the earth's atmosphere is wrong and due to the fact that there was no collection of UFO observations. The general impression was that flying saucers are fantasies. This situation is beginning to change.

In 1968 the Nauka Publishing House of the USSR Academy of Sciences is scheduled to publish a book entitled *Populated Outer Space*, edited by Academician Boris Konstantinov, Vice President of the USSR Academy of Sciences, and written by distinguished Soviet and foreign contributors, including Americans.

Card 1/4

ACC NO: AF3004256

In May 1967 a sponsoring group of scientists, the military, writers, and public figures set to form an unofficial body whose purpose would be to conduct a preliminary scientific investigation of UFOs.

The organization, set up in October 1967, is called the UFO Section of the All-Union Cosmonautics Committee, with headquarters at the Central House of Aviation and Cosmonautics in Moscow. Air Force Major General Porfiri Stolyarov was elected chairman of the section.

The hypothesis that UFOs originate in other worlds, that they are flying craft from planets other than earth, merits the most serious examination.

Observations show that UFOs behave "sensibly." In a group formation flight they maintain a pattern. They are most often spotted over airfields, atomic stations, and other very new engineering installations. On encountering aircraft, they always maneuver so as to avoid direct contact. A considerable list of these seemingly intelligent actions gives the impression that UFOs are investigating, perhaps even reconnoitering.

Curiously enough, the number of UFO observations increases as Mars approaches the earth. Is this pure coincidence?

ACC 135 AP3004256

Some people think that UFOs have appeared in the earth's atmosphere only during the past two decades. This is not the case. The UFO phenomenon has been observed throughout the history of mankind. There are medieval and ancient reports strikingly similar to ours.

Among the earlier UFO reports, as an example, may be the well-documented observations of a "large saucer" in 1882 and a "procession of bolides" in 1910. These reports still await investigation.

The most remarkable UFO phenomenon is the famous "Tungusky meteorite." In recent years Soviet scientists have established that the Tungusky explosion had every parameter of an atmospheric nuclear blast. The USSR Academy of Sciences Reports (Volume 172, Nos. 4 and 5, 1967) include studies by Alexei Zolotov which attempt to prove that the Tungusky body could not be a meteorite or a comet.

In the summer of 1967 the Joint Institute of Nuclear Research at Dubna published a study by Vladimir Mekhedov, who concludes that the Tungusky blast left considerable residual radioactivity. Finally, as recently as 1966, after analyzing the sum total of observations on the Tungusky body's flight, this writer showed that before the blast the Tungusky body described in the atmosphere a tremendous arc of about 375 miles in extent (in azimuth), that is, carried out a maneuver.

All these new results warrant the conclusion that the Tungusky body seems to have been an artificial flying craft from some other planet.

ACC 135 AP8004256

Should this be finally confirmed by investigations now in progress, the significance of the Tungusky disaster would be inestimable.

But this, incidentally, will pose new problems. If we are indeed being studied by creatures from other planets, what is their purpose? Why are they so studiously avoiding any direct contact? Is their unsociability the result of so high a level of development that they study us from that "height" just as we look upon and study ants? Or is there still the possibility of common understanding since we are born in the same Universe and obey the same laws of nature?

The study of UFOs may lead to quite different conclusions and present mankind with quite different problems.

The important thing now is for us to discard any preconceived notions about UFOs and to organize on a global scale a calm, sensation-free, and strictly scientific study of this strange phenomenon. The subject and aims of the investigation are so serious that they justify any efforts. It goes without saying that international cooperation is vital. [NC]

TITLE: Hypothesis about flying plates [Hypothesis about unidentified flying objects]

SOURCE: Leninskaya smenn, no. 22, 31 Jan 68, p. 4, col. 5-7

TOPIC TAGS: ~~astronomic conference~~, unidentified flying object, atmospheric optic phenomenon

ABSTRACT: Originally published in the Hungarian newspaper "Magyar Ifjúság," this article reviews various British, Russian, Yugoslav and U.S. eyewitness accounts of UFO's. Statements by the West German ufologist Professor H. Oberst are also quoted. It is noted that a worldwide conference on UFO's will be held in Vienna in August 1968. Soviet astronomer F. Zigel is quoted as stating that UFO's may be optical illusions, flying objects created on earth, unknown natural phenomenon, or objects from other planets. This last hypothesis is supported by the fact that UFO's exhibit a tremendous speed, which presupposes highly developed remote control. However, this is yet to be proved. Unfortunately, most UFO's have left no traces, and only a few photographs of them exist. [NO]

Q: Are flying saucers a myth?

