MOSCOW, March 17. /TASS/. The Russian army has obtained documentary evidence confirming the Pentagon was involved in

financing military biological projects in Ukraine, the chief of Russia's radiation, chemical and biological protection force, Igor Kirillov, has said.

"We believe that components of biological weapons were being created in Ukraine," Kirillov said. He demonstrated a document dated March 6, 2015 confirming "the Pentagon's direct involvement in financing military biological experiments in Ukraine."

He stressed that it was standard practice to fund US sanitary and epidemiological wellbeing projects in third countries, including those in Africa and Asia, through national health service agencies.
