The Call of Cthulhu

by H. P. Lovecraft

Written Summer 1926

Published February 1928 in Weird Tales, Vol. 11, No. 2, p. 159-78, 287.

Of such great powers or beings there may be conceivably a survival... a survival of a hugely remote period when... consciousness was manifested, perhaps, in shapes and forms long since withdrawn before the tide of advancing humanity... forms of which poetry and legend alone have caught a flying memory and called them gods, monsters, mythical beings of all sorts and kinds...

- Algernon Blackwood

I. The Horror In Clay

The most merciful thing in the world, I think, is the inability of the human mind to correlate all its contents. We live on a placid island of ignorance in the midst of black seas of infinity, and it was not meant that we should voyage far. The sciences, each straining in its own direction, have hitherto harmed us little; but some day the piecing together of dissociated knowledge will open up such terrifying vistas of reality, and of our frightful position therein, that we shall either go mad from the revelation or flee from the light into the peace and safety of a new dark age.

Theosophists have guessed at the awesome grandeur of the cosmic cycle wherein our world and human race form transient incidents. They have hinted at strange survivals in terms which would freeze the blood if not masked by a bland optimism. But it is not from them that there came the single glimpse of forbidden eons which chills me when I think of it and maddens me when I dream of it. That glimpse, like all dread glimpses of truth, flashed out from an accidental piecing together of separated things - in this case an old newspaper item and the notes of a dead professor. I hope that no one else will accomplish this piecing out; certainly, if I live, I shall never knowingly supply a link in so hideous a chain. I think that the professor, too intented to keep silent regarding the part he knew, and that he would have destroyed his notes had not sudden death seized him.

My knowledge of the thing began in the winter of 1926-27 with the death of my great-uncle, George Gammell Angell, Professor Emeritus of Semitic Languages in Brown University, Providence, Rhode Island. Professor Angell was widely known as an authority on ancient inscriptions, and had frequently been resorted to by the heads of prominent museums; so that his passing at the age of ninety-two may be recalled by many. Locally, interest was intensified by the obscurity of the cause of death. The professor had been stricken whilst returning from the Newport boat; falling suddenly; as witnesses said, after having been jostled by a nautical-looking negro who had come from one of the queer dark courts on the precipitous hillside which formed a short cut from the
waterfront to the deceased's home in Williams Street. Physicians were unable to find any visible disorder, but concluded after perplexed debate that some obscure lesion of the heart, induced by the brisk ascent of so steep a hill by so elderly a man, was responsible for the end. At the time I saw no reason to dissent from this dictum, but latterly I am inclined to wonder - and more than wonder.

As my great-uncle's heir and executor, for he died a childless widower, I was expected to go over his papers with some thoroughness; and for that purpose moved his entire set of files and boxes to my quarters in Boston. Much of the material which I correlated will be later published by the American Archeological Society, but there was one box which I found exceedingly puzzling, and which I felt much averse from showing to other eyes. It had been locked and I did not find the key till it occurred to me to examine the personal ring which the professor carried in his pocket. Then, indeed, I succeeded in opening it, but when I did so seemed only to be confronted by a greater and more closely locked barrier. For what could be the meaning of the queer clay bas-relief and the disjointed jottings, ramblings, and cuttings which I found? Had my uncle, in his latter years become credulous of the most superficial impostures? I resolved to search out the eccentric sculptor responsible for this apparent disturbance of an old man's peace of mind.

The bas-relief was a rough rectangle less than an inch thick and about five by six inches in area; obviously of modern origin. Its designs, however, were far from modern in atmosphere and suggestion; for, although the vagaries of cubism and futurism are many and wild, they do not often reproduce that cryptic regularity which lurks in prehistoric writing. And writing of some kind the bulk of these designs seemed certainly to be; though my memory, despite much the papers and collections of my uncle, failed in any way to identify this particular species, or even hint at its remotest affiliations.

Above these apparent hieroglyphics was a figure of evident pictorial intent, though its impressionistic execution forbade a very clear idea of its nature. It seemed to be a sort of monster, or symbol representing a monster, of a form which only a diseased fancy could conceive. If I say that my somewhat extravagant imagination yielded simultaneous pictures of an octopus, a dragon, and a human caricature, I shall not be unfaithful to the spirit of the thing. A pulpy, tentacled head surmounted a grotesque and scaly body with rudimentary wings; but it was the general outline of the whole which made it most shockingly frightful. Behind the figure was a vague suggestions of a Cyclopean architectural background.

The writing accompanying this oddity was, aside from a stack of press cuttings, in Professor Angell's most recent hand; and made no pretense to literary style. What seemed to be the main document was headed "CTHULHU CULT" in characters painstakingly printed to avoid the erroneous reading of a word so unheard-of. This manuscript was divided into two sections, the first of which was headed "1925 - Dream and Dream Work of H.A. Wilcox, 7 Thomas St., Providence, R. I.", and the second, "Narrative of Inspector John R. Legrasse, 121 Bienville St., New Orleans, La., at 1908 A. A. S. Mtg. - Notes on Same, & Prof. Webb's Acct." The other manuscript papers were brief notes, some of them accounts of the queer dreams of different persons, some of them citations from theosophical books and magazines (notably W. Scott-Elliott's *Atlantis and the Lost Lemuria*), and the rest comments on long-surviving secret societies and hidden cults, with
references to passages in such mythological and anthropological source-books as Frazer's *Golden Bough* and Miss Murray's *Witch-Cult in Western Europe*. The cuttings largely alluded to outré mental illness and outbreaks of group folly or mania in the spring of 1925.

The first half of the principal manuscript told a very particular tale. It appears that on March 1st, 1925, a thin, dark young man of neurotic and excited aspect had called upon Professor Angell bearing the singular clay bas-relief, which was then exceedingly damp and fresh. His card bore the name of Henry Anthony Wilcox, and my uncle had recognized him as the youngest son of an excellent family slightly known to him, who had latterly been studying sculpture at the Rhode Island School of Design and living alone at the Fleur-de-Lys Building near that institution. Wilcox was a precocious youth of known genius but great eccentricity, and had from childhood excited attention through the strange stories and odd dreams he was in the habit of relating. He called himself "psychically hypersensitive", but the staid folk of the ancient commercial city dismissed him as merely "queer." Never mingling much with his kind, he had dropped gradually from social visibility, and was now known only to a small group of esthetes from other towns. Even the Providence Art Club, anxious to preserve its conservatism, had found him quite hopeless.

On the occasion of the visit, ran the professor's manuscript, the sculptor abruptly asked for the benefit of his host's archeological knowledge in identifying the hieroglyphics of the bas-relief. He spoke in a dreamy, stilted manner which suggested pose and alienated sympathy; and my uncle showed some sharpness in replying, for the conspicuous freshness of the tablet implied kinship with anything but archeology. Young Wilcox's rejoinder, which impressed my uncle enough to make him recall and record it verbatim, was of a fantastically poetic cast which must have typified his whole conversation, and which I have since found highly characteristic of him. He said, "It is new, indeed, for I made it last night in a dream of strange cities; and dreams are older than brooding Tyre, or the contemplative Sphinx, or garden-girdled Babylon."

It was then that he began that rambling tale which suddenly played upon a sleeping memory and won the fevered interest of my uncle. There had been a slight earthquake tremor the night before, the most considerable felt in New England for some years; and Wilcox's imagination had been keenly affected. Upon retiring, he had had an unprecedented dream of great Cyclopean cities of Titan blocks and sky-flung monoliths, all dripping with green ooze and sinister with latent horror. Hieroglyphics had covered the walls and pillars, and from some undetermined point below had come a voice that was not a voice; a chaotic sensation which only fancy could transmute into sound, but which he attempted to render by the almost unpronounceable jumble of letters: "Cthulhu fhtagn."

This verbal jumble was the key to the recollection which excited and disturbed Professor Angell. He questioned the sculptor with scientific minuteness; and studied with frantic intensity the bas-relief on which the youth had found himself working, chilled and clad only in his night clothes, when waking had stolen bewilderingly over him. My uncle blamed his old age, Wilcox afterwards said, for his slowness in recognizing both hieroglyphics and pictorial design. Many of his questions seemed highly out of place to
his visitor, especially those which tried to connect the latter with strange cults or societies; and Wilcox could not understand the repeated promises of silence which he was offered in exchange for an admission of membership in some widespread mystical or paganly religious body. When Professor Angell became convinced that the sculptor was indeed ignorant of any cult or system of cryptic lore, he besieged his visitor with demands for future reports of dreams. This bore regular fruit, for after the first interview the manuscript records daily calls of the young man, during which he related startling fragments of nocturnal imagery whose burden was always some terrible Cyclopean vista of dark and dripping stone, with a subterrene voice or intelligence shouting monotonously in enigmatical sense-impacts uninscribable save as gibberish. The two sounds frequently repeated are those rendered by the letters "Cthulhu" and "R'lyeh."

On March 23, the manuscript continued, Wilcox failed to appear; and inquiries at his quarters revealed that he had been stricken with an obscure sort of fever and taken to the home of his family in Waterman Street. He had cried out in the night, arousing several other artists in the building, and had manifested since then only alternations of unconsciousness and delirium. My uncle at once telephoned the family, and from that time forward kept close watch of the case; calling often at the Thayer Street office of Dr. Tobey, whom he learned to be in charge. The youth's febrile mind, apparently, was dwelling on strange things; and the doctor shuddered now and then as he spoke of them. They included not only a repetition of what he had formerly dreamed, but touched wildly on a gigantic thing "miles high" which walked or lumbered about.

He at no time fully described this object but occasional frantic words, as repeated by Dr. Tobey, convinced the professor that it must be identical with the nameless monstrosity he had sought to depict in his dream-sculpture. Reference to this object, the doctor added, was invariably a prelude to the young man's subsidence into lethargy. His temperature, oddly enough, was not greatly above normal; but the whole condition was otherwise such as to suggest true fever rather than mental disorder.

On April 2 at about 3 P.M. every trace of Wilcox's malady suddenly ceased. He sat upright in bed, astonished to find himself at home and completely ignorant of what had happened in dream or reality since the night of March 22. Pronounced well by his physician, he returned to his quarters in three days; but to Professor Angell he was of no further assistance. All traces of strange dreaming had vanished with his recovery, and my uncle kept no record of his night-thoughts after a week of pointless and irrelevant accounts of thoroughly usual visions.

Here the first part of the manuscript ended, but references to certain of the scattered notes gave me much material for thought - so much, in fact, that only the ingrained skepticism then forming my philosophy can account for my continued distrust of the artist. The notes in question were those descriptive of the dreams of various persons covering the same period as that in which young Wilcox had had his strange visitations. My uncle, it seems, had quickly instituted a prodigiously far-flung body of inquires amongst nearly all the friends whom he could question without impertinence, asking for nightly reports of their dreams, and the dates of any notable visions for some time past. The reception of his request seems to have varied; but he must, at the very least, have received more responses than any ordinary man could have handled without a secretary. This original
correspondence was not preserved, but his notes formed a thorough and really significant digest. Average people in society and business - New England's traditional "salt of the earth" - gave an almost completely negative result, though scattered cases of uneasy but formless nocturnal impressions appear here and there, always between March 23 and and April 2 - the period of young Wilcox's delirium. Scientific men were little more affected, though four cases of vague description suggest fugitive glimpses of strange landscapes, and in one case there is mentioned a dread of something abnormal.

It was from the artists and poets that the pertinent answers came, and I know that panic would have broken loose had they been able to compare notes. As it was, lacking their original letters, I half suspected the compiler of having asked leading questions, or of having edited the correspondence in corroboration of what he had latently resolved to see. That is why I continued to feel that Wilcox, somehow cognizant of the old data which my uncle had possessed, had been imposing on the veteran scientist. These responses from esthetes told disturbing tale. From February 28 to April 2 a large proportion of them had dreamed very bizarre things, the intensity of the dreams being immeasurably the stronger during the period of the sculptor's delirium. Over a fourth of those who reported anything, reported scenes and half-sounds not unlike those which Wilcox had described; and some of the dreamers confessed acute fear of the gigantic nameless thing visible toward the last. One case, which the note describes with emphasis, was very sad. The subject, a widely known architect with leanings toward theosophy and occultism, went violently insane on the date of young Wilcox's seizure, and expired several months later after incessant screamings to be saved from some escaped denizen of hell. Had my uncle referred to these cases by name instead of merely by number, I should have attempted some corroboration and personal investigation; but as it was, I succeeded in tracing down only a few. All of these, however, bore out the notes in full. I have often wondered if all the the objects of the professor's questioning felt as puzzled as did this fraction. It is well that no explanation shall ever reach them.

The press cuttings, as I have intimated, touched on cases of panic, mania, and eccentricity during the given period. Professor Angell must have employed a cutting bureau, for the number of extracts was tremendous, and the sources scattered throughout the globe. Here was a nocturnal suicide in London, where a lone sleeper had leaped from a window after a shocking cry. Here likewise a rambling letter to the editor of a paper in South America, where a fanatic deduces a dire future from visions he has seen. A dispatch from California describes a theosophist colony as donning white robes en masse for some "glorious fulfiment" which never arrives, whilst items from India speak guardedly of serious native unrest toward the end of March 22-23.

The west of Ireland, too, is full of wild rumour and legendry, and a fantastic painter named Ardois-Bonnot hangs a blasphemous Dream Landscape in the Paris spring salon of 1926. And so numerous are the recorded troubles in insane asylums that only a miracle can have stopped the medical fraternity from noting strange parallelisms and drawing mystified conclusions. A weird bunch of cuttings, all told; and I can at this date scarcely envisage the callous rationalism with which I set them aside. But I was then convinced that young Wilcox had known of the older matters mentioned by the professor.

II. The Tale of Inspector Legrasse.
The older matters which had made the sculptor's dream and bas-relief so significant to my uncle formed the subject of the second half of his long manuscript. Once before, it appears, Professor Angell had seen the hellish outlines of the nameless monstrosity, puzzled over the unknown hieroglyphics, and heard the ominous syllables which can be rendered only as "Cthulhu"; and all this in so stirring and horrible a connexion that it is small wonder he pursued young Wilcox with queries and demands for data.

This earlier experience had come in 1908, seventeen years before, when the American Archaeological Society held its annual meeting in St. Louis. Professor Angell, as befitted one of his authority and attainments, had had a prominent part in all the deliberations; and was one of the first to be approached by the several outsiders who took advantage of the convocation to offer questions for correct answering and problems for expert solution.

The chief of these outsiders, and in a short time the focus of interest for the entire meeting, was a commonplace-looking middle-aged man who had travelled all the way from New Orleans for certain special information unobtainable from any local source. His name was John Raymond Legrasse, and he was by profession an Inspector of Police. With him he bore the subject of his visit, a grotesque, repulsive, and apparently very ancient stone statuette whose origin he was at a loss to determine. It must not be fancied that Inspector Legrasse had the least interest in archaeology. On the contrary, his wish for enlightenment was prompted by purely professional considerations. The statuette, idol, fetish, or whatever it was, had been captured some months before in the wooded swamps south of New Orleans during a raid on a supposed voodoo meeting; and so singular and hideous were the rites connected with it, that the police could not but realise that they had stumbled on a dark cult totally unknown to them, and infinitely more diabolic than even the blackest of the African voodoo circles. Of its origin, apart from the erratic and unbelievable tales extorted from the captured members, absolutely nothing was to be discovered; hence the anxiety of the police for any antiquarian lore which might help them to place the frightful symbol, and through it track down the cult to its fountain-head.

Inspector Legrasse was scarcely prepared for the sensation which his offering created. One sight of the thing had been enough to throw the assembled men of science into a state of tense excitement, and they lost no time in crowding around him to gaze at the diminutive figure whose utter strangeness and air of genuinely abysmal antiquity hinted so potently at unopened and archaic vistas. No recognised school of sculpture had animated this terrible object, yet centuries and even thousands of years seemed recorded in its dim and greenish surface of unplaceable stone.

The figure, which was finally passed slowly from man to man for close and careful study, was between seven and eight inches in height, and of exquisitely artistic workmanship. It represented a monster of vaguely anthropoid outline, but with an octopus-like head whose face was a mass of feelers, a scaly, rubbery-looking body, prodigious claws on hind and fore feet, and long, narrow wings behind. This thing, which seemed instinct with a fearsome and unnatural malignancy, was of a somewhat bloated corpulence, and squatted evilly on a rectangular block or pedestal covered with undecipherable characters. The tips of the wings touched the back edge of the block, the seat occupied the centre, whilst the long, curved claws of the doubled-up, crouching hind legs gripped the front edge and extended a quarter of the way clown toward the bottom of the pedestal. The
cephalopod head was bent forward, so that the ends of the facial feelers brushed the backs of huge fore paws which clasped the croucher's elevated knees. The aspect of the whole was abnormally life-like, and the more subtly fearful because its source was so totally unknown. Its vast, awesome, and incalculable age was unmistakable; yet not one link did it shew with any known type of art belonging to civilisation's youth - or indeed to any other time. Totally separate and apart, its very material was a mystery; for the soapy, greenish-black stone with its golden or iridescent flecks and striations resembled nothing familiar to geology or mineralogy. The characters along the base were equally baffling; and no member present, despite a representation of half the world's expert learning in this field, could form the least notion of even their remotest linguistic kinship. They, like the subject and material, belonged to something horribly remote and distinct from mankind as we know it. something frightfully suggestive of old and unhallowed cycles of life in which our world and our conceptions have no part.

And yet, as the members severally shook their heads and confessed defeat at the Inspector's problem, there was one man in that gathering who suspected a touch of bizarre familiarity in the monstrous shape and writing, and who presently told with some diffidence of the odd trifle he knew. This person was the late William Channing Webb, Professor of Anthropology in Princeton University, and an explorer of no slight note. Professor Webb had been engaged, forty-eight years before, in a tour of Greenland and Iceland in search of some Runic inscriptions which he failed to unearth; and whilst high up on the West Greenland coast had encountered a singular tribe or cult of degenerate Esquimaux whose religion, a curious form of devil-worship, chilled him with its deliberate bloodthirstiness and repulsiveness. It was a faith of which other Esquimaux knew little, and which they mentioned only with shudders, saying that it had come down from horribly ancient aeons before ever the world was made. Besides nameless rites and human sacrifices there were certain queer hereditary rituals addressed to a supreme elder devil or tornasuk; and of this Professor Webb had taken a careful phonetic copy from an aged angekok or wizard-priest, expressing the sounds in Roman letters as best he knew how. But just now of prime significance was the fetish which this cult had cherished, and around which they danced when the aurora leaped high over the ice cliffs. It was, the professor stated, a very crude bas-relief of stone, comprising a hideous picture and some cryptic writing. And so far as he could tell, it was a rough parallel in all essential features of the bestial thing now lying before the meeting.

This data, received with suspense and astonishment by the assembled members, proved doubly exciting to Inspector Legrasse; and he began at once to ply his informant with questions. Having noted and copied an oral ritual among the swamp cult-worshippers his men had arrested, he besought the professor to remember as best he might the syllables taken down amongst the diabolist Esquimaux. There then followed an exhaustive comparison of details, and a moment of really awed silence when both detective and scientist agreed on the virtual identity of the phrase common to two hellish rituals so many worlds of distance apart. What, in substance, both the Esquimaux wizards and the Louisiana swamp-priests had chanted to their kindred idols was something very like this: the word-divisions being guessed at from traditional breaks in the phrase as chanted aloud:
Legrasse had one point in advance of Professor Webb, for several among his mongrel prisoners had repeated to him what older celebrants had told them the words meant. This text, as given, ran something like this:

"In his house at R'lyeh dead Cthulhu waits dreaming."

And now, in response to a general and urgent demand, Inspector Legrasse related as fully as possible his experience with the swamp worshippers; telling a story to which I could see my uncle attached profound significance. It savoured of the wildest dreams of mythmaker and theosophist, and disclosed an astonishing degree of cosmic imagination among such half-castes and pariahs as might be least expected to possess it.

On November 1st, 1907, there had come to the New Orleans police a frantic summons from the swamp and lagoon country to the south. The squatters there, mostly primitive but good-natured descendants of Lafitte's men, were in the grip of stark terror from an unknown thing which had stolen upon them in the night. It was voodoo, apparently, but voodoo of a more terrible sort than they had ever known; and some of their women and children had disappeared since the malevolent tom-tom had begun its incessant beating far within the black haunted woods where no dweller ventured. There were insane shouts and harrowing screams, soul-chilling chants and dancing devil-flames; and, the frightened messenger added, the people could stand it no more.

So a body of twenty police, filling two carriages and an automobile, had set out in the late afternoon with the shivering squatter as a guide. At the end of the passable road they alighted, and for miles splashed on in silence through the terrible cypress woods where day never came. Ugly roots and malignant hanging nooses of Spanish moss beset them, and now and then a pile of dank stones or fragment of a rotting wall intensified by its hint of morbid habitation a depression which every malformed tree and every fungous islet combined to create. At length the squatter settlement, a miserable huddle of huts, hove in sight; and hysterical dwellers ran out to cluster around the group of bobbing lanterns. The muffled beat of tom-toms was now faintly audible far, far ahead; and a curdling shriek came at infrequent intervals when the wind shifted. A reddish glare, too, seemed to filter through pale undergrowth beyond the endless avenues of forest night. Reluctant even to be left alone again, each one of the cowed squatters refused point-blank to advance another inch toward the scene of unholy worship, so Inspector Legrasse and his nineteen colleagues plunged on unguided into black arcades of horror that none of them had ever trod before.

The region now entered by the police was one of traditionally evil repute, substantially unknown and untraversed by white men. There were legends of a hidden lake glimpsed by mortal sight, in which dwelt a huge, formless white polypous thing with luminous eyes; and squatters whispered that bat-winged devils flew up out of caverns in inner earth to worship it at midnight. They said it had been there before d'Iberville, before La Salle, before the Indians, and before even the wholesome beasts and birds of the woods. It was nightmare itself, and to see it was to die. But it made men dream, and so they knew enough to keep away. The present voodoo orgy was, indeed, on the merest fringe of this
abhored area, but that location was bad enough; hence perhaps the very place of the worship had terrified the squatters more than the shocking sounds and incidents.

Only poetry or madness could do justice to the noises heard by Legrasse's men as they ploughed on through the black morass toward the red glare and muffled tom-toms. There are vocal qualities peculiar to men, and vocal qualities peculiar to beasts; and it is terrible to hear the one when the source should yield the other. Animal fury and orgiastic license here whipped themselves to daemoniac heights by howls and squawking ecstacies that tore and reverberated through those nighted woods like pestilential tempests from the gulfs of hell. Now and then the less organized ululation would cease, and from what seemed a well-drilled chorus of hoarse voices would rise in sing-song chant that hideous phrase or ritual:

"Ph'nglui mglw'nafh Cthulhu R'lyeh wgah'ntag.

Then the men, having reached a spot where the trees were thinner, came suddenly in sight of the spectacle itself. Four of them reeled, one fainted, and two were shaken into a frantic cry which the mad cacophony of the orgy fortunately deadened. Legrasse dashed swamp water on the face of the fainting man, and all stood trembling and nearly hypnotised with horror.

In a natural glade of the swamp stood a grassy island of perhaps an acre's extent, clear of trees and tolerably dry. On this now leaped and twisted a more indescribable horde of human abnormality than any but a Sime or an Angarola could paint. Void of clothing, this hybrid spawn were braying, bellowing, and writhing about a monstrous ring-shaped bonfire; in the centre of which, revealed by occasional rifts in the curtain of flame, stood a great granite monolith some eight feet in height; on top of which, incongruous in its diminutiveness, rested the noxious carven statuette. From a wide circle of ten scaffolds set up at regular intervals with the flame-girt monolith as a centre hung, head downward, the oddly marred bodies of the helpless squatters who had disappeared. It was inside this circle that the ring of worshippers jumped and roared, the general direction of the mass motion being from left to right in endless Bacchanal between the ring of bodies and the ring of fire.

It may have been only imagination and it may have been only echoes which induced one of the men, an excitable Spaniard, to fancy he heard antiphonal responses to the ritual from some far and unillumined spot deeper within the wood of ancient legendry and horror. This man, Joseph D. Galvez, I later met and questioned; and he proved distractingly imaginative. He indeed went so far as to hint of the faint beating of great wings, and of a glimpse of shining eyes and a mountainous white bulk beyond the remotest trees but I suppose he had been hearing too much native superstition.

Actually, the horrified pause of the men was of comparatively brief duration. Duty came first; and although there must have been nearly a hundred mongrel celebrants in the throng, the police relied on their firearms and plunged determinedly into the nauseous rout. For five minutes the resultant din and chaos were beyond description. Wild blows were struck, shots were fired, and escapes were made; but in the end Legrasse was able to count some forty-seven sullen prisoners, whom he forced to dress in haste and fall into
line between two rows of policemen. Five of the worshippers lay dead, and two severely
wounded ones were carried away on improvised stretchers by their fellow-prisoners. The
image on the monolith, of course, was carefully removed and carried back by Legrasse.

Examined at headquarters after a trip of intense strain and weariness, the prisoners all
proved to be men of a very low, mixed-blooded, and mentally aberrant type. Most were
seamen, and a sprinkling of Negroes and mulattoes, largely West Indians or Brava
Portuguese from the Cape Verde Islands, gave a colouring of voodooism to the
heterogeneous cult. But before many questions were asked, it became manifest that
something far deeper and older than Negro fetishism was involved. Degraded and
ignorant as they were, the creatures held with surprising consistency to the central idea of
their loathsome faith.

They worshipped, so they said, the Great Old Ones who lived ages before there were any
men, and who came to the young world out of the sky. Those Old Ones were gone now,
inside the earth and under the sea; but their dead bodies had told their secrets in dreams to
the first men, who formed a cult which had never died. This was that cult, and the
prisoners said it had always existed and always would exist, hidden in distant wastes and
dark places all over the world until the time when the great priest Cthulhu, from his dark
house in the mighty city of R'lyeh under the waters, should rise and bring the earth again
beneath his sway. Some day he would call, when the stars were ready, and the secret cult
would always be waiting to liberate him.

