Quotes from *The Real Da Vinci Code*:

“The Real Da Vinci Code . . . gives you the opportunity to open creativity’s communication channel through which sublime inspiration flows. It serves as the enabling mechanism for Divine communion, empowering prophetic vision and technological innovation. It is the cosmic Law by which super humans synchronously live in peace and potentially bliss.”

“These core creative musical tones or energies form the basis for the real Da Vinci Code”

“This knowledge is inherently empowering and Divinely transformative. It has been overlooked, even heavily suppressed, for millennia. . . . The ‘Renaissance Man’ shall overcome the Illuminati.”

“The Real Da Vinci Code is fundamental to creationistic science, healing, economic success, spiritual evolution, and planetary salvation. Its unique sounds fill the Kingdom of Heaven, and you, with Love and creative energy. Entrainment with this Matrix brings you heart-to-heart, in intimate contact, with the “Spirit of God,””

“Here are the keys to creative genius and reasons for singing them responsibly.”
“Reveals the Source Code for unleashing creative genius.”
Da Vinci’s teachers included Plato, Pythagoras, and Vitruvius, each a master of musical-mathematics, architecture, and creative language. From their research, Leonardo tapped into the core creative sounds of the universe, or the “Master Matrix.” This is called the “Kingdom of Heaven” in religious circles. This inspired Da Vinci’s creative genius, prophetic vision and “Universal Man” (Vitruvian Man) hypothesis taught in this self-development guide. The precept that the “Renaissance Man” is reachable in each of us is what Leonardo epitomized and this book proves.

The Real Da Vinci Code details the principle that language is foremost a creative technology. All languages, and the sounds of music, are based on math. English for instance, like earlier ‘sacred’ languages, has letter/number equivalents or an “alpha-numeric code.” Da Vinci is known to have written “backwords,” or encoded many manuscripts with reversed writings. He did this, according to the stunning evidence revealed for the first time herein, to compensate for the strict conditions of his time—the Dark Ages—from whence he lead the Renaissance. Today, his knowledge and this creative technology is even urgent for a planet in desperate need of visionary leaders and people, like you, engaging Spiritual Renaissance.

This accomplishment explains Da Vinci’s greatest secrets and provides simple exercises to do what he did—expand brain function and “heart–mind” connection to empower “future vision,” spark creative talents, and generate genius in the arts and sciences.

This knowledge provides the secret sacred wisdom with which to optimize success in life, rapidly fulfill personal and career goals, and spiritually engage the “grand unification” of man and nature. Herein explained is the Divinely-directed spirit of love, the free flow of energy including money, and your call to service to facilitate the greatest global transformation in history.

Your opportunity here is much like the one Bill Gates had before the beginning of Microsoft. His exclusive knowledge keyed a revolution in communications and computer science. The Real Da Vinci Code puts you on the ground floor of revolutionizing everything “on Earth as it is in Heaven.”
Did you know there really is a Da Vinci code? A secret sacred code that inspires creative genius and prophetic vision. This empowering code was missing from Dan Brown’s famous novel and movie, *The Da Vinci Code*. The fact is, these truths are so freeing that some people don’t want you to access this “Master Matrix” to creative genius what would happen to our planet?

In *The Real Da Vinci Code*, Harvard trained researcher, Dr. Leonard Horowitz, makes an unprecedented contribution. Honored by the World Organization for Natural Medicine as a “World Leading Intellectual,” the award-winning author of sixteen books has now cracked the real Da Vinci code. Exercising this knowledge can produce prosperity and a healthier destiny for you. *The Real Da Vinci Code* reveals the sacred music, creative mathematics, and Divine language empowering the Laws of physics and spirituality.

Dr. Horowitz spent more than a quarter century researching healthy human development. His recent work features the “musical-mathematics of intelligent design underlying evolution of the species.” His research into *The Real Da Vinci Code* was prompted by his discovery of a “Perfect Circle of Sound” hidden within Da Vinci’s famous Vitruvian Man drawing.

The Vitruvian Man is Da Vinci’s artistic rendering of your perfect self in universal balance and Divine communion with Heaven and Earth. This knowledge bridges all religious and cultural divides.

Besides being influenced by the Roman Catholic Church, Da Vinci’s philosophical and theological teachers were Plato, Pythagoras, and Vitruvius, each masters of musical-mathematics,
Horowitz

Objectives of this Book:

By the end of this course, you should develop:

• **Content knowledge** (an understanding of math in creative language, music, art and science and the use of simple musical-mathematics to recreate your life and fulfill your Divine destiny);

• **Structural knowledge** (an understanding of ideas advanced by Leonardo da Vinci, and his predecessors Plato and Pythagoras, pertaining to creative mathematics, related creationistic science, and the laws governing the physical world from the spiritual domain);

• **Historical context** (interpretations of the Renaissance using post-Dark Ages reflection); languages as they relate to history, math, and music;

• **Critical thinking** (appreciation of the advancement of creative “out of the box” reasoning; how human communications operate to compel miraculous manifestations “either good or bad” affecting your life and civilization's communion)

• **Technical reading** (of ancient mystery school mathematics, sacred geometrics, and related life skills);

• **Appreciation for the beauty of nature** (as sacred architecture involving simple mathematics from whence everything comes);

• **Instructional Methods and Activities** (includes daily exercises, personal processes, and fill-in-the-blank instructions; a DVD lecture presentation and recorded discussion (See: Walk on Water DVD); demonstrations [during live seminars only with use of tuning forks, musical instruments, and new technologies for a popular revolution in creative consciousness]; “Holy-Harmony CD” listening assignments; collaboration in research and product developments; reading assignments; expanding Divine–Self Evaluation, and ongoing self-examination.)
Chapter 1.

Introduction to the Real Code

Where is the code in The Da Vinci Code? You won’t find the biggest secret in the book or movie.

By definition, a code is, “a system of signals . . . or symbols used for brevity or secrecy of communication . . . ; a systematic collection of the existing laws . . . ; [and] any system of principles.”

Leonardo da Vinci was inspired by a secret, sacred, powerful code that has remained hidden until now. This book decrypts that code and explains why it has remained hidden.

The real Da Vinci code can help you express your creative genius, improve your health, and even gain wealth. What is this awesome intelligence worth? You obviously feel it is worth the cover-price of this book, but how much more?

This optimally-empowering revelation is great news if you desire to reveal your greatest good and hidden talents, and switch your success-rate into hyper drive. Pay special attention to what you are about to learn.
The Real Da Vinci Code

The code decrypted here is unlike any other. It was created by the universal Master of creation to empower and sustain everyone and everything. It is also used to administer “Divine Justice” granting what you choose consciously and subconsciously. The code is revealed herein to inspire your creative genius and the restoration, evolution, and sustenance of life on this planet.
Chapter 2.
Breaking the Code of Da Vinci

In June 2006, during a trip to South Africa, while confronted with my inability to alter the course of AIDS history, I asked our Creator for reassurance concerning my perceived insignificance. An inner voice replied saying, “You have a very important role to play in the great healing of the nations.” Then, a vision of Da Vinci’s Vitruvian Man spontaneously captured my imagination. In a flash of insight, I received this real Da Vinci code as an affirmation of the Creator’s intention to sustain His faithful.

In that instant the Creator showed me the universal technology inspiring creative genius for use in recreating our planet; solving the AIDS crisis, and every other problem confronting the world today.

The technology governing spiritual power to recreate ourselves in the image of God was included in this gift of insight. The Vitruvian Man, I realized, was a cryptograph mapping God’s core creative technology. This capability—the code—is characterized by the secret sacred principles, signals, symbols, and laws that compel creative genius.
Leonardo da Vinci was illuminate and inspired by this knowledge. History’s greatest “Renaissance Man” moved mountains in the arts and sciences because of this intelligence. His prophetic visions generated many of history’s most beautiful, brilliant, scientific, technical, and imaginative achievements. His loving labors epitomized “The Universal Man,” and his revelations had global implications for sustaining, remaking, and advancing civilization.

Due to the implications of these revelations, *The Real Da Vinci Code* is more than a book. This is a global project. This precious effort makes Da Vinci’s special intelligence and inspirational know-how available to everyone with reading ability. It calls you to do what Leonardo did as a master of metaphysics and commander of spiritual dynamics, that is, used his creative capacity to serve humanity.

This work is, therefore, dedicated to Da Vinci and to the “Renaissance Man” in you. My overall objective is to advance knowledge that can be used to dramatically improve life on Earth.

When I was only 8-years-old, I decided adults needed urgent redirection (beginning with my parents). This book provides the simplest, most advanced, advice I can offer.
The Real Da Vinci Code

I have earned several academic degrees, contributed many scientific publications, wrote 15 published books and produced dozens of DVDs and CDs over the past twenty years. (See: www.DrLenHorowitz.com) The Real Da Vinci Code compiles much of this knowledge and research. Most importantly, in 1998, I wrote Healing Codes for the Biological Apocalypse prompted by Dr. Joseph Puleo. He instructed me to began decrypting codes in music, mathematics, and languages.

More important than my academic training, however, is the critical direction I received for this project from the spiritual realm. There are forces in nature equally available to you that I gratefully, and humbly, acknowledge and conclude represents a Divine hand in this loving project.

I proclaim a Divine hand in this direction partly to test your discernment. More important than what I believe is what you receive. As you read this book, check if you perceive the “fruit” of this labor as savory and sweet as it applies to your life.

Nearly five thousand years ago master Masons applied this code to design and build some of the world’s most amazing architectural wonders, includ-
The Real Da Vinci Code

ing the Great Pyramid of Giza. Temples were similarly constructed according to this sacred knowledge of mathematics, music, and spiritually-conductive design. The dimensions of King Solomon’s Temple in the Holy Land were calculated according to this code. The Bible records these dimensions evidencing this code’s application. Suffice it to say Leonardo da Vinci was not the first to acquire this Divine technology.

By understanding the Da Vinci code, you are presented with a Divine invitation for spiritual evolution, universal unification, and planetary salvation.
Chapter 3.
Your Required Investment

To assimilate this extraordinary metaphysically-empowering information, and have it work for you, you will need to make a reasonable investment of your own time and money. You will learn why this is necessary—including the mathematical mechanism behind this—in the pages ahead.

Simply recognizing the sanctity of this knowledge compels a responsible investment, and there is no need to fear, your investments in this opportunity will be rewarded.

Likewise, by sharing this most powerful creative technology with you, my investment in you shall be rewarded. The Law you will learn about demands an equitable return on our investments in each other.

In ancient times, priests never asked to be paid for their wisdom or services since they operated according to the Divine Law of tithing. People benefited from their counsel and simply donated a reasonable portion of their “first fruit”—the best of their harvest, livestock, or wealth. In return people were spiritually blessed and physically sustained.

This is not always practiced in today’s world although the Law continues in the spiritual realm.
This project engages the Creator’s realm of spirit and provides general access to it. Thus, creatively operating here demands continuous “giving back” or “paying it forward.” That is, for you to regain and maintain the real Da Vinci code’s miraculous enabling power you will need to contribute, perhaps more than you ever have, to our ministry affiliates.

Consensus among Bible scholars holds that nine (9) percent of first fruits will satisfy a tithe. To proceed enabled by the spiritually-empowering, life-changing, metaphysical revelations contained herein you must feel comfortable about tithing simply nine (9) percent. You also need to feel favorable about receiving, and following, higher spiritual direction. This investment, and program, forms far more than a partnership with me as your guide. This “magical-mystery tour” will continue to bear fruit multiplied for many others served by our investments because this rule of multiplication is established by Law.

You are about to consider this Law in the pages ahead. Miracles manifest in compliance with this system of justice. Alternatively, the Law will prohibit your further progress, and optimal success, if you fail your test, that is, you fail to invest your heart, time, and nine percent. This is an exacting Law that is certified by science and ancient scripture.
It’s obviously wise to put your heart and time into important projects. But, why is only nine percent of your “first fruit”—increased income—demanded here?

Here is your answer:

You will undoubtedly increase your creative output and, if you intend, generate more wealth by applying this creative knowledge and technology in your life and career. The Provider of this knowledge has contracted to multiply your return on this investment. This serves everyone, including the Source of this blessing who wishes to sustain you, and other kindred spirits, in joy and prosperity. This is administered using the fundamental mathematics discussed herein; energizing dynamics upon which this successful partnership can continue. This Law is certified by both Old and New Testaments in the Bible as well as modern, and ancient mystery school, teachings.

In other words, there is a historically-proven Levitical covenant and wealth building dynamic that requires the tithe. I am the Levite appointed to remind you of this and advance this math and planet-wide project.
A convenient way to think about this was suggested by John D. Hendricks in his book *Prosperity God’s Way*. “People seem to have no problem as to how God set up life to provide for man,” Hendricks, a minister, wrote. “You can sow a few thousand seeds and they will grow into millions more, like a cornfield. . . . No one has difficulty believing and conceiving farming. Yet it seems to be difficult for people to believe that when they give of their finances, God will do the same thing, but He does.”

Jesus’s adversary turned apostle, Paul, wrote in II Corinthians 9:6-8, “But this I say, He that sows sparingly shall reap also sparingly; and he that sows bountifully shall reap also bountifully.” Every man according to the purpose in his heart, should give; “not grudgingly, or of necessity: for God loveth a cheerful giver. And God is able to make all grace abound toward you; that ye, always having all sufficiency in all things, may abound to every good work.”

The Real Da Vinci Code is, indeed, one such good work. So rejoice expecting the greatest blessings
from it. Minister Hendricks concludes, “When you abundantly share properly, it gives God the freedom, the legal right, to move for you in this world.”

You are about to learn how and why this happens—the precise mathematics and scientific understanding underlying this truth. *The Real Da Vinci Code* reveals how the universe works to affect this and all spiritual dynamics, including all metaphysics. All of this is a result of giving and receiving. These two seemingly opposite verbs, this code explains, are really the same.
Dan Brown developed the popular, highly controversial, novel from which a thrilling film was made. Both book and movie featured glimpses of Leonardo da Vinci’s magnificent art and mysterious life. More than 25 million copies of *The Da Vinci Code*, in 44 languages, have been circulated to date; all revealing virtually nothing about the real code that made the “Renaissance Man” a creative genius.

In fact, the only use of a mathematical code in *The Da Vinci Code* came near the beginning of the book. “Princesse Sophie” rejected Fibonacci’s series of numbers—1, 1, 2, 3, 5, 8, 13, 21. She claimed it as “meaningless” to her investigation of her grandfather’s murder.

In addition, “The Vitruvian Man” is only fleetingly mentioned in *The Da Vinci Code*. It presented a personal message to the heroin of the book to recruit her engagement in an investigation of secret-societies, one of which was protecting her.

Based on the unifying truths revealed herein, the controversy sparked by *The Da Vinci Code* centering
on Jesus’s alleged offspring, and the sacred feminine suppression by organized religion, may be seen as symptomatic of the deeper “grand pathology”—ignorance of this code. In health science this illness is labeled a “social scatoma.” The widespread myopic disorder results in estrangement of humans from our Divine family. This spiritually-incapacitating imposition of organized religion and sovereignty-assailing governments yields superficial chronically-divisive debates, even wars, inconsistent with the unifying technology heralded here.
Leonardo da Vinci was incredibly prophetic and precisely visionary primarily as a result of having received a “Master Code” for applied wisdom. This code had been passed down through the ages. Da Vinci’s heroes, Plato and Pythagoras, were privy to it. “The Lost Temple Code” or “Genius Code” demystifies the Creator’s primary laws of creation. It advances the world’s most powerful creationistic technology. The real Da Vinci code is the Source Code for enlightenment, unleashing human genius, and the creative power to manifest miracles in the real world.

As a result of obtaining this knowledge, the “Renaissance Man” habitually encoded his research notes and wrote backwards! Why? Not simply for secrecy, although this has been alleged by many scholars. He wrote “backwards” because of his knowledge of the creative dynamics of language, its underlying polarity or mirrored mathematics, and the impact of balancing left/right brain function.

To be optimally creative, intuitive, and resourceful with your greatest creative talents, you need to balance, integrate, and develop both hemispheres of your brain. Your left brain is more rational and sci-
entific. Your right brain is considered more imaginative and intuitive. Developing and integrating both sides of your brain, so that they both work together, is central to learning creative language, processing information, and this gift of wisdom that you are about to receive for life mastery.

In fact, everything in the universe is based on math. This includes the creative power of language. Language is math because sound is electromagnetic frequencies, and that is math. Language and sounds are heard because they vibrate at certain rates called Hertz frequencies, or cycles per second. Your brain perceives these energized vibrations, this math, much like your ears hear music from vibrations. Your brain interprets these messages according to your programming, that is, your neurology (nervous system) and memory circuits formed from life experiences. Much like 1950s or 60s music triggers memories for those who lived them, the ancient math presented here can trigger knowledge or wisdom from times long gone and also forthcoming. The future vision is due to the proven concept of space/time relativity, which is also based on simple mathematics and laws of physics you are about to consider.
So math, as you will increasingly integrate in this interactive program, is the basis of everything including Da Vinci’s genius and prophetic vision.

The Magic of Math in Language

Each letter of the alphabet carries a certain frequency of sound or energy. That is, a certain set of mathematical vibrations—cycles per second—underlies communication in all languages. This is expressed in numbers for each letter. So there is an alpha-numeric, that is, letter/number basis for all languages and verbal communications that your brain interprets for better or worse.

According to sound-science (acoustics and linguistics) scholars, a language’s alpha-numeric, and ability to affect human consciousness, are two characteristics of sacred languages such as ancient Babylonian, Hebrew, and Sancrit.

Da Vinci studied the musical-mathematical teachings of architectural masters including Pythagoras, Plato and Vitruvius. He learned about ancient sacred languages and their encoded alpha-numeric. He applied these during work and play in the process of expanding his brain to access the mathematical Matrix of space/time. This is detailed in Chapter 14.

From his study and practice, “The Renaissance Man”
was able to access the creative power available in the Matrix—also called the “Kingdom of Heaven” in the religious world. All of this is exquisitely represented in his famous drawings, especially “The Vitruvian Man” which will be discussed at length later.

To support this thesis, I quote from expert Graham Point’s outstanding research report, “Philosophy and Science of Music in Ancient Greece: Predecessors of Pythagoras and their Contribution,” published in *Nexus Network Journal* (vol. 6, no. 1; 2004). This source is a peer-reviewed scholarly periodical delving into the mathematics of music, other creative arts, and the sciences. Non-technical readers can simply skip ahead trusting what I am saying is true regarding the relationship math maintains with language, and everything else, including what you are about to experience:

“[T]he Pythagorean vision of the living cosmos—or Plato’s ‘World Soul’—has reappeared in new vitalist theories, . . . The modern world-view and its vast astronomical time-frame have changed our conception of humanity itself, . . . The integers 6, 8, 9 and 12 are the smallest whole numbers with which the symmetrical system of interlocking ratios—the natural framework of the ancient and modern diatonic scales—can be expressed. . . . Plato characterized the good man as “living 729 times more pleasantly, and the tyrant more painfully by this same interval” (Republic 587e), . . .
The Real Da Vinci Code

(Plato’s model here, incidentally, is both musical and geometrical); 729 decodes to 9 as you will soon learn.)

“Similarly [Ernest] McClain decoded many other musical allegories and discovered the meaning of some incredibly large numbers in Babylonian, Egyptian, Hindu, Greek, and Hebrew texts. In The Pythagorean Plato, he applied the same method to Plato’s numerology and produced a simple, consistent and comprehensive explanation of allegorical texts that had defeated five hundred years of classical scholarship. . . .

“The key to Plato’s musico-political analogies is here revealed for the first time, . . . with a whole gamut of harmonic terms resonating through the European languages [Spitzer 1963].”

In other words, math, music, and language go hand in hand with everything from politics to profits.

As strange as this may seem, civilizations are built on the musical-mathematics of language. More strange than this, some Western languages, such as English, have been alpha-numerically reversed. This was not so for ancient sacred languages.

Given this knowledge, to reverse his mixed mathematical messaging affecting brain function, Da Vinci wrote backwards, or “backwords.”

While the rest of humanity struggled for survival in the Dark Ages, Da Vinci mathematically exercised
both hemispheres of his brain to develop his super-human creative talents.

He wrote aryawand, correctly interpreting and differentiating his “back-words” from his “fore-words.” He made it a game. With this heart for fun and fundamentals—this balanced orientation, expanded mathematical mind, and super-charged neurology—he gained superior intuitive reception, prophetic vision, and many masterful skills.

