INTRODUCTION	
INTRODUCTION	<p>For a comprehensive and detailed background on the contents of these files, please do read the article by Dilyana Gaytandzhieva from July 2017 that can also be found in the Press Articles folder.</p> <p>Additional useful information has been independently sourced and provided here along with the original releases.</p> <p>As would be expected a large number of these documents are in native Bulgarian/Azerbaijani and various correspondences in respective local European languages, although there are also many in English.</p>
OVERVIEW	
OVERVIEW	<p><i>(largely extracted from the above article):</i></p> <p>These documents implicate Silk Way Airlines, an Azerbaijani civil aircraft firm, in the movement of weapons supplies using diplomatic cover to circumvent IATA regulations regarding the transportation of dangerous goods.</p> <p>According to the International Air Transport Association (IATA) Dangerous Goods Regulations, operators, transporting dangerous goods forbidden for transportation by air by civil aircraft, must apply for exemption for transportation of dangerous goods by air.</p> <p>According to the documents, Azerbaijan's Foreign Ministry has sent instructions to its embassies in Bulgaria and many other European countries to request diplomatic clearance for Silk Way Airlines flights. The embassies sent diplomatic notes to the Foreign Ministry of the relevant country to request such exemption. The Foreign Ministry sent back a note signed by the local civil aviation authorities giving exemption for the transportation of dangerous goods.</p> <p>The requests for diplomatic clearance include information about the type and quantity of the dangerous goods – heavy weapons and ammunition.</p> <p>However, the responsible authorities of many countries (Bulgaria, Serbia, Romania, the Czech Republic, Hungary, Slovakia, Poland, Turkey, Germany, UK, Greece, etc.) have turned a blind eye and allowed diplomatic flights for the transport of tons of weapons, carried out by civil aircraft for military needs.</p>