Meanwhile no more must be told. There was a secret which even torture could not
extract. Mankind was not absolutely alone among the conscious things of earth, for
shapes came out of the dark to visit the faithful few. But these were not the Great Old
Ones. No man had ever seen the Old Ones. The carven idol was great Cthulhu, but none
might say whether or not the others were precisely like him. No one could read the old
writing now, but things were told by word of mouth. The chanted ritual was not the secret
- that was never spoken aloud, only whispered. The chant meant only this: "In his house
at R'lyeh dead Cthulhu waits dreaming."

Only two of the prisoners were found sane enough to be hanged, and the rest were
committed to various institutions. All denied a part in the ritual murders, and averred that
the killing had been done by Black Winged Ones which had come to them from their
immemorial meeting-place in the haunted wood. But of those mysterious allies no
coherent account could ever be gained. What the police did extract, came mainly from the
immensely aged mestizo named Castro, who claimed to have sailed to strange ports and
talked with undying leaders of the cult in the mountains of China.

Old Castro remembered bits of hideous legend that paled the speculations of theosophists
and made man and the world seem recent and transient indeed. There had been aeons
when other Things ruled on the earth, and They had had great cities. Remains of Them,
he said the deathless Chinamen had told him, were still be found as Cyclopean stones on
islands in the Pacific. They all died vast epochs of time before men came, but there were
arts which could revive Them when the stars had come round again to the right positions
in the cycle of eternity. They had, indeed, come themselves from the stars, and brought
Their images with Them.
These Great Old Ones, Castro continued, were not composed altogether of flesh and blood. They had shape - for did not this star-fashioned image prove it? - but that shape was not made of matter. When the stars were right, They could plunge from world to world through the sky; but when the stars were wrong, They could not live. But although They no longer lived, They would never really die. They all lay in stone houses in Their great city of R'lyeh, preserved by the spells of mighty Cthulhu for a glorious surrection when the stars and the earth might once more be ready for Them. But at that time some force from outside must serve to liberate Their bodies. The spells that preserved them intact likewise prevented Them from making an initial move, and They could only lie awake in the dark and think whilst uncounted millions of years rolled by. They knew all that was occurring in the universe, for Their mode of speech was transmitted thought. Even now They talked in Their tombs. When, after infinities of chaos, the first men came, the Great Old Ones spoke to the sensitive among them by moulding their dreams; for only thus could Their language reach the fleshly minds of mammals.

Then, whispered Castro, those first men formed the cult around tall idols which the Great Ones shewed them; idols brought in dim eras from dark stars. That cult would never die till the stars came right again, and the secret priests would take great Cthulhu from His tomb to revive His subjects and resume His rule of earth. The time would be easy to know, for then mankind would have become as the Great Old Ones; free and wild and beyond good and evil, with laws and morals thrown aside and all men shouting and killing and revelling in joy. Then the liberated Old Ones would teach them new ways to shout and kill and revel and enjoy themselves, and all the earth would flame with a holocaust of ecstasy and freedom. Meanwhile the cult, by appropriate rites, must keep alive the memory of those ancient ways and shadow forth the prophecy of their return.

In the elder time chosen men had talked with the entombed Old Ones in dreams, but then something happened. The great stone city R'lyeh, with its monoliths and sepulchres, had sunk beneath the waves; and the deep waters, full of the one primal mystery through which not even thought can pass, had cut off the spectral intercourse. But memory never died, and the high-priests said that the city would rise again when the stars were right. Then came out of the earth the black spirits of earth, mouldy and shadowy, and full of dim rumours picked up in caverns beneath forgotten sea-bottoms. But of them old Castro dared not speak much. He cut himself off hurriedly, and no amount of persuasion or subtlety could elicit more in this direction. The size of the Old Ones, too, he curiously declined to mention. Of the cult, he said that he thought the centre lay amid the pathless desert of Arabia, where Irem, the City of Pillars, dreams hidden and untouched. It was not allied to the European witch-cult, and was virtually unknown beyond its members. No book had ever really hinted of it, though the deathless Chinamen said that there were double meanings in the Necronomicon of the mad Arab Abdul Alhazred which the initiated might read as they chose, especially the much-discussed couplet:

That is not dead which can eternal lie,  
And with strange aeons even death may die.

Legrasse, deeply impressed and not a little bewildered, had inquired in vain concerning the historic affiliations of the cult. Castro, apparently, had told the truth when he said that it was wholly secret. The authorities at Tulane University could shed no light upon either
cult or image, and now the detective had come to the highest authorities in the country and met with no more than the Greenland tale of Professor Webb.

The feverish interest aroused at the meeting by Legrasse's tale, corroborated as it was by the statuette, is echoed in the subsequent correspondence of those who attended; although scant mention occurs in the formal publications of the society. Caution is the first care of those accustomed to face occasional charlatanry and imposture. Legrasse for some time lent the image to Professor Webb, but at the latter's death it was returned to him and remains in his possession, where I viewed it not long ago. It is truly a terrible thing, and unmistakably akin to the dream-sculpture of young Wilcox.

That my uncle was excited by the tale of the sculptor I did not wonder, for what thoughts must arise upon hearing, after a knowledge of what Legrasse had learned of the cult, of a sensitive young man who had dreamed not only the figure and exact hieroglyphics of the swamp-found image and the Greenland devil tablet, but had come in his dreams upon at least three of the precise words of the formula uttered alike by Esquimaux diabolists and mongrel Louisianans?. Professor Angell's instant start on an investigation of the utmost thoroughness was eminently natural; though privately I suspected young Wilcox of having heard of the cult in some indirect way, and of having invented a series of dreams to heighten and continue the mystery at my uncle's expense. The dream-narratives and cuttings collected by the professor were, of course, strong corroboration; but the rationalism of my mind and the extravagance of the whole subject led me to adopt what I thought the most sensible conclusions. So, after thoroughly studying the manuscript again and correlating the theosophical and anthropological notes with the cult narrative of Legrasse, I made a trip to Providence to see the sculptor and give him the rebuke I thought proper for so boldly imposing upon a learned and aged man.

Wilcox still lived alone in the Fleur-de-Lys Building in Thomas Street, a hideous Victorian imitation of seventeenth century Breton Architecture which flaunts its stuccoed front amidst the lovely colonial houses on the ancient hill, and under the very shadow of the finest Georgian steeple in America, I found him at work in his rooms, and at once conceded from the specimens scattered about that his genius is indeed profound and authentic. He will, I believe, some time be heard from as one of the great decadents; for he has crystallised in clay and will one day mirror in marble those nightmares and phantasies which Arthur Machen evokes in prose, and Clark Ashton Smith makes visible in verse and in painting.

Dark, frail, and somewhat unkempt in aspect, he turned languidly at my knock and asked me my business without rising. Then I told him who I was, he displayed some interest; for my uncle had excited his curiosity in probing his strange dreams, yet had never explained the reason for the study. I did not enlarge his knowledge in this regard, but sought with some subtlety to draw him out. In a short time I became convinced of his absolute sincerity, for he spoke of the dreams in a manner none could mistake. They and their subconscious residuum had influenced his art profoundly, and he shewed me a morbid statue whose contours almost made me shake with the potency of its black suggestion. He could not recall having seen the original of this thing except in his own dream bas-relief, but the outlines had formed themselves insensibly under his hands. It was, no doubt, the giant shape he had raved of in delirium. That he really knew nothing
of the hidden cult, save from what my uncle's relentless catechism had let fall, he soon 
made clear; and again I strove to think of some way in which he could possibly have 
received the weird impressions.

He talked of his dreams in a strangely poetic fashion; making me see with terrible 
vividness the damp Cyclopean city of slimy green stone - whose geometry, he oddly said, 
was all wrong - and hear with frightened expectancy the ceaseless, half-mental calling 
from underground: "Cthulhu fhtagn", "Cthulhu fhtagn."

These words had formed part of that dread ritual which told of dead Cthulhu's dream- 
vigil in his stone vault at R'lyeh, and I felt deeply moved despite my rational beliefs. 

Wilcox, I was sure, had heard of the cult in some casual way, and had soon forgotten it 
amidst the mass of his equally weird reading and imagining. Later, by virtue of its sheer 
impressiveness, it had found subconscious expression in dreams, in the bas-relief, and in 
the terrible statue I now beheld; so that his imposture upon my uncle had been a very 
innocent one. The youth was of a type, at once slightly affected and slightly ill-mannered, 
which I could never like, but I was willing enough now to admit both his genius and his 
honesty. I took leave of him amicably, and wish him all the success his talent promises.

The matter of the cult still remained to fascinate me, and at times I had visions of 
personal fame from researches into its origin and connexions. I visited New Orleans, 
talked with Legrasse and others of that old-time raiding-party, saw the frightful image, 
and even questioned such of the mongrel prisoners as still survived. Old Castro, 
unfortunately, had been dead for some years. What I now heard so graphically at first- 
hand, though it was really no more than a detailed confirmation of what my uncle had 
written, excited me afresh; for I felt sure that I was on the track of a very real, very secret, 
and very ancient religion whose discovery would make me an anthropologist of note. My 
attitude was still one of absolute materialism, as I wish it still were, and I discounted with 
almost inexplicable perversity the coincidence of the dream notes and odd cuttings 
collected by Professor Angell.

One thing I began to suspect, and which I now fear I know, is that my uncle's death was 
far from natural. He fell on a narrow hill street leading up from an ancient waterfront 
swarming with foreign mongrels, after a careless push from a Negro sailor. I did not 
forget the mixed blood and marine pursuits of the cult-members in Louisiana, and would 
not be surprised to learn of secret methods and rites and beliefs. Legrasse and his men, it 
is true, have been let alone; but in Norway a certain seaman who saw things is dead. 
Might not the deeper inquiries of my uncle after encountering the sculptor's data have 
come to sinister ears? I think Professor Angell died because he knew too much, or 
because he was likely to learn too much. Whether I shall go as he did remains to be seen, 
for I have learned much now.

III. The Madness from the Sea

If heaven ever wishes to grant me a boon, it will be a total effacing of the results of a 
mere chance which fixed my eye on a certain stray piece of shelf-paper. It was nothing on 
which I would naturally have stumbled in the course of my daily round, for it was an old 
number of an Australian journal, the Sydney Bulletin for April 18, 1925. It had escaped
even the cutting bureau which had at the time of its issuance been avidly collecting material for my uncle's research.

I had largely given over my inquiries into what Professor Angell called the "Cthulhu Cult", and was visiting a learned friend in Paterson, New Jersey; the curator of a local museum and a mineralogist of note. Examining one day the reserve specimens roughly set on the storage shelves in a rear room of the museum, my eye was caught by an odd picture in one of the old papers spread beneath the stones. It was the Sydney Bulletin I have mentioned, for my friend had wide affiliations in all conceivable foreign parts; and the picture was a half-tone cut of a hideous stone image almost identical with that which Legrasse had found in the swamp.

Eagerly clearing the sheet of its precious contents, I scanned the item in detail; and was disappointed to find it of only moderate length. What it suggested, however, was of portentous significance to my flagging quest; and I carefully tore it out for immediate action. It read as follows:

**MYSTERY DERELICT FOUND AT SEA**

*Vigilant* arrives with helpless armed New Zealand yacht in tow. One survivor and dead man found aboard. Tale of desperate battle and deaths at sea. Rescued seaman refuses particulars of strange experience. Odd idol found in his possession. Inquiry to follow.

The Morrison Co.'s freighter *Vigilant*, bound from Valparaiso, arrived this morning at its wharf in Darling Harbour, having in tow the battled and disabled but heavily armed steam yacht *Alert* of Dunedin, N.Z., which was sighted April 12th in S. Latitude 34°21', W. Longitude 152°17', with one living and one dead man aboard.

The *Vigilant* left Valparaiso March 25th, and on April 2nd was driven considerably south of her course by exceptionally heavy storms and monster waves. On April 12th the derelict was sighted; and though apparently deserted, was found upon boarding to contain one survivor in a half-delirious condition and one man who had evidently been dead for more than a week. The living man was clutching a horrible stone idol of unknown origin, about foot in height, regarding whose nature authorities at Sydney University, the Royal Society, and the Museum in College Street all profess complete bafflement, and which the survivor says he found in the cabin of the yacht, in a small carved shrine of common pattern.

This man, after recovering his senses, told an exceedingly strange story of piracy and slaughter. He is Gustaf Johansen, a Norwegian of some intelligence, and had been second mate of the two-masted schooner *Emma* of Auckland, which sailed for Callao February 20th with a complement of eleven men. The *Emma*, he says, was delayed and thrown widely south of her course by the great storm of March 1st, and on March 22nd, in S.
Latitude 49°51' W. Longitude 128°34', encountered the *Alert*, manned by a queer and evil-looking crew of Kanakas and half-castes. Being ordered peremptorily to turn back, Capt. Collins refused; whereupon the strange crew began to fire savagely and without warning upon the schooner with a peculiarly heavy battery of brass cannon forming part of the yacht's equipment. The *Emma*’s men shewed fight, says the survivor, and though the schooner began to sink from shots beneath the water-line they managed to heave alongside their enemy and board her, grappling with the savage crew on the yacht's deck, and being forced to kill them all, the number being slightly superior, because of their particularly abhorrent and desperate though rather clumsy mode of fighting.

Three of the *Emma*’s men, including Capt. Collins and First Mate Green, were killed; and the remaining eight under Second Mate Johansen proceeded to navigate the captured yacht, going ahead in their original direction to see if any reason for their ordering back had existed. The next day, it appears, they raised and landed on a small island, although none is known to exist in that part of the ocean; and six of the men somehow died ashore, though Johansen is queerly reticent about this part of his story, and speaks only of their falling into a rock chasm. Later, it seems, he and one companion boarded the yacht and tried to manage her, but were beaten about by the storm of April 2nd. From that time till his rescue on the 12th the man remembers little, and he does not even recall when William Briden, his companion, died. Briden's death reveals no apparent cause, and was probably due to excitement or exposure. Cable advices from Dunedin report that the *Alert* was well known there as an island trader, and bore an evil reputation along the waterfront. It was owned by a curious group of half-castes whose frequent meetings and night trips to the woods attracted no little curiosity; and it had set sail in great haste just after the storm and earth tremors of March 1st. Our Auckland correspondent gives the *Emma* and her crew an excellent reputation, and Johansen is described as a sober and worthy man. The admiralty will institute an inquiry on the whole matter beginning tomorrow, at which every effort will be made to induce Johansen to speak more freely than he has done hitherto.

This was all, together with the picture of the hellish image; but what a train of ideas it started in my mind! Here were new treasuries of data on the Cthulhu Cult, and evidence that it had strange interests at sea as well as on land. What motive prompted the hybrid crew to order back the *Emma* as they sailed about with their hideous idol? What was the unknown island on which six of the *Emma*’s crew had died, and about which the mate Johansen was so secretive? What had the vice-admiralty’s investigation brought out, and what was known of the noxious cult in Dunedin? And most marvellous of all, what deep and more than natural linkage of dates was this which gave a malign and now undeniable significance to the various turns of events so carefully noted by my uncle?

March 1st - or February 28th according to the International Date Line - the earthquake and storm had come. From Dunedin the Alert and her noisome crew had darted eagerly
forth as if imperiously summoned, and on the other side of the earth poets and artists had
begun to dream of a strange, dank Cyclopean city whilst a young sculptor had moulded in
his sleep the form of the dreaded Cthulhu. March 23rd the crew of the Emma landed on
an unknown island and left six men dead; and on that date the dreams of sensitive men
assumed a heightened vividness and darkened with dread of a giant monster's malign
pursuit, whilst an architect had gone mad and a sculptor had lapsed suddenly into
delirium! And what of this storm of April 2nd - the date on which all dreams of the dank
city ceased, and Wilcox emerged unharmed from the bondage of strange fever? What of
all this - and of those hints of old Castro about the sunken, star-born Old Ones and their
coming reign; their faithful cult and their mastery of dreams? Was I tottering on the brink
of cosmic horrors beyond man's power to bear? If so, they must be horrors of the mind
alone, for in some way the second of April had put a stop to whatever monstrous menace
had begun its siege of mankind's soul.

That evening, after a day of hurried cabling and arranging, I bade my host adieu and took
a train for San Francisco. In less than a month I was in Dunedin; where, however, I found
that little was known of the strange cult-members who had lingered in the old sea-
taverns. Waterfront scum was far too common for special mention; though there was
vague talk about one inland trip these mongrels had made, during which faint drumming
and red flame were noted on the distant hills. In Auckland I learned that Johansen had
returned with yellow hair turned white after a perfunctory and inconclusive questioning at
Sydney, and had thereafter sold his cottage in West Street and sailed with his wife to his
old home in Oslo. Of his stirring experience he would tell his friends no more than he had
told the admiralty officials, and all they could do was to give me his Oslo address.

After that I went to Sydney and talked profitlessly with seamen and members of the vice-
admiralty court. I saw the Alert, now sold and in commercial use, at Circular Quay in
Sydney Cove, but gained nothing from its non-committal bulk. The crouching image with
its cuttlefish head, dragon body, scaly wings, and hieroglyphed pedestal, was preserved in
the Museum at Hyde Park; and I studied it long and well, finding it a thing of balefully
exquisite workmanship, and with the same utter mystery, terrible antiquity, and unearthly
strangeness of material which I had noted in Legrasse's smaller specimen. Geologists, the
curator told me, had found it a monstrous puzzle; for they vowed that the world held no
rock like it. Then I thought with a shudder of what Old Castro had told Legrasse about
the Old Ones: "They had come from the stars, and had brought Their images with Them."

Shaken with such a mental revolution as I had never before known, I now resolved to
visit Mate Johansen in Oslo. Sailing for London, I reembarked at once for the Norwegian
capital; and one autumn day landed at the trim wharves in the shadow of the Egeberg.
Johansen's address, I discovered, lay in the Old Town of King Harold Haardrada, which
kept alive the name of Oslo during all the centuries that the greater city masqueraded as
"Christiana." I made the brief trip by taxicab, and knocked with palpitant heart at the door
of a neat and ancient building with plastered front. A sad-faced woman in black answered
my summons, and I was stung th disappointment when she told me in halting English that
Gustaf Johansen was no more.

He had not long survived his return, said his wife, for the doings sea in 1925 had broken
him. He had told her no more than he told the public, but had left a long manuscript - of
"technical matters" as he said - written in English, evidently in order to guard her from the peril of casual perusal. During a walk rough a narrow lane near the Gothenburg dock, a bundle of papers falling from an attic window had knocked him down. Two Lascar sailors at once helped him to his feet, but before the ambulance could reach him he was dead. Physicians found no adequate cause the end, and laid it to heart trouble and a weakened constitution. I now felt gnawing at my vitals that dark terror which will never leave me till I, too, am at rest; "accidentally" or otherwise. Persuad-g the widow that my connexion with her husband's "technical matters" was sufficient to entitle me to his manuscript, I bore the document away and began to read it on the London boat.

It was a simple, rambling thing - a naive sailor's effort at a post-facto diary - and strove to recall day by day that last awful voyage. I cannot attempt to transcribe it verbatim in all its cloudiness and redundance, but I will tell its gist enough to shew why the sound the water against the vessel's sides became so unendurable to me that I stopped my ears with cotton.

Johansen, thank God, did not know quite all, even though he saw the city and the Thing, but I shall never sleep calmly again when I think of the horrors that lurk ceaselessly behind life in time and in space, and of those unhallowed blasphemies from elder stars which dream beneath the sea, known and favoured by a nightmare cult ready and eager to loose them upon the world whenever another earthquake shall heave their monstrous stone city again to the sun and air.

Johansen's voyage had begun just as he told it to the vice-admiralty. The Emma, in ballast, had cleared Auckland on February 20th, and had felt the full force of that earthquake-born tempest which must have heaved up from the sea-bottom the horrors that filled men's dreams. Once more under control, the ship was making good progress when held up by the Alert on March 22nd, and I could feel the mate's regret as he wrote of her bombardment and sinking. Of the swarthy cult-fiends on the Alert he speaks with significant horror. There was some peculiarly abominable quality about them which made their destruction seem almost a duty, and Johansen shews ingenuous wonder at the charge of ruthlessness brought against his party during the proceedings of the court of inquiry. Then, driven ahead by curiosity in their captured yacht under Johansen's command, the men sight a great stone pillar sticking out of the sea, and in S. Latitude 47°9', W. Longitude l23°43', come upon a coastline of mingled mud, ooze, and weedy Cyclopean masonry which can be nothing less than the tangible substance of earth's supreme terror - the nightmare corpse-city of R'lyeh, that was built in measureless aeons behind history by the vast, loathsome shapes that seeped down from the dark stars. There lay great Cthulhu and his hordes, hidden in green slimy vaults and sending out at last, after cycles incalculable, the thoughts that spread fear to the dreams of the sensitive and called imperiously to the faithfull to come on a pilgrimage of liberation and restoration. All this Johansen did not suspect, but God knows he soon saw enough!

I suppose that only a single mountain-top, the hideous monolith-crowned citadel whereon great Cthulhu was buried, actually emerged from the waters. When I think of the extent of all that may be brooding down there I almost wish to kill myself forthwith. Johansen and his men were awed by the cosmic majesty of this dripping Babylon of elder daemons, and must have guessed without guidance that it was nothing of this or of any sane planet.
Awe at the unbelievable size of the greenish stone blocks, at the dizzying height of the
great carven monolith, and at the stupefying identity of the colossal statues and bas-
reliefs with the queer image found in the shrine on the Alert, is poignantly visible in
every line of the mates frightened description.

Without knowing what futurism is like, Johansen achieved something very close to it
when he spoke of the city; for instead of describing any definite structure or building, he
dwells only on broad impressions of vast angles and stone surfaces - surfaces too great to
belong to anything right or proper for this earth, and impious with horrible images and
hieroglyphs. I mention his talk about angles because it suggests something Wilcox had
told me of his awful dreams. He said that the geometry of the dream-place he saw was
abnormal, non-Euclidean, and loathsomely redolent of spheres and dimensions apart from
ours. Now an unlettered seaman felt the same thing whilst gazing at the terrible reality.

Johansen and his men landed at a sloping mud-bank on this monstrous Acropolis, and
clambered slipperily up over titan oozy blocks which could have been no mortal
staircase. The very sun of heaven seemed distorted when viewed through the polarising
miasma welling out from this sea-soaked perversion, and twisted menace and suspense
lurked leeringly in those crazily elusive angles of carven rock where a second glance
shewed concavity after the first shewed convexity.

Something very like fright had come over all the explorers before anything more definite
than rock and ooze and weed was seen. Each would have fled had he not feared the scorn
of the others, and it was only half-heartedly that they searched - vainly, as it proved - for
some portable souvenir to bear away.

It was Rodriguez the Portuguese who climbed up the foot of the monolith and shouted of
what he had found. The rest followed him, and looked curiously at the immense carved
door with the now familiar squid-dragon bas-relief. It was, Johansen said, like a great
barn-door; and they all felt that it was a door because of the ornate lintel, threshold, and
jambs around it, though they could not decide whether it lay flat like a trap-door or
slantwise like an outside cellar-door. As Wilcox would have said, the geometry of the
place was all wrong. One could not be sure that the sea and the ground were horizontal,
thus the relative position of everything else seemed phantasmally variable.

Briden pushed at the stone in several places without result. Then Donovan felt over it
delicately around the edge, pressing each point separately as he went. He climbed
interminably along the grotesque stone moulding - that is, one would call it climbing if
the thing was not after all horizontal - and the men wondered how any door in the
universe could be so vast. Then, very softly and slowly, the acre-great lintel began to give
inward at the top; and they saw that it was balauced

Donovan slid or somehow propelled himself down or along the jamb and rejoined his
fellows, and everyone watched the queer recession of the monstrously carven portal. In
this phantasy of prismatic distortion it moved anomalously in a diagonal way, so that all
the rules of matter and perspective seemed upset.
The aperture was black with a darkness almost material. That tenebrousness was indeed a positive quality; for it obscured such parts of the inner walls as ought to have been revealed, and actually burst forth like smoke from its aeon-long imprisonment, visibly darkening the sun as it slunk away into the shrunken and gibbous sky on flapping membrane wings. The odour rising from the newly opened depths was intolerable, and at length the quick-eared Hawkins thought he heard a nasty, slopping sound down there. Everyone listened, and everyone was listening still when It lumbered slobberingly into sight and gropingly squeezed Its gelatinous green immensity through the black doorway into the tainted outside air of that poison city of madness.

Poor Johansen's handwriting almost gave out when he wrote of this. Of the six men who never reached the ship, he thinks two perished of pure fright in that accursed instant. The Thing cannot be described - there is no language for such abysms of shrieking and immemorial lunacy, such eldritch contradictions of all matter, force, and cosmic order. A mountain walked or stumbled. God! What wonder that across the earth a great architect went mad, and poor Wilcox raved with fever in that telepathic instant? The Thing of the idols, the green, sticky spawn of the stars, had awaked to claim his own. The stars were right again, and what an age-old cult had failed to do by design, a band of innocent sailors had done by accident. After vigintillions of years great Cthulhu was loose again, and ravenous for delight.

Three men were swept up by the flabby claws before anybody turned. God rest them, if there be any rest in the universe. They were Donovan, Guerrera, and Angstrom. Parker slipped as the other three were plunging frenziedly over endless vistas of green-crusted rock to the boat, and Johansen swears he was swallowed up by an angle of masonry which shouldn't have been there; an angle which was acute, but behaved as if it were obtuse. So only Briden and Johansen reached the boat, and pulled desperately for the Alert as the mountainous monstrosity flopped down the slimy stones and hesitated, floundering at the edge of the water.

Steam had not been suffered to go down entirely, despite the departure of all hands for the shore; and it was the work of only a few moments of feverish rushing up and down between wheel and engines to get the Alert under way. Slowly, amidst the distorted horrors of that indescribable scene, she began to churn the lethal waters; whilst on the masonry of that charnel shore that was not of earth the titan Thing from the stars slavered and gibbered like Polyphemus cursing the fleeing ship of Odysseus. Then, bolder than the storied Cyclops, great Cthulhu slid greasily into the water and began to pursue with vast wave-raising strokes of cosmic potency. Briden looked back and went mad, laughing shrilly as he kept on laughing at intervals till death found him one night in the cabin whilst Johansen was wandering deliriously.