You can and may do this too, given this simple know-how and routine practice.
Chapter 6.
Important Da Vinci Definitions

To cement this language lesson in your mind consider these definitions. According to historians, Da Vinci was a master of “polymath,” “polyhistor,” and “mathema.”

“Polymath” sources from the Greek word “polys,” meaning “much,” or great in quantity; and “mathese” meaning learning. So a person who excels in multiple fields, particularly both arts and sciences, also called “Renaissance Man,” is a master of polymath. Da Vinci is seen as the epitome of the “Renaissance Man.” He was a master of polymath.

“Polyhistor” is a synonym for “Polymath.” In fact, Histor and Math mean the same: “knowledge, learn, or learned.” Histor implies erudition and wisdom. Erudition (derived from Medieval English and Latin) means “the scholarly achievement from instruction and reading followed by assimilation and contemplation that efface all rudeness; smoothes-away all the raw and untrained incivility. It is the depth, polish, and breadth that is applied to education.”

The word “education,” derives from the Latin word *educare* which means to “lead out” from within,
and extract yourself from ignorance and limitations based on lacking know-how.

The word “history,” or histor-e, with “e” the symbol for energy, implies knowledge of energy and the mathematics fundamental to energetics. Both of these are timeless, eternal, and fundamental to everything.

“Philomath” means “a lover of learning.” Plato and Aristotle defined “mathema” as relative to “disciplina,” or discipline; “doctrina,” learning the fundamental laws governing everything; and “cognitio,” or cognition or understanding of the universe and the fundamental mathematical basis for the cosmos. These philosophers, and their many disciples, considered “mathema” in terms of education; which included “arithmetic, geometry, astronomy, and music.”

Relative to the above definitions and understandings, Leonardo da Vinci is quoted as saying: “There is no certainty where one cannot apply any of the mathematical sciences.”

Universal certainty, divine/human unity, and co-creativity is established by math. The road to finding oneself, including your highest qualities and greatest creative potentials, is paved by mystery school math.
The Real Da Vinci Code

You are about to learn the secret sacred principles, signals, symbols, and laws that shall set you free, like Da Vinci, to have, do, and be all that you are able and destined to be.

EXERCISES:

1) Complete the figure on the next page to introduce yourself to ancient mystery-school mathematics from which many modern languages have evolved.

2) Read the following reversed message. If you need help, use a mirror:

The end of shadow-governors control is chosen. Millennia of malicious manipulation nears termination. Servants of injustice shall perish. The Matrix dictates earthly renewal.

3) Consider the Fibonacci Series of numbers in The Da Vinci Code: 1 1 2 3 5 8 13 21. Add all these numbers and what do you get for “completion”?
<table>

Fill in the blanks reducing each double digit to the Pythagorean single digit integer.
4) A major event occurs in the Bible in Revelation 14:1. Look this up and answer the following questions:

a. The Lamb stands on what? Do you recognize this name from *The Da Vinci Code*?

b. What number of people sing for “completion” in the End Times?

c. Where is the “Father’s name” written? Why here?

d. In Rev. 14:2 the “voice from heaven” is as the voice of many what?

5) Sound/math energy placed in water is fundamental to creation. Go online to http://www.liveh2o.org to collaborate in recreating our world.
6) Advanced students should read the following message and answer the question it poses:

In ancient times buildings were designed and constructed by master Masons schooled in the math you are learning here. They measured all assignments using cut reeds. The standard measuring reed was trimmed to precisely 6 cubits and 1 handbreath called a great cubit. A standard cubit was 6 handbreaths; again, 7 handbreaths for a great cubit. So the measuring reed measured 6x7=42 handbreaths. Converted to modern measures a full reed was 12 feet 6 inches.

Typically Bible constructions, such as the ancient temples and Noah’s Ark, were designed respecting these special numbers. Using the information above and Bible verse building descriptions, determine these three numbers now. What are these numbers?
In 1998, *Healing Codes for the Biological Apocalypse* began inspiring musicians and mathematicians worldwide. The book was prompted by the Bible code revelations advanced by Dr. Joseph Puleo. “Joey” relayed how mathematics, the most precise language, is “God’s language” because it always speaks the truth.

I later learned that the Hebrew language, as well as English ְָּּ, held a spiritual relationship with the Creator. In fact, all “sacred languages” have been mathematically designed to advance creative consciousness and Divine spirituality.

To prove this little-known point, and develop your left-brain/right-brain balance as Da Vinci did, Dr. Puleo first advised me to take the English alphabet and number each letter. For example, A=1, B=2, C=3, and so on, as seen in Table 2. Notice, when the two digit numbers are reduced to their single digit numbers, as routinely performed in mystery-school math, this results in a pattern of 1 thru 9, 1 thru 9, and 1 thru 8.
Table 2. Derivation of English Letter Number Code

Table shows the English alphabet and its equivalent numbers. Two or more digit numbers are reduced to single digit numbers to employ the Pythagorean skein and determine the mathematical “truth.” Notice that numbers one through nine repeat; and the number 8, the universal sign for “infinity,” is also the total for “Trust,” “Faith” and “God.” The number nine (9) represents completion. Excerpted from Walk on Water published by Tetrahedron, LLC.

Column of multiples of eights (8) deciphered according to the Pythagorean skein in which all integers are reduced to single digits using addition of each digit in the whole number. Example: 208=2+0+8=10; then 10=1+0=1. This number is associated with the letter A. When A=1 is added to the reverse alphabet letter Z=8, the sum is 9. The number nine (9) implies completion and results everytime the forward and backward English alphanumerics (i.e., letter-numbers) are added together.
In mystery school, Pythagoras taught there are only 9 numbers in the universe: 1–9; with 9 symbolizing “completion.” 10 is really 1 + 0, which is 1. The 0s symbolize nothing, or everything, as you will soon learn. The zeros transcend the ancient, “more correct” numbering system.

After these realizations, Joey performed a mathematical translation on the words “TRUST,” “FAITH,” and “GOD.” You would be wise to do the same.

For “TRUST,” T=20 + R=18 + U=21, + S=19 + T=20 totals 98. Then he again used the ancient mathematical method of reducing each number to a single digit. So 9+8=17; then finally, 1+7=8.

The same sum total of “8” occurs with the words “FAITH” and “GOD.”

For “FAITH,” F=6, A=1, I=9, T=20, and H=8 totals 44. And 4+4=8.

For “GOD,” G=7, O=15, and D=4 totals 26. And again 2+6=8.

Astonishingly, with FAITH, TRUST, and GOD you get “8” when you reduce each letter first, then add their total according to the Pythagorean skein (pronounced “ski–in”).
Eight (8) is the sign of infinity, that is, “Yah’s (God’s) number.” It is also the number for oxygen in the periodic table of elements. Interesting because the Hebrew name for God means “to breathe is to exist.” Fascinating also because to animate Adam, humanity’s first born, the Creator is said to have “breathed into his nostrils the breath of life; and man became a living soul.” (Genesis 2:7) That is, he breathed the math of “8” into him. Element 8 carries the core energy for Divine unity and spiritual transformation along with physical materialization—the miracle of sustaining and creating life as a living soul or spirit.

Thus, you can also think of the term “respiration,” as “re-spiritualization” for re-spiritualizing yourself with every important, virtually sacred, breath.

As previously quoted, Plato’s “world soul” emphasized “8” along with the 3, 6, and 9 number set as special in musical-mathematics and creative science.

Although you can’t do this with other numbers, if you superimpose the 6 and 9 atop the 3 it looks like an 8. This reflects the symbolism and sacred geometry of these numbers used to manufacture matter.

As you will later learn, the total Matrix of the Creator’s math produces the same architecture of twin
circles, one atop the other, a figure “8”—the double toroid—or double-donut stacked shape of the universe!

So, the Creator is symbolized by 8s that include in its intelligent design the special number set—3, 6, and 9. As you will soon see, these numbers serve as portals to the Divine or spiritual realm that includes the Totality of everything infinitely. That’s also why the infinity sign—∞—uses a 90° rotated 8 or two unified circles—oo.

Soon you will learn that at the core of creation are the 528 and 639 Hertz frequencies that resolve to the numbers 6 and 9, respectively. These tones are “MI,” for miracles, and “FA,” for family. Brought together, the “Miracle Family” of numbers create the symbol “69” widely known as the “yin” and “yang” energies of the universe; the male and female counterparts to everything; or the grand polarity of the cosmos.

Merging these polarities as shown in Figure 2 (pg. 71) yields the symbol “8” once again, the infinity sign—God’s number. In Times Roman font, this merged “69” symbol also produces the hurricane icon—the powerful spiraling force of Nature. Likewise, in Walk on Water, I reprinted NASA photo-
graphs showing the obvious merging of the symbols “6” and “9” to form the spiraling structure of galaxies. Thus, this symbolism and math is being expressed everywhere on Earth as it is in Heaven.

The “MIracle 6” number starts at the top and spirals down to rejoin the creative stroke below. Likewise, the number 9, indicating completion, spirals up from Earth to the heavens to rejoin itself in the “Circle of Life.”

These, along with many other revelations, convinced me that math, language, and all of life is based on secret sacred geometry and that there is a metaphysics of language that is also based on mathematics.

I realized that the encoded electromagnetic frequencies of sound in sacred languages relay spiritual messages between people and between people and God as well.

Just for your information God’s abbreviated Hebrew name is “Yah,” short for “Yod-Hey-Vov-Hey.” Again, this means “to breath is to exist,” and implies the importance of element number 8, oxygen.

Add the two most important creative elements—element number one, hydrogen, to element number eight oxygen and you form, according to ancient al-
chemy and Pythagorean math, 1 plus 8 equals 9—"completion." Indeed, water is required to complete creation. The combination of hydrogen and oxygen in the hydroxyl radical OH\(^{-}\) is the chief carrier and balancer of positive and negative charges in electrochemistry and biology. This, more than anything, balances pH fundamental to life.

Recall from the Book of Genesis that in the beginning of creation there was God, the Word, and Water. All three are sacred, yet the masses have been led astray and forgotten the sanctity of water. Now translate these three words to numbers using the alpha-numeric code provided and what do you get? God=8, Word=6, and Water=4. Add these numbers to get 18; where 1 + 8 = 9. This is completion once again.

In fact, if you add all the numbers from the alpha-numerics of the English language: 1-9, 1-9, and 1-8, you get 9 again—completion.

Sadly, people from all religions and different cultures have lost knowledge of the sacredness of, besides water, numbers and spirituality of language. Using water as an example, what ever happened to the respect and appreciation for water as the sole creative
medium energized by the Word, or math? Re-read The Word noting the many references given to water as being essential for creating and sustaining the universe. Even the light came from mathematically energizing the “face of the waters.” (Genesis 1:2-3)

As the Bible records, everything was formed from the Creator’s word (math) affecting water. Therefore, since math is the Creator’s language, if you want to co-create with the Creator using his proven system, you may want to learn to speak His language upon the waters of the world.

There is a Buddhist holyman, Rinpoche, currently traveling around the world blessing water and praying for the lakes, rivers, and oceans. Earth’s survival may depend on many more of us doing the same.

You may use your normal language, like English, but is best for this Anglo-Saxon “tongue.”

Now you know the most rational explanation why da Vinci routinely wrote “backwards” and used number codes in his scientific notes and personal journals. This mathematical bilateral brain creative exercise helped him remain in communication, that is, communicative communion, with the Source of all inspiration, wisdom, and creation.
If you desire to be superhuman, expressing your creative self on par with Da Vinci, you must learn to speak the language created by the Supreme Source and Universal Master—the language of ancient mystery-school math.

**EXERCISES:**

1) Complete Table 4 below to expand your integration of the English alphabet equivalent of the Pythagorean number system.

2) Decrypt the secret number code or pattern hidden within the alpha-numerics of English. Go down the list of letters, adding its number to the alpha-numeric result before it. (This is done for the Fibonacci series). List your results in the “Total” column for a growing total. For example, A=1, B=2, C=3, D=4 and 1+2=3; 3+3=6; 6+4=10 and so on. Use the Table below for convenience to find the hidden number pattern 1-3-6-1-6-3-1 beginning and ending with 9. Notice also the numerical positions within the list that yield the 3s, 6s, and 9s. They are all in the 3, 6, 8, and 9 number set that Plato said was sacred. Finally, decipher the complete total value of the whole alphabet to its single digit. Is that completion?

3) Notice the patterns in the multiples of numbers 3, 6 and 9 in Table 5.

a. What is the pattern in the multiples of 3?
b. What is the pattern in the multiples of 6?
c. Is there a pattern in the multiples of 9?
d. If math underlies physics and metaphysics, in fact, everything, does it make sense that everything shares this fundamental creative language?
e. If these patterns present the Creator’s creative language, or technology, does it make sense to research and develop this field further with applications of sound and light—mathematical patterns measured in cycles per second such as 396Hz (the first note of the ancient original Solfeggio musical scale)—to address virtually every problem facing humanity today?

</tbody>
</table>

Notice the multiples of 3, 6 or 9 always yield a 3, 6, or 9. Multiples of 9 always yield 9—completion.
The Real Da Vinci Code
Knowing there was something sacred about the number eight (8), and knowing, according to the Bible, Yah (God) always multiplies or divides and never adds numbers, Dr. Puleo deciphered all multiples of eights reduced to their Pythagorean single digit integer beginning with $1 \times 8 = 8$; $2 \times 8 = 16$ where $1 + 6 = 7$; $3 \times 8 = 24$ where $2 + 4 = 6$; and so on as seen in Table 3 (p. 29). He then realized the multiples of 8 produced a repeating numerical countdown pattern separated by 9s beginning with 8. That is, 8, 7, 6, 5, 4, 3, 2, 1, $9$, 8, 7, 6, 5, 4, 3, 2, 1, $9$, 8, 7, 6, 5, 4, 3, 2, 1—which corresponded to the alpha-numerics of the English language backwards!

More incredibly, to prove the reversed alpha-numerical perfection of the English language, as shown in this table, if you sum the alphanumeric equivalents of the English alphabet forwards, added to backwards, the Pythagorean integer that always results is nine (9)—once again, the number associated with “completion.”

If you do the same for the Fibonacci series of numbers dismissed as “meaningless” by Princesse Sophie in *The Da Vinci Code*, you get the same “9.” Obvi-
ously this is a highly significant number which is not “meaningless.” Especially if you wish to complete Da Vinci’s course in creative mathematics for Divine attunement and spiritual development.

Number 9 symbolizes spiritual evolution, language completion, and Divine communion—moving up from Earth to the wholeness in Heaven and therein rejoining our Creator in the “Cosmic Circle.” That is absolute completion or complete absolution in the Catholic sense. This spiraling circle symbolism, and the 9 numbers needed for the grand completion, provides a clue to decrypting the real Da Vinci code. This mathematical sacred geometry will become readily apparent in Da Vinci’s “Vitruvian Man” discussed later.

For now, however, if there is something spiritually/mathematically sacred about the English language, why is it herein proven alpha-numerically backwards?

Here’s where the real villains of The Da Vinci Code make their debut.
Da Vinci lived around the time the German-descended Anglo-Saxon, and later Norman, ruling elite developed and encoded this backwards (mathematically/spiritually reversed) English language. The King James Bible was written soon after and became the number one work promoting modern English. Obviously, the aforementioned English alphanumerical code, like some of the verse numbering in the Bible, is based on mystery school mathematics. Some historians say this creative spiritual technology was acquired by Moses†, who wrote the first books of the Bible, and subsequent Levi priests, from the Egyptians and earlier the Babylonians.

As I explained in *Healing Codes for the Biological Apocalypse*, and expanded in *Walk on Water*, my Levitical ancestors translated the Torah into Greek. At that time they encoded the verse numbers in the *Book of Numbers* with the original musical scale.

The esoteric truth about these actions remained hidden from the masses until the publication of *Healing Codes for the Biological Apocalypse* and *Walk on Wa-

† See notes for hidden meaning in Moses’s name.
I concluded the keepers of this sacred knowledge maintained secrecy for two possible reasons: 1) The powerful freeing knowledge of sacred language and mathematics was hidden in an effort to manipulate the unwitting masses keeping people ignorant, and/or 2) by Divine plan, the English speaking world required a maturation period prior to embracing this revelation and mathematical/spiritual emancipation.

In either case, the English language engineers, with certain royal and secret society influence, “confused the tongues” as the Creator had done in Babylonian times. Then, God is said to have punished ego-centrists described in the Book of Genesis.

*The Da Vinci Code* dimly illuminated this spectre of secret society suppression of critical knowledge along with other politically-explosive manipulations.

Indeed, the suppression of such intelligence, and resulting social ignorance, has mathematically, metaphysically, and spiritually enslaved humanity.

Now, almost everyone is speaking misleading math that is vibrationally dissonant and distancing from their most creative intelligence, spiritual sovereignty, and shared divinity.
You are about to emerge from this darkness, be educated out of ignorance, and help discharge this mass deception. These adversities are characteristic of the Dark Ages from which Da Vinci arose to thrive amongst the world’s wealthiest Kings and most powerful religious rulers. If he could use this secret knowledge to express super-human genius—there’s hope for each of us.

It’s time to transcend the ruling cryptocracy and the world’s overbearing oligarchy.
EXERCISES:

1) Using the alpha-numeric code you just learned and integrated in the previous exercise, decipher the math, and single digit (number), for the following words:

a) Faith: ______________

b) Trust: ______________

c) God: ______________

d) Creator: ____________

d) Provider: ____________
2) Determine the numerical equivalents for the terms listed below to see why Princesse Sophie’s “meaningless” statement in *The Da Vinci Code* is not accurate.

If your results intrigue you, you may appreciate reading the pre-9/11 prophecy, *Death in the Air: Globalism, Terrorism and Toxic Warfare* (www.healthyworlddistributing.com; 1-888-508-4787). You might learn something valuable about the forces of evil profitably operating deceptively throughout the world today.

**Word Numerical Equivalents—**

a) XXX: _______________________

b) FOX: _______________________

c) XOX (As in tic-tac-toe”) __________

3) Decipher the infamous Mark-of-the-Beast, “666” to its single digit integer. What is it? State why this is not “meaningless?”
4) Look up Revelation 13:18 in the Bible and write it out below. Consider this as a hint provided about those who control the planet in these years proclaimed the “End Times.”

5) What do you need in order to count a name?

6) Look up the dimensions of important Bible constructions such as Noah’s ark, Solomon’s Temple, and Moses’s Tabernacle converting cubits to feet. (1 cubit = 12 feet 6 inches). What number set is consistently used?

7) In Revelation 14:1, how many people need to sing “a new song” before people stop fighting amongst themselves?
Additional certainty as to why Da Vinci wrote “backwards,” is apparent from an analysis of reverse speech. Divine communion with the Source of supreme inspiration happens every time an Englishman speaks in reverse. This revelation should help you view the English-speaking world as spiritually deprived.

“The English language, and speech played backwards, relays truths from the soul,” pioneering investigator of “reverse speech,” Dr. David John Oates, proclaimed on national radio. His studied segments of famous people’s speeches played backwards clearly record more than nonsense. On Coast-to-Coast radio with Art Bell, President Bill Clinton’s reverse speech clearly claimed he was a “dirty rotten snake-oil salesman.”

I investigated Dr. Oates’s theory and technology to satisfy my curiosity as a behavioral science scholar. Based on this study, and the information relayed above, I concluded, once again, that English is mathematically related to the sacred languages, but electromagnetically or spiritually backwards.
This “curse of English” reflects economics and geopolitics. The British royalty with Anglo-American banking cartel controllers manipulate most of the world’s commerce and geopolitics. This is classically called neocolonialism or globalism. This English influence is one of the main reasons humanity is morally regressing rather than civilly progressing. Competition versus collaboration, and degenerative consumption rather than sustainable production is their modus operandi.

Globalists’ preferred language is English which reads from left to right while sacred languages, such as Hebrew, read from right to left. Why? Because mind control, spiritual warfare, and population manipulation can be best affected by reversing the frequencies of sacred languages. The mathematical polarities of speech are being abused to suppress optimal brain function.