SOURCE: Pravda Ukrainy, no. 40, 17 Feb 68, p. 4, cols. 2-7

TOPIC TAG: ~~apophenomenon~~, unidentified flying object, atmospheric *optical* phenomenon

ABSTRACT: Various eyewitness accounts of UFO's are described. It is concluded [that UFO's are a myth. The single and chance appearance of UFO's complicates or completely excludes the possibility of investigation. Stereoscopic photography is not reliable: it is impossible simultaneously to follow from two points the accurate outlines of a solid flying object. All pictures made by one-objective cameras have room for doubt. It is true that there are pictures which do not raise doubts. They always show objects of round or oval shape with diffused outlines, probably ball lighting. The nature of ball lightning is unknown because of the utter lack of information about the time and place of its formation. It cannot be described as being of outerspace origin. Even during superficial analysis, it is found that the mysterious flares on clouds are reflections of electric welding, signals from aircraft near airports, or remote summer lightning. The November "saucer" of 1957 above Sofia turned out to be a scouting balloon of NATO. When

EXPLOITATION REPORT

FRAGMENT, METAL, RECOVERED IN THE REPUBLIC OF THE CONGO,
ORIGIN BELIEVED TO BE AN UNIDENTIFIED FLIGHT OBJECT
(COUNTRY UNIDENTIFIED) (U)
PEN-25500

SECTION I. (C) Purpose (U)

1. (C) The purpose of this report is to present the results of the exploitation of a metallic fragment recovered near the town of Kerekena in the Republic of the Congo. The recovery was the result of a ground-level search which was conducted after an unidentified flying object exploded and fell to earth in the area. The sighting and recovery took place sometime between 10 and 15 October 1965. Other than a reported east-to-west direction of flight for the UFO, specific observation and recovery details are lacking.

SECTION II. (C) Description (U)

2. (C) Details concerning the exact location and characteristics of impact are unknown. However, the appearance of the fragment indicated exposure to high temperatures prior to impact (burnt). The impact of the specimen had little or no effect on its final condition or appearance. The fragment weighed 0.112g, had an indefinite density of approximately iron and measured $2.25 \times 1.75 \times 1.0$ inches. The top and side views of the specimen were rounded and appeared to have been shaped by heating and melting. This is illustrated in Figures 1 and 2. The top shaped groove, visible in Figure 1, is the outline of an indent of plastic that differs noticeably from the rest of the specimen. Figure 3 shows the side opposite the end shown in Figure 1.

and was composed of six machined or formed T-shaped fins extending along the major axis of the fragment.

SECTION III. (C) Conclusions

3. (C) The fragment was originally part of an electrical component and could be identified as a motor armature, generator armature, or associated electrical regulator component or device.

4. (C) The fragment was penetrated by a .10-inch thick silicon steel laminate stacked on a central mild steel core or shaft.

5. (C) Materials, processes, dimensions, etc., as such, prevent determination of exact origin (country).

6. (C) Surface appearance and microstructure of the specimen indicates exposure to temperatures in excess of 2500° F.

SECTION IV. (C) Explosions

7. (C) The recovered fragment was .41 grams and had a density closely approximating that of steel. The fragment was found on heavy oxide was found in a container with temperatures in excess of 2500° F. While there are no indications of impact, the fractured metal, as shown in Figures 4 and 7, would substantiate the conclusion that the fragment was moving at a high velocity when it was located.

8. (C) Fabrication of the fragment was accomplished utilizing more or less standard procedures for fabricating electric motor armatures.

Armature laminates were stamped (punched) from approximately .012-inch sheet steel, copperplated, and assembled on a mild steel shaft approximately .435 inches in diameter. Following assembly, the laminates were joined by soldering or diffusion-bonding of the copper.

REGRADED UNCLASSIFIED

CONFIDENTIAL

placing. This can be accomplished by slightly compressing the laminate assembly and heating in a furnace. Temperature required for bonding of the copper depends upon the degree of contact on or pressure; the higher pressures requiring proportionately lower temperatures.

9. (C) A cross-section (transverse to length of the specimen) is shown in Figure 3. The light-colored, thin lines are the edges of individual laminates, caused by cutting at an angle to, instead of parallel to, the laminates. These thin lines or petals are "T" shaped. This shape is used to help the winding wire in place and is found on high RPM motors. The melted condition of some of the "T's" is indicative of the high heating conditions experienced. The outer surface of the armature shaft is serrated to prevent axial slippage of the laminates.

10. (C) The lamination or stacking of individual laminates is clearly illustrated in Figure 5. The space between laminates on the fin at the top of the photograph is due to the melting and flowing of the copper during the high temperature exposure of the specimen. Some of the copper has been removed from the fin at the bottom of the photograph. A photograph cross-section of this area is shown in Figures 7 and 8.

11. (C) Another result of intense heating was the enlarged grain size of the steel laminating microstructure. The microstructure of the laminates shown in Figures 9 and 10 illustrates grain sizes that are comparable to Category 2 of ASTM A-213. Large grain sizes also indicate that the laminates were exposed to high temperatures.

intense heat and then cooled at a comparatively slow rate.

12. (C) The light material between the extractions in Figure 9 is plated copper that melted and flowed between the laminations when the entire specimen was hot. A photomicrograph of this is shown in Figure 11.