But Johansen had not given out yet. Knowing that the Thing could surely overtake the Alert until steam was fully up, he resolved on a desperate chance; and, setting the engine for full speed, ran lightning-like on deck and reversed the wheel. There was a mighty eddying and foaming in the noisome brine, and as the steam mounted higher and higher the brave Norwegian drove his vessel head on against the pursuing jelly which rose above the unclean froth like the stern of a daemon galleon. The awful squid-head with writhing feelers came nearly up to the bowsprit of the sturdy yacht, but Johansen drove on
relentlessly. There was a bursting as of an exploding bladder, a slushy nastiness as of a
cloven sunfish, a stench as of a thousand opened graves, and a sound that the chronicler
could not put on paper. For an instant the ship was befouled by an acrid and blinding
green cloud, and then there was only a venomous seething astern; where - God in heaven!
- the scattered plasticity of that nameless sky-spawn was nebulously recombining in its
hateful original form, whilst its distance widened every second as the Alert gained
impetus from its mounting steam.

That was all. After that Johansen only brooded over the idol in the cabin and attended to a
few matters of food for himself and the laughing maniac by his side. He did not try to
navigate after the first bold flight, for the reaction had taken something out of his soul.
Then came the storm of April 2nd, and a gathering of the clouds about his consciousness.
There is a sense of spectral whirling through liquid gulfs of infinity, of dizzying rides
through reeling universes on a comets tail, and of hysterical plunges from the pit to the
moon and from the moon back again to the pit, all livened by a cachinnating chorus of the
distorted, hilarious elder gods and the green, bat-winged mocking imps of Tartarus.

Out of that dream came rescue-the Vigilant, the vice-admiralty court, the streets of
Dunedin, and the long voyage back home to the old house by the Egeberg. He could not
tell - they would think him mad. He would write of what he knew before death came, but
his wife must not guess. Death would be a boon if only it could blot out the memories.

That was the document I read, and now I have placed it in the tin box beside the bas-
relief and the papers of Professor Angell. With it shall go this record of mine - this test of
my own sanity, wherein is pieced together that which I hope may never be pieced
together again. I have looked upon all that the universe has to hold of horror, and even
the skies of spring and the flowers of summer must ever afterward be poison to me. But I
do not think my life will be long. As my uncle went, as poor Johansen went, so I shall go.
I know too much, and the cult still lives.

Cthulhu still lives, too, I suppose, again in that chasm of stone which has shielded him
since the sun was young. His accursed city is sunken once more, for the Vigilant sailed
over the spot after the April storm; but his ministers on earth still bellow and prance and
slay around idol-capped monoliths in lonely places. He must have been trapped by the
sinking whilst within his black abyss, or else the world would by now be screaming with
fright and frenzy. Who knows the end? What has risen may sink, and what has sunk may
rise. Loathsomeness waits and dreams in the deep, and decay spreads over the tottering
cities of men. A time will come - but I must not and cannot think! Let me pray that, if I
do not survive this manuscript, my executors may put caution before audacity and see
that it meets no other eye.
Gorgons and Hydras, and Chimaeras - dire stories of Celaeno and the Harpies - may reproduce themselves in the brain of superstition - but they were there before. They are transcripts, types - the archetypes are in us, and eternal. How else should the recital of that which we know in a waking sense to be false come to affect us all? Is it that we naturally conceive terror from such objects, considered in their capacity of being able to inflict upon us bodily injury? O, least of all! These terrors are of older standing. They date beyond body - or without the body, they would have been the same... That the kind of fear here treated is purely spiritual - that it is strong in proportion as it is objectless on earth, that it predominates in the period of our sinless infancy - are difficulties the solution of which might afford some probable insight into our ante-mundane condition, and a peep at least into the shadowland of pre-existence.

- Charles Lamb: *Witches and Other Night-Fears*

I.

When a traveller in north central Massachusetts takes the wrong fork at the junction of Aylesbury pike just beyond Dean's Corners he comes upon a lonely and curious country.

The ground gets higher, and the brier-bordered stone walls press closer and closer against the ruts of the dusty, curving road. The trees of the frequent forest belts seem too large, and the wild weeds, brambles and grasses attain a luxuriance not often found in settled regions. At the same time the planted fields appear singularly few and barren; while the sparsely scattered houses wear a surprisingly uniform aspect of age, squalor, and dilapidation.

Without knowing why, one hesitates to ask directions from the gnarled solitary figures spied now and then on crumbling doorsteps or on the sloping, rock-strewn meadows. Those figures are so silent and furtive that one feels somehow confronted by forbidden things, with which it would be better to have nothing to do. When a rise in the road brings the mountains in view above the deep woods, the feeling of strange uneasiness is increased. The summits are too rounded and symmetrical to give a sense of comfort and naturalness, and sometimes the sky silhouettes with especial clearness the queer circles of tall stone pillars with which most of them are crowned.

Gorges and ravines of problematical depth intersect the way, and the crude wooden bridges always seem of dubious safety. When the road dips again there are stretches of marshland that one instinctively dislikes, and indeed almost fears at evening when unseen
whippoorwills chatter and the fireflies come out in abnormal profusion to dance to the raucous, creepily insistent rhythms of stridently piping bull-frogs. The thin, shining line of the Miskatonic's upper reaches has an oddly serpent-like suggestion as it winds close to the feet of the domed hills among which it rises.

As the hills draw nearer, one heeds their wooded sides more than their stone-crowned tops. Those sides loom up so darkly and precipitously that one wishes they would keep their distance, but there is no road by which to escape them. Across a covered bridge one sees a small village huddled between the stream and the vertical slope of Round Mountain, and wonders at the cluster of rotting gambrel roofs bespeaking an earlier architectural period than that of the neighbouring region. It is not reassuring to see, on a closer glance, that most of the houses are deserted and falling to ruin, and that the broken-steepled church now harbours the one slovenly mercantile establishment of the hamlet. One dreads to trust the tenebrous tunnel of the bridge, yet there is no way to avoid it. Once across, it is hard to prevent the impression of a faint, malign odour about the village street, as of the massed mould and decay of centuries. It is always a relief to get clear of the place, and to follow the narrow road around the base of the hills and across the level country beyond till it rejoins the Aylesbury pike. Afterwards one sometimes learns that one has been through Dunwich.

Outsiders visit Dunwich as seldom as possible, and since a certain season of horror all the signboards pointing towards it have been taken down. The scenery, judged by an ordinary aesthetic canon, is more than commonly beautiful; yet there is no influx of artists or summer tourists. Two centuries ago, when talk of witch-blood, Satan-worship, and strange forest presences was not laughed at, it was the custom to give reasons for avoiding the locality. In our sensible age - since the Dunwich horror of 1928 was hushed up by those who had the town's and the world's welfare at heart - people shun it without knowing exactly why. Perhaps one reason - though it cannot apply to uninformed strangers - is that the natives are now repellently decadent, having gone far along that path of retrogression so common in many New England backwaters. They have come to form a race by themselves, with the well-defined mental and physical stigmata of degeneracy and inbreeding. The average of their intelligence is woefully low, whilst their annals reek of overt viciousness and of half-hidden murders, incests, and deeds of almost unnameable violence and perversity. The old gentry, representing the two or three armigerous families which came from Salem in 1692, have kept somewhat above the general level of decay; though many branches are sunk into the sordid populace so deeply that only their names remain as a key to the origin they disgrace. Some of the Whateleys and Bishops still send their eldest sons to Harvard and Miskatonic, though those sons seldom return to the mouldering gambrel roofs under which they and their ancestors were born.

No one, even those who have the facts concerning the recent horror, can say just what is the matter with Dunwich; though old legends speak of unhallowed rites and conclaves of the Indians, amidst which they called forbidden shapes of shadow out of the great rounded hills, and made wild orgiastic prayers that were answered by loud crackings and rumblings from the ground below. In 1747 the Reverend Abijah Hoadley, newly come to
the Congregational Church at Dunwich Village, preached a memorable sermon on the
close presence of Satan and his imps; in which he said:

"It must be allow'd, that these Blasphemies of an infernall Train of
Daemons are Matters of too common Knowledge to be deny'd; the cursed
Voices of Azazel and Buzrael, of Beelzebub and Belial, being heard now
from under Ground by above a Score of credible Witnesses now living. I
myself did not more than a Fortnight ago catch a very plain Discourse of
evill Powers in the Hill behind my House; wherein there were a Rattling
and Rolling, Groaning, Screeching, and Hissing, such as no Things of this
Earth could raise up, and which must needs have come from those Caves
that only black Magick can discover, and only the Divell unlock".

Mr. Hoadley disappeared soon after delivering this sermon, but the text, printed in
Springfield, is still extant. Noises in the hills continued to be reported from year to year,
and still form a puzzle to geologists and physiographers.

Other traditions tell of foul odours near the hill-crowning circles of stone pillars, and of
rushing airy presences to be heard faintly at certain hours from stated points at the bottom
of the great ravines; while still others try to explain the Devil's Hop Yard - a bleak,
blasted hillside where no tree, shrub, or grass-blade will grow. Then, too, the natives are
mortally afraid of the numerous whippoorwills which grow vocal on warm nights. It is
vowed that the birds are psychopomps lying in wait for the souls of the dying, and that
they time their eerie cries in unison with the sufferer's struggling breath. If they can catch
the fleeing soul when it leaves the body, they instantly flutter away chittering in
daemoniac laughter; but if they fail, they subside gradually into a disappointed silence.

These tales, of course, are obsolete and ridiculous; because they come down from very
old times. Dunwich is indeed ridiculously old - older by far than any of the communities
within thirty miles of it. South of the village one may still spy the cellar walls and
chimney of the ancient Bishop house, which was built before 1700; whilst the ruins of the
mill at the falls, built in 1806, form the most modern piece of architecture to be seen.
Industry did not flourish here, and the nineteenth-century factory movement proved
short-lived. Oldest of all are the great rings of rough-hewn stone columns on the hilltops,
but these are more generally attributed to the Indians than to the settlers. Deposits of
skulls and bones, found within these circles and around the sizeable table-like rock on
Sentinel Hill, sustain the popular belief that such spots were once the burial-places of the
Pocumtucks; even though many ethnologists, disregarding the absurd improbability of
such a theory, persist in believing the remains Caucasian.

II.

It was in the township of Dunwich, in a large and partly inhabited farmhouse set against a
hillside four miles from the village and a mile and a half from any other dwelling, that
Wilbur Whateley was born at 5 a.m. on Sunday, the second of February, 1913. This date
was recalled because it was Candlemas, which people in Dunwich curiously observe
under another name; and because the noises in the hills had sounded, and all the dogs of
the countryside had barked persistently, throughout the night before. Less worthy of
notice was the fact that the mother was one of the decadent Whateleys, a somewhat
deformed, unattractive albino woman of thirty-five, living with an aged and half-insane
father about whom the most frightful tales of wizardry had been whispered in his youth.
Lavinia Whateley had no known husband, but according to the custom of the region
made no attempt to disavow the child; concerning the other side of whose ancestry the
country folk might - and did - speculate as widely as they chose. On the contrary, she
seemed strangely proud of the dark, goatish-looking infant who formed such a contrast to
her own sickly and pink-eyed albinism, and was heard to mutter many curious prophecies
about its unusual powers and tremendous future.

Lavinia was one who would be apt to mutter such things, for she was a lone creature
given to wandering amidst thunderstorms in the hills and trying to read the great odorous
books which her father had inherited through two centuries of Whateleys, and which
were fast falling to pieces with age and wormholes. She had never been to school, but
was filled with disjointed scraps of ancient lore that Old Whateley had taught her. The
remote farmhouse had always been feared because of Old Whateley's reputation for black
magic, and the unexplained death by violence of Mrs Whateley when Lavinia was twelve
years old had not helped to make the place popular. Isolated among strange influences,
Lavinia was fond of wild and grandiose day-dreams and singular occupations; nor was
her leisure much taken up by household cares in a home from which all standards of
order and cleanliness had long since disappeared.

There was a hideous screaming which echoed above even the hill noises and the dogs'
barking on the night Wilbur was born, but no known doctor or midwife presided at his
coming. Neighbours knew nothing of him till a week afterward, when Old Wateley drove
his sleigh through the snow into Dunwich Village and discoursed incoherently to the
group of loungers at Osborne's general store. There seemed to be a change in the old man
- an added element of furtiveness in the clouded brain which subtly transformed him from
an object to a subject of fear - though he was not one to be perturbed by any common
family event. Amidst it all he showed some trace of the pride later noticed in his
daughter, and what he said of the child's paternity was remembered by many of his
hearers years afterward.

'I dun't keer what folks think - ef Lavinny's boy looked like his pa, he wouldn't look like
nothin' ye expeck. Ye needn't think the only folks is the folks hereabouts. Lavinny's read
some, an' has seed some things the most o' ye only tell abaout. I calc'late her man is as
good a husban' as ye kin find this side of Aylesbury; an' ef ye knowed as much abaout the
hills as I dew, ye wouldn't ast no better church weddin' nor her'n. Let me tell ye suthin -
some day yew folks'll hear a child o' Lavinny's a-callin' its father's name on the top o'
Sentinel Hill!'

The only person who saw Wilbur during the first month of his life were old Zechariah
Whateley, of the undecayed Whateleys, and Earl Sawyer's common-law wife, Mamie
Bishop. Mamie's visit was frankly one of curiosity, and her subsequent tales did justice to
her observations; but Zechariah came to lead a pair of Alderney cows which Old
Whateley had bought of his son Curtis. This marked the beginning of a course of cattle-
buying on the part of small Wilbur's family which ended only in 1928, when the
Dunwich horror came and went; yet at no time did the ramshackle Wateley barn seem
overcrowded with livestock. There came a period when people were curious enough to
steal up and count the herd that grazed precariously on the steep hillside above the old
farm-house, and they could never find more than ten or twelve anaemic, bloodless-
looking specimens. Evidently some blight or distemper, perhaps sprung from the
unwholesome pasturage or the diseased fungi and timbers of the filthy barn, caused a
heavy mortality amongst the Whateley animals. Odd wounds or sores, having something
of the aspect of incisions, seemed to afflict the visible cattle; and once or twice during the
earlier months certain callers fancied they could discern similar sores about the throats of
the grey, unshaven old man and his slattemly, crinkly-haired albino daughter.

In the spring after Wilbur's birth Lavinia resumed her customary rambles in the hills,
bearing in her misproportioned arms the swarthy child. Public interest in the Whateleys
subsided after most of the country folk had seen the baby, and no one bothered to
comment on the swift development which that newcomer seemed every day to exhibit.
Wilbur's growth was indeed phenomenal, for within three months of his birth he had
attained a size and muscular power not usually found in infants under a full year of age.
His motions and even his vocal sounds showed a restraint and deliberateness highly
peculiar in an infant, and no one was really unprepared when, at seven months, he began
to walk unassisted, with falterings which another month was sufficient to remove.

It was somewhat after this time - on Hallowe'en - that a great blaze was seen at midnight
on the top of Sentinel Hill where the old table-like stone stands amidst its tumulus of
ancient bones. Considerable talk was started when Silas Bishop - of the undecayed
Bishops - mentioned having seen the boy running sturdily up that hill ahead of his mother
about an hour before the blaze was remarked. Silas was rounding up a stray heifer, but he
nearly forgot his mission when he fleetingly spied the two figures in the dim light of his
lantern. They darted almost noiselessly through the underbrush, and the astonished
watcher seemed to think they were entirely unclothed. Afterwards he could not be sure
about the boy, who may have had some kind of a fringed belt and a pair of dark trunks or
trousers on. Wilbur was never subsequently seen alive and conscious without complete
and tightly buttoned attire, the disarrangement or threatened disarrangement of which
always seemed to fill him with anger and alarm. His contrast with his squalid mother and
grandfather in this respect was thought very notable until the horror of 1928 suggested
the most valid of reasons.

The next January gossips were mildly interested in the fact that 'Lavinny's black brat' had
commenced to talk, and at the age of only eleven months. His speech was somewhat
remarkable both because of its difference from the ordinary accents of the region, and
because it displayed a freedom from infantile lisping of which many children of three or
four might well be proud. The boy was not talkative, yet when he spoke he seemed to
reflect some elusive element wholly unpossessed by Dunwich and its denizens. The
strangeness did not reside in what he said, or even in the simple idioms he used; but
seemed vaguely linked with his intonation or with the internal organs that produced the
spoken sounds. His facial aspect, too, was remarkable for its maturity; for though he
shared his mother's and grandfather's chinlessness, his firm and precociously shaped nose
united with the expression of his large, dark, almost Latin eyes to give him an air of
 quasi-adulthood and well-nigh preternatural intelligence. He was, however, exceedingly
ugly despite his appearance of brilliancy; there being something almost goatish or animalistic about his thick lips, large-pored, yellowish skin, coarse crinkly hair, and oddly elongated ears. He was soon disliked even more decidedly than his mother and grandsire, and all conjectures about him were spiced with references to the bygone magic of Old Whateley, and how the hills once shook when he shrieked the dreadful name of *Yog-Sothoth* in the midst of a circle of stones with a great book open in his arms before him. Dogs abhorred the boy, and he was always obliged to take various defensive measures against their barking menace.

III.

Meanwhile Old Whateley continued to buy cattle without measurably increasing the size of his herd. He also cut timber and began to repair the unused parts of his house - a spacious, peak-roofed affair whose rear end was buried entirely in the rocky hillside, and whose three least-ruined ground-floor rooms had always been sufficient for himself and his daughter.

There must have been prodigious reserves of strength in the old man to enable him to accomplish so much hard labour; and though he still babbled dementedly at times, his carpentry seemed to show the effects of sound calculation. It had already begun as soon as Wilbur was born, when one of the many tool sheds had been put suddenly in order, clapboarded, and fitted with a stout fresh lock. Now, in restoring the abandoned upper storey of the house, he was a no less thorough craftsman. His mania showed itself only in his tight boarding-up of all the windows in the reclaimed section - though many declared that it was a crazy thing to bother with the reclamation at all.

Less inexplicable was his fitting up of another downstairs room for his new grandson - a room which several callers saw, though no one was ever admitted to the closely-boarded upper storey. This chamber he lined with tall, firm shelving, along which he began gradually to arrange, in apparently careful order, all the rotting ancient books and parts of books which during his own day had been heaped promiscuously in odd corners of the various rooms.

'I made some use of 'em,' he would say as he tried to mend a torn black-letter page with paste prepared on the rusty kitchen stove, 'but the boy's fitten to make better use of 'em. He'd orter hev 'em as well so as he kin, for they're goin' to be all of his larnin'.'

When Wilbur was a year and seven months old - in September of 1914 - his size and accomplishments were almost alarming. He had grown as large as a child of four, and was a fluent and incredibly intelligent talker. He ran freely about the fields and hills, and accompanied his mother on all her wanderings. At home he would pore dilligently over the queer pictures and charts in his grandfather's books, while Old Whateley would instruct and catechize him through long, hushed afternoons. By this time the restoration of the house was finished, and those who watched it wondered why one of the upper windows had been made into a solid plank door. It was a window in the rear of the east gable end, close against the hill; and no one could imagine why a cleated wooden runway was built up to it from the ground. About the period of this work's completion people noticed that the old tool-house, tightly locked and windowlessly clapboarded since
Wilbur's birth, had been abandoned again. The door swung listlessly open, and when Earl Sawyer once stepped within after a cattle-selling call on Old Whateley he was quite discomposed by the singular odour he encountered - such a stench, he averred, as he had never before smelt in all his life except near the Indian circles on the hills, and which could not come from anything sane or of this earth. But then, the homes and sheds of Dunwich folk have never been remarkable for olfactory immaculateness.

The following months were void of visible events, save that everyone swore to a slow but steady increase in the mysterious hill noises. On May Eve of 1915 there were tremors which even the Aylesbury people felt, whilst the following Hallowe'en produced an underground rumbling queerly synchronized with bursts of flame - 'them witch Whateleys' doin's' - from the summit of Sentinel Hill. Wilbur was growing up uncannily, so that he looked like a boy of ten as he entered his fourth year. He read avidly by himself now; but talked much less than formerly. A settled taciturnity was absorbing him, and for the first time people began to speak specifically of the dawning look of evil in his goatish face. He would sometimes mutter an unfamiliar jargon, and chant in bizarre rhythms which chilled the listener with a sense of unexplainable terror. The aversion displayed towards him by dogs had now become a matter of wide remark, and he was obliged to carry a pistol in order to traverse the countryside in safety. His occasional use of the weapon did not enhance his popularity amongst the owners of canine guardians.

The few callers at the house would often find Lavinia alone on the ground floor, while odd cries and footsteps resounded in the boarded-up second storey. She would never tell what her father and the boy were doing up there, though once she turned pale and displayed an abnormal degree of fear when a jocose fish-pedlar tried the locked door leading to the stairway. That pedlar told the store loungers at Dunwich Village that he thought he heard a horse stamping on that floor above. The loungers reflected, thinking of the door and runway, and of the cattle that so swiftly disappeared. Then they shuddered as they recalled tales of Old Whateley's youth, and of the strange things that are called out of the earth when a bullock is sacrificed at the proper time to certain heathen gods. It had for some time been noticed that dogs had begun to hate and fear the whole Whateley place as violently as they hated and feared young Wilbur personally.

In 1917 the war came, and Squire Sawyer Whateley, as chairman of the local draft board, had hard work finding a quota of young Dunwich men fit even to be sent to development camp. The government, alarmed at such signs of wholesale regional decadence, sent several officers and medical experts to investigate; conducting a survey which New England newspaper readers may still recall. It was the publicity attending this investigation which set reporters on the track of the Whateleys, and caused the Boston Globe and Arkham Advertiser to print flamboyant Sunday stories of young Wilbur's precociousness, Old Whateley's black magic, and the shelves of strange books, the sealed second storey of the ancient farmhouse, and the weirdness of the whole region and its hill noises. Wilbur was four and a half then, and looked like a lad of fifteen. His lips and cheeks were fuzzy with a coarse dark down, and his voice had begun to break.

Earl Sawyer went out to the Whateley place with both sets of reporters and camera men, and called their attention to the queer stench which now seemed to trickle down from the sealed upper spaces. It was, he said, exactly like a smell he had found in the toolshed
abandoned when the house was finally repaired; and like the faint odours which he
sometimes thought he caught near the stone circle on the mountains. Dunwich folk read
the stories when they appeared, and grinned over the obvious mistakes. They wondered,
too, why the writers made so much of the fact that Old Whateley always paid for his
cattle in gold pieces of extremely ancient date. The Whateleys had received their visitors
with ill-concealed distaste, though they did not dare court further publicity by a violent
resistance or refusal to talk.

IV.

For a decade the annals of the Whateleys sink indistinguishably into the general life of a
morbid community used to their queer ways and hardened to their May Eve and All-
Hallows orgies. Twice a year they would light fires on the top of Sentinel Hill, at which
times the mountain rumblings would recur with greater and greater violence; while at all
seasons there were strange and portentous doings at the lonely farm-house. In the course
of time callers professed to hear sounds in the sealed upper storey even when all the
family were downstairs, and they wondered how swiftly or how lingeringly a cow or
bullock was usually sacrificed. There was talk of a complaint to the Society for the
Prevention of Cruelty to Animals but nothing ever came of it, since Dunwich folk are
never anxious to call the outside world's attention to themselves.

About 1923, when Wilbur was a boy of ten whose mind, voice, stature, and bearded face
gave all the impressions of maturity, a second great siege of carpentry went on at the old
house. It was all inside the sealed upper part, and from bits of discarded lumber people
concluded that the youth and his grandfather had knocked out all the partitions and even
removed the attic floor, leaving only one vast open void between the ground storey and
the peaked roof. They had torn down the great central chimney, too, and fitted the rusty
range with a flimsy outside tin stove-pipe.

In the spring after this event Old Whateley noticed the growing number of whippoorwills
that would come out of Cold Spring Glen to chirp under his window at night. He seemed
to regard the circumstance as one of great significance, and told the loungers at Osborn's
that he thought his time had almost come.

'They whistle jest in tune with my breathin' naow,' he said, 'an' I guess they're gittin' ready
to ketch my soul. They know it's a-goin' aout, an' dun't calc'late to miss it. Yew'll know,
boys, arter I'm gone, whether they git me er not. Ef they dew, they'll keep up a-singin' an'
laffin' till break o' day. Ef they dun't they'll kinder quiet daown like. I expeck them an' the
souls they hunts fer hev some pretty tough tussles sometimes.'

On Lammas Night, 1924, Dr Houghton of Aylesbury was hastily summoned by Wilbur
Whateley, who had lashed his one remaining horse through the darkness and telephoned
from Osborn's in the village. He found Old Whateley in a very grave state, with a cardiac
action and stertorous breathing that told of an end not far off. The shapeless albino
daughter and oddly bearded grandson stood by the bedside, whilst from the vacant abyss
overhead there came a disquieting suggestion of rhythmical surging or lapping, as of the
waves on some level beach. The doctor, though, was chiefly disturbed by the chattering
night birds outside; a seemingly limitless legion of whippoorwills that cried their endless
message in repetitions timed diabolically to the wheezing gasps of the dying man. It was uncanny and unnatural - too much, thought Dr Houghton, like the whole of the region he had entered so reluctantly in response to the urgent call.

Towards one o'clock Old Whateley gained consciousness, and interrupted his wheezing to choke out a few words to his grandson.

'More space, Willy, more space soon. Yew grows - an' that grows faster. It'll be ready to serve ye soon, boy. Open up the gates to Yog-Sothoth with the long chant that ye'll find on page 751 of the complete edition, an' then put a match to the prison. Fire from airth can't burn it nohaow.'

He was obviously quite mad. After a pause, during which the flock of whippoorwills outside adjusted their cries to the altered tempo while some indications of the strange hill noises came from afar off, he added another sentence or two.

'Feed it reg'lar, Willy, an' mind the quantity; but dun't let it grow too fast fer the place, fer ef it busts quarters or gits aout afore ye opens to Yog-Sothoth, it's all over an' no use. Only them from beyont kin make it multiply an' work... Only them, the old uns as wants to come back...'