As briefly mentioned, science shows the right hemisphere of your brain is more active spiritually and intuitively. It undoubtedly shares a more peaceful co-existence with your heart. It is generally more receptive, female, and creative. On your other side, rational reasoning is processed more by your left hemisphere in your more ego-centric, largely fear-based, thought processing center.
Language is similarly divided. In adult brains, not children’s, language typically activates the left brain. Your right hemisphere engages creative and artistic domains more active in children than adults. You might say adults are deprived of natural child-like creative consciousness for this reason. It is the main reversal associated with the “original sin”—the fundamental violation of Divine direction and creative communion for the sake of tempting knowledge. Humanity’s left brain speaks while its right heart/brain yearns to sing.

Academically, the left brain serves more scientists; the right side blesses more artists. The two sides are like the “69”—mirror images of one another, or polar opposites. This partly explains the view that “men are from Mars, women are from Venus.” It also illuminates the tragedy of advancing a male-dominated patriarchal society that suppresses and abuses women. Women are the most creative and nurturing contributors to civilization. They are obviously being suppressed on a planet governed primarily by patriarchs directing us to the brink of annihilation.
The Law of Love and Prosperity

Male/female harmony must be reestablished to advance common divinity. Digressing for a moment on this controversial topic resonating throughout *The Da Vinci Code*, all relationships are based on faith and trust—mathematical “8”s. Male/female relationships are most commonly and heavily challenged by breaches of faith and trust. These occur mostly from communication breakdowns, that is, lost language and missing math.

Misunderstandings, misinterpretations, or failed communications reflect your own deficiencies; that which you haven’t owned, integrated, or mastered in your male/female balanced personality.

The universe is balanced according to mathematical patterns, as you will soon learn. This Law involves cybernetics, that is, feedback loop communications. Stressful relationships do not generally occur by chance. They require your negligence, or lacking response-ability to feedback you may not wish to receive.

The Law of the mathematical Matrix you will soon study calls these conflicts forth. Call it justice, judgment, or karma, your problems do not present
serendipitously. “Sh_t happens” for your personal development, clearing of negativity, and heart/mind healing.

In fact, through the mathematical Matrix, you attract precisely what you resist, or reap what you sow, energetically and electromagnetically. A full understanding of the real Da Vinci code proves this profound understanding very clearly.

In other words, all of your troubles in life stem from “mathematical-masochism.” You disable yourself mathematically with self-defeating socially-disruptive communications or “bad vibrations.” And these choices commonly become habits.

This problem hinges on egocentrism—thinking you are smarter than anything or anyone else. This attitude energetically (mathematically) disrupts your “communion” or connection to the Matrix, to other people, and to a higher (spiritual) Source of guidance. This truth is part of the Word and the Law. You can banish your “inner child” this way if you wish, but it will cost you much including love, joy, peace, prosperity and creativity.

Alternatively, like “The Renaissance Man” who playfully scoffed at the Church’s hypocrisy by expressing
his creativity through brilliant works of art, you can hold full faith and trust in your connection, communications, and communion within this Matrix or “Kingdom of Heaven.”

Rather than living with fear and doubt, anger and disappointment, you hold the power to choose heartfelt Love and confidence in your communion with Yah and others. It’s a matter of choice to be led by your heart, and not simply by your head, at every moment. Isn’t that right?

When you lead with your head, you are directed by life experience, past decisions, lessons learned (mostly) “the hard way,” and commonly fear. Alternatively, when you lead with your heart, you are directed by the vast universe of Love with faith in the unity of humanity living in harmony with Divinity.

As you may instinctively know, and will soon fully grasp, leading with Love relays an extraordinary mathematical frequency that bridges genetic, social, political, economic, and spiritual gaps. You’ve heard the saying, “Do what you Love and the money will come.” So does everything else according to the real Da Vinci code. Heavenly gates open and prosperity pours out when you open your heart and tune your head to this “good vibration.”
Much emphasis in the Bible is given to living with a “happy heart,” especially if you desire to be prosperous in all ways. This point is beautifully addressed by John Hendricks in *Prosperity God’s Way*. He makes it clear that “giving and receiving” are energetically the same and interchangeable terms based on careful Bible study. The phrases “abundant sharing” and “giving and receiving,” equally express “being in harmony with the principles and truths of God’s Word. This is more easily understood with the real Da Vinci code heralding man’s communion with all creation. The mathematical Matrix of the universe, and the cybernetic (feedback) energy dynamics operating in our Kingdom of Heaven, boomerangs your output.

Most importantly, to positively, powerfully, and effectively engage this closed-loop system to reap the greatest rewards, your heart must be fully and joyfully engaged. Why? Because this is how the Creator works and how you were created to co-create in joy.

Think about this. You’ve heard it said, “it is better to give than to receive.” The Creator is obviously a great example of this. You are constantly receiving what the Source is giving—the air you breathe, the water you drink, the food for life, and the energy you need...
to heal and live. This is all given with Love and joy, and in return the Creator receives Love and joy from His relatives who hold faith and trust in the relationship.

Shall we not be imitators of our glorious Creator? If “the Love you take is equal to the Love you make,” should we not be pure-hearted givers in every way? “And in this giving,” wrote Minister Hendricks, “we will be free and joy-filled, and open floodgates of receiving to ourselves.” He concludes, “This is how God set up life, and this is the way to live life.”

By getting into the groove of good-hearted, abundant, joyful sharing, you engage the Law (the math, the full frequency or clear channel) of giving and receiving. Then our joy-filled Creator, who reads the mathematical vibration of your heart and exclusively established the mathematical Matrix to harmonize with your child-like happiness, opens the floodgates of heaven and pours out abundantly for your prosperity.

Remind yourself to consistently engage the supreme Law of the universe that operates positively, mathematically, and effectively based solely on giving and receiving with heart-felt Love and happiness.
Returning to the topic of reverse speech and the spiritual dynamics of language, children are increasingly being diagnosed with dyslexia, reversing their letters and numbers. This may be occurring more commonly because of an advancing Spiritual Renaissance. In this age of increasing enlightenment, dyslexia may be viewed as nature’s attempt to rectify the unnatural retardation imposed by alpha-numerically altered/mathematically-reversed languages.

Think about this. Dyslexic children tend to be more intuitive and artistically creative. They seem to have less trouble expressing their right brains and loving hearts. Yet parents and teachers label them “learning challenged,” or “disadvantaged.” They are said to need “special education,” and are required to learn our backwards, mathematically-reversed, spiritually-stifling, socially divisive, English language. Ironically, this is called a ‘civilized society,’ with officials pledging “no child left behind.”

In review and conclusion, when the direction of reading words and articulating them in speech is mathematically reversed, as it is with English, it literally compromises your left-brain/right-brain function, spiritual connection, and optimal genius.
If you were created in the image of the Creator then your lips are also spiritually-creative instruments. This knowledge of language, and its mathematical basis, is necessary for your ascendance to a more sane reality. Live a holistic life in the heavenly domain rather than a fractured co-existence in lunacy. If you use a manner of speaking “taught by the Spirit,” as Apostle Paul prescribed in first Corinthians (2:6-16), you will “receive the things from the Spirit of God.”

Refined speech and certain tones, sounds, and music, can transmit the Creator’s loving vibrations—all math-based expressions of Divinity.

Hold this knowledge dearly and exercise its power. You will use this intelligence to solve the primary problem plaguing humanity since the “Tower of Babel”—communication. The word itself says it all. It instructs you to commune in the Divine community. In this loving family lies your Source of happiness, abundant sustenance, and creative fulfillment.
EXERCISES:

1) This week, increasingly bond with others and the Creator in the “Spirit of Love.” Consciously resolve to connect more sincerely, open-heartedly, more regularly, and joyfully, using communications that reflect your appreciation for the Divine/human family.

This week, have your lips move to express truth with more faith and trust in your loving nature. Then you will commune with the Most High and gain the inspiration and talents of singing from your soul.

2) To transcend modern madness, and regain your essence, wholeness, and heart/mind balance, you simply need to integrate the real Da Vinci code’s math which echoes the Creator’s language. Write the following simple words backwards to expand your thinking:

a) Dog : ______. “Man’s best friend.”

b) Evil : ______. Draining versus sustaining.

c) Lived : ________ . Adversary outside heaven.

d) No : ____. Limitation versus full operation.
e) Yes: ____. Visualize and speak through the ocean of creation.

f) AND: ______________. Linking everything.

g) From: ______________. Means change.

3) From now on, realize the importance of element 8, oxygen, and throw your chest out to expand your lungs and your breathe. Lead with your heart, in Love, rather than your head in fear or doubt. Practice “righteousness,” that is, “right-standingness” by modifying your body posture. Stand up and walk straighter; hold your head up and shoulders back farther, especially if you have forward head posture and/or stooped shoulders. Consciously choose to open your joy-filled loving heart. See if you can realign yourself with the universal flow of mathematical Matrix energy.

4) Read a book or magazine “backwards” in a mirror for 3, 6, or 9 minutes a day for the next 3, 6 or 9 days. Simply hold the pages in front of a mirror to practice reading backwards. In this way, your brain will engage more balanced data pro-
cessing, like Da Vinci did, opening more of your creative/intuitive/visionary intelligence.

5) This week, let mathematics speak to you from a higher dimension. For example, many people view 11:11 on a digital clock as a good sign that “all is well in unity with the One.”

Other examples abound throughout nature and various cultures. North American natives, for instance, look to numbers in nature, such as a single versus group of crows, wolves, deer, buffalo, etc., to relay messages from “The Great Spirit.” Sighting a single crow, for example, in native lore, may sound an alert to be on the lookout for danger; whereas two or more crows bade better for the traveler.

This is also academically supported, for example, in Robert Batchelor’s Stanford Univ. thesis. Here he explained:

“[S]cholars of the Renaissance thought of the production of knowledge in terms of reading the book of the world. In a realist sense, God’s signs were literally everywhere in nature, so that someone like the famous physician Paracelsus (1493-1541) could argue that “the stars in heaven must be taken
together in order that we may read the sentence in the firmament. It is like a letter that has been sent to us from a hundred miles off, and in which the writer’s mind speaks to us.”

Let Yah speak to you this week through signs and wonders in nature. Paracelsus advocated something similarly in “the doctrine of signatures,” in which he claimed sentences made from stars contain divine signatures.

Children, and parents, today envision faces and forms in clouds while in ancient times mystics experienced stars as colorful spheres of sound that communicated God’s messages.

According to Batchelor, the Creator’s signature is considered key to all of this. “[T]he signature acted as a key to God’s great post-Babel cipher. Increasingly, many began to think that the ‘key’ to the cipher was mathematics.”

You will grasp this concept more fully in Chapter 16 where you will see Yah’s signature on everything.
This week, consider yourself, your communications, and the world around you as encoded mathematics. Recognize this entire system is creative/constructive/productive, loving, and joy-filled by mathematically intelligent design. These recognitions are keys that open the heavenly floodgates to prosperity and more including the “Grand Unification” to be detailed later.

Use the space below to chronicle your experiences this week exercising the aforementioned life-skills. Document your progress and positive results here or in your journal:
Chapter 11
The Secret Sacred Spiritual Mechanics of Life

The Holy Spirit, commonly recognized by all religions, uses the dynamics and mechanics of musical–mathematics. This metaphysics inspires life. Biophysics, the energy dynamics fundamental to biology, is a brand of metaphysics. Metaphysical theories and theologies go hand-and-hand with advancing reality theories, mathematics, and the physical sciences. Transcend divisive religious dogma for a moment and cut to the core of Divine creativity.

As I shared in Walk on Water, which you are encouraged to read to fully integrate this intelligence, Russian physics scholar, Dr. Hartmut Müller, previously with the Institutes of the Russian Academy of Sciences and the Institute for Applied Mathematics of Leningrad University, now living in the United States, proved that the human spirit, energy field, or “biofield,” was entrained to a “standing gravitational force field” resonating from the periphery of the cosmos. This field of study is mostly mathematical, sometimes physical, and partly theological. It was christened “Biocosmology” by Chris King at the Department of Mathematics, at the University of Auckland, New Zealand.
Müller and co-workers showed that your body, like all biology, is mathematically generated piece by piece, or “fractally.” Mathematically you crystallize or fall apart. As an expert in space-time mathematics and physics, Müller compared biological elements to cosmic elements: planets, galaxies and particles in space. Comparing double helix DNA to “the universe as a double helix on the logarithmic line,” he concluded, “the genetic code itself is a product of the global Standing Gravitational Wave = time wave.” (See Figures 1 and 2.)

Waves flow according to mathematical law, in fact, the Law discussed herein. I have capitalized Law so that you will know this is not a lesser law. It is the Supreme Law directing everything.

Müller and colleagues detailed the existence of special “nodes” in this Law he calls the “Global [i.e., universal] Standing Gravitational Wave.” All physical elements congeal within this Matrix. From microscopic bacteria and cell parts to macrocosmic celestial bodies and galaxies, all matter crystallizes in special energy zones within this math. He noted that this fractal (or piecemeal) mathematical-precipitation of matter is based on repeating sequences of the
numbers 3, 6, and 9. This set of numbers is ener-
ggetically or spiritually special, as you have already
learned and will increasingly use. Along with
the number “8” this triad in the real Da Vinci
code of numbers opens the portal to the fourth
dimension, future vision, and the spiritual do-
main. Müller observed experimentally the place
from whence everything in the physical universe
comes.

Müller wrote of a creationistic transition toward
physical precipitation from spiritual ether—from
the “unpacked medium” of disorganized or cha-
otic free energy, the “yin,” to the “packed cluster
medium” of physical objects in space/time, the
“yang.” In scientific terms, you are about to learn
the metaphysical secrets of creationistic power;
for exercising mathematical heart-mind over mat-
ter.

Recall from Chapter 7 you considered the origins
of languages and underlying math—the Creator’s
language that animates your soul, doesn’t lie, and
knows you intimately. You exercised your right
brain by reverse reading and using creative math-
ematics—especially the 3s, 6s and 9s. Balanced
brain function, you recall, was needed for your “Grand Communion.”

In the forthcoming exercises the 3s, 6s, and 9s are shown to reflect each other and intermingle. These numbers, you will see, all derive from the “Grand O” or “Circle of Life” being evenly split.

Creation is compelled mathematically quite similarly evolving from initial unity in the whole system to individuality. The initial mathematical clustering or structuring of matter from free flowing randomly-spaced particles in space/time, Müller wrote, was forced by the mathematical Matrix he called the Grand Standing Gravitational Wave. This wave is graphically depicted in Figure 1.

Like water waves bouncing off the sides of a swimming pool, the universal wave ricochets in predictable directions. Its bend is predicated on the shifting of numbers 3, 6, and 9. Each place and time the grand wave hits the “light horizon,” or virtual cosmic wall, its refraction shifts the Pythagorean trinity—3, 6, and 9 number set (or energy portals’) positions—by a factor of “In(6).”

This relates to the information you learned about the creative power in alpha-numeric languages, Eng-
lish I used as an example. This too yielded the special 3, 6, 8, and 9 number set.

The number position of “In(6)” also relates to the Book of Genesis account of universal creation “in 6 days.”

Numbers are sacred symbols—secret messages about the “Cosmic Circle” spiraling to Earth from a spinning Heaven. “As above, so below.” According to Müller, all of this occurs along the universe’s logarithmic line as determined mathematically and experimentally. Müller and colleagues diagrammed this dynamic in Figure 1.

Figure 1 also shows double helix DNA, the sacred spiraling “blueprint of life” that is mathematically, logarithmically, and structurally correlated to the Standing Gravitational Wave.

Can you now understand more clearly why I conclude life spirals down from Heaven to Earth mathematically with DNA being a prime example. This sacred spiral of the creationistic process is generated from patterns of mathematical music. It is likewise capable of recreating life and duplicating itself, just as we now know the Creator does for consciousness and diversity.
Figure 1. Similar Structuring of DNA and Standing Universal Gravity Wave

At the transition from the unpacked medium to the packed cluster medium the reflected gravitational wave is refracted at the universe's light horizon and shifts the Müller act by the factor $\ln(6)$ on the logarithmic line. This value is identical with the shift of DNA molecules in the double helix and conforms with the maximum packing density on the logarithmic line. The monomorphic and polymorphic systems of the primary (P, M) and secondary (p, m) waves correlate with the 4 complementary bases adenine-thymine and guanine-cytosine in the DNA double helix.
Solfeggio frequencies superimposed on Müller’s standing gravitational wave. Within the In(6) wave length is secondary waves established by the numerical set of 3, 6, and 9 on the logarithmic line. This creative hydroacoustic matrix contains numbers and frequencies to direct the flow of crystallized matter; its form and function. Wave phases vary tone expressions affect everything. The dissonant frequencies 528Hz and 741Hz is known in music as the “Devil's tone.” Between 528Hz and 639Hz, the center of the “LIFEWAVE,” Love and Family vibrations predominate. Theoretically, the universe is shifting into this more harmonious phase of the wave, which might explain the Spiritual Renaissance.”
EXERCISES: the origin of number symbols:

1. Complete these exercises in the boxes below.
   
a. Draw a circle in the first box. This circle represents everything.

b. Draw “everything” again and a line cutting the circle in half from far right to left. This symbol represents divided unity--man from man; man from himself; and man from Creator.

   
   
c. Imagine the lower half of the circle, the “cup” or “challis,” pivoting in the same plane 180° to the right. The top half of the circle, the “lid” or “phallis,” stays put. Draw and identify this rudimentary waveform.

   
   
d. Rotate the lower half of figure b. 45-60° down and to the right. This rudimentary “9” symbol represents complete ascendency from Earth to the Grand Unification.
The Real Da Vinci Code

Continue exercise . . .

e. Beginning with figure b again, pivoting on the right side, move upper and lower halves 90° up and down, respectively, and remove most of the line to form a “3”—the trinity of Creator, Created and the Holy Spirit maintainer.

f. Rotate the top half of figure b 45° on its left side. This symbol represents the Divine seed spiraling down from Heaven to create sacred Earth and its divine family of inhabitants. This symbol represents the numerology of organic chemistry. The basis of life—carbon 6 and its hexagon.

g. Now invert both halves of the divided circle symbol you drew in figure b, and eliminate the center line. This “X” codes for a “6” alpha-numerically in English, and represents the false reversal and division between 2 parts of the whole—the division between male and female parts of equally Divine humanity.
h. The above “X” symbol also represents a divided unity—man from man; man from himself; and man from Creator.

This symbol also shows the feminine uplifted by the masculine—the challis or Holy Grail cup pivoting on the male phallis symbol.

2. Given the above, can you now see why the numbers 3, 6, and 9 represent a very special set?

3. Study Figure 2, and then:

a. Identify and write in a column the six Hertz frequencies of sound.
b. Examine the “male” and “female” sections of the Standing Gravitational Wave. Notice the triangulated energy structure of these segments. Did you know that the triangle is the “delta” symbol for change in physics and chemistry? What, if anything, do you need to change about your concept of masculinity or femininity based on this knowledge?

c. Find the musical staff superimposed on this wave graphic. Can you see how this mathematical wave may transmit as music?
In the last exercises above, the line that you drew bisecting the O, or $\Theta$, symbolizes division or the *illusion* of division. It is also depicts a whole note on a musical line. It makes sense that this illusion of a divided whole, a note in music, along with male/female polarity for eternity, was needed to evolve consciousness and self/other recognition. If you were the Creator intent on becoming joyfully self-aware—pleasingly and constructively self-conscious—you too would need to create the illusion of division wouldn’t you? Then you would need a code composed of symbols or signals that describe all parts of your whole, would you not?

Does the 1-9 numbering system provide this?

I need it does. Everything evolves from the whole or Holy unity symbolized by the circle. The false division, a straight line, represents the shortest distance between two points—Yah and man. All other numbers derive from this illusion of division as shown in the symbols you just drew. Even the basic structures within the numbers “5” and “7” derive from this same symbol set missing or repeating a part of two.

To reinforce this lesson, besides knowing you derive your existence from math, or Yah’s language,
an additional way to become self aware, to “know thyself” or become conscious about yourself, is to reflect from a second vantage point—through another person’s eyes—or looking at your reflection in a mirror. Distinguishing positive from negative, right from left, male from female, develops this advantage or vantage point. After all, if everything was always positive, then negative would disappear (putting a lot of profiteers out of business). This understanding is basic to metaphysics 101.

So the Creator’s only intelligent choice was to divide his creative Self into positive and negative, plus or minus, male versus female, yin and yang, etc. Only then could Yah remain joyfully and universally Self-conscious.

