

# Marilyn Gudsruk - Reliable Sandy Hook Massacre Eyewitness

Source: <https://archive.org/details/MarilynGudsruk-ReliableSandyHookMassacreEyewitness>

Most of the eyewitness accounts of the Sandy Hook shooting have been proven unreliable, or even in some cases fake. Some report two, three or even four different versions of the story, conflict with each other, or were not who they said they were.

Marilyn Gudsruk (in this video) is different, however. Notice that she clearly and methodically details her observations not once, but twice. She is perhaps the only true bystander eyewitness, with a complete view of the outside. It is also the case that she was NOT interviewed by a government controlled media outlet, was not coached, and not an actor.

Her account is also very different from all of the others. Listen very carefully to what she says, and specifically, the order and timing of what happened. If you do, you will have a very different picture of what happened there - one that will also match with the "end the life of Adam" statement recorded on police scanner radio. One that will match with the second shooter suspect observed ending up in the FRONT of a police car.