But speech gave place to gasps again, and Lavinia screamed at the way the whippoorwills followed the change. It was the same for more than an hour, when the final throaty rattle came. Dr Houghton drew shrunken lids over the glazing grey eyes as the tumult of birds faded imperceptibly to silence. Lavinia sobbed, but Wilbur only chuckled whilst the hill noises rumbled faintly.

'They didn't git him,' he muttered in his heavy bass voice.

Wilbur was by this time a scholar of really tremendous erudition in his one-sided way, and was quietly known by correspondence to many librarians in distant places where rare and forbidden books of old days are kept. He was more and more hated and dreaded around Dunwich because of certain youthful disappearances which suspicion laid vaguely at his door; but was always able to silence inquiry through fear or through use of that fund of old-time gold which still, as in his grandfather's time, went forth regularly and increasingly for cattle-buying. He was now tremendously mature of aspect, and his height, having reached the normal adult limit, seemed inclined to wax beyond that figure. In 1925, when a scholarly correspondent from Miskatonic University called upon him one day and departed pale and puzzled, he was fully six and three-quarters feet tall.

Through all the years Wilbur had treated his half-deformed albino mother with a growing contempt, finally forbidding her to go to the hills with him on May Eve and Hallowmass; and in 1926 the poor creature complained to Mamie Bishop of being afraid of him.

'They's more abaout him as I knows than I kin tell ye, Mamie,' she said, 'an' naowadays they's more nor what I know myself. I vaow afur Gawd, I dun't know what he wants nor what he's a-tryin' to dew.'
That Hallowe'en the hill noises sounded louder than ever, and fire burned on Sentinel Hill as usual; but people paid more attention to the rhythmical screaming of vast flocks of unnaturally belated whippoorwills which seemed to be assembled near the unlighted Whateley farmhouse. After midnight their shrill notes burst into a kind of pandemoniac cacklination which filled all the countryside, and not until dawn did they finally quiet down. Then they vanished, hurrying southward where they were fully a month overdue. What this meant, no one could quite be certain till later. None of the countryfolk seemed to have died - but poor Lavinia Whateley, the twisted albino, was never seen again.

In the summer of 1927 Wilbur repaired two sheds in the farmyard and began moving his books and effects out to them. Soon afterwards Earl Sawyer told the loungers at Osborn's that more carpentry was going on in the Whateley farmhouse. Wilbur was closing all the doors and windows on the ground floor, and seemed to be taking out partitions as he and his grandfather had done upstairs four years before. He was living in one of the sheds, and Sawyer thought he seemed unusually worried and tremulous. People generally suspected him of knowing something about his mother disappearance, and very few ever approached his neighbourhood now. His height had increased to more than seven feet, and showed no signs of ceasing its development.

V.

The following winter brought an event no less strange than Wilbur's first trip outside the Dunwich region. Correspondence with the Widener Library at Harvard, the Bibliothèque Nationale in Paris, the British Museum, the University of Buenos Ayres, and the Library of Miskatonic University at Arkham had failed to get him the loan of a book he desperately wanted; so at length he set out in person, shabby, dirty, bearded, and uncouth of dialect, to consult the copy at Miskatonic, which was the nearest to him geographically. Almost eight feet tall, and carrying a cheap new valise from Osborne's general store, this dark and goatish gargoyle appeared one day in Arkham in quest of the dreaded volume kept under lock and key at the college library - the hideous Necronomicon of the mad Arab Abdul Alhazred in Olaus Wormius' Latin version, as printed in Spain in the seventeenth century. He had never seen a city before, but had no thought save to find his way to the university grounds; where indeed, he passed heedlessly by the great white-fanged watchdog that barked with unnatural fury and enmity, and tugged frantically at its stout chaim.

Wilbur had with him the priceless but imperfect copy of Dr Dee's English version which his grandfather had bequeathed him, and upon receiving access to the Latin copy he at once began to collate the two texts with the aim of discovering a certain passage which would have come on the 751st page of his own defective volume. This much he could not civilly refrain from telling the librarian - the same erudite Henry Armitage (A.M. Miskatonic, Ph.D. Princeton, Litt.D. Johns Hopkins) who had once called at the farm, and who now politely plied him with questions. He was looking, he had to admit, for a kind of formula or incantation containing the frightful name Yog-Sothoth, and it puzzled him to find discrepancies, duplications, and ambiguities which made the matter of determination far from easy. As he copied the formula he finally chose, Dr Armitage looked involuntarily over his shoulder at the open pages; the left-hand one of which, in the Latin version, contained such monstrous threats to the peace and sanity of the world.
Nor is it to be thought (ran the text as Armitage mentally translated it) that man is either the oldest or the last of earth's masters, or that the common bulk of life and substance walks alone. The Old Ones were, the Old Ones are, and the Old Ones shall be. Not in the spaces we know, but between them, they walk serene and primal, undimensioned and to us unseen. Yog-Sothoth knows the gate. Yog-Sothoth is the gate. Yog-Sothoth is the key and guardian of the gate. Past, present, future, all are one in Yog-Sothoth. He knows where the Old Ones broke through of old, and where They shall break through again. He knows where They had trod earth's fields, and where They still tread them, and why no one can behold Them as They tread. By Their smell can men sometimes know Them near, but of Their semblance can no man know, saving only in the features of those They have begotten on mankind; and of those are there many sorts, differing in likeness from man's truest eidolon to that shape without sight or substance which is Them. They walk unseen and foul in lonely places where the Words have been spoken and the Rites howled through at their Seasons. The wind gibbers with Their voices, and the earth mutters with Their consciousness. They bend the forest and crush the city, yet may not forest or city behold the hand that smites. Kadath in the cold waste hath known Them, and what man knows Kadath? The ice desert of the South and the sunken isles of Ocean hold stones whereon Their seal is engraver, but who bath seen the deep frozen city or the sealed tower long garlanded with seaweed and barnacles? Great Cthulhu is Their cousin, yet can he spy Them only dimly. Êä! Shub-Niggurath! As a foulness shall ye know Them. Their hand is at your throats, yet ye see Them not; and Their habitation is even one with your guarded threshold. Yog-Sothoth is the key to the gate, whereby the spheres meet. Man rules now where They ruled once; They shall soon rule where man rules now. After summer is winter, after winter summer. They wait patient and potent, for here shall They reign again.

Dr. Annitage, associating what he was reading with what he had heard of Dunwich and its brooding presences, and of Wilbur Whateley and his dim, hideous aura that stretched from a dubious birth to a cloud of probable matricide, felt a wave of fright as tangible as a draught of the tomb's cold clamminess. The bent, goatish giant before him seemed like the spawn of another planet or dimension; like something only partly of mankind, and linked to black gulfs of essence and entity that stretch like titan phantasms beyond all spheres of force and matter, space and time. Presently Wilbur raised his head and began speaking in that strange, resonant fashion which hinted at sound-producing organs unlike the run of mankind's.

'Mr Armitage,' he said, 'I calc'late I've got to take that book home. They's things in it I've got to try under sarten conditions that I can't git here, en' it 'ud be a mortal sin to let a red-tape rule hold me up. Let me take it along, Sir, an' I'll swar they wun't nobody know the difference. I dun't need to tell ye I'll take good keer of it. It wan't me that put this Dee copy in the shape it is...'
He stopped as he saw firm denial on the librarian's face, and his own goatish features grew crafty. Armitage, half-ready to tell him he might make a copy of what parts he needed, thought suddenly of the possible consequences and checked himself. There was too much responsibility in giving such a being the key to such blasphemous outer spheres. Whateley saw how things stood, and tried to answer lightly.

'Wal, all right, ef ye feel that way abaout it. Maybe Harvard won't be so fussy as yew be.' And without saying more he rose and strode out of the building, stooping at each doorway.

Armitage heard the savage yelping of the great watchdog, and studied Whateley's gorilla-like lope as he crossed the bit of campus visible from the window. He thought of the wild tales he had heard, and recalled the old Sunday stories in the *Advertiser*; these things, and the lore he had picked up from Dunwich rustics and villagers during his one visit there. Unseen things not of earth - or at least not of tridimensional earth - rushed foetid and horrible through New England's glens, and brooded obscenely on the mountain tops. Of this he had long felt certain. Now he seemed to sense the close presence of some terrible part of the intruding horror, and to glimpse a hellish advance in the black dominion of the ancient and once passive nightmare. He locked away *the Necronomicon* with a shudder of disgust, but the room still reeked with an unholy and unidentifiable stench. 'As a foulness shall ye know them,' he quoted. Yes - the odour was the same as that which had sickened him at the Whateley farmhouse less than three years before. He thought of Wilbur, goatish and ominous, once again, and laughed mockingly at the village rumours of his parentage.

'Inbreeding?' Armitage muttered half-aloud to himself. 'Great God, what simpletons! Show them Arthur Machen's Great God Pan and they'll think it a common Dunwich scandal! But what thing - what cursed shapeless influence on or off this three-dimensional earth - was Wilbur Whateley's father? Born on Candlemas - nine months after May Eve of 1912, when the talk about the queer earth noises reached clear to Arkham - what walked on the mountains that May night? What Roodmas horror fastened itself on the world in half-human flesh and blood?'

During the ensuing weeks Dr Armitage set about to collect all possible data on Wilbur Whateley and the formless presences around Dunwich. He got in communication with Dr Houghton of Aylesbury, who had attended Old Whateley in his last illness, and found much to ponder over in the grandfather's last words as quoted by the physician. A visit to Dunwich Village failed to bring out much that was new; but a close survey of *the Necronomicon*, in those parts which Wilbur had sought so avidly, seemed to supply new and terrible clues to the nature, methods, and desires of the strange evil so vaguely threatening this planet. Talks with several students of archaic lore in Boston, and letters to many others elsewhere, gave him a growing amazement which passed slowly through varied degrees of alarm to a state of really acute spiritual fear. As the summer drew on he felt dimly that something ought to be done about the lurking terrors of the upper Miskatonic valley, and about the monstrous being known to the human world as Wilbur Whateley.

VI.
The Dunwich horror itself came between Lammas and the equinox in 1928, and Dr Armitage was among those who witnessed its monstrous prologue. He had heard, meanwhile, of Whateley's grotesque trip to Cambridge, and of his frantic efforts to borrow or copy from the *Necronomicon* at the Widener Library. Those efforts had been in vain, since Armitage had issued warnings of the keenest intensity to all librarians having charge of the dreaded volume. Wilbur had been shockingly nervous at Cambridge; anxious for the book, yet almost equally anxious to get home again, as if he feared the results of being away long.

Early in August the half-expected outcome developed, and in the small hours of the third Dr Armitage was awakened suddenly by the wild, fierce cries of the savage watchdog on the college campus. Deep and terrible, the snarling, half-mad growls and barks continued; always in mounting volume, but with hideously significant pauses. Then there rang out a scream from a wholly different throat - such a scream as roused half the sleepers of Arkham and haunted their dreams ever afterwards - such a scream as could come from no being born of earth, or wholly of earth.

Armitage, hastening into some clothing and rushing across the street and lawn to the college buildings, saw that others were ahead of him; and heard the echoes of a burglar-alarm still shrilling from the library. An open window showed black and gaping in the moonlight. What had come had indeed completed its entrance; for the barking and the screaming, now fast fading into a mixed low growling and moaning, proceeded unmistakably from within. Some instinct warned Armitage that what was taking place was not a thing for unfortified eyes to see, so he brushed back the crowd with authority as he unlocked the vestibule door. Among the others he saw Professor Warren Rice and Dr Francis Morgan, men to whom he had told some of his conjectures and misgivings; and these two he motioned to accompany him inside. The inward sounds, except for a watchful, droning whine from the dog, had by this time quite subsided; but Armitage now perceived with a sudden start that a loud chorus of whippoorwills among the shrubbery had commenced a damnably rhythmical piping, as if in unison with the last breaths of a dying man.

The building was full of a frightful stench which Dr Armitage knew too well, and the three men rushed across the hall to the small genealogical reading-room whence the low whining came. For a second nobody dared to turn on the light, then Armitage summoned up his courage and snapped the switch. One of the three - it is not certain which - shrieked aloud at what sprawled before them among disordered tables and overturned chairs. Professor Rice declares that he wholly lost consciousness for an instant, though he did not stumble or fall.

The thing that lay half-bent on its side in a foetid pool of greenish-yellow ichor and tarry stickiness was almost nine feet tall, and the dog had torn off all the clothing and some of the skin. It was not quite dead, but twitched silently and spasmodically while its chest heaved in monstrous unison with the mad piping of the expectant whippoorwills outside. Bits of shoe-leather and fragments of apparel were scattered about the room, and just inside the window an empty canvas sack lay where it had evidently been thrown. Near the central desk a revolver had fallen, a dented but undischarged cartridge later explaining why it had not been fired. The thing itself, however, crowded out all other
images at the time. It would be trite and not wholly accurate to say that no human pen
could describe it, but one may properly say that it could not be vividly visualized by
anyone whose ideas of aspect and contour are too closely bound up with the common
life-forms of this planet and of the three known dimensions. It was partly human, beyond
a doubt, with very manlike hands and head, and the goatish, chinless face had the stamp
of the Whateley's upon it. But the torso and lower parts of the body were teratologically
fabulous, so that only generous clothing could ever have enabled it to walk on earth
unchallenged or uneradicated.

Above the waist it was semi-anthropomorphic; though its chest, where the dog's rending
paws still rested watchfully, had the leathery, reticulated hide of a crocodile or alligator.
The back was piebald with yellow and black, and dimly suggested the squamous covering
of certain snakes. Below the waist, though, it was the worst; for here all human
resemblance left off and sheer phantasy began. The skin was thickly covered with coarse
black fur, and from the abdomen a score of long greenish-grey tentacles with red sucking
mouths protruded limply.

Their arrangement was odd, and seemed to follow the symmetries of some cosmic
geometry unknown to earth or the solar system. On each of the hips, deep set in a kind of
pinkish, ciliated orbit, was what seemed to be a rudimentary eye; whilst in lieu of a tail
there depended a kind of trunk or feeler with purple annular markings, and with many
evidences of being an undeveloped mouth or throat. The limbs, save for their black fur,
roughly resembled the hind legs of prehistoric earth's giant saurians, and terminated in
ridgy-veined pads that were neither hooves nor claws. When the thing breathed, its tail
and tentacles rhythmically changed colour, as if from some circulatory cause normal to
the non-human greenish tinge, whilst in the tail it was manifest as a yellowish appearance
which alternated with a sickly grayish-white in the spaces between the purple rings. Of
genuine blood there was none; only the foetid greenish-yellow ichor which trickled along
the painted floor beyond the radius of the stickiness, and left a curious discoloration
behind it.

As the presence of the three men seemed to rouse the dying thing, it began to mumble
without turning or raising its head. Dr Armitage made no written record of its mouthings,
but asserts confidently that nothing in English was uttered. At first the syllables defied all
correlation with any speech of earth, but towards the last there came some disjointed
fragments evidently taken from the Necronomicon, that monstrous blasphemy in quest of
which the thing had perished. These fragments, as Armitage recalls them, ran something
like 'N'gai, n'gha'ghaa, bugg-shoggog, y'hah: Yog-Sothoth, Yog-Sothoth ...' They trailed
off into nothingness as the whippoorwills shrieked in rhythmical crescendos of unholy
anticipation.

Then came a halt in the gasping, and the dog raised its head in a long, lugubrious howl. A
change came over the yellow, goatish face of the prostrate thing, and the great black eyes
fell in appallingly. Outside the window the shrilling of the whippoorwills had suddenly
ceased, and above the murmurs of the gathering crowd there came the sound of a panic-
struck whirring and fluttering. Against the moon vast clouds of feathery watchers rose
and raced from sight, frantic at that which they had sought for prey.
All at once the dog started up abruptly, gave a frightened bark, and leaped nervously out of the window by which it had entered. A cry rose from the crowd, and Dr Armitage shouted to the men outside that no one must be admitted till the police or medical examiner came. He was thankful that the windows were just too high to permit of peering in, and drew the dark curtains carefully down over each one. By this time two policemen had arrived; and Dr Morgan, meeting them in the vestibule, was urging them for their own sakes to postpone entrance to the stench-filled reading-room till the examiner came and the prostrate thing could be covered up.

Meanwhile frightful changes were taking place on the floor. One need not describe the kind and rate of shrinkage and disintegration that occurred before the eyes of Dr Armitage and Professor Rice; but it is permissible to say that, aside from the external appearance of face and hands, the really human element in Wilbur Whateley must have been very small. When the medical examiner came, there was only a sticky whitish mass on the painted boards, and the monstrous odour had nearly disappeared. Apparently Whateley had had no skull or bony skeleton; at least, in any true or stable sense. He had taken somewhat after his unknown father.

VII.

Yet all this was only the prologue of the actual Dunwich horror. Formalities were gone through by bewildered officials, abnormal details were duly kept from press and public, and men were sent to Dunwich and Aylesbury to look up property and notify any who might be heirs of the late Wilbur Whateley. They found the countryside in great agitation, both because of the growing rumblings beneath the domed hills, and because of the unwonted stench and the surging, lapping sounds which came increasingly from the great empty shell formed by Whateley's boarded-up farmhouse. Earl Sawyer, who tended the horse and cattle during Wilbur's absence, had developed a woefully acute case of nerves. The officials devised excuses not to enter the noisome boarded place; and were glad to confine their survey of the deceased's living quarters, the newly mended sheds, to a single visit. They filed a ponderous report at the courthouse in Aylesbury, and litigations concerning heirship are said to be still in progress amongst the innumerable Whateleys, decayed and undecayed, of the upper Miskatonic valley.

An almost interminable manuscript in strange characters, written in a huge ledger and adjudged a sort of diary because of the spacing and the variations in ink and penmanship, presented a baffling puzzle to those who found it on the old bureau which served as its owner's desk. After a week of debate it was sent to Miskatonic University, together with the deceased's collection of strange books, for study and possible translation; but even the best linguists soon saw that it was not likely to be unriddled with ease. No trace of the ancient gold with which Wilbur and Old Whateley had always paid their debts has yet been discovered.

It was in the dark of September ninth that the horror broke loose. The hill noises had been very pronounced during the evening, and dogs barked frantically all night. Early risers on the tenth noticed a peculiar stench in the air. About seven o'clock Luther Brown, the hired boy at George Corey's, between Cold Spring Glen and the village, rushed frenziedly back from his morning trip to Ten-Acre Meadow with the cows. He was almost convulsed
with fright as he stumbled into the kitchen; and in the yard outside the no less frightened herd were pawing and lowing pitifully, having followed the boy back in the panic they shared with him. Between gasps Luther tried to stammer out his tale to Mrs Corey.

'Up thar in the rud beyont the glen, Mis' Corey - they's suthin' ben thar! It smells like thunder, an' all the bushes an' little trees is pushed back from the rud like they'd a haouse ben moved along of it. An' that ain't the wust, nuther. They's prints in the rud, Mis' Corey - great raound prints as big as barrel-heads, all sunk dawon deep like a elephant had ben along, only they's a sight more nor four feet could make! I looked at one or two afore I run, an' I see every one was covered with lines spreadin' aout from one place, like as if big palm-leaf fans - twict or three times as big as any they is - hed of ben paounded dawon into the rud. An' the smell was awful, like what it is around Wizard Whateley's ol' haouse...'

Here he faltered, and seemed to shiver afresh with the fright that had sent him flying home. Mrs Corey, unable to extract more information, began telephoning the neighbours; thus starting on its rounds the overture of panic that heralded the major terrors. When she got Sally Sawyer, housekeeper at Seth Bishop's, the nearest place to Whateley's, it became her turn to listen instead of transmit; for Sally's boy Chauncey, who slept poorly, had been up on the hill towards Whateley's, and had dashed back in terror after one look at the place, and at the pasturage where Mr Bishop's cows had been left out all night.

'Yes, Mis' Corey,' came Sally's tremulous voice over the party wire, 'Cha'ncey he just come back a-postin', an' couldn't half talk fer bein' scairt! He says Ol' Whateley's house is all bowed up, with timbers scattered raound like they'd ben dynamite inside; only the bottom floor ain't through, but is all covered with a kind o' tar-like stuff that smells awful an' drips daown offen the aidges onto the graoun' whar the side timbers is blowed away. An' they's awful kinder marks in the yard, tew - great raound marks bigger raound than a hogshead, an' all sticky with stuff like is on the browed-up haouse. Cha'ncey he says they leads off into the medders, whar a great swath wider'n a barn is matted daown, an' all the stun walls tumbled everywhichway wherever it goes.

'An' he says, says he, Mis' Corey, as haow he sot to look fer Seth's caows, frightened ez he was an' faound 'em in the upper pasture nigh the Devil's Hop Yard in an awful shape. Haff on 'em's clean gone, an' nigh haff o' them that's left is sucked most dry o' blood, with sores on 'em like they's ben on Whateleys cattle ever senct Lavinny's black brat was born. Seth hes gone aout naow to look at 'em, though I'll vaow he won't keer ter git very nigh Wizard Whateley's! Cha'ncey didn't look keerful ter see whar the big matted-daown swath led arter it leff the pasturage, but he says he thinks it p'inted towards the glen rud to the village.

'I tell ye, Mis' Corey, they's suthin' abroad as hadn't orter be abroad, an' I for one think that black Wilbur Whateley, as come to the bad end he deserved, is at the bottom of the breedin' of it. He wa'n't all human hiself, I allus says to everybody; an' I think he an' Ol' Whateley must a raised suthin' in that there nailed-up haouse as ain't even so human as he was. They's allus ben unseen things araound Dunwich - livin' things - as ain't human an' ain't good fer human folks.
'The graoun' was a-talkin' las' night, an' towards mornin' Cha'ncey he heered the whippoorwills so laoud in Col' Spring Glen he couldn't sleep nun. Then he thought he heered another faint-like saound over towards Wizard Whateley's - a kinder rippin' or tearin' o' wood, like some big box er crate was bein' opened fur off. What with this an' that, he didn't git to sleep at all till sunup, an' no sooner was he up this mornin', but he's got to go over to Whateley's an' see what's the matter. He see enough I tell ye, Mis' Corey! This dun't mean no good, an' I think as all the men-folks ought to git up a party an' do suthin'. I know suthin' awful's abaout, an' feel my time is nigh, though only Gawd knows jest what it is.

'Did your Luther take accaount o' whar them big tracks led tew? No? Wal, Mis' Corey, ef they was on the glen rud this side o' the glen, an' ain't got to your haouse yet, I calc'late they must go into the glen itself. They would do that. I allus says Col' Spring Glen ain't no healthy nor decent place. The whippoorwills an' fireflies there never did act like they was creaters o' Gawd, an' they's them as says ye kin hear strange things a-rushin' an' a-talkin' in the air dawon thar ef ye stand in the right place, atween the rock falls an' Bear's Den.'

By that noon fully three-quarters of the men and boys of Dunwich were trooping over the roads and meadows between the newmade Whateley ruins and Cold Spring Glen, examining in horror the vast, monstrous prints, the maimed Bishop cattle, the strange, noisome wreck of the farmhouse, and the bruised, matted vegetation of the fields and roadside. Whatever had burst loose upon the world had assuredly gone down into the great sinister ravine; for all the trees on the banks were bent and broken, and a great avenue had been gouged in the precipice-hanging underbrush. It was as though a house, launched by an avalanche, had slid down through the tangled growths of the almost vertical slope. From below no sound came, but only a distant, undefinable foetor; and it is not to be wondered at that the men preferred to stay on the edge and argue, rather than descend and beard the unknown Cyclopean horror in its lair. Three dogs that were with the party had barked furiously at first, but seemed cowed and reluctant when near the glen. Someone telephoned the news to the Aylesbury Transcript; but the editor, accustomed to wild tales from Dunwich, did no more than concoct a humorous paragraph about it; an item soon afterwards reproduced by the Associated Press.

That night everyone went home, and every house and barn was barricaded as stoutly as possible. Needless to say, no cattle were allowed to remain in open pasturage. About two in the morning a frightful stench and the savage barking of the dogs awakened the household at Elmer Frye's, on the eastern edge of Cold Spring Glen, and all agreed that they could hear a sort of muffled swishing or lapping sound from somewhere outside. Mrs Frye proposed telephoning the neighbours, and Elmer was about to agree when the noise of splintering wood burst in upon their deliberations. It came, apparently, from the barn; and was quickly followed by a hideous screaming and stamping amongst the cattle. The dogs slavered and crouched close to the feet of the fear-numbed family. Frye lit a lantern through force of habit, but knew it would be death to go out into that black farmyard. The children and the women-folk whimpered, kept from screaming by some obscure, vestigial instinct of defence which told them their lives depended on silence. At last the noise of the cattle subsided to a pitiful moaning, and a great snapping, crashing,
and crackling ensued. The Fryes, huddled together in the sitting-room, did not dare to move until the last echoes died away far down in Cold Spring Glen. Then, amidst the dismal moans from the stable and the demoniac piping of the late whippoorwills in the glen, Selina Frye tottered to the telephone and spread what news she could of the second phase of the horror.

The next day all the countryside was in a panic; and cowed, uncommunicative groups came and went where the fiendish thing had occurred. Two titan swaths of destruction stretched from the glen to the Frye farmyard, monstrous prints covered the bare patches of ground, and one side of the old red barn had completely caved in. Of the cattle, only a quarter could be found and identified. Some of these were in curious fragments, and all that survived had to be shot. Earl Sawyer suggested that help be asked from Aylesbury or Arkham, but others maintained it would be of no use. Old Zebulon Whateley, of a branch that hovered about halfway between soundness and decadence, made darkly wild suggestions about rites that ought to be practiced on the hill-tops. He came of a line where tradition ran strong, and his memories of chantings in the great stone circles were not altogether connected with Wilbur and his grandfather.

Darkness fell upon a stricken countryside too passive to organize for real defence. In a few cases closely related families would band together and watch in the gloom under one roof; but in general there was only a repetition of the barricading of the night before, and a futile, ineffective gesture of loading muskets and setting pitchforks handily about. Nothing, however, occurred except some hill noises; and when the day came there were many who hoped that the new horror had gone as swiftly as it had come. There were even bold souls who proposed an offensive expedition down in the glen, though they did not venture to set an actual example to the still reluctant majority.