This is why wise men throughout the ages have always prescribed self knowledge. “Know thyself!” Because if you maintained optimal self-knowledge as Yah knows Himself, you would be positively and infinitely self-conscious at the level of the grand mathematical Matrix. That is, with enlightened awareness you would playfully commune, sing and dance, with the musical–mathematical Oneness of space/time and the cosmic community. This would place you home in the Kingdom of Heaven, appreciating the
surrounding beauty being created every moment; with none of the mad mentality.

In essence, you’d be free to flow in your life with the unified field of creative possibilities—free to choose your life and be at cause instead of being or becoming a victim of negative circumstances.

If, and when, you created anything negative in your life you would know you did so. You would immediately forgive yourself for all self-inflicted injury you chose. Any other choice would be nonsensical or plainly insane.

So it’s your choice to acquire a good life versus traumatic, be productive rather than wasteful, and pleased versus pained. Whatever you choose, you do so based on the aforementioned math.

Therefore, the first smart decision you need to make is whether you choose to acquire a joyful relationship with the math Maker by communing in the Matrix. You will learn more about this Matrix in the coming pages.

Finally, this information also helps explain why “men are from Mars, and women are from Venus.” The opposite sexes require one another to model and mirror their missing virtues. You need the opposite sex to develop self-consciousness; to see yourself in
The Real Da Vinci Code

the mirror of love versus fear. Isn’t that a fact, albeit frustrating for most people?

How much longer must you suffer in your relationships before realizing you’re choosing madness over bliss? Why not choose to attract allies not adversaries? We evolved from the Dark Ages. People need to view these “wholes” in their mirrors. It’s time to transform ourselves in the image of Yah.
The Real Da Vinci Code
Chapter 12
Genetically Speaking Truth

Genetics, like all matter, represents the physical crystallization of energized math. The intelligence for genetic construction flows freely and lawfully from the Matrix with mathematical precision like a broadcasting station transmits a radio or television signal. Your stream of consciousness or enlightenment flows the same way with frequencies of sound (Hz) and wavelengths of light (nm) called phonons and photons, respectively. The sacred resonating geometry of DNA, and its related force-fields, affecting and connecting you with everything in the universe, I documented in detail in DNA: Pirates of the Sacred Spiral.

A consensus of Bible scholars and space/time physicists is now forming. Astrophysicists agree that the mathematics of sound affects water, both present throughout space. In fact, sound and water are two fundamental requirements for the creation of matter. This combination of musical-mathematics affecting water miraculously manifests everything.

Most fascinating to me is that the In(6) wave phase, or complete sine wave cycle of universal creation, corresponds to the mathematics and harmonics of
the original Solfeggio musical scale. These musical
tones—mathematical frequencies—were encoded by
my Levitical ancestors in the Bible’s Book of Num-
bers. In the book, *Healing Codes for the Biological
Apocalypse*, these creative frequencies were revealed
for the first time in nearly 3,000 years. This revela-
tion has come to benefit humanity. As will be shown
shortly, this musical-mathematics, sung from the
depths of the cosmic ocean, creates the Standing
Gravitational Wave, Love, and all matter. You in-
cluded!

The book *Walk on Water* explains how and why
this ancient musical scale, and advancing new mu-
sic based on it, will be used to affect a complete
turnaround in the governing versus stewarding our
planet. In Christian theology, this is prophesied with
the gathering of “New Song” singers, 144,000—
1+4+4=9—completion! (Rev. 14:1.)

This knowledge predicts a paradigm shift from our
current predominating physical focus, linear intel-
lect, fear-based consciousness, and devilish addic-
tions, to a spiritual transcendence of deficiencies,
imbalances, and inadequacies. You are being given
a chance (choice) to evolve with unlimited creative
capacity, including miraculous material manifesta-
tions, to revolutionize civilization. All of this is what
Da Vinci foresaw and heralded with his works of art and science, particularly The Vitruvian Man.

Just to make sure you can trust what you are reading here, consider what Da Vinci’s mentors, Plato and Pythagoras, had to say on this subject of musical-mathematics and its social implications. Read the next section, but don’t skip the written exercise before it.

EXERCISES:

If the Creator of life used math as His/Her creative technology, you would expect to see evidence of this math in the code for life called DNA. These exercises provide this proof as to why the basic building block of life—genetics—is encoded in the shape of a spiraling double helix.

1. Using the circle provided in the space below, write the numbers 1 - 9 isometrically, that is, evenly spaced, next to and outside your circle beginning at the top with 9. Your final numbered circle should be like the one shown on page 124 herein (but don’t fill in the design yet).
2. Next, fill in the blanks in the number series below to determine the secret mathematical sequence underlying the code for life. Beginning with the number one, double each number and decipher each number down to the Pythagorian single digit integer. (Example: $2 \times 8 = 16$, where $1+6=7$.)

$1, 2, 4, __, 7, __, 1, __, 4, ____, 7, 5, __, 2, __, __, 7, ____.$
3. Now, using the circle you numbered, connect the numbers from the code of life you just identified in the order of their pattern. Your final drawing should be similar to Figure 8 on page 115.

4. This number sequence continues to infinity and is called the “infinity pattern.” Can you see the double winged “infinity pattern” shape created by this mathematical sequence? Yes or No?

5. Can you see the absence of the 3s, 6s and 9s in this “infinity pattern”? Yes or No?

6. On the circle, connect the 3, 6, and 9. Can you see this set of numbers maintains a unique triangular geometry or “trinity pattern,” distinct from the “infinity pattern”? Yes or No?

7. The 3s, 6s, and 9s, and their triangularity in space/time, theoretically opens “portals” or “doorways” to higher dimensions, higher consciousness, or holy spiritual domains from whence Divine creative energies can be relied upon to flow. Matter precipitates or manifests from spirit through this portal system. Can you see the resemblance of the double-winged “infinity pattern” you drew and each segment of DNA? (See Figure 10 on page 124.)
8. In *Walk on Water* and *DNA: Pirates of the Sacred Spiral*, I proposed that DNA operates like an antennae to Yah. Can you now see how this truth is based on simple mathematics?

9. This week, as you travel, see if you can determine the geometry of the antennae used to broadcast cell phone communications. What is this structure? Why do you think this structure is used for wireless communications more than any other geometric form?

10. Through Philomath—the Love of learning and applying this Matrix math—can you now comprehend how Da Vinci might have been able to connect with a Divine Source of intelligence—mathematically-charged pure creativity generally considered foreign and mysterious to humanity?

Answer “Yes” to all of the above questions before proceeding, since these simple understandings are fundamental to your ability to commune (or entrain), like Da Vinci, with the Heavenly Matrix.
Chapter 13
monochord Mathematics
and the Macro/Microcosm

According to historians, a musical instrument called the monochord played a harmonious role in architecture, politics, and philosophies upon which civilizations have been built including our own. Among his dying words, Pythagoras is reported to have recommended monochord instruction to his disciples. Plato is believed to have done the same in his addendum to his Laws, called the Epinomis. This instrument, it is said, holds the keys to understanding the workings of the universe.

The title, Epinomis, references the most important or highest value numbers. It is the only work in the entire body of Plato’s productions that specifically addresses the importance of harmonic mathematics and mathematical ratios.

According to expert Graham Point, “the harmonic analogia or tuning module of 6:8::9:12 [Epinomis 991a-b],” is centrally important. “Analogia means, ‘equality of ratios’ or ‘proportion,’” The word shares similar roots with the terms analysis, logic, and analogy or similarity. Point wrote, “the analogia is the module or system of whole-number ratios that gives
the ‘divisions of the monochord,’ the precise points at which the vibrating string can be stopped with a movable bridge, to sound the ‘fixed’ or fundamental intervals of the musical scale, the octave (2:1); the fifth (3:2); the fourth (3:4); and the major tone (8:9). [Once again, t]he integers 6, 8, 9, and 12 are the smallest whole numbers with which the symmetrical system of interlocking ratios—the natural framework of the ancient and modern diatonic scales—can be expressed.” The exercise you completed in the last section reflects this “symmetrical system of interlocking ratios.”

As already mentioned, the whole note in music is written as an oval. It looks like a zero on its side. When in the middle of a line of music it looks just like a circle cut in half like the drawing you created in Chapter 11, exercise 1b. To reiterate, this symbol obviously gave rise to the 3, 6, 8, and 9 set of special creative numbers. The oval or circle also relayed the concept that the universe is composed of two equal and opposite parts—an “equality of [male and female] interlocking ratios.” This was symbolized by the phallus and challis halves of the equally-divided circle.
Symbolically then, the zero (0) cut in half, like the eight (8), relays the concept of there always being two halves to one wholeness or unity. The cut, or middle dividing line, (like Ø) represents the fact that opposites are really part of the same circle, or monochord.

This circle represents the alpha and the omega (the beginning and the end) that our Creator characterizes Himself as being to Moses in the Book of Exodus. In a circle, the beginning is also the end. This relates energetically to the concept mentioned in Chapter 3 that giving, or tithing, is the same as receiving. The seeming opposites are interdependent operating cybernetically or energetically looped by a spinning circular monochord.

Here is another way of contemplating this universal freeing truth. Polarity exists for everything, and everything and nothing are really the same. How so?

If you were everything, like the Creator that manifests into all creation, then there would be nothing else. So everything and nothing are like opposite sides of the same coin. If one side disappears so must the other. Likewise, if one side manifests, so must the other.
The aforementioned duality and polarity relates to the circular monochord as well. This circular instrument, according to authorities, played into existence the basis for all experience and existence.

In Ernest McClain’s analysis of The Pythagorean Plato (1978) his introduction discussed the fundamentals of tuning, and the circular application of the monochord string was featured. I suggest you consider this along with the importance of tuning into the “Circle of Life.” If you were to commune with the frequencies of the monochord, how might this affect your health, well-being, and prosperity?

“As above so below.” If the cosmos springs from a sacred circle of sound, the monochord, Heaven must present musically to Earthlings.

McClain explained that the monochord tones can be graphed geometrically, or circularly. This idea of graphing sound, laying specific tones out on a circular line, is precisely what I did as early as 2000, when I first conceived of the “Perfect Circle of Sound” presented below. Later, I developed the “3E™” based on this knowledge that you are encouraged to study and apply.

The implications of this knowledge are broadly transformational. Taken to the next level, McClain’s
text examined seven of Plato’s numerical allegories as they relate to his theories of music underlying politics, empowered governors, and governments. It has been reported that the governmental constitutions of Athens, Callipolis, Atlantis, and Magnesia, according to McClain, corresponded to four different tuning systems, or musical “temperaments.”

This may seem irrelevant, but I assure you it’s important if you have any interest in transforming global politics and disharmonious governments into something more sensible.

Linking musical-mathematics to civilizations past and present, Point examined the “Predecessors of Pythagoras” in relation to architecture, especially focused on temple art. He noted “their connection with science and music.” In the “grandest monuments that man has built in imitation of the heavenly order,” monochord musical-mathematics is apparent.

Joseph Campbell reviewed five millennia of cultural development. He showed temple designs consistently included traditional mandalas of the circle and square—ancient symbols of Heaven and Earth. This graphic encryption of the ancient monochord is likewise displayed in many of the world’s financial and governing capitals, including London, Paris and
Energy grid, called Lay lines, throughout the Northern hemisphere is graphed showing the Western world’s major financial and governing capitals including London, Paris, Rome, Cairo/Jerusalem, New York, Boston, Philadelphia, Washington D.C., and Atlanta share nearly the same Lay line! This monochord apparently resonates each precise harmonic location to express optimal economic and political power.
Because if its self-symmetry and use of the Golden Proportion, as shown in Figure 14 the pentagram contains within itself the seed of its own replication in progressively smaller or larger scales. Today this is called fractal geometry. It is the governing template of nature that is also expressed economically and geopolitically throughout the world.

Historically, archaeologists discovered pentagrams on Mesopotamian potsherds dating back to 3500 BC. Pentagrams appear in art from ancient Egypt, Greece, and Rome. Reference to the pentagram in Christian writings stems from Hildegard of Bingen. The twelfth century Benedictine nun perceived the pentagram, as Da Vinci did in creating The Vitruvian Man, as the central symbol of the micro/macrocosm, reflecting Earth in the Divine plan according to the Creator’s image. Hildegard wrote the pentagram metaphorically represented human nature with five obvious senses – sight, smell, taste, touch, and hearing; and five extremities – two arms, two legs, and a head. And, because humans were made in the Creator’s image, she viewed the pentagram as a sacred geometric godly symbol. Christians later saw the pentagram as depicting the five wounds of Christ and, because of this, the symbol was believed to guard against evil. Earlier, Hebrew scholars linked the Pentateuch, the first five books of the Bible, to the pentagram.

Geopolitically, as shown above, the planet’s Lay lines provide an energetic template within which pentagonal fractals, like puzzle pieces, fit.
together to complete the global grid. Here, a finger points to the precise construction, and orientation, of America’s “Pentagon”—the center of the world’s military might—in Washington DC as fitting the global grid. The Pentagon’s pentagonal grid points precisely to the White House.

One anonymous analyst of this sacred pentagon grid wrote his concerns about this extension of Washington’s pentagon grid and White House “onto the dodeca Planet.” He wrote of troubling geomantic magnetic forces that could affect emotions and mental functions. He predicted if left unchecked, this power would control the geomantic “body politic.”

Numerous investigators have critically analyzed the lay-of-the-land and architecture in America’s capitol. It is strikingly Masonic in design including the precise locations of Washington’s famous monuments. The city’s heredity interweaves little known European and Native American esoterics, wisdom, and traditions. The Capitol Mall design, for instance, incorporates a great circle with a cross representing more than the four elements. The Capitol Building, the White House, the Lincoln Memorial, the Washington Monument, and other featured monuments are laid out like an “X”.

These graphics prove secret planners used Metatron’s cube (shown top right), containing the “Tree of Life,” to design D.C. with 11 of 13 major monuments falling precisely on the global grid.

Shown here is some of the raw unpublished research of Michael Mackay, a veteran cryptologist decoding the sacred seal and imagery of American currency and coins. His work demonstrates the precise application of sacred knowledge herein explained pertaining to the mathematics of creativity and the alpha-numerics of language. Few people realize that Masonic symbols and architectures adorn every angle of American currency, front and back. Mackay’s example is the back side of the common quarter. It is alphaneumically and geometrically decrypted. Notice the eagle—a Roman symbol for strength in the feminine principle of the pentagram. Its head is slightly off center as are the words above its wings. This is done to encode the double pentagon of the two-headed eagle crest of Russia–Roman royalty into the American coin with the points spelling “MASON.” It’s slight left leaning implies political orientation. Mackay deciphered this by using the alphaneumeric code revealed herein. This anagram yields the numbers 18 or 81. Confirm this for yourself. This quarter design geometrically emulates the precise angles (degrees) of the Knights Templar shield with two swords as shown lower-right. The swords create a cross inside the Knights’ Black Cross Pattée. (The Knights were “Double Crossed” by the Catholic Church.) These crosses also symbolize the union of Divine male and female elements in all directions. The double pentagram anagram shown above also decrypts to the “Son of[ f] man (Christ) Nos (knows).” The Latin word anagram in the Templar shield also codes for Genesis and renewal through knowledge of Judeo-Christian faith. For more on Mackay’s research see “References & Notes” at the end of this book.
Washington, D.C. Da Vinci’s Vitruvian Man also displays this as will be analyzed later.

Additional evidence of the importance and application of this circular geometry in government and finance is found in the research of Michael Mackay, an independent investigator.

Figure 3 provides a crude view of planet Earth seen from outer space above the North Pole. Mackay graphed the energy grid, called Lay lines, throughout the Northern hemisphere. Astonishingly, the Western world’s major financial and governing capitals including London, Paris, Rome, Cairo/Jerusalem, New York City, Boston, Philadelphia, Washington D.C., and Atlanta share nearly the same Lay line! This is obviously a monochord, harmonically resonating in each precise location, to express optimal economic and political clout and generate massive wealth for the keepers of this secret sacred creative knowledge.

Now you can begin to fathom the ramifications of this discovery, its political implications, and its revolutionary opportunity we hold to level the playing field for creative control over planet Earth, including financial control.

Near the beginning of this book, I informed you this knowledge demands a high level of responsibility. I said it would challenge your personal collaborative
integrity. Now that you have a more complete picture, are you still interested in teaming up to advance our planet’s redirection? It does not appear to be an intelligent option to remain ignorant, fearful, and thus part of the planet’s main problem—ignorance of this truth that can set everyone free.

Use Da Vinci as your model. What did he do with his knowledge? He advanced a new view of the world. He shared his knowledge and creativity to the best of his ability, and his work has lasted the test of time.

You are about to receive substantial proof that the real Da Vinci code is your ticket to freedom—the master method for recreating yourself and our planet. Drawing on “the image of Yah,” this path accords with the one Law, one Word, and only one way that makes rational sense. It offers a proven way to command the forces of nature to serve constructively, lovingly, and sustainably, rather than destructively, fearfully, and terminally. This option respects, rather than abuses, the mathematical Matrix and musical monochord.

The potential offered here, as well as the plan, is depicted and encrypted in Leonardo’s Vitruvian Man. The drawing, few realize, is a cryptograph—a secret map of the monochord for biological tuning.
and spiritually awakening of the “Universal Man.” It incorporates both circle and square, bridging Heaven and Earth, through the monochord nodes—the notes of the “Perfect Circle of Sound.”

This is the only reasonable analysis of this art as per Da Vinci’s, and his mentors’, writings and these recent revelations. This art offers Da Vinci’s technical direction for advancing, not merely heralding, “The Universal Man.” By understanding, honoring, and applying this knowledge, access to the Matrix — the Kingdom of Heaven— is available to you and everyone called to gather more meaning in life.

The Matrix is the secret sacred musical-mathematics of universal construction. The monochord plays the music of the Matrix. The Matrix is reflected in the Lay lines of this planet, our architecture; even our currency. Its tonal mechanics and geometrics will be revealed to you. By helping to spread this knowledge the world may regain its Divinity.

Look at how other civilizations and scholars applied this knowledge to spark your future vision.

Joseph Campbell observed that the hieroglyphic for ancient Egyptian towns was a St. Andrew’s cross inscribed in a circle. It has arms, like Da Vinci’s Vitruvian Man, pointing outward “to the minor direc-

Horowitz

98
tions.” Campbell discussed the relevance of these symbols to the rise of the ancient city-state (c.3500-2500BC):”

…The whole city now (not simply the temple area) is conceived as an imitation on earth of the celestial order -- a sociological middle cosmos, or mesocosm, between the macrocosm of the universe and the microcosm of the individual, making visible their essential form: with the king in the center (either as sun or as moon, according to the local cult) and an organization of the walled city, in the manner of a mandala, about the central sanctum of the palace and the ziggurat; and with a mathematically structured calendar, furthermore, to regulate the seasons of the city’s life according to the passages of the sun and moon among the stars; as well as a highly developed system of ritual arts, including an art of rendering audible to human ears the harmony of the visible celestial spheres. It is at this moment that the art of writing first appears in the world...[Campbell 1990, 151-2]. [Point 2004]

Can you imagine living during the time Campbell described? Consider yourself at the forefront of this prompt transformation in communications—written works and words created for the first time from sacred sounds, symbols, and math. Imagine serving a similar evolutionary purpose today with this new knowledge you are gaining. Can you grasp this opportunity for creative innovation? Are you ready, willing, and able to make a social contribution for civilization’s Divine resurrection?
Graham Point, in his book *Transforming Total Art*, similarly summarized these implications for evolving humanity. These “connections with the old tradition,” he said, are all “symptomatic of a new era in the history of thought when mechanistic and reductionist paradigms are giving way to a holistic and organic world-view. This emergent rationality is fundamentally ecological and its impact is being felt from metaphysics to everyday manners. The new paradigms of the Age of Ecology are already transforming the professions, sciences, arts, academic disciplines, and human enterprises generally—from the minute study of bird-song and insect music to the utopian vision of planet Earth designed and managed as a single, organic Gesamtkunstwerk (i.e., community enterprise).[Point 1997]

“Decades ago, de Chardin realized that central to this new understanding of the world is the concept of the ‘Biosphere,’ which is the very antithesis of Newton’s mechanistic universe.[Teilhard de Chardin 1955] Likewise, the English geneticist Rupert Sheldrake presented his notion of Nature occurring as a result of ‘morphic resonance.’”