13. (C) Analysis of the shift discloses the following:

<u>Element</u>	<u>Percent Present (Weight)</u>
Carbon	
Manganese	
Silicon	
Nickel	less than 0.10
Chromium	0.37
Molybdenum	less than 0.01

14. (C) Chemical composition of the steel laminations was as follows:

<u>Element</u>	<u>Percent Present (Weight)</u>
Manganese	25
Silicon	(0.5)
Nickel	less than 0.10
Chromium	
Molybdenum	less than 0.01

FOR ORIGINAL

This image shows a highly textured surface, likely the cover or endpaper of an old book. The texture is characterized by a dense, irregular pattern of small, dark, and somewhat elongated shapes, possibly fibers or ink splatters, set against a lighter, mottled background. The overall appearance is grainy and aged, with some darker, more solid-looking areas interspersed among the lighter, speckled regions. The texture seems to be uniform across the entire frame, with no distinct geometric shapes or patterns other than the organic, fibrous-looking structure.

We turned the light off as quickly as possible. At this time, I saw a shadowy form above the horizon to the south. Its profile was not clearly outlined against the sky but appeared to be shaped like a partially deflated balloon with a slight dome on top. When I first saw it, it was off the ground and rising rather slowly in a vertical direction. There were two sources of light connected with the object, a white light on top and on the perimeter, a glow which was white with a trace of pink. I have no estimate of its distance from us, possibly 1-2 miles.

It continued to rise vertically with the glow moving slowly around the perimeter in a clockwise direction giving the appearance of a pinwheel. When it reached an altitude of the spinning stopped, the glow remaining fixed on the side away from us, and it then moved toward us at tremendous speed.

The light on top disappeared as it came toward us. The object did not seem to change size to any great extent as it came toward us.

[REDACTED]

ANOTHER SOVIET, WHO WAS A MEMBER OF A COMMITTEE THE USSR HAS ESTABLISHED TO INVESTIGATE UNUSUAL PHENOMENA, IN OTHER WORDS, FLYING SAUCERS, GAVE A SERIOUS TALK WHICH WAS ACTUALLY VERY HUMOROUS.

[REDACTED]

[REDACTED]

HIS APPROACH WAS, "WELL, OF COURSE, WE KNOW THERE ISN'T ANYTHING TO THIS ALLEGED PHENOMENON (FLYING SAUCERS), BUT ON THE OTHER HAND". DURING HIS TALK SHKLOVSKIY AND OTHER SOVIETS JOKED AND LAUGHED AND OBVIOUSLY DID NOT TAKE THE SPEAKER'S REMARKS SERIOUSLY.

C SHKLOVSKIY REMARKED LATER TO A US ATTENDEE THAT THE "FLYING SAUCER COMMITTEE" CONSISTS OF MANY POLITICIANS, THEORISTS, HISTORIANS AND SIMILAR TYPE PEOPLE. IT HAS LITTLE IF ANY SCIENTIFIC TALENT.

[REDACTED]

ON ONE OCCASION [REDACTED] ASKED IF THE U.S. FORECAST CENTER WAS EVER BOTHERED WITH UFO SIGHTINGS. HE EXPLAINED THAT AT ONE TIME THE [REDACTED] AND [REDACTED] IN PARTICULAR, HAD BEEN PLAGUED WITH CALLS AND QUESTIONS ABOUT UFO SIGHTINGS. HE SAID THAT

[REDACTED]

[REDACTED]

SOME OF THEIR SCIENTIFIC BALLOON FLIGHTS HAD PROMPTED SOME OF THEM. NOW, HE SAID, HE NEVER GETS THOSE CALLS ANYMORE AND HALF JOKINGLY SURMISED THAT SOMEONE MUST HAVE MADE A POLITICAL DECISION THAT THEY WERE NOT TO BE SIGHTED ANYMORE.

UNITED STATES SCIENTISTS BELIEVE THAT LOW MAGNETIC FIELD DO NOT HAVE A SERIOUS EFFECT ON ASTRONAUTS, BUT HIGH MAGNETIC FIELD, OSCILLATING MAGNETIC FIELD, AND ELECTROMAGNETIC FIELD CAN OR DO HAVE CONSIDERABLE EFFECT. THERE IS A THEORY THAT SUCH FIELD ARE CLOSELY ASSOCIATED WITH SUPERCONDUCTIVITY AT VERY LOW TEMPERATURES,

[REDACTED]

[REDACTED]

SUCH AS IN SPACE. [THIS IN TURN IS RELATED TO THE POSSIBLE PROPULSION SYSTEM OF UFOs. THERE IS A RUMOR THAT FRAGMENTS OF A POSSIBLE UFO FOUND IN BRAZIL BORE A RELATIONSHIP TO SUPERCONDUCTORS AND MAGNETOHYDRODYNAMICS.]