When night came again the barricading was repeated, though there was less huddling together of families. In the morning both the Frye and the Seth Bishop households reported excitement among the dogs and vague sounds and stenches from afar, while early explorers noted with horror a fresh set of the monstrous tracks in the road skirting Sentinel Hill. As before, the sides of the road showed a bruising indicative of the blasphemously stupendous bulk of the horror; whilst the conformation of the tracks seemed to argue a passage in two directions, as if the moving mountain had come from Cold Spring Glen and returned to it along the same path. At the base of the hill a thirty-foot swath of crushed shrubbery saplings led steeply upwards, and the seekers gasped when they saw that even the most perpendicular places did not deflect the inexorable trail. Whatever the horror was, it could scale a sheer stony cliff of almost complete verticality; and as the investigators climbed round to the hill's summit by safer routes they saw that the trail ended - or rather, reversed - there.

It was here that the Whateleys used to build their hellish fires and chant their hellish rituals by the table-like stone on May Eve and Hallowmass. Now that very stone formed the centre of a vast space thrashed around by the mountainous horror, whilst upon its slightly concave surface was a thick and foetid deposit of the same tarry stickiness observed on the floor of the ruined Whateley farmhouse when the horror escaped. Men looked at one another and muttered. Then they looked down the hill. Apparently the horror had descended by a route much the same as that of its ascent. To speculate was
futile. Reason, logic, and normal ideas of motivation stood confounded. Only old Zebulon, who was not with the group, could have done justice to the situation or suggested a plausible explanation.

Thursday night began much like the others, but it ended less happily. The whippoorwills in the glen had screamed with such unusual persistence that many could not sleep, and about 3 A.M. all the party telephones rang tremulously. Those who took down their receivers heard a fright-mad voice shriek out, 'Help, oh, my Gawd! ...' and some thought a crashing sound followed the breaking off of the exclamation. There was nothing more. No one dared do anything, and no one knew till morning whence the call came. Then those who had heard it called everyone on the line, and found that only the Fryes did not reply. The truth appeared an hour later, when a hastily assembled group of armed men trudged out to the Frye place at the head of the glen. It was horrible, yet hardly a surprise. There were more swaths and monstrous prints, but there was no longer any house. It had caved in like an egg-shell, and amongst the ruins nothing living or dead could be discovered. Only a stench and a tarry stickiness. The Elmer Fryes had been erased from Dunwich.

VIII.

In the meantime a quieter yet even more spiritually poignant phase of the horror had been blackly unwinding itself behind the closed door of a shelf-lined room in Arkham. The curious manuscript record or diary of Wilbur Whateley, delivered to Miskatonic University for translation had caused much worry and bafflement among the experts in language both ancient and modern; its very alphabet, notwithstanding a general resemblance to the heavily-shaded Arabic used in Mesopotamia, being absolutely unknown to any available authority. The final conclusion of the linguists was that the text represented an artificial alphabet, giving the effect of a cipher; though none of the usual methods of cryptographic solution seemed to furnish any clue, even when applied on the basis of every tongue the writer might conceivably have used. The ancient books taken from Whateley's quarters, while absorbingly interesting and in several cases promising to open up new and terrible lines of research among philosophers and men of science, were of no assistance whatever in this matter. One of them, a heavy tome with an iron clasp, was in another unknown alphabet - this one of a very different cast, and resembling Sanskrit more than anything else. The old ledger was at length given wholly into the charge of Dr Armitage, both because of his peculiar interest in the Whateley matter, and because of his wide linguistic learning and skill in the mystical formulae of antiquity and the middle ages.

Armitage had an idea that the alphabet might be something esoterically used by certain forbidden cults which have come down from old times, and which have inherited many forms and traditions from the wizards of the Saracenic world. That question, however, he did not deem vital; since it would be unnecessary to know the origin of the symbols if, as he suspected, they were used as a cipher in a modern language. It was his belief that, considering the great amount of text involved, the writer would scarcely have wished the trouble of using another speech than his own, save perhaps in certain special formulae and incantations. Accordingly he attacked the manuscript with the preliminary assumption that the bulk of it was in English.
Dr Armitage knew, from the repeated failures of his colleagues, that the riddle was a deep and complex one; and that no simple mode of solution could merit even a trial. All through late August he fortified himself with the mass lore of cryptography; drawing upon the fullest resources of his own library, and wading night after night amidst the arcana of Trithemius' *Poligraphia*, Giambattista Porta's *De Furtivis Literarum Notis*, De Vigenere's *Traite des Chiffres*, Falconer's *Cryptomenysis Patefacta*, Davys' and Thicknesse's eighteenth-century treatises, and such fairly modern authorities as Blair, van Marten and Kluber's script itself, and in time became convinced that he had to deal with one of those subtlest and most ingenious of cryptograms, in which many separate lists of corresponding letters are arranged like the multiplication table, and the message built up with arbitrary key-words known only to the initiated. The older authorities seemed rather more helpful than the newer ones, and Armitage concluded that the code of the manuscript was one of great antiquity, no doubt handed down through a long line of mystical experimenters. Several times he seemed near daylight, only to be set back by some unforeseen obstacle. Then, as September approached, the clouds began to clear. Certain letters, as used in certain parts of the manuscript, emerged definitely and unmistakably; and it became obvious that the text was indeed in English.

On the evening of September second the last major barrier gave way, and Dr Armitage read for the first time a continuous passage of Wilbur Whateley's annals. It was in truth a diary, as all had thought; and it was couched in a style clearly showing the mixed occult erudition and general illiteracy of the strange being who wrote it. Almost the first long passage that Armitage deciphered, an entry dated November 26, 1916, proved highly startling and disquieting. It was written, he remembered, by a child of three and a half who looked like a lad of twelve or thirteen.

```
Today learned the Aklo for the Sabaoth (it ran), which did not like, it being answerable from the hill and not from the air. That upstairs more ahead of me than I had thought it would be, and is not like to have much earth brain. Shot Elam Hutchins's collie Jack when he went to bite me, and Elam says he would kill me if he dast. I guess he won't. Grandfather kept me saying the Dho formula last night, and I think I saw the inner city at the 2 magnetic poles. I shall go to those poles when the earth is cleared off, if I can't break through with the Dho-Hna formula when I commit it. They from the air told me at Sabbat that it will be years before I can clear off the earth, and I guess grandfather will be dead then, so I shall have to learn all the angles of the planes and all the formulas between the Yr and the Nhhngr. They from outside will help, but they cannot take body without human blood. That upstairs looks it will have the right cast. I can see it a little when I make the Voorish sign or blow the powder of Ibn Ghazi at it, and it is near like them at May Eve on the Hill. The other face may wear off some. I wonder how I shall look when the earth is cleared and there are no earth beings on it. He that came with the Aklo Sabaoth said I may be transfigured there being much of outside to work on.
```

Morning found Dr Armitage in a cold sweat of terror and a frenzy of wakeful concentration. He had not left the manuscript all night, but sat at his table under the
electric light turning page after page with shaking hands as fast as he could decipher the cryptic text. He had nervously telephoned his wife he would not be home, and when she brought him a breakfast from the house he could scarcely dispose of a mouthful. All that day he read on, now and then halted maddeningly as a reapplication of the complex key became necessary. Lunch and dinner were brought him, but he ate only the smallest fraction of either. Toward the middle of the next night he drowsed off in his chair, but soon woke out of a tangle of nightmares almost as hideous as the truths and menaces to man's existence that he had uncovered.

On the morning of September fourth Professor Rice and Dr Morgan insisted on seeing him for a while, and departed trembling and ashen-grey. That evening he went to bed, but slept only fitfully. Wednesday - the next day - he was back at the manuscript, and began to take copious notes both from the current sections and from those he had already deciphered. In the small hours of that night he slept a little in an easy chair in his office, but was at the manuscript again before dawn. Some time before noon his physician, Dr Hartwell, called to see him and insisted that he cease work. He refused; intimating that it was of the most vital importance for him to complete the reading of the diary and promising an explanation in due course of time. That evening, just as twilight fell, he finished his terrible perusal and sank back exhausted. His wife, bringing his dinner, found him in a half-comatose state; but he was conscious enough to warn her off with a sharp cry when he saw her eyes wander toward the notes he had taken. Weakly rising, he gathered up the scribbled papers and sealed them all in a great envelope, which he immediately placed in his inside coat pocket. He had sufficient strength to get home, but was so clearly in need of medical aid that Dr Hartwell was summoned at once. As the doctor put him to bed he could only mutter over and over again, 'But what, in God's name, can we do?'

Dr Armitage slept, but was partly delirious the next day. He made no explanations to Hartwell, but in his calmer moments spoke of the imperative need of a long conference with Rice and Morgan. His wilder wanderings were very startling indeed, including frantic appeals that something in a boarded-up farmhouse be destroyed, and fantastic references to some plan for the extirpation of the entire human race and all animal and vegetable life from the earth by some terrible elder race of beings from another dimension. He would shout that the world was in danger, since the Elder Things wished to strip it and drag it away from the solar system and cosmos of matter into some other plane or phase of entity from which it had once fallen, vigintillions of aeons ago. At other times he would call for the dreaded Necronomicon and the Daemonolatreia of Remigius, in which he seemed hopeful of finding some formula to check the peril he conjured up.

'Stop them, stop them!' he would shout. 'Those Whateleys meant to let them in, and the worst of all is left! Tell Rice and Morgan we must do something - it's a blind business, but I know how to make the powder... It hasn't been fed since the second of August, when Wilbur came here to his death, and at that rate...' But Armitage had a sound physique despite his seventy-three years, and slept off his disorder that night without developing any real fever. He woke late Friday, clear of head, though sober with a gnawing fear and tremendous sense of responsibility. Saturday afternoon he felt able to go over to the library and summon Rice and Morgan for a
conference, and the rest of that day and evening the three men tortured their brains in the wildest speculation and the most desperate debate. Strange and terrible books were drawn voluminously from the stack shelves and from secure places of storage; and diagrams and formulae were copied with feverish haste and in bewildering abundance. Of scepticism there was none. All three had seen the body of Wilbur Whateley as it lay on the floor in a room of that very building, and after that not one of them could feel even slightly inclined to treat the diary as a madman's raving.

Opinions were divided as to notifying the Massachusetts State Police, and the negative finally won. There were things involved which simply could not be believed by those who had not seen a sample, as indeed was made clear during certain subsequent investigations. Late at night the conference disbanded without having developed a definite plan, but all day Sunday Armitage was busy comparing formulae and mixing chemicals obtained from the college laboratory. The more he reflected on the hellish diary, the more he was inclined to doubt the efficacy of any material agent in stamping out the entity which Wilbur Whateley had left behind him - the earth threatening entity which, unknown to him, was to burst forth in a few hours and become the memorable Dunwich horror.

Monday was a repetition of Sunday with Dr Armitage, for the task in hand required an infinity of research and experiment. Further consultations of the monstrous diary brought about various changes of plan, and he knew that even in the end a large amount of uncertainty must remain. By Tuesday he had a definite line of action mapped out, and believed he would try a trip to Dunwich within a week. Then, on Wednesday, the great shock came. Tucked obscurely away in a corner of the *Arkham Advertiser* was a facetious little item from the Associated Press, telling what a record-breaking monster the bootleg whisky of Dunwich had raised up. Armitage, half stunned, could only telephone for Rice and Morgan. Far into the night they discussed, and the next day was a whirlwind of preparation on the part of them all. Armitage knew he would be meddling with terrible powers, yet saw that there was no other way to annul the deeper and more malign meddling which others had done before him.

IX.

Friday morning Armitage, Rice, and Morgan set out by motor for Dunwich, arriving at the village about one in the afternoon. The day was pleasant, but even in the brightest sunlight a kind of quiet dread and portent seemed to hover about the strangely domed hills and the deep, shadowy ravines of the stricken region. Now and then on some mountain top a gaunt circle of stones could be glimpsed against the sky. From the air of hushed fright at Osborn's store they knew something hideous had happened, and soon learned of the annihilation of the Elmer Frye house and family. Throughout that afternoon they rode around Dunwich, questioning the natives concerning all that had occurred, and seeing for themselves with rising pangs of horror the drear Frye ruins with their lingering traces of the tarry stickiness, the blasphemous tracks in the Frye yard, the wounded Seth Bishop cattle, and the enormous swaths of disturbed vegetation in various places. The trail up and down Sentinel Hill seemed to Armitage of almost cataclysmic significance, and he looked long at the sinister altar-like stone on the summit.
At length the visitors, apprised of a party of State Police which had come from Aylesbury that morning in response to the first telephone reports of the Frye tragedy, decided to seek out the officers and compare notes as far as practicable. This, however, they found more easily planned than performed; since no sign of the party could be found in any direction. There had been five of them in a car, but now the car stood empty near the ruins in the Frye yard. The natives, all of whom had talked with the policemen, seemed at first as perplexed as Armitage and his companions. Then old Sam Hutchins thought of something and turned pale, nudging Fred Farr and pointing to the dank, deep hollow that yawned close by.

'Gawd,' he gasped, 'I telled 'em not ter go daown into the glen, an' I never thought nobody'd dew it with them tracks an' that smell an' the whippoorwills a-screechin' daown thar in the dark o' noonday...'

A cold shudder ran through natives and visitors alike, and every ear seemed strained in a kind of instinctive, unconscious listening. Armitage, now that he had actually come upon the horror and its monstrous work, trembled with the responsibility he felt to be his. Night would soon fall, and it was then that the mountainous blasphemy lumbered upon its eldritch course. *Negotium perambuians in tenebris*... The old librarian rehearsed the formulae he had memorized, and clutched the paper containing the alternative one he had not memorized. He saw that his electric flashlight was in working order. Rice, beside him, took from a valise a metal sprayer of the sort used in combating insects; whilst Morgan uncased the big-game rifle on which he relied despite his colleague's warnings that no material weapon would be of help.

Armitage, having read the hideous diary, knew painfully well what kind of a manifestation to expect; but he did not add to the fright of the Dunwich people by giving any hints or clues. He hoped that it might be conquered without any revelation to the world of the monstrous thing it had escaped. As the shadows gathered, the natives commenced to disperse homeward, anxious to bar themselves indoors despite the present evidence that all human locks and bolts were useless before a force that could bend trees and crush houses when it chose. They shook their heads at the visitors' plan to stand guard at the Frye ruins near the glen; and, as they left, had little expectancy of ever seeing the watchers again.

There were rumblings under the hills that night, and the whippoorwills piped threateningly. Once in a while a wind, sweeping up out of Cold Spring Glen, would bring a touch of ineffable foetor to the heavy night air; such a foetor as all three of the watchers had smelled once before, when they stood above a dying thing that had passed for fifteen years and a half as a human being. But the looked-for terror did not appear. Whatever was down there in the glen was biding its time, and Armitage told his colleagues it would be suicidal to try to attack it in the dark.

Morning came wanly, and the night-sounds ceased. It was a grey, bleak day, with now and then a drizzle of rain; and heavier and heavier clouds seemed to be piling themselves up beyond the hills to the north-west. The men from Arkham were undecided what to do. Seeking shelter from the increasing rainfall beneath one of the few undestroyed Frye outbuildings, they debated the wisdom of waiting, or of taking the aggressive and going
down into the glen in quest of their nameless, monstrous quarry. The downpour waxed in heaviness, and distant peals of thunder sounded from far horizons. Sheet lightning shimmered, and then a forky bolt flashed near at hand, as if descending into the accursed glen itself. The sky grew very dark, and the watchers hoped that the storm would prove a short, sharp one followed by clear weather.

It was still gruesomely dark when, not much over an hour later, a confused babel of voices sounded down the road. Another moment brought to view a frightened group of more than a dozen men, running, shouting, and even whimpering hysterically. Someone in the lead began sobbing out words, and the Arkham men started violently when those words developed a coherent form.

'Oh, my Gawd, my Gawd,' the voice choked out. 'It's a-goin' agin, an' this time by day! It's aout - it's aout an' a-movin' this very minute, an' only the Lord knows when it'll be on us all!'

The speaker panted into silence, but another took up his message.

'Nigh on a haour ago Zeb Whatleley here heered the 'phone a-ringing, an' it was Mis' Corey, George's wife, that lives daown by the junction. She says the hired boy Luther was aout drivin' in the caows from the storm arter the big bolt, when he see all the trees a-bendin' at the maouth o' the glen - opposite side ter this - an' smelt the same awful smell like he smelt when he faound the big tracks las' Monday mornin'. An' she says he says they was a swishin' lappin' saound, more nor what the bendin' trees an' bushes could make, an' all on a suddent the trees along the rud begun ter git pushed one side, an' they was a awful stompin' an' splashin' in the mud. But mind ye, Luther he didn't see nothin' at all, only just the bendin' trees an' bushes could make.

'Cause maybe they was a moded o' the wind, an' maybe the wind he woulda got a turn to pick up on its waay.

' أنع' then she let aout a turrible yell, an' says the shed daown the rud had jest caved in like the storm bed blewed it over, only the wind w'an't strong enough to dew that. Everybody
was a-listenin', an' we could hear lots o' folks on the wire a-gaspin'. All to onct Sally she yelled again, an' says the front yard picket fence hed just crumbled up, though they wa'n't no sign o' what done it. Then everybody on the line could hear Cha'ncey an' old Seth Bishop a-yellin' tew, an' Sally was shriekin' aout that suthin' heavy hed struck the haouse - not lightnin' nor nothin', but suthin' heavy again' the front, that kep' 'a-lauchin' itself agin an' agin, though ye couldn't see nothin' aout the front winders. An' then... an' then...

Lines of fright deepened on every face; and Armitage, shaken as he was, had barely poise enough to prompt the speaker.

'An' then.... Sally she yelled aout, "O help, the haouse is a-cavin' in... an' on the wire we could hear a turrible crashin' an' a hull flock o' screaming... jes like when Elmer Frye's place was took, only wuss...' The man paused, and another of the crowd spoke.

'That's all - not a saound nor squeak over the 'phone arter that. Jest still-like. We that heerd it got aout Fords an' wagons an' rounded up as many able-bodied men-folks as we could git, at Corey's place, an' come up here ter see what yew thought best ter dew. Not but what I think it's the Lord's jedgment fer our iniquities, that no mortal kin ever set aside.'

Armitage saw that the time for positive action had come, and spoke decisively to the faltering group of frightened rustics.

'We must follow it, boys.' He made his voice as reassuring as possible. 'I believe there's a chance of putting it out of business. You men know that those Whateleys were wizards - well, this thing is a thing of wizardry, and must be put down by the same means. I've seen Wilbur Whateley's diary and read some of the strange old books he used to read; and I think I know the right kind of spell to recite to make the thing fade away. Of course, one can't be sure, but we can always take a chance. It's invisible - I knew it would be - but there's powder in this long-distance sprayer that might make it show up for a second. Later on we'll try it. It's a frightful thing to have alive, but it isn't as bad as what Wilbur would have let in if he'd lived longer. You'll never know what the world escaped. Now we've only this one thing to fight, and it can't multiply. It can, though, do a lot of harm; so we mustn't hesitate to rid the community of it.

'We must follow it - and the way to begin is to go to the place that has just been wrecked. Let somebody lead the way - I don't know your roads very well, but I've an idea there might be a shorter cut across lots. How about it?'

The men shuffled about a moment, and then Earl Sawyer spoke softly, pointing with a grimy finger through the steadily lessening rain.

'I guess ye kin git to Seth Bishop's quickest by cuttin' across the lower medder here, wadin' the brook at the low place, an' climbin' through Carrier's mowin' an' the timber-lot beyont. That comes aout on the upper rud mighty nigh Seth's - a leetle t'other side.'
Armitage, with Rice and Morgan, started to walk in the direction indicated; and most of
the natives followed slowly. The sky was growing lighter, and there were signs that the
storm had worn itself away. When Armitage inadvertently took a wrong direction, Joe
Osborn warned him and walked ahead to show the right one. Courage and confidence
were mounting, though the twilight of the almost perpendicular wooded hill which lay
towards the end of their short cut, and among whose fantastic ancient trees they had to
scramble as if up a ladder, put these qualities to a severe test.

At length they emerged on a muddy road to find the sun coming out. They were a little
beyond the Seth Bishop place, but bent trees and hideously unmistakable tracks showed
what had passed by. Only a few moments were consumed in surveying the ruins just
round the bend. It was the Frye incident all over again, and nothing dead or living was
found in either of the collapsed shells which had been the Bishop house and barn. No one
cared to remain there amidst the stench and tarry stickiness, but all turned instinctively to
the line of horrible prints leading on towards the wrecked Whateley farmhouse and the
altar-crowned slopes of Sentinel Hill.

As the men passed the site of Wilbur Whateley's abode they shuddered visibly, and
seemed again to mix hesitancy with their zeal. It was no joke tracking down something as
big as a house that one could not see, but that had all the vicious malevolence of a
daemon. Opposite the base of Sentinel Hill the tracks left the road, and there was a fresh
bending and matting visible along the broad swath marking the monster's former route to
and from the summit.

Armitage produced a pocket telescope of considerable power and scanned the steep green
side of the hill. Then he handed the instrument to Morgan, whose sight was keener. After
a moment of gazing Morgan cried out sharply, passing the glass to Earl Sawyer and
indicating a certain spot on the slope with his finger. Sawyer, as clumsy as most non-
users of optical devices are, fumbled a while; but eventually focused the lenses with
Armitage's aid. When he did so his cry was less restrained than Morgan's had been.

'Gawd almighty, the grass an' bushes is a'movin'! It's a-goin' up - slow-like - creepin'- up
ter the top this minute, heaven only knows what fur!'

Then the germ of panic seemed to spread among the seekers. It was one thing to chase the
nameless entity, but quite another to find it. Spells might be all right - but suppose they
weren't? Voices began questioning Armitage about what he knew of the thing, and no
reply seemed quite to satisfy. Everyone seemed to feel himself in close proximity to
phases of Nature and of being utterly forbidden and wholly outside the sane experience of
mankind.

X.

In the end the three men from Arkham - old, white-bearded Dr Armitage, stocky, iron-
grey Professor Rice, and lean, youngish Dr Morgan, ascended the mountain alone. After
much patient instruction regarding its focusing and use, they left the telescope with the
frightened group that remained in the road; and as they climbed they were watched
closely by those among whom the glass was passed round. It was hard going, and
Armitage had to be helped more than once. High above the toiling group the great swath trembled as its hellish maker repassed with snail-like deliberateness. Then it was obvious that the pursuers were gaining.

Curtis Whateley - of the undecayed branch - was holding the telescope when the Arkham party detoured radically from the swath. He told the crowd that the men were evidently trying to get to a subordinate peak which overlooked the swath at a point considerably ahead of where the shrubbery was now bending. This, indeed, proved to be true; and the party were seen to gain the minor elevation only a short time after the invisible blasphemy had passed it.

Then Wesley Corey, who had taken the glass, cried out that Armitage was adjusting the sprayer which Rice held, and that something must be about to happen. The crowd stirred uneasily, recalling that his sprayer was expected to give the unseen horror a moment of visibility. Two or three men shut their eyes, but Curtis Whateley snatched back the telescope and strained his vision to the utmost. He saw that Rice, from the party's point of advantage above and behind the entity, had an excellent chance of spreading the potent powder with marvellous effect.

Those without the telescope saw only an instant's flash of grey cloud - a cloud about the size of a moderately large building - near the top of the mountain. Curtis, who held the instrument, dropped it with a piercing shriek into the ankle-deep mud of the road. He reeled, and would have crumbled to the ground had not two or three others seized and steadied him. All he could do was moan half-inaudibly.

'Oh, oh, great Gawd... that... that...'

There was a pandemonium of questioning, and only Henry Wheeler thought to rescue the fallen telescope and wipe it clean of mud. Curtis was past all coherence, and even isolated replies were almost too much for him.

'Bigger'n a barn... all made o' squirmin' ropes... hull thing sort o' shaped like a hen's egg bigger'n anything with dozens o' legs like hogs-heads that haff shut up when they step... nothin' solid abaout it - all like jelly, an' made o' sep'rit wrigglin' ropes pushed clost together... great bulgin' eyes all over it... ten or twenty maouths or trunks a-stickin' aout all along the sides, big as stove-pipes an all a-tossin' an openin' an' shuttin'... all grey, with kinder blue or purple rings... an' Gawd it Heaven - that haff face on top...'

This final memory, whatever it was, proved too much for poor Curtis; and he collapsed completely before he could say more. Fred Farr and Will Hutchins carried him to the roadside and laid him on the damp grass. Henry Wheeler, trembling, turned the rescued telescope on the mountain to see what he might. Through the lenses were discernible three tiny figures, apparently running towards the summit as fast as the steep incline allowed. Only these - nothing more. Then everyone noticed a strangely unseasonable noise in the deep valley behind, and even in the underbrush of Sentinel Hill itself. It was the piping of unnumbered whippoorwills, and in their shrill chorus there seemed to lurk a note of tense and evil expectancy.
Earl Sawyer now took the telescope and reported the three figures as standing on the
topmost ridge, virtually level with the altar-stone but at a considerable distance from it.
One figure, he said, seemed to be raising its hands above its head at rhythmic intervals;
and as Sawyer mentioned the circumstance the crowd seemed to hear a faint, half-musical
sound from the distance, as if a loud chant were accompanying the gestures. The weird
silhouette on that remote peak must have been a spectacle of infinite grotesqueness and
impressiveness, but no observer was in a mood for aesthetic appreciation. 'I guess he's
sayin' the spell,' whispered Wheeler as he snatched back the telescope. The
whippoorwills were piping wildly, and in a singularly curious irregular rhythm quite
unlike that of the visible ritual.

Suddenly the sunshine seemed to lessen without the intervention of any discernible cloud.
It was a very peculiar phenomenon, and was plainly marked by all. A rumbling sound
seemed brewing beneath the hills, mixed strangely with a concordant rumbling which
clearly came from the sky. Lightning flashed aloft, and the wondering crowd looked in
vain for the portents of storm. The chanting of the men from Arkham now became
unmistakable, and Wheeler saw through the glass that they were all raising their arms in
the rhythmic incantation. From some farmhouse far away came the frantic barking of
dogs.