Based on the Pythagorean tradition, the real Da Vinci code revealed here manifests like “frozen music” into the architecture of nature, politics and civilization.
“How else are we to explain Vitruvius’s frequent references to music?” Point rhetorically asked. “If the ancient priests, sages, and philosophers were able to discern musical proportions in the heavenly systems, would they not have naturally encoded them in their earthly imitations—just as their predecessors imitated the dance of the stars?”

Answering his own question, Point concluded, “a discordance between the macrocosm and the microcosm seems unthinkable . . .” [Point 2004]

**EXERCISES:**

1) Think of three projects that will bring you additional wealth that integrate this knowledge.

2) If you can’t think of three, then practice communing in the Matrix with your most trusted spiritual guide(s). With heartfelt loving intent decree or claim your possession of how you can use this new knowledge for profitable human service without fear or attachment to any outcome. In other words, shut off your head and open your heart-mind. Then your calls with be affirmatively answer communing in the Matrix the exercise of red.
3) Continue exercising your heart-mind by recalling the symbolism presented in the 3s, 6s, 8s, and 9s. Daily contemplate the polarity/unity duality in: addresses, license plates, hotel room numbers, prices of items, etc. Recall often the hidden meanings of mathematical symbols; particularly the zero.

Remember, these seemingly meaningless exercises actually serve to connect your heart-mind to the ancient symbols and freeing truths that reinforce your connection to the Matrix. This will help you develop right-brain consciousness. Increasingly, you will be thinking with your heart as your head gets a deserved vacation.

4) What are your “repeating numbers.” List one or more numbers you see most often that may represent a sign, signal, symbol, or message from your spiritual guide(s) or Creator.
Chapter 14
Da Vinci’s Time Travel Technology

Truth has a way of surfacing or resurfacing. I have seen this time and time again during my past quarter-century as a health science investigator.

On the other hand, I have observed numerous times astonishing scientific revelations and major breakthroughs disappeared from the public’s view almost immediately; lost to obscurity. I do not perceive this as idiosyncratic, or simply chance. There are methods of mass-mediated mind-control being used. Left brains, mind-egos, are being manipulated for politics and profits. These methods of psychological warfare stifle the heart-mind. Counter-intelligence propaganda and disinformation condemns humanity to ignorance and virtual slavery. Half truths, if not complete lies, are told for optimal oligarchy control of geopolitics and global economics.

The book and movie, The Da Vinci Code, is a prime example of this subtle art of deception. The title begs the question, “Where is the code in The Da Vinci Code?” The ploy leaves people ignorant and divided. Is this result accidental in a media-manipulated world wherein global industrialists strive for this “divide-and-conquer” outcome? Popular dependence on products such as fuel and drugs is best accomplished with half truths and complete lies.
I am not saying Dan Brown is guilty of anything except writing an interesting and controversial novel. The same for Ron Howard and his film. If their prime purpose was to draw popular attention to Da Vinci’s esoteric art and secret society geopolitics then they were successful. Far more is needed, however, to raise awareness that Da Vinci’s genius and artistic expressions involved a secret code essential for humanity’s emancipation from geopolitical manipulations and spiritual damnation.

The mass media has an important educational role to play according to the Declaration of Independence and U.S. Constitution. To maintain a balance of powers in government now heavily influenced by industry, it is the media’s responsibility, along with every American’s duty, to protest and defend against socially-destructive abuses of power including a deceptive press.

Chief among methods of public deception and killing a legitimate story is its coverage by one or more of the supermarket tabloids. Mixed among these publications’ facts are obvious absurdities. The ridiculous sensationalism functions to discredit reputable books, films, scientists and research discoveries that might otherwise establish widespread publicity, credibility and thus contribute greatly to educate society. Such is the case regarding Leonardo da Vinci’s alleged capacity to “time travel.”
As reported in The Sun, July 17, 2006, “Da Vinci was a time traveler.” Allegedly, following 15-years of studying Da Vinci’s notebooks, Vatican archivist Monsignor Bruno Pantaleone, reported on Da Vinci’s capacity to “describe life in the 20th century in great detail.” He concluded Da Vinci’s skill was due to the fact that “he had seen it with his own eyes.”

The Sun noted that one of Da Vinci’s notebooks held scientific information about a method for reversing the flow of time. “Following this is a list of inventions underneath the heading: ‘Useful for the advancement of this species, culled from their own future timeline in accordance with our standard protocols.’”

Da Vinci’s “descriptions of twentieth century life,” included “. . . the development of antibiotics, the Holocaust, the atomic bombing of Japan and the American political system, with special mention of Nixon’s resignation . . . ,” the Sun mentioned.

Pantaleone analyzed Da Vinci’s notebooks for “clues to two remaining mysteries: what method Leonardo da Vinci used to travel through time, and where he came from originally. Neither certainty was determined.

“‘The level of knowledge, insight and compassion contained in his notebooks are beyond human,’ Pantaleone declare[d]. ‘Perhaps, when he refers to ‘our standard protocols,’ it means that he was from an
advanced alien race watching over us, or perhaps he was simply a miraculous genius sent by . . . God.”

A third possibility, not mentioned, is that the “standard protocols” pertain to the controversial Protocols of the Elders of Sion, believed to have been leaked by one or more leaders of the House of Rothschild in the Prieure du Sion, credited in the forematter of *The Da Vinci Code* as implicated in the world’s ongoing turmoil along with the radical Catholic sect Opis Dei, whose New York address is 243 Lexington Avenue. What a coincidence—a 9!

Whether this report, or Da Vinci’s ability to “time-travel,” is factual or not, The Renaissance Man’s ability, “standard protocol,” and technology for prophetic vision would have depended on the science advanced by Müller in time/space physics, and its underlying musical-mathematics. Given that Da Vinci was a master of polyhistor and philomath, Pantaleone’s thesis is temptingly credible.

Consciousness is humanity’s greatest frontier. Given substantial evidence of intuition, premonition, extrasensory perception, and “remote viewing,” it is highly likely that Da Vinci was not space-vehicle-bound when he observed “with his own eyes” the future. Proper balanced brain function, placid cognition, and mathematical-Matrix-connection best explains Da Vinci’s astonishing future-vision and prophetic accomplishments.
I have added this section for you to realize that anything and everything is possible with the actual mathematical code Da Vinci used. Though this has been historically suppressed, it is presented below for your consideration, integration, personal mastery, and planetary contribution.

EXERCISES:

Use the Internet to perform this next exercise. Go to http://www.3epower.us. After studying this website, fill in the following blanks to complete the mathematics (and Hertz frequencies of sound) that comprise the “Perfect Circle of Sound” and Heavenly Matrix. To do this, simply complete the sequence of numbers placed in the hundreds, tens and ones blank below.

For people without web access, peruse the 3E™ diagram on the next page, or the cross section of double helix DNA in Figure 14:

1 7 4, 2 8 5, __ 9 __, 4 __ __, __ 2 __, 6 __ __, 7 __ 1, 8 __ __, 9 6 3.

Next, lay these numbers out isometrically, that is, evenly spaced, on the circle provided on the next page. Start at the top with the number 396 (the first tone of the ancient scale).

Finally, connect the triads, that is, draw straight lines between the three similar numbers to form the sacred geometrics of this two dimensional “Perfect Circle of Sound.”
The 3E™ Evolutionary Energy Enhancer

monochord Technology for Spiritual Ascension
In *Walk on Water*, I explained the power of sound (including words and music) to create everything. My reason for suggesting you study this is the same as what Jesus (actually named YahShuah) intended when he said, “But seek ye first the Kingdom of God, and His righteousness; and all these things shall be added unto you.” If you want to have an abundant and fruitful life you will heed this counsel.

Communing with the Matrix is akin to entering the Kingdom of Heaven where there is nothing missing or broken. Everything is ordered here according to the Creator’s mathematical Law. Standing right in this, that is “righteousness,” creates miraculous manifestations since thee is “nothing missing or broken in the Kingdom of Heaven.” Here, everything is possible and readily provided including great wisdom, wealth, creative talents, and health.

This dynamic human ability of communion with the Divine Matrix, through and from which the generally-recognized Holy Spirit flows, is also fundamental to baptisms, particularly wet ones. Water, after all, is now widely known to be a “living” carrier of consciousness thanks to repeated demonstrations and research by Dr. Masaru Emoto. As viewed on the
The Real Da Vinci Code

3E™ website (www.3epower.us), in Figures 15 thru 17, and far more persuasively in Dr. Emoto’s amazing books, (See: www.healthyworlddistributing.com) water molecules comprise a creative fluid that responds to positive prayers and loving intent. Water is brewing with creative, sustaining, and rejuvenating power.

If you don’t believe this, simply consider some facts: Why do you feel so much better after bathing, showering, or a swim in the ocean? The fact is, you are being baptized, or spiritually-energized, by simple emersions in water because the sacred geometry of this liquid energetically relays the musical-mathematics you are learning here—nature’s harmonics and balance.

Since you are mostly water, and so is the universe, you resonate with the larger body of water. The universe carries hidden “messages from water,” especially Love. Its awesome force compels entrainment with this Law. Thus, you feel refreshed and spiritually blessed from water emersions.

This sacred, secreted, creative knowledge, along with the following mathematical revelations, will trigger your inspirational ideas and technological inventions as you increasingly integrate these symbols, numbers, and fundamental truths. Thus, as a philomath student you can master polymath like Da Vinci.
Central to this amazing opportunity for expanding your creativity is the breakthrough in mathematical understanding conceived by Marko Rodin. From my view, the mathematical dynamics of the universe, musically unfolding within a sea of possibilities set in motion by a grand Standing Gravitational Wave, can be most readily appreciated by studying the wave-like patterns in Rodin’s math as shown in figures 6-8.

Rodin’s math proves the nine core creative frequencies of the universe. Rodin independently discovered the original musical frequencies, without knowing it, in his master mathematical Matrix shown in Figure 6.

These specific number wave patterns, Rodin realized, touch every part of reality from black holes to blood cells. All matter, in other words, displays this “signature of God” or math-in-motion at a most fundamental level.

Though you may not perceive material moving at the atomic level, everything is vibrating. The math underlying this movement has been generally dis-

The matrix extends infinitely in both directions.
The word *pattern* derives from the word “paternal.” It means from the seed of the Father. Here, Rodin’s math and the patterns he revealed evidences Divine math providing the seed of creation. Mathematicians and physicists who have studied Rodin’s work say it provides the basis for revolutionizing energy industries, including the production of free, renewable, non-polluting energy tapping the natural spin-power of the universe. See: www.rodinaerodynamics.org for more details.
regarded, even suppressed throughout the world for millennia. Heralding it now holds the greatest hope for planetary survival. This truth is both spiritually and petrochemically freeing.

As the photograph of Rodin’s patterns depict, he began to develop this Matrix by simply observing patterns in math. Carefully examine Rodin’s math that applies Pythagorean simplicity. Using this system, make sure you memorize this most important pattern:

Doubling numbers, beginning with one, the pattern 1, 2, 4, 8, 7, 5 is generated infinitely (i.e., 1+1=2; 2+2=4; 4+4=8; 8+8=16 where 1+6=7; 16+16=32 where 3+2=5; 32+32=64 where 6+4=10 and 1+0=1; 1+1=2, etc.).

Rodin reported this pattern is also produced in the reverse direction offering a bit of insight into the balanced math underlying nature and polarity in the universe.

In an effort to determine the precise structure of the universe Rodin used this and a few more sophisticated patterns to develop the topology of a toroid. According to Rodin’s patterns and toroid the numbers 3, 9, and 6—not present in the infinity pattern—actually create the fourth dimension.
Rodin studied several interesting mathematical patterns. Doubling numbers beginning with one (1) yields the pattern 1, 2, 4, 8, 7, 5 to infinity.

The infinity pattern depicted here provides a unidimensional template for multi-dimensional DNA. It also projects the torque and spin of the mathematical Matrix or template of the universe as shown in Figure 9. This simple discovery offers the essential mathematical formula underlying nature, balance, movement, and unity as detailed by Rodin and Haramein.\(^{25}\)

The numbers 3, 6 and 9 provide a completely distinct triangular pattern which, according to Rodin and others, presents a portal to the fourth dimension, or spiritual realm.

The infinity pattern 1, 2, 4, 8, 7, 5 diagram is structurally identical to the standing gravitational wave of the universe and, at the microscopic level, your DNA as shown in Figure 10.
By simply scanning the Matrix you can observe repeating numbers, 396, 417, 528, 639, 741, 852, 963, 174, and 285—the “Perfect Circle of Sound,” the monochord of the universe, with each Hertz frequency deciphering to 9, 3 or 6.

Rodin likens his mathematical map to “God’s fingerprint,” much like Paracelsus observed during his study of nature. This math appears in the sacred geometry of every facet of the universe. This conclusion is also completely consistent with Plato’s and Pythagoras’s esteem for the 3, 6, and 9 number set as previously mentioned.

Physicist Nassim Haramein further developed this concept after modifying Einstein’s field equations with considerations given to torque, spin, velocity, and polarity. He derived the double toroidal concept of the mathematically perfect universe, as depicted on the next page, to help explain his “Grand Unification Theory.”

The implications of these discoveries, like the universe, are limitless and stretch human comprehension. Vastly beneficial creative potential rests in the application of this knowledge to solve civilization’s greatest problems. One likelihood, most exciting to both Rodin and Haramein, is the generation of free energy to liberate humanity from petrochemical reliance, economic slavery, and environmental toxicity.
Haramein’s thesis reinforces the numerical symbolism discussed earlier—the universe forms mathematically into a spinning figure “8” composed of two polar opposite toroids. This is how and why you attract what you resist and “reap what you sow” in life. This also explains why giving is the same as receiving—“what goes around comes around,” or as Forrest Gump said, “Stupid is as stupid does.” For Haramein’s story, see: http://www.theresonanceproject.org and http://www.theresonanceproject.org/interviews/nassimbayarea.mp3
As these toroid structures indicate, the universe is constantly spinning and torquing with energy. Tapping this free-flowing potential was proven possible by Nikola Tesla. His technology was secreted by militarists and energy industrialists. Your mission, should you choose to accept it, is to disseminate this knowledge to help people like Haramein, Rodin, and Müller set humanity free from these deadly demagogues.

After corroborating Rodin’s and Haramein’s monumental works, many great minds from physics, biology, chemistry, and even computer science, have been able to resolve enigmas in their fields by understanding this unique, all encompassing, mathematical system.

In concluding this discussion on the mathematical Matrix, you should realize these core creative energies form the basis for the real Da Vinci Code. This is empirically obvious according to rational deduction from this amassed evidence. This knowledge is inherently empowering and divinely transformative. This Matrix is the enabling force behind “The Renaissance Man” and the Illuminati.

*The Real Da Vinci Code* reveals the mathematical Matrix that offers you the opportunity to operate your creative genius, and comprehend your creative destiny. It opens creativity’s communication channel
through which sublime inspiration flows. It serves humanity with the enabling mechanism for Divine communion empowering prophetic vision and technological innovation. It is the cosmic Law by which super-humans synchronously live.

Alternatively, the ignorant masses shall remain clueless. Those presented with these profound truths, and who foolishly ignore them, shall miss the blessings available here.

Leonardo da Vinci obviously communed with this creative channel. His heart-mind attuned to the relative dimensions of space/time pulling from the future revolutionary ideas and technologies. His world was also largely controlled by religious zealots and dogmatic dictators, but that didn’t stop him, nor should it slow you. Leonardo sought how to best benefit humanity through the arts and sciences using this math.

Will you use this information to enable your creative scientific, artistic, and/or technical inventions like Da Vinci did? Or will you allow your motivation to fail for some “good” reason?

By simply applying this knowledge of decrypted mathematics in your life, daily exercising its lawful power; thereby reinforcing this cosmic force of balance within you, you are destined to miraculously fulfill your unique calling. Divine achievement for
humanity’s benefit is available to you. Will you grasp this unprecedented opportunity?

EXERCISES:

1. Get into the habit of thinking like Da Vinci, and living according to the “3s, 6s, 8s, and 9s.” Pay reverence to this universal code of creation and the Creator’s mathematical musical Matrix by simply counting your actions, or routine operations. Count the number of things that you do. See if you can do them in groups of “3s, 6s, 8s, or 9s.”

For example, while brushing your teeth, count the number of times you brush each tooth section, and fix it to this number set. Use 3, 6, 8, 9, or larger harmonics like 12, 15, 17, or 18, that decipher to 3, 6, or 9. Count the number of sips or gulps you take in sequence while drinking. Stop at multiples of 3, 6, 8 or 9. Count the number of steps you take walking to your car. Recalibrate your routine operations so that you end with the miraculous mathematics of creation.

In this way, you will be walking, talking and accessing the Matrix, operating in a manner inher-
ently more creative. This, again, is based on the revelation that physical reality manifests (precipitates or crystallizes), in our three dimensional world, from the spiritual domain involving higher dimensions exclusively accessed through the monochord Matrix of the 3s, 6s, and 9s.

2. Working from right to left, fill in the blanks in the matrix below with the correct numbers.

```
 3  6  3  6  3  9  6  3  6  3  9  6  3  6  3  9  6  3  6  3
 5  2  8  5  2  8  5  2  8  5  2  5  8  5  8  5  8  5  8  5
 4  1  3  9  6  3  9  6  3  9  6  3  9  6  3  9  6  3  9  6
 2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8
 1  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4
 6  9  6  9  6  3  6  9  6  3  9  6  3  9  6  3  9  6  3  9
 8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5
 7  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4  1
 9  6  9  6  3  6  9  6  3  9  6  3  9  6  3  9  6  3  9  6
 5  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8
 7  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4
 9  6  9  6  3  6  9  6  3  9  6  3  9  6  3  9  6  3  9  6
 8  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2
 1  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4
 9  6  9  6  3  6  9  6  3  9  6  3  9  6  3  9  6  3  9  6
 8  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2
 1  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4
 9  6  9  6  3  6  9  6  3  9  6  3  9  6  3  9  6  3  9  6
 8  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2
 1  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4
 9  6  9  6  3  6  9  6  3  9  6  3  9  6  3  9  6  3  9  6
 8  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2
 1  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4  1  7  4
 9  6  9  6  3  6  9  6  3  9  6  3  9  6  3  9  6  3  9  6
 8  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2  8  5  2

```
The Real Da Vinci Code
Do not fret if you are challenged comprehending or integrating the full measure of the aforementioned. There is a ton of “food for thought” here. It is natural to need time for digestion and elimination: “out with the old and in with the new.” The great news is the mathematical Matrix of creative genius has a subtle way of sneaking up on you. One morning you’ll just wake up more musically-mathematically mature and spiritually attuned.

Now it’s time to take your next step towards achieving this goal. It’s time to explore the concept of “creative consciousness” that Da Vinci used to the max.

Have you ever wondered how certain life experiences, including synchronistic meetings and miraculous manifestations occur for some people, and not for others; or how prayed-for outcomes can happen far away in space/time as a result of heart-felt loving intent? The real Da Vinci code gives the best explanation for these occurrences.

Remember I described DNA as a virtual antennae to Yah? Figure 10 on the next page proves your DNA is vibrationally-entrained to the mathematical Matrix. Even your psycho-neurology is empowered by this supreme energy system. Your thoughts, visions, and
As seen in Figure 8, a diagram of the infinity pattern 1, 2, 4, 8, 7, 5 is structurally identical to each segment of DNA spiralling in the genetic double helix. Adjacent segments flip sides and polarities to accelerate energy flow and electrogeneric signaling. This animates you with Divine spirit. Again, this same structure appears in Figure 2 in the framework of the Standing Gravitational Wave.

So besides the PHI ratio expressing the mathematics of Divinity to humanity (and all creation) so does Rodin’s circular mathematics. This is also evident in The Vitruvian Man as you will soon learn in Chapter 22. “As above, so below.” What is true for the macrocosm, is true for the microcosm. The entire universe is perfectly patterned mathematically the same way throughout the fractal cosmos. Everything is thusly empowered, enabled, and restored exclusively by Divine mathematical design.16
imaginings are, likewise, energetically, universally, or cosmically enabled.

Here is how those synchronicities and miracles occur in the lives of people tuned into the Matrix:

Frequency transmissions from your heart/mind, as well as your lips, travel throughout the cosmos—the vast spinning figure-8-shaped universe as explained by Haramein’s “Grand Unification Theory.”

As discussed in *Walk on Water*, and you can visualize by examining Haramein’s spinning double toroid graphic in Figure 9, once in the Matrix your energized heart-felt messages acquire additional torque, spin, velocity and super-charged polarity. Like magnets they attract their opposite charge, or repel realities similarly charged all based on the Law of this math.