The change in the quality of the daylight increased, and the crowd gazed about the
horizon in wonder. A purplish darkness, born of nothing more than a spectral deepenning
of the sky's blue, pressed down upon the rumbling hills. Then the lightning flashed again,
somewhat brighter than before, and the crowd fancied that it had showed a certain
mistiness around the altar-stone on the distant height. No one, however, had been using
the telescope at that instant. The whippoorwills continued their irregular pulsation, and
the men of Dunwich braced themselves tensely against some imponderable menace with
which the atmosphere seemed surcharged.

Without warning came those deep, cracked, raucous vocal sounds which will never leave
the memory of the stricken group who heard them. Not from any human throat were they
born, for the organs of man can yield no such acoustic perversions. Rather would one
have said they came from the pit itself, had not their source been so unmistakably the
altar-stone on the peak. It is almost erroneous to call them sounds at all, since so much of
their ghastly, infra-bass timbre spoke to dim seats of consciousness and terror far subtler
than the ear; yet one must do so, since their form was indisputably though vaguely that of
half-articulate words. They were loud - loud as the rumblings and the thunder above
which they echoed - yet did they come from no visible being. And because imagination
might suggest a conjectural source in the world of non-visible beings, the huddled crowd
at the mountain's base huddled still closer, and winced as if in expectation of a blow.

'Ygnaiih... ygnaiih... thflthkh'ngha.... Yog-Sothoth ...' rang the hideous croaking out of
space. 'Y'bthnk... h'ehye - n'grkdl'lh...'

The speaking impulse seemed to falter here, as if some frightful psychic struggle were
going on. Henry Wheeler strained his eye at the telescope, but saw only the three
grotesquely silhouetted human figures on the peak, all moving their arms furiously in
strange gestures as their incantation drew near its culmination. From what black wells of
Acherontic fear or feeling, from what unplumbed gulfs of extra-cosmic consciousness or obscure, long-latent heredity, were those half-articulate thunder-croakings drawn? Presently they began to gather renewed force and coherence as they grew in stark, utter, ultimate frenzy.

'Eh-y-ya-ya-yahaah - e'yayaaaaa... ngh'aaaa... ngh'aaa... h'yuh... h'yuh... HELP! HELP! ...ff - ff - ff - FATHER! FATHER! YOG-SOTHOTH!...'

But that was all. The pallid group in the road, still reeling at the indisputably English syllables that had poured thickly and thunderously down from the frantic vacancy beside that shocking altar-stone, were never to hear such syllables again. Instead, they jumped violently at the terrific report which seemed to rend the hills; the deafening, cataclysmic peal whose source, be it inner earth or sky, no hearer was ever able to place. A single lightning bolt shot from the purple zenith to the altar-stone, and a great tidal wave of viewless force and indescribable stench swept down from the hill to all the countryside. Trees, grass, and under-brush were whipped into a fury; and the frightened crowd at the mountain's base, weakened by the lethal foetor that seemed about to asphyxiate them, were almost hurled off their feet. Dogs howled from the distance, green grass and foliage wilted to a curious, sickly yellow-grey, and over field and forest were scattered the bodies of dead whippoorwills.

The stench left quickly, but the vegetation never came right again. To this day there is something queer and unholy about the growths on and around that fearsome hill. Curtis Whateley was only just regaining consciousness when the Arkham men came slowly down the mountain in the beams of a sunlight once more brilliant and untainted. They were grave and quiet, and seemed shaken by memories and reflections even more terrible than those which had reduced the group of natives to a state of cowed quivering. In reply to a jumble of questions they only shook their heads and reaffirmed one vital fact.

'The thing has gone for ever,' Armitage said. 'It has been split up into what it was originally made of, and can never exist again. It was an impossibility in a normal world. Only the least fraction was really matter in any sense we know. It was like its father - and most of it has gone back to him in some vague realm or dimension outside our material universe; some vague abyss out of which only the most accursed rites of human blasphemy could ever have called him for a moment on the hills.'

There was a brief silence, and in that pause the scattered senses of poor Curtis Whateley began to knit back into a sort of continuity; so that he put his hands to his head with a moan. Memory seemed to pick itself up where it had left off, and the horror of the sight that had prostrated him burst in upon him again.

'Oh, oh, my Gawd, that haff face - that haff face on top of it... that face with the red eyes an' crinkly albino hair, an' no chin, like the Whateleys... It was a octopus, centipede, spider kind o' thing, but they was a haff-shaped man's face on top of it, an' it looked like Wizard Whateley's, only it was yards an' yards acrost....'
He paused exhausted, as the whole group of natives stared in a bewilderment not quite crystallized into fresh terror. Only old Zebulon Whateley, who wanderingly remembered ancient things but who had been silent heretofore, spoke aloud.

'Fifteen year' gone,' he rambled, 'I heered Ol' Whateley say as haow some day we'd hear a child o' Lavinny's a-callin' its father's name on the top o' Sentinel Hill...'

But Joe Osborn interrupted him to question the Arkham men anew.

'What was it, anyhaow, an' haowever did young Wizard Whateley call it aout o' the air it come from?'

Armitage chose his words very carefully.

'It was - well, it was mostly a kind of force that doesn't belong in our part of space; a kind of force that acts and grows and shapes itself by other laws than those of our sort of Nature. We have no business calling in such things from outside, and only very wicked people and very wicked cults ever try to. There was some of it in Wilbur Whateley himself - enough to make a devil and a precocious monster of him, and to make his passing out a pretty terrible sight. I'm going to burn his accursed diary, and if you men are wise you'll dynamite that altar-stone up there, and pull down all the rings of standing stones on the other hills. Things like that brought down the beings those Whateleys were so fond of - the beings they were going to let in tangibly to wipe out the human race and drag the earth off to some nameless place for some nameless purpose.

'But as to this thing we've just sent back - the Whateleys raised it for a terrible part in the doings that were to come. It grew fast and big from the same reason that Wilbur grew fast and big - but it beat him because it had a greater share of the outsideness in it. You needn't ask how Wilbur called it out of the air. He didn't call it out. It was his twin brother, but it looked more like the father than he did.'
The Haunter Of The Dark
by H. P. Lovecraft

Written Nov 1935

Published December 1936 in Weird Tales, Vol. 28, No. 5, p. 538-53.

I have seen the dark universe yawning
Where the black planets roll without aim,
Where they roll in their horror unheeded,
Without knowledge or lustre or name.

Cautious investigators will hesitate to challenge the common belief that Robert Blake was killed by lightning, or by some profound nervous shock derived from an electrical discharge. It is true that the window he faced was unbroken, but nature has shown herself capable of many freakish performances. The expression on his face may easily have arisen from some obscure muscular source unrelated to anything he saw, while the entries in his diary are clearly the result of a fantastic imagination aroused by certain local superstitions and by certain old matters he had uncovered. As for the anomalous conditions at the deserted church of Federal Hill - the shrewd analyst is not slow in attributing them to some charlatanry, conscious or unconscious, with at least some of which Blake was secretly connected.

For after all, the victim was a writer and painter wholly devoted to the field of myth, dream, terror, and superstition, and avid in his quest for scenes and effects of a bizarre, spectral sort. His earlier stay in the city - a visit to a strange old man as deeply given to occult and forbidden lore as he - had ended amidst death and flame, and it must have been some morbid instinct which drew him back from his home in Milwaukee. He may have known of the old stories despite his statements to the contrary in the diary, and his death may have nipped in the bud some stupendous hoax destined to have a literary reflection.

Among those, however, who have examined and correlated all this evidence, there remain several who cling to less rational and commonplace theories. They are inclined to take much of Blake's diary at its face value, and point significantly to certain facts such as the undoubted genuineness of the old church record, the verified existence of the disliked and unorthodox Starry Wisdom sect prior to 1877, the recorded disappearance of an inquisitive reporter named Edwin M. Lillibridge in 1893, and - above all - the look of monstrous, transfiguring fear on the face of the young writer when he died. It was one of these believers who, moved to fanatical extremes, threw into the bay the curiously angled stone and its strangely adorned metal box found in the old church steeple - the black windowless steeple, and not the tower where Blake's diary said those things originally were. Though widely censured both officially and unofficially, this man - a reputable physician with a taste for odd folklore - averred that he had rid the earth of something too dangerous to rest upon it.
Between these two schools of opinion the reader must judge for himself. The papers have given the tangible details from a sceptical angle, leaving for others the drawing of the picture as Robert Blake saw it - or thought he saw it - or pretended to see it. Now studying the diary closely, dispassionately, and at leisure, let us summarize the dark chain of events from the expressed point of view of their chief actor.

Young Blake returned to Providence in the winter of 1934-5, taking the upper floor of a venerable dwelling in a grassy court off College Street - on the crest of the great eastward hill near the Brown University campus and behind the marble John Hay Library. It was a cosy and fascinating place, in a little garden oasis of village-like antiquity where huge, friendly cats sunned themselves atop a convenient shed. The square Georgian house had a monitor roof, classic doorway with fan carving, small-paned windows, and all the other earmarks of early nineteenth century workmanship. Inside were six-panelled doors, wide floor-boards, a curving colonial staircase, white Adam-period mantels, and a rear set of rooms three steps below the general level.

Blake's study, a large southwest chamber, overlooked the front garden on one side, while its west windows - before one of which he had his desk - faced off from the brow of the hill and commanded a splendid view of the lower town's outspread roofs and of the mystical sunsets that flamed behind them. On the far horizon were the open countryside's purple slopes. Against these, some two miles away, rose the spectral hump of Federal Hill, bristling with huddled roofs and steeples whose remote outlines wavered mysteriously, taking fantastic forms as the smoke of the city swirled up and enmeshed them. Blake had a curious sense that he was looking upon some unknown, ethereal world which might or might not vanish in dream if ever he tried to seek it out and enter it in person.

Having sent home for most of his books, Blake bought some antique furniture suitable for his quarters and settled down to write and paint - living alone, and attending to the simple housework himself. His studio was in a north attic room, where the panes of the monitor roof furnished admirable lighting. During that first winter he produced five of his best-known short stories - *The Burrower Beneath*, *The Stairs in the Crypt*, *Shaggai*, *In the Vale of Pnath*, and *The Feast from the Stars* - and painted seven canvases; studies of nameless, unhuman monsters, and profoundly alien, non-terrestrial landscapes.

At sunset he would often sit at his desk and gaze dreamily off at the outspread west - the dark towers of Memorial Hall just below, the Georgian court-house belfry, the lofty pinnacles of the downtown section, and that shimmering, spire-crowned mound in the distance whose unknown streets and labyrinthine gables so potently provoked his fancy. From his few local acquaintances he learned that the far-off slope was a vast Italian quarter, though most of the houses were remnant of older Yankee and Irish days. Now and then he would train his field-glasses on that spectral, unreachable world beyond the curling smoke; picking out individual roofs and chimneys and steeples, and speculating upon the bizarre and curious mysteries they might house. Even with optical aid Federal Hill seemed somehow alien, half fabulous, and linked to the unreal, intangible marvels of Blake's own tales and pictures. The feeling would persist long after the hill had faded into the violet, lamp-starred twilight, and the court-house floodlights and the red Industrial Trust beacon had blazed up to make the night grotesque.
Of all the distant objects on Federal Hill, a certain huge, dark church most fascinated Blake. It stood out with especial distinctness at certain hours of the day, and at sunset the great tower and tapering steeple loomed blackly against the flaming sky. It seemed to rest on especially high ground; for the grimy façade, and the obliquely seen north side with sloping roof and the tops of great pointed windows, rose boldly above the tangle of surrounding ridgepoles and chimney-pots. Peculiarly grim and austere, it appeared to be built of stone, stained and weathered with the smoke and storms of a century and more. The style, so far as the glass could show, was that earliest experimental form of Gothic revival which preceded the stately Upjohn period and held over some of the outlines and proportions of the Georgian age. Perhaps it was reared around 1810 or 1815.

As months passed, Blake watched the far-off, forbidding structure with an oddly mounting interest. Since the vast windows were never lighted, he knew that it must be vacant. The longer he watched, the more his imagination worked, till at length he began to fancy curious things. He believed that a vague, singular aura of desolation hovered over the place, so that even the pigeons and swallows shunned its smoky eaves. Around other towers and belfries his glass would reveal great flocks of birds, but here they never rested. At least, that is what he thought and set down in his diary. He pointed the place out to several friends, but none of them had even been on Federal Hill or possessed the faintest notion of what the church was or had been.

In the spring a deep restlessness gripped Blake. He had begun his long-planned novel - based on a supposed survival of the witch-cult in Maine - but was strangely unable to make progress with it. More and more he would sit at his westward window and gaze at the distant hill and the black, frowning steeple shunned by the birds. When the delicate leaves came out on the garden boughs the world was filled with a new beauty, but Blake's restlessness was merely increased. It was then that he first thought of crossing the city and climbing bodily up that fabulous slope into the smoke-wreathed world of dream.

Late in April, just before the aeon-shadowed Walpurgis time, Blake made his first trip into the unknown. Plodding through the endless downtown streets and the bleak, decayed squares beyond, he came finally upon the ascending avenue of century-worn steps, sagging Doric porches, and blear-paned cupolas which he felt must lead up to the long-known, unreachable world beyond the mists. There were dingy blue-and-white street signs which meant nothing to him, and presently he noted the strange, dark faces of the drifting crowds, and the foreign signs over curious shops in brown, decade-weathered buildings. Nowhere could he find any of the objects he had seen from afar; so that once more he half fancied that the Federal Hill of that distant view was a dream-world never to be trod by living human feet.

Now and then a battered church façade or crumbling spire came in sight, but never the blackened pile that he sought. When he asked a shopkeeper about a great stone church the man smiled and shook his head, though he spoke English freely. As Blake climbed higher, the region seemed stranger and stranger, with bewildering mazes of brooding brown alleys leading eternally off to the south. He crossed two or three broad avenues, and once thought he glimpsed a familiar tower. Again he asked a merchant about the massive church of stone, and this time he could have sworn that the plea of ignorance
was feigned. The dark man's face had a look of fear which he tried to hide, and Blake saw
him make a curious sign with his right hand.

Then suddenly a black spire stood out against the cloudy sky on his left, above the tiers of
brown roofs lining the tangled southerly alleys. Blake knew at once what it was, and
plunged toward it through the squalid, unpaved lanes that climbed from the avenue.
Twice he lost his way, but he somehow dared not ask any of the patriarchs or housewives
who sat on their doorsteps, or any of the children who shouted and played in the mud of
the shadowy lanes.

At last he saw the tower plain against the southwest, and a huge stone bulk rose darkly at
the end of an alley. Presently he stood in a wind-swept open square, quaintly
cobblestoned, with a high bank wall on the farther side. This was the end of his quest; for
upon the wide, iron-railed, weed-grown plateau which the wall supported - a separate,
lesser world raised fully six feet above the surrounding streets - there stood a grim, titan
bulk whose identity, despite Blake's new perspective, was beyond dispute.

The vacant church was in a state of great decrepitude. Some of the high stone buttresses
had fallen, and several delicate finials lay half lost among the brown, neglected weeds
and grasses. The sooty Gothic windows were largely unbroken, though many of the stone
mullions were missing. Blake wondered how the obscurely painted panes could have
survived so well, in view of the known habits of small boys the world over. The massive
doors were intact and tightly closed. Around the top of the bank wall, fully enclosing the
grounds, was a rusty iron fence whose gate - at the head of a flight of steps from the
square - was visibly padlocked. The path from the gate to the building was completely
overgrown. Desolation and decay hung like a pall above the place, and in the birdless
eaves and black, ivyless walls Blake felt a touch of the dimly sinister beyond his power to
define.

There were very few people in the square, but Blake saw a policeman at the northerly end
and approached him with questions about the church. He was a great wholesome
Irishman, and it seemed odd that he would do little more than make the sign of the cross
and mutter that people never spoke of that building. When Blake pressed him he said
very hurriedly that the Italian priest warned everybody against it, vowing that a
monstrous evil had once dwelt there and left its mark. He himself had heard dark
whispers of it from his father, who recalled certain sounds and rumours from his
boyhood.

There had been a bad sect there in the old days - an outlaw sect that called up awful
things from some unknown gulf of night. It had taken a good priest to exorcise what had
come, though there did be those who said that merely the light could do it. If Father
O'Malley were alive there would be many the thing he could tell. But now there was
nothing to do but let it alone. It hurt nobody now, and those that owned it were dead or
far away. They had run away like rats after the threatening talk in '77, when people began
to mind the way folks vanished now and then in the neighbourhood. Some day the city
would step in and take the property for lack of heirs, but little good would come of
anybody's touching it. Better it be left alone for the years to topple, lest things be stirred
that ought to rest for ever in their black abyss.
After the policeman had gone Blake stood staring at the sullen steepled pile. It excited him to find that the structure seemed as sinister to others as to him, and he wondered what grain of truth might lie behind the old tales the bluecoat had repeated. Probably they were mere legends evoked by the evil look of the place, but even so, they were like a strange coming to life of one of his own stories.

The afternoon sun came out from behind dispersing clouds, but seemed unable to light up the stained, sooty walls of the old temple that towered on its high plateau. It was odd that the green of spring had not touched the brown, withered growths in the raised, iron-fenced yard. Blake found himself edging nearer the raised area and examining the bank wall and rusted fence for possible avenues of ingress. There was a terrible lure about the blackened fane which was not to be resisted. The fence had no opening near the steps, but round on the north side were some missing bars. He could go up the steps and walk round on the narrow coping outside the fence till he came to the gap. If the people feared the place so wildly, he would encounter no interference.

He was on the embankment and almost inside the fence before anyone noticed him. Then, looking down, he saw the few people in the square edging away and making the same sign with their right hands that the shopkeeper in the avenue had made. Several windows were slammed down, and a fat woman darted into the street and pulled some small children inside a rickety, unpainted house. The gap in the fence was very easy to pass through, and before long Blake found himself wading amidst the rotting, tangled growths of the deserted yard. Here and there the worn stump of a headstone told him that there had once been burials in the field; but that, he saw, must have been very long ago. The sheer bulk of the church was oppressive now that he was close to it, but he conquered his mood and approached to try the three great doors in the façade. All were securely locked, so he began a circuit of the Cyclopean building in quest of some minor and more penetrable opening. Even then he could not be sure that he wished to enter that haunt of desertion and shadow, yet the pull of its strangeness dragged him on automatically.

A yawning and unprotected cellar window in the rear furnished the needed aperture. Peering in, Blake saw a subterrene gulf of cobwebs and dust faintly litten by the western sun's filtered rays. Debris, old barrels, and ruined boxes and furniture of numerous sorts met his eye, though over everything lay a shroud of dust which softened all sharp outlines. The rusted remains of a hot-air furnace showed that the building had been used and kept in shape as late as mid-Victorian times.

Acting almost without conscious initiative, Blake crawled through the window and let himself down to the dust-carpeted and debris-strewn concrete floor. The vaulted cellar was a vast one, without partitions; and in a corner far to the right, amid dense shadows, he saw a black archway evidently leading upstairs. He felt a peculiar sense of oppression at being actually within the great spectral building, but kept it in check as he cautiously scouted about - finding a still-intact barrel amid the dust, and rolling it over to the open window to provide for his exit. Then, bracing himself, he crossed the wide, cobweb-festooned space toward the arch. Half-choked with the omnipresent dust, and covered with ghostly gossamer fibres, he reached and began to climb the worn stone steps which rose into the darkness. He had no light, but groped carefully with his hands. After a sharp turn he felt a closed door ahead, and a little fumbling revealed its ancient latch. It opened
inward, and beyond it he saw a dimly illumined corridor lined with worm-eaten panelling.

Once on the ground floor, Blake began exploring in a rapid fashion. All the inner doors were unlocked, so that he freely passed from room to room. The colossal nave was an almost eldritch place with its drifts and mountains of dust over box pews, altar, hour-glass pulpit, and sounding-board and its titanic ropes of cobweb stretching among the pointed arches of the gallery and entwining the clustered Gothic columns. Over all this hushed desolation played a hideous leaden light as the declining afternoon sun sent its rays through the strange, half-blackened panes of the great apsidal windows.

The paintings on those windows were so obscured by soot that Blake could scarcely decipher what they had represented, but from the little he could make out he did not like them. The designs were largely conventional, and his knowledge of obscure symbolism told him much concerning some of the ancient patterns. The few saints depicted bore expressions distinctly open to criticism, while one of the windows seemed to show merely a dark space with spirals of curious luminosity scattered about in it. Turning away from the windows, Blake noticed that the cobwebbed cross above the altar was not of the ordinary kind, but resembled the primordial ankh or crux ansata of shadowy Egypt.

In a rear vestry room beside the apse Blake found a rotting desk and ceiling-high shelves of mildewed, disintegrating books. Here for the first time he received a positive shock of objective horror, for the titles of those books told him much. They were the black, forbidden things which most sane people have never even heard of, or have heard of only in furtive, timorous whispers; the banned and dreaded repositories of equivocal secret and immemorial formulae which have trickled down the stream of time from the days of man's youth, and the dim, fabulous days before man was. He had himself read many of them - a Latin version of the abhorred Necronomicon, the sinister Liber Ivonis, the infamous Cultes des Goules of Comte d'Erlette, the Unaussprechlichen Kulten of von Junzt, and old Ludvig Prinn's hellish De Vermis Mysteriis. But there were others he had known merely by reputation or not at all - the Pnakotic Manuscripts, the Book of Dzyan, and a crumbling volume of wholly unidentifiable characters yet with certain symbols and diagrams shuddering recognizable to the occult student. Clearly, the lingering local rumours had not lied. This place had once been the seat of an evil older than mankind and wider than the known universe.

In the ruined desk was a small leatherbound record-book filled with entries in some odd cryptographic medium. The manuscript writing consisted of the common traditional symbols used today in astronomy and anciently in alchemy, astrology, and other dubious arts - the devices of the sun, moon, planets, aspects, and zodiacal signs - here massed in solid pages of text, with divisions and paragraphings suggesting that each symbol answered to some alphabetical letter.

In the hope of later solving the cryptogram, Blake bore off this volume in his coat pocket. Many of the great tomes on the shelves fascinated him unutterably, and he felt tempted to borrow them at some later time. He wondered how they could have remained undisturbed so long. Was he the first to conquer the clutching, pervasive fear which had for nearly sixty years protected this deserted place from visitors?
Having now thoroughly explored the ground floor, Blake ploughed again through the dust of the spectral nave to the front vestibule, where he had seen a door and staircase presumably leading up to the blackened tower and steeple - objects so long familiar to him at a distance. The ascent was a choking experience, for dust lay thick, while the spiders had done their worst in this constricted place. The staircase was a spiral with high, narrow wooden treads, and now and then Blake passed a clouded window looking dizzily out over the city. Though he had seen no ropes below, he expected to find a bell or peal of bells in the tower whose narrow, louvre-boarded lancet windows his field-glass had studied so often. Here he was doomed to disappointment; for when he attained the top of the stairs he found the tower chamber vacant of chimes, and clearly devoted to vastly different purposes.

The room, about fifteen feet square, was faintly lighted by four lancet windows, one on each side, which were glazed within their screening of decayed louvre-boards. These had been further fitted with tight, opaque screens, but the latter were now largely rotted away. In the centre of the dust-laden floor rose a curiously angled stone pillar home four feet in height and two in average diameter, covered on each side with bizarre, crudely incised and wholly unrecognizable hieroglyphs. On this pillar rested a metal box of peculiarly asymmetrical form; its hinged lid thrown back, and its interior holding what looked beneath the decade-deep dust to be an egg-shaped or irregularly spherical object some four inches through. Around the pillar in a rough circle were seven high-backed Gothic chairs still largely intact, while behind them, ranging along the dark-panelled walls, were seven colossal images of crumbling, black-painted plaster, resembling more than anything else the cryptic carven megaliths of mysterious Easter Island. In one corner of the cobwebbed chamber a ladder was built into the wall, leading up to the closed trap door of the windowless steeple above.

As Blake grew accustomed to the feeble light he noticed odd bas-reliefs on the strange open box of yellowish metal. Approaching, he tried to clear the dust away with his hands and handkerchief, and saw that the figurings were of a monstrous and utterly alien kind; depicting entities which, though seemingly alive, resembled no known life-form ever evolved on this planet. The four-inch seeming sphere turned out to be a nearly black, red-striated polyhedron with many irregular flat surfaces; either a very remarkable crystal of some sort or an artificial object of carved and highly polished mineral matter. It did not touch the bottom of the box, but was held suspended by means of a metal band around its centre, with seven queerly-designed supports extending horizontally to angles of the box's inner wall near the top. This stone, once exposed, exerted upon Blake an almost alarming fascination. He could scarcely tear his eyes from it, and as he looked at its glistening surfaces he almost fancied it was transparent, with half-formed worlds of wonder within. Into his mind floated pictures of alien orbs with great stone towers, and other orbs with titan mountains and no mark of life, and still remoter spaces where only a stirring in vague blacknesses told of the presence of consciousness and will.

When he did look away, it was to notice a somewhat singular mound of dust in the far corner near the ladder to the steeple. Just why it took his attention he could not tell, but something in its contours carried a message to his unconscious mind. Ploughing toward it, and brushing aside the hanging cobwebs as he went, he began to discern something
grim about it. Hand and handkerchief soon revealed the truth, and Blake gasped with a baffling mixture of emotions. It was a human skeleton, and it must have been there for a very long time. The clothing was in shreds, but some buttons and fragments of cloth bespoke a man's grey suit. There were other bits of evidence - shoes, metal clasps, huge buttons for round cuffs, a stickpin of bygone pattern, a reporter's badge with the name of the old Providence Telegram, and a crumbling leather pocketbook. Blake examined the latter with care, finding within it several bills of antiquated issue, a celluloid advertising calendar for 1893, some cards with the name "Edwin M. Lillibridge", and a paper covered with pencilled memoranda.

This paper held much of a puzzling nature, and Blake read it carefully at the dim westward window. Its disjointed text included such phrases as the following:

Prof. Enoch Bowen home from Egypt May 1844 - buys old Free-Will Church in July - his archaeological work & studies in occult well known.

Dr Drowne of 4th Baptist warns against Starry Wisdom in sermon 29 Dec. 1844.

Congregation 97 by end of '45.

1846 - 3 disappearances - first mention of Shining Trapezohedron.

7 disappearances 1848 - stories of blood sacrifice begin.

Investigation 1853 comes to nothing - stories of sounds.

Fr O'Malley tells of devil-worship with box found in great Egyptian ruins - says they call up something that can't exist in light. Flees a little light, and banished by strong light. Then has to be summoned again. Probably got this from deathbed confession of Francis X. Feeney, who had joined Starry Wisdom in '49. These people say the Shining Trapezohedron shows them heaven & other worlds, & that the Haunter of the Dark tells them secrets in some way.

Story of Orrin B. Eddy 1857. They call it up by gazing at the crystal, & have a secret language of their own.

200 or more in cong. 1863, exclusive of men at front.

Irish boys mob church in 1869 after Patrick Regan's disappearance.

Veiled article in J. 14 March '72, but people don't talk about it.

6 disappearances 1876 - secret committee calls on Mayor Doyle.

Action promised Feb. 1877 - church closes in April.

Gang - Federal Hill Boys - threaten Dr - and vestrymen in May.

181 persons leave city before end of '77 - mention no names.
Ghost stories begin around 1880 - try to ascertain truth of report that no human being has entered church since 1877.

Ask Lanigan for photograph of place taken 1851...

Restoring the paper to the pocketbook and placing the latter in his coat, Blake turned to look down at the skeleton in the dust. The implications of the notes were clear, and there could be no doubt but that this man had come to the deserted edifice forty-two years before in quest of a newspaper sensation which no one else had been bold enough to attempt. Perhaps no one else had known of his plan - who could tell? But he had never returned to his paper. Had some bravely-suppressed fear risen to overcome him and bring on sudden heart-failure? Blake stooped over the gleaming bones and noted their peculiar state. Some of them were badly scattered, and a few seemed oddly dissolved at the ends. Others were strangely yellowed, with vague suggestions of charring. This charring extended to some of the fragments of clothing. The skull was in a very peculiar state - stained yellow, and with a charred aperture in the top as if some powerful acid had eaten through the solid bone. What had happened to the skeleton during its four decades of silent entombment here Blake could not imagine.

Before he realized it, he was looking at the stone again, and letting its curious influence call up a nebulous pageantry in his mind. He saw processions of robed, hooded figures whose outlines were not human, and looked on endless leagues of desert lined with carved, sky-reaching monoliths. He saw towers and walls in nighted depths under the sea, and vortices of space where wisps of black mist floated before thin shimmerings of cold purple haze. And beyond all else he glimpsed an infinite gulf of darkness, where solid and semisolid forms were known only by their windy stirrings, and cloudy patterns of force seemed to superimpose order on chaos and hold forth a key to all the paradoxes and arcana of the worlds we know.

Then all at once the spell was broken by an access of gnawing, indeterminate panic fear. Blake choked and turned away from the stone, conscious of some formless alien presence close to him and watching him with horrible intentness. He felt entangled with something - something which was not in the stone, but which had looked through it at him - something which would ceaselessly follow him with a cognition that was not physical sight. Plainly, the place was getting on his nerves - as well it might in view of his gruesome find. The light was waning, too, and since he had no illuminant with him he knew he would have to be leaving soon.

It was then, in the gathering twilight, that he thought he saw a faint trace of luminosity in the crazily angled stone. He had tried to look away from it, but some obscure compulsion drew his eyes back. Was there a subtle phosphorescence of radio-activity about the thing? What was it that the dead man 's notes had said concerning a *Shining Trapezohedron*? What, anyway, was this abandoned lair of cosmic evil? What had been done here, and what might still be lurking in the bird-shunned shadows? It seemed now as if an elusive touch of foetor had arisen somewhere close by, though its source was not apparent. Blake seized the cover of the long-open box and snapped it down. It moved easily on its alien hinges, and closed completely over the unmistakably glowing stone.
At the sharp click of that closing a soft stirring sound seemed to come from the steeple's eternal blackness overhead, beyond the trap-door. Rats, without question - the only living things to reveal their presence in this accursed pile since he had entered it. And yet that stirring in the steeple frightened him horribly, so that he plunged almost wildly down the spiral stairs, across the ghoulish nave, into the vaulted basement, out amidst the gathering dust of the deserted square, and down through the teeming, fear-haunted alleys and avenues of Federal Hill towards the sane central streets and the home-like brick sidewalks of the college district.

During the days which followed, Blake told no one of his expedition. Instead, he read much in certain books, examined long years of newspaper files downtown, and worked feverishly at the cryptogram in that leather volume from the cobwebbed vestry room. The cipher, he soon saw, was no simple one; and after a long period of endeavour he felt sure that its language could not be English, Latin, Greek, French, Spanish, Italian, or German. Evidently he would have to draw upon the deepest wells of his strange erudition.

Every evening the old impulse to gaze westwards returned, and he saw the black steeple as of yore amongst the bristling roofs of a distant and half-fabulous world. But now it held a fresh note of terror for him. He knew the heritage of evil lore it masked, and with the knowledge his vision ran riot in queer new ways. The birds of spring were returning, and as he watched their sunset flights he fancied they avoided the gaunt, lone spire as never before. When a flock of them approached it, he thought, they would wheel and scatter in panic confusion - and he could guess at the wild twitterings which failed to reach him across the intervening miles.

It was in June that Blake's diary told of his victory over the cryptogram. The text was, he found, in the dark Aklo language used by certain cults of evil antiquity, and known to him in a halting way through previous researches. The diary is strangely reticent about what Blake deciphered, but he was patently awed and disconcerted by his results. There are references to a Haunter of the Dark awakened by gazing into the Shining Trapezohedron, and insane conjectures about the black gulfs of chaos from which it was called. The being is spoken of as holding all knowledge, and demanding monstrous sacrifices. Some of Blake's entries show fear lest the thing, which he seemed to regard as summoned, stalk abroad; though he adds that the streetlights form a bulwark which cannot be crossed.

Of the Shining Trapezohedron he speaks often, calling it a window on all time and space, and tracing its history from the days it was fashioned on dark Yuggoth, before ever the Old Ones brought it to earth. It was treasured and placed in its curious box by the crinoid things of Antarctica, salvaged from their ruins by the serpent-men of Valusia, and peered at aeons later in Lemuria by the first human beings. It crossed strange lands and stranger seas, and sank with Atlantis before a Minoan fisher meshed it in his net and sold it to swarthy merchants from nighted Khem. The Pharaoh Nephren-Ka built around it a temple with a windowless crypt, and did that which caused his name to be stricken from all monuments and records. Then it slept in the ruins of that evil fane which the priests and the new Pharaoh destroyed, till the delver's spade once more brought it forth to curse mankind.
Early in July the newspapers oddly supplement Blake's entries, though in so brief and casual a way that only the diary has called general attention to their contribution. It appears that a new fear had been growing on Federal Hill since a stranger had entered the dreaded church. The Italians whispered of unaccustomed stirrings and bumpings and scrapings in the dark windowless steeple, and called on their priests to banish an entity which haunted their dreams. Something, they said, was constantly watching at a door to see if it were dark enough to venture forth. Press items mentioned the longstanding local superstitions, but failed to shed much light on the earlier background of the horror. It was obvious that the young reporters of today are no antiquarians. In writing of these things in his diary, Blake expresses a curious kind of remorse, and talks of the duty of burying the Shining Trapezohedron and of banishing what he had evoked by letting daylight into the hideous jutting spire. At the same time, however, he displays the dangerous extent of his fascination, and admits a morbid longing - pervading even his dreams - to visit the accursed tower and gaze again into the cosmic secrets of the glowing stone.

Then something in the Journal on the morning of 17 July threw the diarist into a veritable fever of horror. It was only a variant of the other half-humorous items about the Federal hill restlessness, but to Blake it was somehow very terrible indeed. In the night a thunderstorm had put the city's lighting-system out of commission for a full hour, and in that black interval the Italians had nearly gone mad with fright. Those living near the dreaded church had sworn that the thing in the steeple had taken advantage of the street lamps' absence and gone down into the body of the church, flopping and bumping around in a viscous, altogether dreadful way. Towards the last it had bumped up to the tower, where there were sounds of the shattering of glass. It could go wherever the darkness reached, but light would always send it fleeing.

When the current blazed on again there had been a shocking commotion in the tower, for even the feeble liglit trickling through the grime-blackened, louvre-boarded windows was too much for the thing. It had bumped and slithered up into its tenebrous steeple just in time - for a long dose of light would have sent it back into the abyss whence the crazy stranger had called it. During the dark hour praying crowds had clustered round the church in the rain with lighted candles and lamps somehow shielded with folded paper and umbrellas - a guard of light to save the city from the nightmare that stalks in darkness. Once, those nearest the church declared, the outer door had rattled hideously.

But even this was not the worst. That evening in the Bulletin Blake read of what the reporters had found. Aroused at last to the whimsical news value of the scare, a pair of them had defied the frantic crowds of Italians and crawled into the church through the cellar window after trying the doors in vain. They found the dust of the vestibule and of the spectral nave ploughed up in a singular way, with pits of rotted cushions and satin pew-linings scattered curiously around. There was a bad odour everywhere, and here and there were bits of yellow stain and patches of what looked like charring. Opening the door to the tower, and pausing a moment at the suspicion of a scraping sound above, they found the narrow spiral stairs wiped roughly clean.

In the tower itself a similarly half-swept condition existed. They spoke of the heptagonal stone pillar, the overturned Gothic chairs, and the bizarre plaster images; though strangely enough the metal box and the old mutilated skeleton were not mentioned. What
disturbed Blake the most - except for the hints of stains and charring and bad odours - was the final detail that explained the crashing glass. Every one of the tower's lancet windows was broken, and two of them had been darkened in a crude and hurried way by the stuffing of satin pew-linings and cushion-horsehair into the spaces between the slanting exterior louvre-boards. More satin fragments and bunches of horsehair lay scattered around the newly swept floor, as if someone had been interrupted in the act of restoring the tower to the absolute blackness of its tightly curtained days.

Yellowish stains and charred patches were found on the ladder to the windowless spire, but when a reporter climbed up, opened the horizontally-sliding trap-door and shot a feeble flashlight beam into the black and strangely foetid space, he saw nothing but darkness, and a heterogeneous litter of shapeless fragments near the aperture. The verdict, of course, was charlatanry. Somebody had played a joke on the superstitious hill-dwellers, or else some fanatic had striven to bolster up their fears for their own supposed good. Or perhaps some of the younger and more sophisticated dwellers had staged an elaborate hoax on the outside world. There was an amusing aftermath when the police sent an officer to verify the reports. Three men in succession found ways of evading the assignment, and the fourth went very reluctantly and returned very soon without adding to the account given by the reporters.

From this point onwards Blake's diary shows a mounting tide of insidious horror and nervous apprehension. He upbraids himself for not doing something, and speculates wildly on the consequences of another electrical breakdown. It had been verified that on three occasions - during thunderstorms - he telephoned the electric light company in a frantic vein and asked that desperate precautions against a lapse of power be taken. Now and then his entries show concern over the failure of the reporters to find the metal box and stone, and the strangely marred old skeleton, when they explored the shadowy tower room. He assumed that these things had been removed - whither, and by whom or what, he could only guess. But his worst fears concerned himself, and the kind of unholy rapport he felt to exist between his mind and that lurking horror in the distant steeple - that monstrous thing of night which his rashness had called out of the ultimate black spaces. He seemed to feel a constant tugging at his will, and callers of that period remember how he would sit abstractedly at his desk and stare out of the west window at that far-off spire-bristling mound beyond the swirling smoke of the city. His entries dwell monotonously on certain terrible dreams, and of a strengthening of the unholy rapport in his sleep. There is mention of a night when he awakened to find himself fully dressed, outdoors, and headed automatically down College Hill towards the west. Again and again he dwells on the fact that the thing in the steeple knows where to find him.

The week following 30 July is recalled as the time of Blake's partial breakdown. He did not dress, and ordered all his food by telephone. Visitors remarked the cords he kept near his bed, and he said that sleep-walking had forced him to bind his ankles every night with knots which would probably hold or else waken him with the labour of untying. In his diary he told of the hideous experience which had brought the collapse. After retiring on the night of the 30th, he had suddenly found himself groping about in an almost black space. All he could see were short, faint, horizontal streaks of bluish light, but he could smell an overpowering foetor and hear a curious jumble of soft, furtive sounds above
him. Whenever he moved he stumbled over something, and at each noise there would come a sort of answering sound from above - a vague stirring, mixed with the cautious sliding of wood on wood.

Once his groping hands encountered a pillar of stone with a vacant top, whilst later he found himself clutching the rungs of a ladder built into the wall, and fumbling his uncertain way upwards towards some region of intenser stench where a hot, searing blast beat down against him. Before his eyes a kaleidoscopic range of phantasmal images played, all of them dissolving at intervals into the picture of a vast, unplumbed abyss of night wherein whirled suns and worlds of an even profounder blackness. He thought of the ancient legends of Ultimate Chaos, at whose centre sprawls the blind idiot god Azathoth, Lord of All Things, encircled by his flopping horde of mindless and amorphous dancers, and lulled by the thin monotonous piping of a demoniac flute held in nameless paws.

Then a sharp report from the outer world broke through his stupor and roused him to the unutterable horror of his position. What it was, he never knew - perhaps it was some belated peal from the fireworks heard all summer on Federal Hill as the dwellers hail their various patron saints, or the saints of their native villages in Italy. In any event he shrieked aloud, dropped frantically from the ladder, and stumbled blindly across the obstructed floor of the almost lightless chamber that encompassed him.

He knew instantly where he was, and plunged recklessly down the narrow spiral staircase, tripping and bruising himself at every turn. There was a nightmare flight through a vast cobwebbed nave whose ghostly arches readied up to realms of leering shadow, a sightless scramble through a littered basement, a climb to regions of air and street lights outside, and a mad racing down a spectral hill of gibbering gables, across a grim, silent city of tall black towers, and up the steep eastward precipice to his own ancient door.

On regaining consciousness in the morning he found himself lying on his study floor fully dressed. Dirt and cobwebs covered him, and every inch of his body seemed sore and bruised. When he faced the mirror he saw that his hair was badly scorched while a trace of strange evil odour seemed to cling to his upper outer clothing. It was then that his nerves broke down. Thereafter, lounging exhaustedly about in a dressing-gown, he did little but stare from his west window, shiver at the threat of thunder, and make wild entries in his diary.

The great storm broke just before midnight on 8 August. Lightning struck repeatedly in all parts of the city, and two remarkable fireballs were reported. The rain was torrential, while a constant fusillade of thunder brought sleeplessness to thousands. Blake was utterly frantic in his fear for the lighting system, and tried to telephone the company around 1 A.M. though by that time service had been temporarily cut off in the interests of safety. He recorded everything in his diary - the large, nervous, and often undecipherable, hieroglyphs telling their own story of growing frenzy and despair, and of entries scrawled blindly in the dark.
He had to keep the house dark in order to see out of the window, and it appears that most of his time was spent at his desk, peering anxiously through the rain across the glistening miles of downtown roofs at the constellation of distant lights marking Federal Hill. Now and then he would fumblingly make an entry in his diary, so that detached phrases such as "the lights must not go"; "it knows where I am"; "I must destroy it"; and "it is calling to me, but perhaps it means no injury this time"; are found scattered down two of the pages.

Then the lights went out all over the city. It happened at 2.12 A.M. according to power-house records, but Blake's diary gives no indication of the time. The entry is merely, "Lights out - God help me." On Federal Hill there were watchers as anxious as he, and rain-soaked knots of men paraded the square and alleys around the evil church with umbrella-shaded candles, electric flashlights, oil lanterns, crucifixes, and obscure charms of the many sorts common to southern Italy. They blessed each flash of lightning, and made cryptical signs of fear with their right hands when a turn in the storm caused the flashes to lessen and finally to cease altogether. A rising wind blew out most of the candles, so that the scene grew threatening dark. Someone roused Father Merluzzo of Spirito Santo Church, and he hastened to the dismal square to pronounce whatever helpful syllables he could. Of the restless and curious sounds in the blackened tower, there could be no doubt whatever.

For what happened at 2.35 we have the testimony of the priest, a young, intelligent, and well-educated person; of Patrolman William J. Monohan of the Central Station, an officer of the highest reliability who had paused at that part of his beat to inspect the crowd; and of most of the seventy-eight men who had gathered around the church's high bank wall - especially those in the square where the eastward façade was visible. Of course there was nothing which can be proved as being outside the order of Nature. The possible causes of such an event are many. No one can speak with certainty of the obscure chemical processes arising in a vast, ancient, ill-aired, and long-deserted building of heterogeneous contents. Mephitic vapours - spontaneous combustion - pressure of gases born of long decay - any one of numberless phenomena might be responsible. And then, of course, the factor of conscious charlatanry can by no means be excluded. The thing was really quite simple in itself, and covered less than three minutes of actual time. Father Merluzzo, always a precise man, looked at his watch repeatedly.

It started with a definite swelling of the dull fumbling sounds inside the black tower. There had for some time been a vague exhalation of strange, evil odours from the church, and this had now become emphatic and offensive. Then at last there was a sound of splintering wood and a large, heavy object crashed down in the yard beneath the frowning easterly façade. The tower was invisible now that the candles would not burn, but as the object neared the ground the people knew that it was the smoke-grimed louver-boarding of that tower's east window.

Immediately afterwards an utterly unbearable foetor welled forth from the unseen heights, choking and sickening the trembling watchers, and almost prostrating those in the square. At the same time the air trembled with a vibration as of flapping wings, and a sudden east-blowing wind more violent than any previous blast snatched off the hats and wrenched the dripping umbrellas of the crowd. Nothing definite could be seen in the
candleless night, though some upward-looking spectators thought they glimpsed a great spreading blur of denser blackness against the inky sky - something like a formless cloud of smoke that shot with meteorlike speed towards the east.

That was all. The watchers were half numbed with fright, awe, and discomfort, and scarcely knew what to do, or whether to do anything at all. Not knowing what had happened, they did not relax their vigil; and a moment later they sent up a prayer as a sharp flash of belated lightning, followed by an ear-splitting crash of sound, rent the flooded heavens. Half an hour later the rain stopped, and in fifteen minutes more the street lights sprang on again, sending the weary, bedraggled watchers relievedly back to their homes.

The next day's papers gave these matters minor mention in connection with the general storm reports. It seems that the great lightning flash and deafening explosion which followed the Federal Hill occurrence were even more tremendous farther east, where a burst of the singular foetor was likewise noticed. The phenomenon was most marked over College Hill, where the crash awakened all the sleeping inhabitants and led to a bewildered round of speculations. Of those who were already awake only a few saw the anomalous blaze of light near the top of the hill, or noticed the inexplicable upward rush of air which almost stripped the leaves from the trees and blasted the plants in the gardens. It was agreed that the lone, sudden lightning-bolt must have struck somewhere in this neighbourhood, though no trace of its striking could afterwards be found. A youth in the Tau Omega fraternity house thought he saw a grotesque and hideous mass of smoke in the air just as the preliminary flash burst, but his observation has not been verified. All of the few observers, however, agree as to the violent gust from the west and the flood of intolerable stench which preceded the belated stroke, whilst evidence concerning the momentary burned odour after the stroke is equally general.

These points were discussed very carefully because of their probable connection with the death of Robert Blake. Students in the Psi Delta house, whose upper rear windows looked into Blake's study, noticed the blurred white face at the westward window on the morning of the ninth, and wondered what was wrong with the expression. When they saw the same face in the same position that evening, they felt worried, and watched for the lights to come up in his apartment. Later they rang the bell of the darkened flat, and finally had a policeman force the door.

The rigid body sat bolt upright at the desk by the window, and when the intruders saw the glassy, bulging eyes, and the marks of stark, convulsive fright on the twisted features, they turned away in sickened dismay. Shortly afterwards the coroner's physician made an examination, and despite the unbroken window reported electrical shock, or nervous tension induced by electrical discharge, as the cause of death. The hideous expression he ignored altogether, deeming it a not improbable result of the profound shock as experienced by a person of such abnormal imagination and unbalanced emotions. He deduced these latter qualities from the books, paintings, and manuscripts found in the apartment, and from the blindly scrawled entries in the diary on the desk. Blake had prolonged his frenzied jottings to the last, and the broken-pointed pencil was found clutched in his spasmodically contracted right hand.
The entries after the failure of the lights were highly disjointed, and legible only in part. From them certain investigators have drawn conclusions differing greatly from the materialistic official verdict, but such speculations have little chance for belief among the conservative. The case of these imaginative theorists has not been helped by the action of superstitious Doctor Dexter, who threw the curious box and angled stone - an object certainly self-luminous as seen in the black windowless steeple where it was found - into the deepest channel of Narragansett Bay. Excessive imagination and neurotic unbalance on Blake's part, aggravated by knowledge of the evil bygone cult whose startling traces he had uncovered, form the dominant interpretation given those final frenzied jottings.

These are the entries - or all that can be made of them:

Lights still out - must be five minutes now. Everything depends on lightning. Yaddith grant it will keep up!... Some influence seems beating through it... Rain and thunder and wind deafen... The thing is taking hold of my mind...

Trouble with memory. I see things I never knew before. Other worlds and other galaxies... Dark... The lightning seems dark and the darkness seems light...

It cannot be the real hill and church that I see in the pitch-darkness. Must be retinal impression left by flashes. Heaven grant the Italians are out with their candles if the lightning stops!

What am I afraid of? Is it not an avatar of Nyarlathotep, who in antique and shadowy Khem even took the form of man? I remember Yuggoth, and more distant Shaggai, and the ultimate void of the black planets...

The long, winging flight through the void... cannot cross the universe of light... re-created by the thoughts caught in the Shining Trapezohedron... send it through the horrible abysses of radiance...

My name is Blake - Robert Harrison Blake of 620 East Knapp Street, Milwaukee, Wisconsin... I am on this planet...

Azathoth have mercy! - the lightning no longer flashes - horrible - I can see everything with a monstrous sense that is not sight - light is dark and dark is light... those people on the hill... guard... candles and charms... their priests...

Sense of distance gone - far is near and near is far. No light - no glass - see that steeple - that tower - window - can hear - Roderick Usher - am mad or going mad - the thing is stirring and fumbling in the tower.

I am it and it is I - I want to get out... must get out and unify the forces... it knows where I am...
I am Robert Blake, but I see the tower in the dark. There is a monstrous odour... senses transfigured... boarding at that tower window cracking and giving way... lâ... ngai... ygg...

I see it - coming here - hell-wind - titan blue - black wing - Yog Sothoth save me - the three-lobed burning eye...
The Lurking Fear
by H. P. Lovecraft

I. The Shadow On The Chimney

Vol. 2, No. 6 (January 1923), p. 4-10;

There was thunder in the air on the night I went to the deserted mansion atop Tempest Mountain to find the lurking fear. I was not alone, for foolhardiness was not then mixed with that love of the grotesque and the terrible which has made my career a series of quests for strange horrors in literature and in life. With me were two faithful and muscular men for whom I had sent when the time came; men long associated with me in my ghastly explorations because of their peculiar fitness.

We had started quietly from the village because of the reporters who still lingered about after the eldritch panic of a month before - the nightmare creeping death. Later, I thought, they might aid me; but I did not want them then. Would to God I had let them share the search, that I might not have had to bear the secret alone so long; to bear it alone for fear the world would call me mad or go mad itself at the demon implications of the thing. Now that I am telling it anyway, lest the brooding make me a maniac, I wish I had never concealed it. For I, and I only, know what manner of fear lurked on that spectral and desolate mountain.

In a small motor-car we covered the miles of primeval forest and hill until the wooded ascent checked it. The country bore an aspect more than usually sinister as we viewed it by night and without the accustomed crowds of investigators, so that we were often tempted to use the acetylene headlight despite the attention it might attract. It was not a wholesome landscape after dark, and I believe I would have noticed its morbidity even had I been ignorant of the terror that stalked there. Of wild creatures there were none - they are wise when death leers close. The ancient lightning-scarred trees seemed unnaturally large and twisted, and the other vegetation unnaturally thick and feverish, while curious mounds and hummocks in the weedy, fulgurite-pitted earth reminded me of snakes and dead men's skulls swelled to gigantic proportions.

Fear had lurked on Tempest Mountain for more than a century. This I learned at once from newspaper accounts of the catastrophe which first brought the region to the world's notice. The place is a remote, lonely elevation in that part of the Catskills where Dutch civilization once feebly and transiently penetrated, leaving behind as it receded only a few mined mansions and a degenerate squatter population inhabiting pitiful hamlets on isolated slopes. Normal beings seldom visited the locality till the state police were formed, and even now only infrequent troopers patrol it. The fear, however, is an old tradition throughout the neighboring villages; since it is a prime topic in the simple
discourse of the poor mongrels who sometimes leave their valleys to trade handwoven baskets for such primitive necessities as they cannot shoot, raise, or make.

The lurking fear dwelt in the shunned and deserted Martense mansion, which crowned the high but gradual eminence whose liability to frequent thunderstorms gave it the name of Tempest Mountain. For over a hundred years the antique, grove-circled stone house had been the subject of stories incredibly wild and monstrously hideous; stories of a silent colossal creeping death which stalked abroad in summer. With whimpering insistence the squatters told tales of a demon which seized lone wayfarers after dark, either carrying them off or leaving them in a frightful state of gnawed dismemberment; while sometimes they whispered of blood trails toward the distant mansion. Some said the thunder called the lurking fear out of its habitation, while others said the thunder was its voice.

No one outside the backwoods had believed these varying and conflicting stories, with their incoherent, extravagant descriptions of the hall-glimpsed fiend; yet not a farmer or villager doubted that the Martense mansion was ghoulishly haunted. Local history forbade such a doubt, although no ghostly evidence was ever found by such investigators as had visited the building after some especially vivid tale of the squatters. Grandmothers told strange myths of the Martense spectre; myths concerning the Martense family itself, its queer hereditary dissimilarity of eyes, its long, unnatural annals, and the murder which had cursed it.