You get wacked when you violate the perfect resonance patterns. That is, you get what you resist and fear, and repel what you fear may be lacking. Our creator does not operate in fear; only by faith, Love and joy.

Dissonance simply attracts itself like a boomerang you throw out into the Matrix returns to wack you in the head!
There is nothing to fear, and nothing lacking or broken in the Kingdom of the Heavenly Matrix. So seek this peaceful place of mathematical perfection first. Then you can confidently attract everything you need to survive and thrive. Give every problem with prayer over to the Creator. The Matrix Mastermind knows best how to direct your destiny.

If you desire more money, create wealth as an exercise in applying this real Da Vinci code.

Consider if you resist poverty what happens? You attract more of it due to the negative energy you put out fretting. That negativity feeds the Matrix with dissonance and you get back what you put out—”stupid is as stupid does.” This is much like a computer that runs precisely on mathematically designed crystals. People unfamiliar with operating the system get frustrated with the computer rather than simply taking the time for training. “Garbage in/garbage out!”

Alternatively, you can reap massive wealth. Tithing is a great example. With faith and trust you give, or “pay it forward,” and you receive your investment back mathematically multiplied. This is why your tithe is required to make this collaboration and co-creative partnership work.
Your nine percent tithe is what I recommend. This is not too much or too little to give. It is just right, according to these mathematical revelations, the Law, and scriptural decree. In addition to supporting my ministry and colleagues for the work we do on behalf of what is good and just, it blesses you. “Not because I desire a gift: but I desire fruit that may abound to your account.” (Philippians 4:17) With your growing support, increasing wealth, and tithe, we are additionally empowered to continue this educational effort for earth’s physical salvation and people’s spiritual evolution.

Everyone will be blessed if you can internalize the justification for collaboration that this knowledge provides.

In this way, acting cooperatively and positively versus selfishly and negatively, creatively versus destructively, collaboratively versus competitively, and lovingly versus coldheartedly, intent cuts to the core of creation. Its power spins out to affect the world.

Now you know why the universe is mathematically compelled to respond to your thoughts and imagination, prayers and heart-felt pleas, effecting your creative/attractive or destructive/restrictive outcomes.
This is the technology by which the “Renaissance Man,” or the enlightened you, can either attract or repel life experiences depending on what you transmit, positive or negative.

This best explains “karmic law” or Divine justice. Spiritual judgment is administered; mathematically compelled by universal balance. Likes repel; opposites attract. Karmically, you get what you need to learn and manifest godliness. If you resist, you get into trouble.

If you are imbalanced, let’s say neurotic, you do not need more of the same pathology in your life. So you repel it by seeing the same flaw in others, rejecting them, feuding with them, getting caught up in the energy of your own imbalances; in all cases resistance to Love. This creates this problem’s persistence for you and others. You poison the well, so to speak. The end result is you get to keep, rather than transform like a caterpillar to a butterfly, what you don’t like about yourself.

Alternatively, if you are missing something, like an opposite charge, you attract it. . . . Ideal mates and partners attract one another in this way to balance each other’s strengths and weaknesses.

This process of rejecting and attracting life experiences, thus co-creating with the Matrix your reality, continues until you fill the gaps, or relieve the strain, created by
your present lacking as compared with your more complete level of creative abundance through consciousness.

In other words, you are uniquely qualified and called to fulfill your spiritual destiny. Transcend dissatisfying deficiency needs now. You have the power, and better things to do in life.

This is the most disheartening aspect of political impositions such as poverty, pestilence, dehydration, and starvation. These are affronts to humanity’s capability. The goal is to free yourself so that we free our planet from these scourges to become optimally balanced and loving.

This dynamic also helps explain YahShuah’s counsel to seek Heaven first, and how judgment occurs by every word that comes from your mouth. (Matthew 12:36) “I tell you this, on the Day of Judgment people will have to give account for every careless word they have spoken; for by your own words you will be acquitted, and by your own words you will be condemned.” Given this book’s revelations about language and creative mathematics, this counsel is very wise.

The same seems reasonable for your thoughts and imaginings since these actions are also energetically potent. During these days of spiritual awakening
and karmic hastening you can be powerful. But this doesn’t guarantee anything but trouble if your actions (which generate vibrations) don’t jibe with the math of the Matrix.

Human spirituality and creative consciousness is expanding exponentially. This is hastening for you too experientially due to this massive spiraling sound picking up velocity. Divine attunement and miraculous manifestations will occur more often for you now. This is precisely what is ongoing for a growing multitude. Those aware are getting turned on and tuned in to this process of ever-expanding fully-sustaining Love. Those not tuned to the right station just can’t hear the music.

Again, if you foolishly ignore this dynamic truth, you will not be going with the flow. You will be ignored and will not engage this co-creative opportunity. You simply reap what you sow as part of the problem or solution. It is nothing or everything when you engage this quest! It’s your choice.

Heed the advice that “the Kingdom of Heaven is [extremely] near,” and you will increasingly experience it. Choose to commune in it, reminding yourself to gratefully receive blessings from Heaven every moment. This is the meaning of Jim Morrison’s famous
Doors lyric, “Break on thru to the other side.”

The works by Müller, Rodin, and Haramein also help explain the phrase, “As above, so below.” The math in the real Da Vinci’s code is omnipresent and consistent throughout the universe—the macrocosm and the microcosm. Müller found that all celestial bodies and cell organelle, in fact, all of physical creation, share predetermined physical characteristics, intelligent design, based on this underlying code of governing mathematics—the 3s, 6s, 8s and 9s—fundamental to metaphysics. Detailed technical treatments of this important subject are available from Müller and Haramein as directed in the reference section.

Given all of the above proving the existence of this Heavenly Matrix, assessing your life status at any moment is simple. You’re either flowing with the current in peace and harmony, or treading water exhaustively trying to hold your position against a stronger current. One choice puts you at risk of drowning. The other is optimally freeing. Have you the courage and intelligence to choose wisely?
The Real Da Vinci Code
Chapter 18
Recruiting Cells for Co-creating Health

Now here’s another profound revelation. Given the macrocosmic reflection in the microcosm it is apparent that Divine intelligence must exist at every level of life.

Therefore, it is likely that each cell containing a genetic blueprint of the universe operates with equal metaphysical intelligence. Individually and as groups, your cells may be relied upon, and even recruited, to respond intelligently to disease.

Again, there is nothing missing or broken in the Matrix of Heaven’s Kingdom. So give your cells the benefit of doubt! These microscopic allies naturally know how to thrive and provide sustenance. That is, they are naturally attuned to this mathematical/spiritual input, electromagnetic force and fields vibrations. Your cells use math as co-creative stimuli to affect physiologic functions that generate miraculous healings.

Positive thinking and visualized prayers turns on the power your cells and tissues need and use for healing.
Miraculous healing is simply a dimension away in Heaven’s Matrix. Right now it is recharging your spirit-filled “temple,” your body, without you even knowing it. This is the best way to explain why sleep is so refreshing. You are naturally restored by free-flowing energy.

The Matrix also explains why people living in fear, or driven by guilt, get sick. Fear and guilt triggers the “Devil’s Tone” disharmonic (interval between the 528Hz and 714Hz frequencies of the mono-chord). These emotions tug at your heart strings and block the flow of Love required for health and longevity. Anger, sadness, and jealousy link your left-brain/ego-mind to this dissonance. Overactivity here causes nervous breakdowns. Da Vinci obviously knew this. The Vitruvian Man, you’ll notice in Figure 13, is free from appendages in this destructive interval. The “Renaissance Man” was wise enough to stop Vitruvius from reaching or treading into this domain.

The best of life, including your health, depends on your creative imagination, honest communications, and correct lawful orientation to the musical Matrix. Many Christians call this “righteousness,” that is, standing right within the Law. Others explain that all available blessings are provided free by “Divine grace.”
This wholistic paradigm, mind-body-spirit interaction with the Matrix explains psychosomatic reactions.

The Matrix potentiates creative consciousness. This best explains healing by placebo. It also explains placebo’s energetic opposite called “nocebo.” Nocebo is the disease-triggering reaction initiated by ignorant physicians. Let me explain. . . .

Most people have heard that a placebo, such as a sugar pill, recommended by someone with perceived authority, prompts healing in more than 30 percent of cases. The deadly opposite is also true for the nocebo. Simply telling a person they are chronically challenged or terminally ill can have devastating affects. As I advanced in Walk on Water, nocebo-related ailments may be commonly caused by frightfully negative disease “labels,” poor prognostications, and urgent or deadly professional proclamations. These trigger fear in patients prone to attract what they resist, and grow what they seed with fear.

Yet, people run to their M.D.s, medical deities, for “help.” Unwittingly, health professionals manipulate their patients to their detriment with disease labels.
For instance, the phrase “terminal illness” does not bode well for most people. As a nocebo, it kills nearly 30 percent of medical victims. It’s better to not get “diagnosed” than be terminally cursed. I cover this topic effectively in my DVD called “IATROGENOCIDE!”

Disease labels actually become illness generators, cofactors, or risk factors, in increasing disease and premature death. Widespread understanding of creative consciousness and free-flowing Matrix energy can help relieve this burden of doctrinal imposition on humanity. Wake up! Then pull others from this deadly deception.

Recognizing the structural mathematics empowering the bio-energetics and sacred geometrics of life, all diseases can be more conscientiously considered and addressed simply energy blockages. Professionals might then commonly inform patients of this overriding influence of energy, and address the Matrix and patients’ educational and lifestyle change needs prior to prescribing slash, burn and poison forms of “healthcare.”

Soon, people will realize how barbaric “modern medicine” is. The entire concept of intoxicating the
“body electric” with chemical “cocktails,” and conducting war against biology with risky and expensive “antibiotics” is recognizably repugnant following recognition of the awesome healing power pouring through the Matrix at every moment.

Obviously, these revelations hold profound potential for transforming the Dark Age of drug-dependence and public confusion. You stand on the threshold of paving the new paradigm with this knowledge.

EXERCISES:

List at least three unwanted circumstances, repeating patterns, or diseases in your life that you have been attracting or co-creating attitudinally and/or behaviorally.

1)  
2)  
3) 

Next, get into a relaxed and prayerful position. With heartfelt loving intent allow your imagination, or creative consciousness, to commune with
the Matrix. This is what master-meditators do when they slow brain wave activity to achieve pure being. In the Judeo-Christian sense, I am talking about opening the inner gate to allow the Holy Spirit to flow through the Kingdom of Heaven into you. Allow this vibration for restoration to bathe your cells and body parts with healing energy. Some people see, or experience, this as being bathed with the loving light of God. Others feel this state as a vibration, or hear it as an inner “wind” or sound of “rushing water.” The exercise and experience is unique for each person with general similarities.

Once you have done this to the best of your ability, prayerfully propose that any remaining disease patterns in your life or body disappear for all time.

Joyfully giving thanks, praise, and credit to the Matrix Maker helps.
Now that you know how DNA resonates with nature, you can better appreciate why I consider DNA your hardware for Divine communion. There are different types, or species, of DNA just as there are many types of computers. The real Da Vinci code, the mathematical Matrix of the universe, otherwise called the “Perfect Circle of Sound,” is like a widely distributed software program that make all these different computers and DNA species work.

Müller and his collaborators determined that everyone’s DNA is in perfect nodal resonance with universal gravity that results from the mathematical-musical Matrix.

As graphed like the pattern seen in figures 8 and 10, DNA’s structure is a direct result of the patterned spiraling Matrix of this universe’s mathematical design.

In other words, with the universe mathematically unified, lawfully ordered, precisely operating, energetically structured, and musically harmonized with your DNA, tinkering with earth’s “genetic pool” is foolish to say the least. It may be deadly for you and virtually every living creature.
From Haramein’s “Grand Unification Theory,” and sacred understanding of the Matrix—the mathematical basis of modern physics and biocosmology—comes recognition of the grossest risk of genetic engineering. The world is now threatened with the apocalypse of pan-generational genome derangements. Devolution of all species seems destined by “unnatural selection.” Genetic tinkering, you have likely heard, threatens food production everywhere. Farmers are losing their organic seed stocks from cross pollinations by unwary bees buzzing from one field to the next carrying man-made mutations.

The way out of this fix is presented here. This decrypted Da Vinci code implores rational genetic conservation for physical salvation, spiritual evolution, and Divine communion.

The evolving “New Age” or “Messianic Age” (take your pick) is only possible through widespread revelation that people’s hardware and software must be preserved with the Divine program.

In this program, Love is the great healer. To survive and thrive today you must integrate this knowledge of Love central to your mathematical/structural integrity and harmony with the universal unity. Otherwise you will die of spiritual deficiency, also known as a “broken heart.” This, along with nutritional fat poisoning, is the leading cause of heart failure.
This is commonly seen with elderly couples whereafter one spouse dies the other soon follows. There is both a heart-felt spiritual deficiency from the loss of a loved one and physical stress prompting immunological meltdown commonly underlying the “cause of death.”

According to revelations advanced here, man-made mutations oppose natural selection as dictated by the Matrix and corresponding physics including the conservation of matter and energy associated with sacred geometry. This universal Law is being broken daily, in thousands of research laboratories and medical clinics around the world. Wherever genetic bioengineering is advancing, prospects for a free and lawful world are diminishing.

As I documented in Death in the Air: Globalism, Terrorism & Toxic Warfare (June, 2001), the highly profitable genetics cartel is intimately tied to Big Pharma and directed by leading energy industrialists. These covert operators plan to control you and your wages every way possible.

In fact, this profitable bio-ethics violation of the Matrix’s natural selection and vibrational perfection risks omnicide—global genocide affecting all species.

The Law of the Matrix that empowers nature and maintains universal integrity by such Divine design
opposes genetic mutations. Simply consider what happens when you build a sand castle on a beach at low tide. Sure you can do it. You can mold this part of nature into the shape you desire. A little later what happens? The tide rushes in and washes your castle away. The strength of your castle just can’t compete with the ocean’s flow. Likewise, genetic tinkering is doomed simply because genes require the energy of the Matrix to thrive.

Müller wrote that because DNA’s wave form reflects the Standing Gravitational Wave’s form, genetic modifications are likely sending distress signals out into the universe. These virtual shock waves transmit throughout the double-toroid figure-8-shaped universe. Herein the distress signal picks up torque, spin, and velocity.

This scientific theory is now backed by knowledge of the real Da Vinci code. This code proves intelligent design. It decrees universal unity and integrity of energetic operations based on Matrix music and mathematics. This genetic aspect of the Matrix’s energy and influence demands multi-dimensional or quantum reasoning and holistic responsibility.

This view contrasts sharply with the views of most genetic “experts” serving special interest groups in Big Pharma. For them, the more castles they build the better off we are.
This new knowledge, however, challenges these myopic genetophiles. They think they can value profits ahead of people and get away with the unnatural injustice of genocide. They are in for a surprise.

There is a rising tide of consciousness rapidly cleansing this planet. Its chief objective is to save valuable resources for posterity.

Vatican researcher Pantaleone said Da Vinci exhorted Pope Leo X to use his inventions only to better humanity. “Leonardo’s final message was that although the inventions should be released by the Vatican as necessary, the knowledge of his true identity should be kept a secret until at least 2006, when the world would begin an amazing transformation.”

The 2006 “amazing transformation” Leonardo predicted is hereby determined and reconciled. Unfolding is the Spiritual Renaissance for the fulfillment of humanity’s Divine destiny. This outcome is assured like music in the scroll of history. Life is the exclusive property of the monochord Maker. This power and direction shall not be denied.

Can you see more clearly now how and why you obtained this publication? Do you sense a common urgency for man and nature? Will you use this knowledge wisely?
EXERCISES:

1) Please consider how you might use this knowledge to engage more effectively in this most exciting and challenging Spiritual Renaissance. Meditate on the possibilities of applying this knowledge. Allow yourself to be intuitively and creatively guided.

2) Familiarize yourself with the Holy Harmony CD by going online to: http://www.steamventinn.com/holy_harmony. Use the recording containing the “Perfect Circle of Sound” to help you gain your next creative step. Pray for receiving your personal direction in this regard by communing in the Matrix with heartfelt loving and thankful intent. The Source of power to gain your next step to advance important service thrives in this Matrix. Use the space provided on the next two pages to record your insights and creative direction:
Chapter 20
The Law of Entrainment

Consider this question: What compels miracles in a universe ordered mathematically?

The answer is *entrainment*.

Entrainment is defined as “boarding the train.” In this case, it is the train carrying the Spiritual Renaissance—the real “Soul Train.”

The simplest example of physical entrainment is the synchronizing of menstrual cycles among women living in the same dormitory. This involves synchronizing their physiological, hormonal/neuro-endocrine cycles. Amazing that all of this occurs naturally, directed bio-energetically; without popping pills.

If you long for a peaceful world in which people band together aboard the Peace Train, here is great hope and Divine promise. The Matrix commands musical-mathematical entrainment. With this technology humanity is being synchronized in a natural reparative movement. To board the train you simply need to make a commitment of faith, and consistently choose to honor the technology and its Supreme Source. There are zero rational alternatives in a world urgently threatened as ours now is.

Boarding begins now.
Entrainment expert Joshua Leeds best defines musical “psychoacoustic entrainment.” The process reflects your heart-mind’s adjustment to the beat of the universe. He describes this as an “important aspect of resonance . . . [that] concerns changing the rate of brain waves, breaths, or heartbeats from” chaotic and stressed to relaxing and harmonious. This is done “through exposure to external, periodic rhythms” or frequencies of sound. This is accomplished by integrating the left brain/right brain balance described earlier to augment the heart-mind, and by listening to the sacred tones identified herein.

The real Da Vinci code reveals these frequencies as those of the monochord or “Perfect Circle of Sound.” These tones resonate throughout the ethers for eternity.

We have entered the miracle millennium Da Vinci predicted. It is no accident the center of the Matrix resonates the third note of the original Solfeggio musical scale. This note is “MI”—as in “DO, RE, MI”—short for “mira gestorum” in Latin, and “miracles” in English. As detailed in DNA: Pirates of the Sacred Spiral (2005), this note is known to miraculously repair damaged DNA. As you may now gather, the genetic repair capability of this tone, and the powerful influence it has over everyone, rests assured by the Law of entrainment.

As you will soon learn, this “Love frequency,” 528 Hz, is also vitally important to the “Perfect Circle of
“Universal Entrainment,” as I prefer to call it in this context of empowering the Spiritual Renaissance, involves human psycho-emotional and physical resonance—harmonizing with the core creative frequencies or rhythms of the Matrix, akin to tuning into your Divine essence. The Love tone, 528Hz, is vitally important in this regard.

This Divine attunement is precisely what Apostle Paul prescribed in I Corinthians when he wrote the only intimate way to know God is to experience the Spirit of God.

In figures 11 and 12, I have superimposed on Da Vinci’s gift and guide to your creative genius the mathematics of the monochord Matrix and “Perfect Circle of Sound.” You can use this knowledge to accelerate your spiritual evolution and Divine entrainment.

The monochord Matrix and “Perfect Circle of Sound” provides the secret set of numbers—musical communications—broadcasting Divine communion for the enlightened masses. This is the real Da Vinci code that decrypts the full meaning of The Vitruvian Man and the human potential to live a saintly, physical transcendent, blissful life.
Leonardo da Vinci’s famous rendering of the “Universal Man” reaching and stepping “out of the box” to consciously commune with the music of the Matrix. Here the monochord of frequencies in cycles per second is superimposed on the perimeter of the cosmic circle of sound. This “Perfect Circle of Sound” vibrationally establishes physical reality including your human body. At every instant, every atom, molecule, genetic strand, and cell is being reprogrammed, energized, sustained, and entrained beyond your conscious awareness. This revolutionary knowledge brings consciousness to the Divine process of creation.
EXERCISES:

1) Using a bold pen or fine magic marker, place the numbers 1-9 in their appropriate positions adjacent the tones at the outer edge of the circle beginning with “1” put above 417Hz. Next, use a ruler to draw: 1) the infinity pattern discussed in Chapter 16 (Figure 8, page 115); and 2) a dashed-line representing the 3, 6, 9 “Trinity Pattern.” Then locate the genetic and physical reproductive center of humans. Next note the position of the umbilicus within your graphic.
2) Using your pen, marker, and ruler draw a pentagram on the graphic below. Begin with a line across Da Vinci’s drawn neck and shoulder line continuing to the two edges of the circle. Connect these two points to the base of each outer foot. Then from here, the star’s base, draw two lines to the top of the circle above Vitruvius’s head to complete the pentagram. Notice the umbilicus is at the center of the pentagon.
EXERCISES continued:

Now turn this book upside down and view the pentagram you just drew. Examine this symbol for the infamous Baphomet—the occult symbol for the devil?

According to historians, the Knights Templar were persecuted by the Church for alleged idol worship of the Baphomet featuring the head of the goat. This myth has persisted more than 600 years. Peter Underwood’s dictionary definition of Baphomet states:

“a deity worshipped by the Knights Templar, and in Black Magic as the source and creator of evil; the Satanic goat of the witches’ Sabbath and one of the names adopted by Aleister Crowley.”

According to Templar History Magazine, Templars simply see this image as representing “absorption into wisdom.” This truth, validated by these real Da Vinci code revelations, was secreted from the time King Philip of France sought to own the vast Templar wealth, and he along with Pope Clement V had the Templars captured and tortured. During these tortures they made false confessions including the disclosure that they had worshipped an idol said to be the Baphomet.

On the next page you can see that the primary symbols for the Baphomet, the goat, Freemasonry—including the compass and ruler—along with Masonry’s Grand Union Lodge of England, actually sources from this ancient truth about the mathematical-musical Matrix of the monochord and its creative sacred geometry.

The Real Da Vinci Code

Figure 12. Symbols of Royalty, Freemasonry & Occult
Chapter 21
The Vitruvian Man and the Grand Unification

The Vitruvian Man beautifully blends art and science. It was named after the 1st Century B.C. architect and Roman engineer Vitruvius.

Above all of his accomplishments, Vitruvius is known to have heralded water as the source of society and human culture. It is believed that he became Julius Caesar’s chief engineer, and following Ceasar’s death, in 44 B.C., Vitruvius helped direct the construction of the Roman aqueduct water system. His textbook De Architectura libri decem (Ten Books on Architecture) survived Classical Antiquity to heavily influence artists and engineers from the Early Renaissance forward.

Like Da Vinci, Vitruvius believed in the supreme importance of mathematics as expressed through architecture, the arts, and sciences. He believed that an architect cannot reach perfection without becoming a pure mathematician and mastering geometry, astronomy, music, and the arts.

The same can be said for you to manifest your most creative destiny.

The great Renaissance architect Leon Battista Alberti used Vitruvius’s ideas in his De re aedificatoria
Horowitz

(1452, Ten Books on Architecture), and likewise professed as Plato and Phythagoras had previously, the arts, sciences, and architecture, were all critically governed by mathematical laws and proportions.

Thus, to be supremely successful in most fields, your mastery of mathematics supersedes all else according to chief Renaissance architects including Da Vinci.

Inspired by this knowledge, Leonardo drew The Vitruvian Man. This symbol became the icon for natural living and holistic healing. As you can see, it is a simple drawing depicting “The Universal Man” with 4 arms, 4 legs, and a head—nine projections altogether extending to the edge of a square representing Earth and a circle representing Heaven and all of creation. The art projects human balance within this perfection. This is what the master genius sought as well as expressed.

Referencing Stanford University’s online analysis of this composition:

“This rendering of the Vitruvian Man, completed in 1490, is fundamentally different than others” produced by Da Vinci’s architectural and technological mentors. The circle and square image was uniquely overlaid on top of each other to form one image. Without this key adjustment, Da Vinci’s predecessors “were forced to make disproportionate appendages.”
You will note Da Vinci depicted the cosmic circle representing Heaven and the spiritual domain as a value worth pursuing from the lower earthly vibrational state.

“Leonardo’s famous drawings of the Vitruvian proportions of a man’s body first standing inscribed in a square and then with feet and arms outspread inscribed in a [heavenly] circle provides an excellent early example of the way in which his studies of proportion fuse artistic and scientific objectives.

“It is Leonardo, not Vitruvius, who points out that ‘If you open the legs so as to reduce the stature by one-fourteenth and open and raise your arms so that your middle fingers touch the line through the top of the head, know that the centre of the extremities of the outspread limbs will be the umbilicus, and the space between the legs will make an equilateral triangle’ [with its tip at the groin representing the male creative and procreative element. The female element is positioned at the center of gravity at the umbilicus. The circular spiraling umbilicus is the center point for communing with the cosmos. It conducts, like a life-line, the Matrix of heavenly music.](Accademia, Venice).

“Here Da Vinci provides one of his simplest illustrations of a shifting ‘centre of magnitude’ without a corresponding change of ‘centre of normal gravity’. This remains passing through the central line from the pit of the throat through the umbilicus and pubis between the legs. Leonardo repeatedly distinguishes these two different ‘centres’ of a body, i.e., the centers of ‘magnitude’ and ‘gravity’ (Keele 252).”
The center of gravity here at the umbilicus metaphorically projects your communion with Creator. Your lifeline of spiritual/energetic sustainance springs from the center of the Matrix to the center of your “holy temple.” This concept of rebirthing/recreating yourself at every moment through Divine communion in the womb of the Matrix with the umbilicus of sound is additionally supported by “messages” recently found in Hawaiian holy water. This sacred knowledge is detailed below with more at www.steamventinn.com/breath_of_the_earth.

“This image provides the perfect example of Leonardo’s keen interest in proportion. In addition, this picture represents a cornerstone of Leonardo’s attempts to relate man to nature. Encyclopaedia Britannica online states, “Leonardo envisaged the great picture chart of the human body he had produced through his anatomical drawings and Vitruvian Man as a cosmografia del minor mondo (cosmography of the microcosm). He believed the workings of the human body to be an analogy for the workings of the universe.” (Source: http://leonardoda-vinci.stanford.edu/submissions/clabaugh/history/leonardo)

I added emphasis in the previous quote to draw your attention to the 3, 6, and 9 triangle formed in The Vitruvian Man. As he stands, the pinnacle of the triangle is at his groin as the “center of magnitude.”
The “center of gravity” is above this representing the higher female values. Indeed, as Da Vinci well understood, this polarity of male/female biocosmography sources from the monochord/Matrix transmitting the “Perfect Circle of Sound.”

This analysis of The Vitruvian Man, even by mainstream media, scientists, architects, and historians, validates this comprehensive decryption of this most esoteric Da Vinci work. The drawing is a cryptographic “higher-self portrait” memorializing Da Vinci, his recognition of a Universal Spirit and Divine Source. The art serves to direct “The Universal Man” in you through these teachings. This code and text presents “the workings of the universe” in relation to your spiritual essence.

The above analysis of the Vitruvian Man also supports my thesis that Da Vinci’s code for mastering the mathematics of language and life heralds your capacity to commune with the Creator through the Matrix. The Vitruvian Man encrypts the fundamental mathematics and tonal dynamics required for the “Grand Unification.” Da Vinci himself demonstrated this.

Given this knowledge, you can supercharge your link to Divine Source by realizing, that is making real, your true identity in the Grand Duality, as
both creator and created. You are this mystical miracle. You came from this music and return to it. Get it? You are this music!

Your essence in Matrix music calls forth your spirit to live in harmony with the universal symphony. This certainty about the Matrix community will help you drop your false notion(s) of separation. Indeed, embrace unification. It is the premier purpose of your “Universal Man.”

The best artists, especially musicians and vocalists, flow with their music. . . . In the moment of performance they become their creations and compositions. They commune with the beauty in the spirit of Love. They entrain with their creations from their seats on the “Heavenly Throne.”
As shown in Figure 13, there is a spiraling pentagonal geometry linked to the “Perfect Circle of Sound.” This appears to lay out upon the Vitruvian Man so well it can not be an accident. His heart is centered adjacent the 528 Hz frequency of Love. His umbilicus is centered within the pentagrams and pentagons graphically depicted in Figure 13. Also, his feet that are stepping “out of the box” appear to indicate a clockwise spin, or continuous rotation, much like the ascending pentagon-producing musical scale shown in this figure. This is also true for double helix DNA viewed from its center. All of this evidences the “cosmografia del minor mondo,” that is, the grand unification Da Vinci researched and expressed.

Music is the source of the 5-pointed star (pentagram) sacred geometry in this famous drawing. The pentagram has been classically associated mathematically with the phi ratio (See: www.intent.com/sg1). The sacred secret within Da Vinci’s Vitruvian Man is reconciled with knowledge of the “Perfect Circle of Sound.” The master monochord of the Creator’s Matrix is laid out here as Leonardo’s cosmographic encryption.
The circular monochord heralded by Pythagoras, Plato, Vitruvius, Da Vinci and others engaged in mystery-school education is decrypted here in service to humanity’s psychosocial and spiritual evolution toward the “grand unification.” The goal of mystery scholars was optimal heavenly communion using this monochord. Their knowledge was based on fundamental musical-mathematics featuring the “Perfect Circle of Sound” that vibrates life and physical reality into crystalline existence. This creative impetus operates as a virtual umbilical chord spiraling electromechanically between your body and the mathematical Matrix of the universe. This Divine creative technology, this musical-mathematics, is fundamental to profound advances occurring in physics and the physical sciences. This image is a metaphor for the macrocosmic/microscopic order of the fractal universe.
The figure above results from connecting keys in the “Perfect Circle of Sound” that correspond to the ascending or descending tones matching Rodin’s mathematical infinity pattern as shown in Figure 8. This is also consistent with Phi ratio analysis. The lower figures show the sacred geometry of pentagrams that reflect the macrocosmic/microscopic order of the fractal universe.

Figure 14. Cross Section of Double Helix DNA with Double Pentagram Musical/Mathematical Energy Signatures
You will notice each of many reference lines in Da Vinci’s human figure corresponds precisely with intersections of the key musical and geometric elements—the circle, square, and spinning pentagon. These are energy nodes, much like the In(6) in which we creatures precipitate. As mentioned, Da Vinci omitted drawing human appendages between 528 Hz and 741 Hz, commonly known in music as the “Devil’s interval.” This was a choice made to direct the Divine in people versus the lower offensive character produced when humans reach for the “Devil’s tone.”

Plato and Pythagoras considered these tones and the phi ratio as sacred. Each larger or smaller section correlates with the phi (or golden) ratio raised or lowered by the whole note/number scale. That is, phi, phi², phi³, etc.

As detailed in *Healing Codes for the Biological Apocalypse*, the decrypted ancient Solfeggio—the original musical scale, holds major implications for humanity’s spiritual evolution and civilized ascension. For this reason this work has been moving musicians, mathematicians, physicists, and other researchers worldwide to investigate and integrate these findings in their creative works.
The “Perfect Circle of Sound” has been increasingly associated with profound outcomes, miracles included! To be sure, read the testimonials posted on the Internet. (See: http://www.steamventinn.com/holy_harmony) These describe people’s experiences playing or listening to these special tones. What might you expect from listening to the Creator’s music?

Recall I mentioned the third “MI” note of this “circle” transmits Love, the 528Hz frequency. It is also the central green tone coloring the botanical world. It is characterized by, or capable of, producing miracles, according to its definition in Webster’s Dictionary:

**MI–ra gestorum (Miracle)**
1. an extraordinary occurrence that surpasses all known human powers or natural forces and is ascribed to a divine or supernatural cause esp. to God. 2. a superb or surpassing example of something; wonder, marvel [1125-75]; ME <L Miraculum=Mira(Ri) to wonder at. \(fr\) (French): sighting, aiming to hold against the light. (gestorum: gesture; movements to express thought, emotion; any action, *communication*, etc. intended for effect.)

This note, along with miracle-making, warms people’s hearts. You’ve heard the phrase, “Home is where the heart is.” This tone summons us “home” through the universal umbilical chord of sound to the middle of the mathematical Matrix to commune...
with our grand Creator and naturally with each other. “MI” (pronounced “ME”) transmits near the center of the six note (original) scale, near the center of the “Perfect Circle of Sound,” and near the center of the mathematical Matrix of the universe. Zero chance an accident, Da Vinci’s Vitruvian Man, superimposed onto the “Perfect Circle of Sound,” places this note nearest this icon’s heart.

So you are even more miraculous and loving than you thought. The power and glory of miracle-making with Love and joy is resonating from the center of the universe through your heart. That’s why exercising and developing your heart-mind is so important. This connects you to the Creator and calls you to commune in the “Circle of Life” from the depths of the flowing cosmos.

These revelations help to explain Da Vinci’s deep Love for humanity as well as his Divine creativity. They prove life’s core sustaining vibration is Love according to advancing mathematics, physics, and anthropological metaphysics.

The original Solfeggio musical scale, used by Babylonian and Levite priests alike to produce miracles, apparently including three complementary keys, (i.e., 963, 174, and 285Hz) completes the “Perfect Circle of Sound.” This music supplies you with more than
your holy creative loving spirit. This melodious Matrix relays the full meaning and blessing of the Vitruvian Man. It offers direction for personal development, spiritual ascension, and optimal communion with the Source of everything.

In *Walk on Water* I credited toning expert, Jonathan Goldman, for writing and intuiting years ago, “the use of these tones . . . creates a sacred spiral that seems to encode itself as a matrix upon the cellular structure, and particularly on the DNA. I believe this is the Matrix of the ‘higher’ human—helping create an evolutionary step in our genetic encoding.” When Goldman wrote this he was unaware of the mathematical Matrix described herein.

Goldman further reported that playing these tones in ascending or descending order, “seems to have the ability to nullify any frequencies that are counter productive to our highest good. These frequencies create a blanket of Divine sounds that may counter the effects of harmful energy including bacteria and viruses.” The same might be said for all pathology, since, as YahShuah said, “There is nothing missing or broken in the Kingdom of Heaven.”

These tones characterize the wholeness and holiness of the Kingdom of Heaven. They amplify your essential resonance, and entrain your physical presence
Horowitz

to the Divine. These are the sounds of silence that broadcast eternally. These keys are inherently balancing and universally sustaining. They unlock floodgates for unprecedented restoration and healing.

It is written in Psalm 91:1, “He that dwelleth in the secret place of the Most High shall abide under the shadow of the Almighty.” This “secret place” is the Matrix in which you are well advised to dwell.

“Without making medical claims,” Goldman wrote, “these frequencies likely nullify and dissipate disharmonious energies that may be trying to establish themselves upon our physical, mental, emotional, or spiritual essences. . . . . People call this stress and disease,” as these defiant energies ultimately result in injuries and maladies.

“Behold, I give unto you power to tread on serpents and scorpions, and over all the power of the enemy: and nothing shall by any means hurt you.” (Luke 10:19)

Goldman’s assertions have been substantially supported by research. For example, the frozen water micro-crystal hexagon shown in Figure 15 was captured in the laboratory of world renowned water researcher and award-winning humanitarian, Dr. Masaru Emoto. This sacred form of structured water was resonated into this unique shape during 24-hours of
This crystal water cluster was photographed in Dr. Masaru Emoto’s Japanese laboratory. This structure developed sonically from cube-structured distilled water. The physical transformation occurred during 24 hours of exposure to the vibrations of the “Perfect Circle of Sound.”

Toning artist and sound healing expert, Jonathan Goldman, recorded the tones of the real Da Vinci code on a CD entitled Holy Harmony. He used the nine notes in ascending and descending order, directing professional vocalists using tuning forks. The sacred chant he used was the Hebrew letters of the Messiah’s name. These photographs show the central portion of this cluster is marked by sound rings made as the water froze.

This hexagon-shaped cluster is typical of harmonically energized structured water. ...........

Goldman, and numerous other musicians and vocalists worldwide are currently composing additional music for personal and planetary healing based on this knowledge of The Real Da Vinci Code.

This series of structured water photographs was also taken under the direction of Dr. Masaru Emoto. They show the effects on water structure from a 24-hour exposure to 3E™ sticker resonance. Dr. Emoto reported these structures as “very interesting,” as the first shows a well defined arch, typical of matter evolving from the Fibonacci Series, Phi ratio and Golden Mean math. Notice the sub-structures that resemble the “Infinity Pattern” in Rodin’s math and genetic substructuring.

The crystal on the right side is photographed with a highly unusual halo around it suggestive of an “aura” or associated energy field.

The third crystal cluster appears as a “cartoon-like character” with hands posed in what looks like prayer. Dr. Emoto’s legitimate thesis—that water relays messages, and responds to consciousness, including prayer and loving heart-felt intent—has been criticized by ignorant scientists and blindly-biased reporters. According to revelations in The Real Da Vinci Code, given water’s elemental mathematics (totalling 9), and sacred tetrahedron geometrics, this substance must be respectfully recognized as holding and relaying consciousness as the premier creative medium. Source: http://www.3epower.us.
exposure to the “Perfect Circle of Sound” toned and chanted under Goldman’s direction.

Listen to Goldman’s Holy Harmony CD and experience its affects for yourself, including the restructuring of your body water. This can have a profoundly positive influence on your state of mind, emotions, imaginative capacity, intuitive capability, health, healing, and genetic expression. The reason for this genetic affect is this kind of structured or “clustered” water has been scientifically determined to be responsible for most of your DNA’s electrogenetic influence. (See: DNA: Pirates of the Sacred Spiral for more details.)

More evidence is shown in the crystal structures shown in Figure 16, also photographed in Dr. Emoto’s lab. This sacred geometry was produced from cube-structured distilled water energetically affected by the “Perfect Circle of Sound” imprinted on the 3E™ “Evolutionary Energy Enhancer” sticker. (See: www.3epower.us)

These photographs help demonstrate the great potential we hold to impact the “living waters” of the world, and all of life, with technologies developed from these simple understandings. (See: http://www.liveh2o.org for more information.)

Given that your body is mostly water, these sacred
sounds can vibrate your body water, DNA, and whole person back into harmony with your purest-spiritual self. Imagine the potential for resuscitating and sustaining planet-wide positivity based on these revelations.

Dr. Emoto concludes water receives and transmits mathematical messages. In fact, the material itself makes an obvious statement about human consciousness. As a creative liquid, here before Earth’s creation (Genesis 1:2), the statement water makes about life on Earth, and creative consciousness, is expressed in its three states: solid, liquid, and gas:

Rock solid ice is like hard-headed people. They are fearfully fixed in divisive beliefs, attitudes, and positions. They don’t move very much, nor get very far in life, generally speaking. They are socially “cold.” They are considered less conscious or entirely unconscious.

Heat the water up a bit, and the ice liquifies and spreads. Flowing water avoids obstacles, and moves along paths of least resistance. It takes direction from nature to commune with its neighbors in the rivers and oceans of life. Conscious spiritually-evolving people do similarly in their inspired lives.
Add more heat, or use the “3E™” and the “Perfect Circle of Sound” to increase the vibrations of water, and your creative medium becomes more etheric or spiritual just like boiling water turns to steam.

Consciousness today, like steam, is rising and spreading. The rainwater that forms from evaporation cleanses and renews the planet. Likewise, as human awareness grows Earth shall be cleansed and renewed. All natural processes and substances, including water and creative consciousness best serve to uplift the human spirit to commune, refresh, and renew in the musical-mathematics of pure Oneness.
The Big Island of Hawaii is famous for its active volcano and powerful purgative and creative energy. Local holy-persons, Ka-hunas, say the top of Mauna Kea bears the umbilical chord to the entire universe. This is akin to The Vitruvian Man’s navel connecting to the center of the cosmos. These unique structures are part of a larger series of crystals photographed in Dr. Emoto’s lab analyzing the “Breath of the Earth™”—lava-heated steam. These crystals tell the same loving story about creation. A heart-shaped crystal holds two swords forming a “V” for the Divine feminine principle, or spiritual receptacle, like the Holy Grail cup. The swords mimic those in the Knights Templar medallion shown in Figure 5.

The crystal on the right shows a 12-pointed star with an extraordinary center. Moving from the darkness into the radiant light is a spiriling string of hexagons (the basic structure of organic chemistry and molecular biology). It appears as an umbilical cord might, connecting Heaven to Earth; from the dark formless abyss into the light center of life.

This cluster actually shows a fetus-like structure with an umbilical cord attached to its navel. Given this accumulating evidence, Dr. Emoto’s “scientific critics” should silence their objections. See http://www.steamventinn.com/breath_of_the_earth and Dr. Emoto’s website: www.masaru-emoto.net.
EXERCISES:

List at least three goals or projects in your life that might be aided by employing this new creative knowledge of the “Perfect Circle of Sound.”

1) 
2) 
3) 

Write a brief explanation of how the “Perfect Circle of Sound” might help you achieve your goals, or complete your personal project(s), to achieve greater success.
EXERCISES:
Consider the number of people in your life that might appreciate having this knowledge as a creative blessing for personal empowerment, professional success, and enhanced social service. List these people below and set a date by which you will contact them with this information:
Please recall from your earliest Bible study, that the world began when the Creator’s “word” acted on water. That is, sound frequencies based on the musical-mathematics were applied to water.

If you were created in the image of God, then your lips must also be creative instruments. For you to evolve yourself and this world with Love and Divine energy, you must, therefore, speak, sing, chant, play or otherwise apply these core creative musical tones to your creative endeavors. You might especially consider the importance of the central Love (528Hz) frequency being applied to water, just as our Creator has done since the beginning of time.

Knowledge of the real Da Vinci code and decrypted Vitruvian Man can significantly impact your life. This knowledge proves your personal stresses, psycho-emotional strains, and physical illnesses source from violating the musical-mathematics of the Matrix. Only crazy people go against this fundamental Law.

Simply summarized, all diseases and discords stem from going “out of tune” with these core creative tones. You may simply require a “tune-up” with the real Da Vinci code to remain optimally healthy,
happy, wealthy, and productive. After all, the code advanced herein offers unlimited creativity and musical-mathematical access to the Creator’s domain—the heavenly Matrix.

As you come to rely on this knowledge and its Source for your sustenance, you will become increasingly creative and resourceful.

The real Da Vinci code is fundamental to creationistic science, healing, economic success, spiritual evolution, and planetary salvation. Its unique sounds fill the Kingdom of Heaven, and you, with Love and creative energy. That is why entraining with this Matrix brings you heart-to-heart, in intimate contact, with the Spirit of God. (See: http://www.3epower.us/)

To make this technology, this Divine code, work for you, simply play with the numbers, sacred symbols, sounds, and music described herein. Test the various products and technologies advancing with this wisdom. See if you are blessed, as I have been, to increasingly integrate these sacred sounds that entrain humanity Divinely through this mathematical-musical Matrix. Then you will either perceive this fruit as sweet and nurturing or not. In the stillness of your mind, and the opening of your heart, this harvest of creative genius is increasingly available.
The root word of education is *educare*, meaning to “lead out [of ignorance] from within.” This refers to the special skills and talents each of us acquires by spiritual blessing at birth through the Divine Matrix.

How sad that today’s educational institutions are so inept in celebrating this core virtue. Their operation to indoctrinate children and adults with information that is wholistically retarding rather than spiritually freeing is stifling and intolerable. Will you help change it? If so, what might you use and recommend to replace education with educare?

The scientific evidence advanced herein proves the truest Source of your personal freedom comes spiritually “from within.”

You are a Divine offspring. By nurturing your seedlings, feeding them organically, and loving them optimally they naturally grow inspired by Heaven’s ambient music recharging Earth at every moment. Working together in this way we can free humanity’s latent talents, leadership, and creativity for sustainability.
I pray this will be our collaborative quest for the coming years. That you will join our growing “team,” and contribute to humanity’s edutainment. Contact me through www.DrLenHorowitz.com for updates, scheduled events, and to make arrangements for lectures in your area.

Now that you are aware of this most valuable creative technology, you might consider yourself on par with pioneers like Thomas Edison and Bill Gates. This knowledge, after all, creates an opportunity like Gates actualized in his garage. Microsoft’s master realized his exclusive knowledge could revolutionize computing and global communications. After integrating the information in this book, you might realize this knowledge, and technologies spun from it, can revolutionize every field of research and development. You have a greater opportunity now, than what Bill Gates had when he began Microsoft!

Using this knowledge you too can invent new products, innovative methods, revolutionary materials, and Divinely-inspired services. This information provides unlimited creative power to revolutionize everything for the benefit of everyone.

Essentially, these revelations are part of a spiritual evolution and popular revolution hastening globally—a Spiritual Renaissance. This metamorphosis for
spiritual transcendence is facilitated by entraining to the music and metaphysical math detailed herein.

You can help this revolution by applying this knowledge in practical ways, some of which have been described herein. By developing, and/or distributing, marketing, and selling this knowledge, related products, educational seminars and conference events, you can make a big positive difference promoting this revolution for health and well-being.

Read, for example, my description of the 3E™ at http://www.3epower.us. This is the simplest illustration of how this extraordinary knowledge can be applied to pioneering technologies for better health and living. Encourage your own creative imagination to flow while inventing additional beneficial product based on this knowledge. You will help everyone by doing so.

As mentioned, musicians worldwide are quickly grasping this creative opportunity. People are contributing new music, musical products and instruments, and related technologies based on the real Da Vinci code. Entrepreneurs are productively engaging this revolution now.

This book has given the world a great gift, and you, among the earliest to read it are on the “ground
floor” of an unprecedented opportunity. The financial opportunity here is huge. You can prosper with these well-kept secrets and by “giving and receiving” from it for humanity’s benefit.

The truth about the Vitruvian Man cryptograph is very beneficial and enabling. Many people perceive an urgent need for health advice, healing technologies, and knowledge to protect and sustain life. Existence being endangered, many people are desperately searching for the information to save loved-ones. The real Da Vinci code appears to be critical for this miracle.

This book is my call to you for collaboration and action. More research obviously needs to be done and many new products developed. The humanitarian scope of this project includes wealth-building. How else can we get the job done? Everything right comes with sustainability and prosperity.

The Bible foretells that in the “End Times” the “meek shall inherit the Earth and all its riches.” The word “meek” implies loving and gentle. These two adjectives characterize this project for peaceful productive revolution. Can you think of a better way than with the Creator’s technology by which loving spirit-filled people gain victorious advantage to win in the end?
This previously secreted knowledge levels the playing field in creative mastery. Together, with this proven power for good not evil, we can take control of this planet, attract massive wealth, restore public health, and cocreate sustainable industries for an eco-friendly planet. We had the “Industrial Age” and the “Computer Revolution.” Why not lead the “Matrix Generation?” If you choose to enroll in this great opportunity, let me know. I seek collaborators and partners.

If you have already received benefits from this instruction, then share it with others. You already listed their names in a previous exercise. Your sharings will expand everyone’s blessings, including your own.

Help make people aware of this book and spiritual revolution. Gain great satisfaction, and even earn extra income, with this wonderful provision. Profit by filling our “edutaining” events with kindred spirits and conscious persons. Become a distributor of *The Real Da Vinci Code* and the many spin-off products being produced by increasing numbers of collaborators. Simply contact us through Healthy World Distributing, LLC to set yourself up as a wholesale purchaser and retail seller of all the revolutionary new products and opportunities evolving
from this work. Register now to participate and get on our e-mail list by going to: www.lovetherealda-vincicode.com.

This is not an invitation to join another network-marketing or multi-level organization. This is an opportunity to fulfill a very special destiny to make a huge difference in the world and earn substantial income for yourself through a standard limited partnership agreement between us that includes your high percentage return on investment.

For more information about setting up your association account today, or help with online administration, call 1-888-508-4787.

More Opportunities for Collaboration

Consider your unique talents and interests. Conceive of ways to express yourself creatively in this collaborative venture. Inventions based on these revelations are required in all fields including education, communications, healthcare, physics, agriculture, architecture, fashion, construction, music and more.

When I decided to research ways to help protect humanity from disease and premature death, I first conceived of the 3E™ as a novel way of energizing water and people’s bodies with the “Perfect Circle of
Sound.” Then I realized the opportunity to literally “baptize the entire planet” with this holy water to advance creative consciousness and Divine communion. From this idea came efforts to send these precise sound signals into the atmosphere and oceans as my friends and colleagues are now doing around the world. Can you think of a better way of directing and empowering our prayers for uplifting our planet? We shall use this gift to inspire the Divine-human family with our Creator’s loving essence.

If this still sounds strange to you, as it might to newcomers to this great news, reflect on what John the Baptist accomplished with his unique “hydrotherapy.” Applying this code may be crucial to freeing humanity from Dark Ages mentality. This information is educationally imperative to the whole human being and family. It is also life-saving and spiritually invigorating.

3E™s, Holy Harmony CDs, the “Perfect Circle of Sound” tuning fork set, the monochord wind chimes set, and the Breath-of-the-Earth™ energized Hawaiian holy water are all products you can use as creative examples. All of these products use the same mathematics and harmonics to impart the core creative frequencies for better health and living. You can buy these products wholesale and resell them to others retail.
Horowitz

Powerful prayerful messages of Love, thanks, peace, health, prosperity and more may be programmed into your life. Virtually anything and everything in physical reality may be blessed using these Divine revelations in musical mathematics. Bring me your ideas; and I will do my best in collaboration to bring them successfully to market.

Near the beginning of this book I promised to provide technology, even “supernatural” ways and means, to live your life prosperously and creatively empowered. *The Real Da Vinci Code* has achieved this goal. The next step is yours.
Dr. Leonard G. Horowitz (Hebrew name, Arya ben Schlomo ha Levi) is an internationally known authority in public health, behavioral science and emerging diseases.

In 1999, he was voted “Author of the Year” by the World Natural Health Organization for his monumental research and first national bestseller, *Emerging Viruses: AIDS & Ebola—Nature, Accident or Intentional?*

In 2006, he was honored by the World Organization for Natural Medicine as a “World Leading Intellectual.”

In November, 2006, synchronous with the e-book release of *The Real Da Vinci Code*, his 16th book, he is to be honored for his global efforts to advance public health through natural medicine by officials of The Sovereign Order of the Orthodox Knights Hospitaller of Saint John of Jerusalem. This organization was formed in the eleventh century and still operates today internationally for the purpose of healing the sick and protecting the public from emerging health risks.
Dr. Horowitz received his doctorate from Tufts University School of Dental Medicine in 1977. As a student and faculty member at Tufts, he taught medical and dental histology, graduated with honors, and was awarded a research fellowship in behavioral science at the University of Rochester.

He later earned a Master of Public Health degree from Harvard University focused on behavioral science and media persuasion technologies, and a Master of Arts degree in health education/counseling psychology from Beacon College/Interface Foundation, before joining the research faculty at Harvard School of Dental Medicine to study psychosocial factors in oral health and disease prevention.

While in Boston, he also taught master’s candidates, “Pain, Fear and Stress Management” for Leslie College’s Institute for the Arts and Human Development.

For more than a quarter century he has directed a non-profit educational publishing company that evolved into Tetrahedron, LLC.

Dr. Horowitz’s published works include the American best-seller *Emerging Viruses: AIDS & Ebola—Nature, Accident or Intentional?* Now considered a medical classic, this publication earned him the “Author of the Year Award” from the World Natural Health Organization in 1999, the same year he
The Real Da Vinci Code

released *Healing Codes for the Biological Apocalypse* which permanently expanded the field of therapeutic musicology.

In June, 2001, three months before the attacks of 9/11, Dr. Horowitz released the prophetically-titled critically-acclaimed book, *Death in the Air: Globalism, Terrorism and Toxic Warfare*. This book examined leading global industrialists’ successful efforts to direct contemporary culture through propaganda wars, toxicity, petrochemical/pharmaceutical malfeasance and economic dependence.

His 2004 book, *DNA: Pirates of the Sacred Spiral*, reviewed the science of electrogenetics that speaks to humanity’s fundamental spirituality.

Likewise, his 2006 release, *Walk on Water*, advances the mathematics, music, and physical mechanics of the ongoing Spiritual Renaissance. Revelations in this book were foundational for *The Real Da Vinci Code*, particularly the pioneering thesis on hydrocreationism that Dr. Horowitz advances.
Dr. Horowitz’s 16th book entitled, *The Real Da Vinci Code*, compellingly decrypts Da Vinci’s famous Vitruvian Man drawing mapping the mathematical-musical matrix technology required to accelerate and optimize human spiritual evolution and arguably civilization’s physical salvation.

Aside from helping to organize LIVEH2O, an international “Concert for the Living Waters,” and his speaking schedule, Dr. Horowitz oversees the Steam Vent Inn & Health Retreat on the Big Island of Hawaii, where one of the world’s most powerful natural healing resources—volcanically-heated steam—is being used to demonstrate Divinity to humanity.

The Real Da Vinci Code

Notes

[1] An erudite and forthright critic of the Greeks was William Chappell (1809-1888): “There is no longer room to doubt that the entire Greek system was mainly derived from Egypt, Phoenicia, Babylon, or other countries of more ancient civilization than Greece” [Chappell 1874, 1].

[2] [Cornford 1952, 107ff]. Europe’s last distinguished representative of this ancient tradition was probably St Francis of Assisi, whose fits of ecstasy and sermon to the birds (c.1220) are unmistakably shamanic. So are Socrates’ ‘daemon’ (or ‘inner voice’) and his trances.

[3] From Abaris, his ‘Hyperborean’ (British?) disciple, Pythagoras obtained a golden arrow that, like the witch’s broom, enabled him to fly and appear the same day in two towns separated by ‘a journey of many days’. See Guthrie 1987, 90-91, 128.

[4] The story of Pythagoras meditating ‘the greater part of day and night’ in a cave outside the city of Samos [Guthrie 1987, 62] recalls another familiar practice of the shamans. return to text

[6] Some years ago I applied for a major research grant to conduct a comparative and historical study of the Aboriginal Corroboree as the ‘indigenous Australian opera’. The application was referred to the two most eminent female anthropologists in the country, one of whom gave the project a top rating for its originality and national significance; the other (who happened to have been trained by the same philosophers who taught me) utterly damned the whole idea, especially with the revelation that I had never attended a corroboree (except, that is, of the imported kind).

[7] They also report a perfect example of ‘As above so below’: ‘Central Australian tribes believed that the Milky Way divided the sky people
into two tribes and hence served as a perpetual reminder that a similar
division of lands should be observed by local neighbouring tribes’ (loc.
cit.).

[8] See [Miller 1986], especially Foreword and Chapter 1. Cf. [Doczi
1994, Chapter 4].

[9] For a concise summary of the Pythagorean doctrine and the an-
cient literary evidence, see [Michaelides 1978,129-30].

[10] Gadalla 2002, 22-3 claims the harmony of the spheres (that is,
the ‘planetary scale’, the melodious movement of the classical ‘plan-
ettles’, from Earth to Saturn, and including the Sun and Moon, in the
proportions of a diatonic scale) as a purely Egyptian discovery. Fabre
d’Olivet had long ago reached a similar conclusion. See Godwin 1993,
347ff.

[11] I once speculated that the root meaning of ‘section cut off’ re-
ferred to the sectio canonis or division of the monochord but this
hypothesis over-simplifies what must have been a very protracted his-
tory of human invention and social development. Following Abraham
Seidenberg, I now think it more likely that the ‘tem-’ words originally
referred to ritual or liturgical procedures of ‘cutting off’ or delineating
sections of space and time as, for example, in the timing of festivals or
the reservation of sacred enclosures. Much later the ‘tem-’ vocabulary
was extended to musical theory, as in the terms ‘temper’ and ‘tempera-
ment’.

[12] ‘In the seventh century… Sparta was the most important musical
center of Greece’ (Comotti 1989, 17).

[13] The classical Greek music theorists concentrated their efforts on
the measurement of melody and rhythm and the development of a
fairly precise notation for both (see [Comotti 1989, 110-20]). Their
greatest achievement (the significance of which has often been over-
looked) was probably the quantitative analysis of the various tribal
or regional ‘modes’ and the codification of their distinctive rhythms
and accents. While the Greeks relied heavily on their predecessors in
speculative music and tuning systems, their empirical and mathemati-
cal studies of contemporary song and dance were the beginning of comparative musicology in the West.

[14] John Curtis Franklin has recently thrown new light on the influence of ‘Mesopotamian diatony’ on Greek music during the ‘orientalising period’ (c.750-650 BC). See [Franklin 2002a, 2002b].

[15] Even so, one might wonder how long it will take the recent progress in harmonic studies to affect the structure and content of academic courses in music, architecture, mathematics, aesthetics, cultural history, etc.

16] Regarding the pentacle, the Saint Christopher’s cross, and the holy grail quest, Dan Brown’s book accurately detailed some of the specifics regarding the “power of symbols.” His hero, Harvard Professor of Religious Symbology, and author of the books The Symbology of Secret Sects, The Art of the Illuminati, The Lost Language of Ideograms, said “The pentacle is representative of the female half of all things—a concept religious historians call the ‘sacred feminine’ or the ‘divine goddess.’ . . . [T]he pentacle symbolizes Venus—the goddess of female sexual Love and beauty. . . .

“Early religion was based on the divine order of Nature. The goddess Venus and the planet Venus were one and the same. The goddess had a place in the night-time sky and was known by many names—Venus, the Eastern Star, Ishtar, Astarte—all of them powerful female concepts with ties to Nature and Mother Earth. . . . [T]he planet Venus traced a perfect pentacle across the ecliptic sky every eight years. . . . [T]he pentacle’s true origins were actually quite godly.

“I assure you,” Landon said, ‘despite what you see in the movies, the pentacle’s demonic interpretation is historically accurate. The original feminine meaning is correct, but the symbolism of the pentacle has been distorted over the millennia. In this case, through bloodshed.’ (pp. 36-37, The Da Vinci Code.) . . .

[17] “[T] ratios of line segments in a pentacle all equal PHI [1.618, the ‘Divine Proportion.’ PHI is the] fundamental building block in nature. Plants, animals, and even human beings all possess dimen-
sional properties that adhere with . . . the ratio PHI to 1. . . . [T]he number PHI must have been preordained by the Creator of the universe. . . . Da Vinci was the first to show that the human body is literally made of building blocks whose proportional rations always equal PHI. . . . My friends, each of you is a walking tribute to the Divine Proportion. . . . God’s hand is evident in Nature. . . . [T]he ratios of line segments in a pentacle all equal PHI, making this symbol the ultimate expression of Divine Proportion. For this reason, the five-pointed star has always been the symbol for beauty and perfection associated with the goddess and the sacred feminine.”(p. 96)

[18] Anagrams, such as those found by Michael MacKay adorning American coins and currency, are historically linked to mystical teachings of the Kabbala. Rearranged letters in Hebrew words were used to message new meanings. According to The Da Vinci Code, “French kings throughout the Renaissance were so convinced that anagrams held magic power that they appointed royal anagrammatists to help them make better decisions by analyzing words in important documents. The Romans actually referred to the study of anagrams as ars magna—’the great art.’”

[19] Michael K. Mackay, the cryptologist that did an excellent job decoding masses amounts of information hidden in America’s currency and coins, is available for contact as follows: P. O. Box 1171, Foresthill, CA 95631; E-mail: iddod2002@yahoo.com; telephone: 530-367-4362.

[21] Moses’s Hebrew name literally means “Saving from the water.” He was spared from Pharaoh’s dictate to kill Hebrew first born males by being hidden in the Nile river. This is symbolic of “saving” humanity through the water.
The Real Da Vinci Code

ANSWER KEY:

Chapter 6: Exercise #3—9 is “completion”; #4—a. “Sion” as in Priory of Sion; b. 144,000 sing new song for “completion;” c. the forehead is the site of the pineal gland, the electromagnetic processing station of the forebrain regulating all neurology and endocrinology; d. water(s),
(Note: thunder comes from lightening or electrical current flows between earth and “heaven,” and harps are stringed instruments that relay sound waves of vibrational energy.)

Chapter 7: Exercise #2—The hidden number code or pattern is: 9-1-3-6-1-6-3-9. Notice the 1s exclusively separate the 3sm 6s, and 9s; #3—a. 3-6-9; b. 6-3-9; c. not really, highly unique, all 9s; d. yes; e. yes!

Chapter 9: Exercise #1—8s; #2—a-c) 666; #3: 9; #4: designers of alpha-numeric code; #5) alpha-numeric code; 6) 3, 6, 8 and 9; 7) 144,000.

Chapter 10: Exercise #2—a) god; b) live; c) devil; d) on; e) s[a]y or se[e]; f) DNA; g) mor[ph].

Chapter 11: Exercise #1a) O; b) O; c) ∞ ; d) 9 ; e) 3; f) 
6; g) × #3—a) 345678; 912345; 678912

Chapter 12: Exercise #3—1,2,4,8,7,5 repeats to eternity.

Chapter 14: The sequence is—1 7 4 , 2 8 5 , 3 9 6 , 4 1
7, 5 2 8, 6 3 9, 7 4 1, 8 5 2 , 9 6 3.