The terror which brought me to the scene was a sudden and portentous confirmation of the mountaineers' wildest legends. One summer night, after a thunderstorm of unprecedented violence, the countryside was aroused by a squatter stampede which no mere delusion could create. The pitiful throngs of natives shrieked and whined of the unnamable horror which had descended upon them, and they were not doubted. They had not seen it, but had heard such cries from one of their hamlets that they knew a creeping death had come.

In the morning citizens and state troopers followed the shuddering mountaineers to the place where they said the death had come. Death was indeed there. The ground under one of the squatter's villages had caved in after a lightning stroke, destroying several of the malodorous shanties; but upon this property damage was superimposed an organic devastation which paled it to insignificance. Of a possible seventy-five natives who had inhabited this spot, not one living specimen was visible. The disordered earth was covered with blood and human debris bespeaking too vividly the ravages of demon teeth and talons; yet no visible trail led away from the carnage. That some hideous animal must be the cause, everyone quickly agreed; nor did any tongue now revive the charge that such cryptic deaths formed merely the sordid murders common in decadent communities. That charge was revived only when about twenty-five of the estimated population were found missing from the dead; and even then it was hard to explain the murder of fifty by half that number. But the fact remained that on a summer night a bolt had come out of the heavens and left a dead village whose corpses were horribly mangled, chewed, and clawed.

The excited countryside immediately connected the horror with the haunted Martense mansion, though the localities were over three miles apart. The troopers were more
skeptical; including the mansion only casually in their investigations, and dropping it altogether when they found it thoroughly deserted. Country and village people, however, canvassed the place with infinite care; overturning everything in the house, sounding ponds and brooks, beating down bushes, and ransacking the nearby forests. All was in vain; the death that had come had left no trace save destruction itself.

By the second day of the search the affair was fully treated by the newspapers, whose reporters overran Tempest Mountain. They described it in much detail, and with many interviews to elucidate the horror's history as told by local grandams. I followed the accounts languidly at first, for I am a connoisseur in horrors; but after a week I detected an atmosphere which stirred me oddly, so that on August 5th, 1921, I registered among the reporters who crowded the hotel at Lefferts Corners, nearest village to Tempest Mountain and acknowledged headquarters of the searchers. Three weeks more, and the dispersal of the reporters left me free to begin a terrible exploration based on the minute inquiries and surveying with which I had meanwhile busied myself.

So on this summer night, while distant thunder rumbled, I left a silent motor-car and tramped with two armed companions up the last mound-covered reaches of Tempest Mountain, casting the beams of an electric torch on the spectral grey walls that began to appear through giant oaks ahead. In this morbid night solitude and feeble shifting illumination, the vast boxlike pile displayed obscure hints of terror which day could not uncover; yet I did not hesitate, since I had come with fierce resolution to test an idea. I believed that the thunder called the death-demon out of some fearsome secret place; and be that demon solid entity or vaporous pestilence, I meant to see it.

I had thoroughly searched the ruin before, hence knew my plan well; choosing as the seat of my vigil the old room of Jan Martense, whose murder looms so great in the rural legends. I felt subtly that the apartment of this ancient victim was best for my purposes. The chamber, measuring about twenty feet square, contained like the other rooms some rubbish which had once been furniture. It lay on the second story, on the southeast corner of the house, and had an immense east window and narrow south window, both devoid of panes or shutters. Opposite the large window was an enormous Dutch fireplace with scriptural tiles representing the prodigal son, and opposite the narrow window was a spacious bed built into the wall.

As the tree-muffled thunder grew louder, I arranged my plan's details. First I fastened side by side to the ledge of the large window three rope ladders which I had brought with me. I knew they reached a suitable spot on the grass outside, for I had tested them. Then the three of us dragged from another room a wide four-poster bedstead, crowding it laterally against the window. Having strewn it with fir boughs, all now rested on it with drawn automatics, two relaxing while the third watched. From whatever direction the demon might come, our potential escape was provided. If it came from within the house, we had the window ladders; if from outside the door and the stairs. We did not think, judging from precedent, that it would pursue us far even at worst.

I watched from midnight to one o'clock, when in spite of the sinister house, the unprotected window, and the approaching thunder and lightning, I felt singularly drowsy. I was between my two companions, George Bennett being toward the window and
William Tobey toward the fireplace. Bennett was asleep, having apparently felt the same anomalous drowsiness which affected me, so I designated Tobey for the next watch although even he was nodding. It is curious how intently I had been watching the fireplace.

The increasing thunder must have affected my dreams, for in the brief time I slept there came to me apocalyptic visions. Once I partly awaked, probably because the sleeper toward the window had restlessly flung an arm across my chest. I was not sufficiently awake to see whether Tobey was attending to his duties as sentinel, but felt a distinct anxiety on that score. Never before had the presence of evil so poignantly oppressed me. Later I must have dropped asleep again, for it was out of a phantasmal chaos that my mind leaped when the night grew hideous with shrieks beyond anything in my former experience or imagination.

In that shrieking the inmost soul of human fear and agony clawed hopelessly and insanely at the ebony gates of oblivion. I awoke to red madness and the mockery of diabolism, as farther and farther down inconceivable vistas that phobic and crystalline anguish retreated and reverberated. There was no light, but I knew from the empty space at my right that Tobey was gone, God alone knew whither. Across my chest still lay the heavy arm of the sleeper at my left.

Then came the devastating stroke of lightning which shook the whole mountain, lit the darkest crypts of the hoary grove, and splintered the patriarch of the twisted trees. In the demon flash of a monstrous fireball the sleeper started up suddenly while the glare from beyond the window threw his shadow vividly upon the chimney above the fireplace from which my eyes had never strayed. That I am still alive and sane, is a marvel I cannot fathom. I cannot fathom it, for the shadow on that chimney was not that of George Bennett or of any other human creature, but a blasphemous abnormality from hell's nethermost craters; a nameless, shapeless abomination which no mind could fully grasp and no pen even partly describe. In another second I was alone in the accursed mansion, shivering and gibbering. George Bennett and William Tobey had left no trace, not even of a struggle. They were never heard of again.

II. A Passer In The Storm

For days after that hideous experience in the forest-swathed mansion I lay nervously exhausted in my hotel room at Lefferts Corners. I do not remember exactly how I managed to reach the motor-car, start it, and slip unobserved back to the village; for I retain no distinct impression save of wild-armed titan trees, demoniac mutterings of thunder, and Charonian shadows athwart the low mounds that dotted and streaked the region.

As I shivered and brooded on the casting of that brain-blasting shadow, I knew that I had at last pried out one of earth's supreme horrors - one of those nameless blights of outer voids whose faint demon scratchings we sometimes hear on the farthest rim of space, yet from which our own finite vision has given us a merciful immunity. The shadow I had
seen, I hardly dared to analyse or identify. Something had lain between me and the window that night, but I shuddered whenever I could not cast off the instinct to classify it. If it had only snarled, or bayed, or laughed titteringly—even that would have relieved the abysmal hideousness. But it was so silent. It had rested a heavy arm or foreleg on my chest...

Obviously it was organic, or had once been organic... Jan Martense, whose room I had invaded, was buried in the grave-yard near the mansion... I must find Bennett and Tobey, if they lived... why had it picked them, and left me for the last?... Drowsiness is so stifling, and dreams are so horrible...

In a short time I realised that I must tell my story to someone or break down completely. I had already decided not to abandon the quest for the lurking fear, for in my rash ignorance it seemed to me that uncertainty was worse than enlightenment, however terrible the latter might prove to be. Accordingly I resolved in my mind the best course to pursue; whom to select for my confidences, and how to track down the thing which had obliterated two men and cast a nightmare shadow.

My chief acquaintances at Lefferts Corners had been the affable reporters, of whom several had still remained to collect final echoes of the tragedy. It was from these that I determined to choose a colleague, and the more I reflected the more my preference inclined toward one Arthur Munroe, a dark, lean man of about thirty-five, whose education, taste, intelligence, and temperament all seemed to mark him as one not bound to conventional ideas and experiences.

On an afternoon in early September, Arthur Munroe listened to my story. I saw from the beginning that he was both interested and sympathetic, and when I had finished he analysed and discussed the thing with the greatest shrewdness and judgement. His advice, moreover, was eminently practical; for he recommended a postponement of operations at the Martense mansion until we might become fortified with more detailed historical and geographical data. On his initiative we combed the countryside for information regarding the terrible Martense family, and discovered a man who possessed a marvelously illuminating ancestral diary. We also talked at length with such of the mountain mongrels as had not fled from the terror and confusion to remoter slopes, and slope again scanned for dens and caves, but all without result. And yet, as I have said, vague new fears hovered menacingly over us; as if giant bat-winged gryphons looked on transcosmic gulfs.

As the afternoon advanced, it became increasingly difficult to see; and we heard the rumble of a thunderstorm gathering over Tempest Mountain. This sound in such a locality naturally stirred us, though less than it would have done at night. As it was, we hoped desperately that the storm would last until well after dark; and with that hope turned from our aimless hillside searching toward the nearest inhabited hamlet to gather a body of squatters as helpers in the investigation. Timid as they were, a few of the younger men were sufficiently inspired by our protective leadership to promise such help.

We had hardly more than turned, however, when there descended such a blinding sheet of torrential rain that shelter became imperative. The extreme, almost nocturnal darkness of
the sky caused us to stumble badly, but guided by the frequent flashes of lightning and by our minute knowledge of the hamlet we soon reached the least porous cabin of the lot; an heterogeneous combination of logs and boards whose still existing door and single tiny window both faced Maple Hill. Barring the door after us against the fury of the wind and rain, we put in place the crude window shutter which our frequent searches had taught us where to find. It was dismal sitting there on rickety boxes in the pitchy darkness, but we smoked pipes and occasionally flashed our pocket lamps about. Now and then we could see the lightning through cracks in the wall; the afternoon was so incredibly dark that each flash was extremely vivid.

The stormy vigil reminded me shudderingly of my ghastly night on Tempest Mountain. My mind turned to that odd question which had kept recurring ever since the nightmare thing had happened; and again I wondered why the demon, approaching the three watchers either from the window or the interior, had begun with the men on each side and left the middle man till the last, when the titan fireball had scared it away. Why had it not taken its victims in natural order, with myself second, from whichever direction it had approached? With what manner of far-reaching tentacles did it prey? Or did it know that I was the leader, and saved me for a fate worse than that of my companions?

In the midst of these reflections, as if dramatically arranged to intensify them, there fell nearby a terrific bolt of lightning followed by the sound of sliding earth. At the same time the wolfish wind rose to demoniac crescendos of ululation. We were sure that the one tree on Maple Hill had been struck again, and Munroe rose from his box and went to the tiny window to ascertain the damage. When he took down the shutter the wind, and rain howled deafeningly in, so that I could not hear what he said; but I waited while he leaned out and tried to fathom Nature's pandemonium.

Gradually a calming of the wind and dispersal of the unusual darkness told of the storm's passing. I had hoped it would last into the night to help our quest, but a furtive sunbeam from a knothole behind me removed the likelihood of such a thing. Suggesting to Munroe that we had better get some light even if more showers came, I unbarred and opened the crude door. The ground outside was a singular mass of mud and pools, with fresh heaps of earth from the slight landslide; but I saw nothing to justify the interest which kept my companion silently leaning out the window. Crossing to where he leaned, I touched his shoulder; but he did not move. Then, as I playfully shook him and turned him around, I felt the strangling tendrils of a cancerous horror whose roots reached into illimitable pasts and fathomless abysms of the night that broods beyond time.

For Arthur Munroe was dead. And on what remained of his chewed and gouged head there was no longer a face.

III. What The Red Glare Meant

Vol. 3, No. 2 (March 1923), p. 31-37, 44, 48;

On the tempest-racked night of November 8, 1921, with a lantern which cast charnel shadows, I stood digging alone and idiotically in the grave of Jan Martense. I had begun
to dig in the afternoon, because a thunderstorm was brewing, and now that it was dark and the storm had burst above the maniacally thick foliage I was glad.

I believe that my mind was partly unhinged by events since August 5th; the demon shadow in the mansion, the general strain and disappointment, and the thing that occurred at the hamlet in an October storm. After that thing I had dug a grave for one whose death I could not understand. I knew that others could not understand either, so let them think Arthur Munroe had wandered away. They searched, but found nothing. The squatters might have understood, but I dared not frighten them more. I myself seemed strangely callous. That shock at the mansion had done something to my brain, and I could think only of the quest for a horror now grown to cataclysmic stature in my imagination; a quest which the fate of Arthur Munroe made me vow to keep silent and solitary.

The scene of my excavations would alone have been enough to unnerve any ordinary man. Baleful primal trees of unholy size, age, and grotesqueness leered above me like the pillars of some hellish Druidic temple; muffling the thunder, hushing the clawing wind, and admitting but little rain. Beyond the scarred trunks in the background, illumined by faint flashes of filtered lightning, rose the damp ivied stones of the deserted mansion, while somewhat nearer was the abandoned Dutch garden whose walks and beds were polluted by a white, fungous, foetid, over-nourished vegetation that never saw full daylight. And nearest of all was the graveyard, where deformed trees tossed insane branches as their roots displaced unhallowed slabs and sucked venom from what lay below. Now and then, beneath the brown pall of leaves that rotted and festered in the antediluvian forest darkness, I could trace the sinister outlines of some of those low mounds which characterized the lightning-pierced region.

History had led me to this archaic grave. History, indeed, was all I had after everything else ended in mocking Satanism. I now believed that the lurking fear was no material being, but a wolf-fanged ghost that rode the midnight lightning. And I believed, because of the masses of local tradition I had unearthed in search with Arthur Munroe, that the ghost was that of Jan Martense, who died in 1762. This is why I was digging idiotically in his grave.

The Martense mansion was built in 1670 by Gerrit Martense, a wealthy New-Amsterdam merchant who disliked the changing order under British rule, and had constructed this magnificent domicile on a remote woodland summit whose untrodden solitude and unusual scenery pleased him. The only substantial disappointment encountered in this site was that which concerned the prevalence of violent thunderstorms in summer. When selecting the hill and building his mansion, Mynheer Martense had laid these frequent natural outbursts to some peculiarity of the year; but in time he perceived that the locality was especially liable to such phenomena. At length, having found these storms injurious to his head, he fitted up a cellar into which he could retreat from their wildest pandemonium.

Of Gerrit Martense's descendants less is known than of himself; since they were all reared in hatred of the English civilisation, and trained to shun such of the colonists as accepted it. Their life was exceedingly secluded, and people declared that their isolation had made them heavy of speech and comprehension. In appearance all were marked by a
peculiar inherited dissimilarity of eyes; one generally being blue and the other brown. Their social contacts grew fewer and fewer, till at last they took to intermarrying with the numerous menial class about the estate. Many of the crowded family degenerated, moved across the valley, and merged with the mongrel population which was later to produce the pitiful squatters. The rest had stuck sullenly to their ancestral mansion, becoming more and more clannish and taciturn, yet developing a nervous responsiveness to the frequent thunderstorms.

Most of this information reached the outside world through young Jan Martense, who from some kind of restlessness joined the colonial army when news of the Albany Convention reached Tempest Mountain. He was the first of Gerrit's descendants to see much of the world; and when he returned in 1760 after six years of campaigning, he was hated as an outsider by his father, uncles, and brothers, in spite of his dissimilar Martense eyes. No longer could he share the peculiarities and prejudices of the Martenses, while the very mountain thunderstorms failed to intoxicate him as they had before. Instead, his surroundings depressed him; and he frequently wrote to a friend in Albany of plans to leave the paternal roof.

In the spring of 1763 Jonathan Gifford, the Albany friend of Jan Martense, became worried by his correspondent's silence; especially in view of the conditions and quarrels at the Martense mansion. Determined to visit Jan in person, he went into the mountains on horseback. His diary states that he reached Tempest Mountain on September 20, finding the mansion in great decrepitude. The sullen, odd-eyed Martenses, whose unclean animal aspect shocked him, told him in broken gutterals that Jan was dead. He had, they insisted, been struck by lightning the autumn before; and now lay buried behind the neglected sunken gardens. They showed the visitor the grave, barren and devoid of markers. Something in the Martenses' manner gave Gifford a feeling of repulsion and suspicion, and a week later he returned with spade and mattock to explore the sepulchral spot. He found what he expected - a skull crushed cruelly as if by savage blows - so returning to Albany he openly charged the Martenses with the murder of their kinsman.

Legal evidence was lacking, but the story spread rapidly round the countryside; and from that time the Martenses were ostracised by the world. No one would deal with them, and their distant manor was shunned as an accursed place. Somehow they managed to live on independently by the product of their estate, for occasional lights glimpsed from far-away hills attested their continued presence. These lights were seen as late as 1810, but toward the last they became very infrequent.

Meanwhile there grew up about the mansion and the mountain a body of diabolic legendry. The place was avoided with doubled assiduousness, and invested with every whispered myth tradition could supply. It remained unvisited till 1816, when the continued absence of lights was noticed by the squatters. At that time a party made investigations, finding the house deserted and partly in ruins.

There were no skeletons about, so that departure rather than death was inferred. The clan seemed to have left several years before, and improvised penthouses showed how numerous it had grown prior to its migration. Its cultural level had fallen very low, as proved by decaying furniture and scattered silverware which must have been long
abandoned when its owners left. But though the dreaded Martenses were gone, the fear of the haunted house continued; and grew very acute when new and strange stories arose among the mountain decadents. There it stood; deserted, feared, and linked with the vengeful ghost of Jan Martense. There it still stood on the night I dug in Jan Martense's grave.

I have described my protracted digging as idiotic, and such it indeed was in object and method. The coffin of Jan Martense had soon been unearthed— it now held only dust and nitre - but in my fury to exhume his ghost I delved irrationally and clumsily down beneath where he had lain. God knows what I expected to find—I only felt that I was digging in the grave of a man whose ghost stalked by night.

It is impossible to say what monstrous depth I had attained when my spade, and soon my feet, broke through the ground beneath. The event, under the circumstances, was tremendous; for in the existence of a subterranean space here, my mad theories had terrible confirmation. My slight fall had extinguished the lantern, but I produced an electric pocket lamp and viewed the small horizontal tunnel which led away indefinitely in both directions. It was amply large enough for a man to wriggle through; and though no sane person would have tried at that time, I forgot danger, reason, and cleanliness in my single-minded fever to unearth the lurking fear. Choosing the direction toward the house, I scrambled recklessly into the narrow burrow; squirming ahead blindly and rapidly, and flashing but seldom the lamp I kept before me.

What language can describe the spectacle of a man lost in infinitely abysmal earth; pawing, twisting, wheezing; scrambling madly through sunken - convolutions of immemorial blackness without an idea of time, safety, direction, or definite object? There is something hideous in it, but that is what I did. I did it for so long that life faded to a far memory, and I became one with the moles and grubs of nighted depths. Indeed, it was only by accident that after interminable writhings I jarred my forgotten electric lamp alight, so that it shone eerily along the burrow of caked loam that stretched and curved ahead.

I had been scrambling in this way for some time, so that my battery had burned very low, when the passage suddenly inclined sharply upward, altering my mode of progress. And as I raised my glance it was without preparation that I saw glistening in the distance two demoniac reflections of my expiring lamp; two reflections glowing with a baneful and unmistakable effulgence, and provoking maddeningly nebulous memories. I stopped automatically, though lacking the brain to retreat. The eyes approached, yet of the thing that bore them I could distinguish only a claw. But what a claw! Then far overhead I heard a faint crashing which I recognized. It was the wild thunder of the mountain, raised to hysteric fury - I must have been crawling upward for some time, so that the surface was now quite near. And as the muffled thunder clattered, those eyes still stared with vacuous viciousness.

Thank God I did not then know what it was, else I should have died. But I was saved by the very thunder that had summoned it, for after a hideous wait there burst from the unseen outside sky one of those frequent mountainward bolts whose aftermath I had noticed here and there as gashes of disturbed earth and fulgurites of various sizes. With
Cyclopean rage it tore through the soil above that damnable pit, blinding and deafening me, yet not wholly reducing me to a coma. In the chaos of sliding, shifting earth I clawed and floundered helplessly till the rain on my head steadied me and I saw that I had come to the surface in a familiar spot; a steep unforested place on the southwest slope of the mountain. Recurrent sheet lightnings illumined the tumbled ground and the remains of the curious low hummock which had stretched down from the wooded higher slope, but there was nothing in the chaos to show my place of egress from the lethal catacomb. My brain was as great a chaos as the earth, and as a distant red glare burst on the landscape from the south I hardly realised the horror I had been through.

But when two days later the squatters told me what the red glare meant, I felt more horror than that which the mould-burrow and the claw and eyes had given; more horror because of the overwhelming implications. In a hamlet twenty miles away an orgy of fear had followed the bolt which brought me above ground, and a nameless thing had dropped from an overhanging tree into a weak-roofed cabin. It had done a deed, but the squatters had fired the cabin in frenzy before it could escape. It had been doing that deed at the very moment the earth caved in on the thing with the claw and eyes.

IV. The Horror In The Eyes

Vol. 3, No. 3 (April 1923), p. 35-42.

There can be nothing normal in the mind of one who, knowing what I knew of the horrors of Tempest Mountain, would seek alone for the fear that lurked there. That at least two of the fear's embodiments were destroyed, formed but a slight guarantee of mental and physical safety in this Acheron of multiform diabolism; yet I continued my quest with even greater zeal as events and revelations became more monstrous. When, two days after my frightful crawl through that crypt of the eyes and claw, I learned that a thing had malignly hovered twenty miles away at the same instant the eyes were glaring at me, I experienced virtual convulsions of fright. But that fright was so mixed with wonder and alluring grotesqueness, that it was almost a pleasant sensation. Sometimes, in the throes of a nightmare when unseen powers whirl one over the roofs of strange dead cities toward the grinning chasm of Nis, it is a relief and even a delight to shriek wildly and throw oneself voluntarily along with the hideous vortex of dream-doom into whatever bottomless gulf may yawn. And so it was with the walking nightmare of Tempest Mountain; the discovery that two monsters had haunted the spot gave me ultimately a mad craving to plunge into the very earth of the accursed region, and with bare hands dig out the death that leered from every inch of the poisonous soil.

As soon as possible I visited the grave of Jan Martense and dug vainly where I had dug before. Some extensive cave-in had obliterated all trace of the underground passage, while the rain had washed so much earth back into the excavation that I could not tell how deeply I had dug that other day. I likewise made a difficult trip to the distant hamlet where the death-creature had been burnt, and was little repaid for my trouble. In the ashes of the fateful cabin I found several bones, but apparently none of the monster's. The squatters said the thing had had only one victim; but in this I judged them inaccurate, since besides the complete skull of a human being, there was another bony fragment which seemed certainly to have belonged to a human skull at some time. Though the
rapid drop of the monster had been seen, no one could say just what the creature was like; those who had glimpsed it called it simply a devil. Examining the great tree where it had lurked, I could discern no distinctive marks. I tried to find some trail into the black forest, but on this occasion could not stand the sight of those morbidly large boles, or of those vast serpent-like roots that twisted so malevolently before they sank into the earth.

My next step was to reexamine with microscopic care the deserted hamlet where death had come most abundantly, and where Arthur Munroe had seen something he never lived to describe. Though my vain previous searches had been exceedingly minute, I now had new data to test; for my horrible grave-crawl convinced me that at least one of the phases of the monstrosity had been an underground creature. This time, on the 14th of November, my quest concerned itself mostly with the slopes of Cone Mountain and Maple Hill where they overlook the unfortunate hamlet, and I gave particular attention to the loose earth of the landslide region on the latter eminence.

The afternoon of my search brought nothing to light, and dusk came as I stood on Maple Hill looking down at the hamlet and across the valley to Tempest Mountain. There had been a gorgeous sunset, and now the moon came up, nearly full and shedding a silver flood over the plain, the distant mountainside, and the curious low mounds that rose here and there. It was a peaceful Arcadian scene, but knowing what it hid I hated it. I hated the mocking moon, the hypocritical plain, the festering mountain, and those sinister mounds. Everything seemed to me tainted with a loathsome contagion, and inspired by a noxious alliance with distorted hidden powers.

Presently, as I gazed abstractedly at the moonlit panorama, my eye became attracted by something singular in the nature and arrangement of a certain topographical element. Without having any exact knowledge of geology, I had from the first been interested in the odd mounds and hummocks of the region. I had noticed that they were pretty widely distributed around Tempest Mountain, though less numerous on the plain than near the hilltop itself, where prehistoric glaciation had doubtless found feeble opposition to its striking and fantastic caprices. Now, in the light of that low moon which cast long weird shadows, it struck me forcibly that the various points and lines of the mound system had a peculiar relation to the summit of Tempest Mountain. That summit was undeniably a centre from which the lines or rows of points radiated indefinitely and irregularly, as if the unwelcome Martense mansion had thrown visible tentacles of terror. The idea of such tentacles gave me an unexplained thrill, and I stopped to analyze my reason for believing these mounds glacial phenomena.

The more I analyzed the less I believed, and against my newly opened mind there began to beat grotesque and horrible analogies based on superficial aspects and upon my experience beneath the earth. Before I knew it I was uttering frenzied and disjointed words to myself; "My God!... Molehills... the damned place must be honeycombed... how many... that night at the mansion... they took Bennett and Tobey first... on each side of us..." Then I was digging frantically into the mound which had stretched nearest me; digging desperately, shiveringly, but almost jubilantly; digging and at last shrieking aloud with some unplaced emotion as I came upon a tunnel or burrow just like the one through which I had crawled on the other demoniac night.
After that I recall running, spade in hand; a hideous run across moon-litten, mound-marked meadows and through diseased, precipitous abysses of haunted hillside forest; leaping screaming, panting, bounding toward the terrible Martense mansion. I recall digging unreasonably in all parts of the brier-choked cellar; digging to find the core and centre of that malignant universe of mounds. And then I recall how I laughed when I stumbled on the passageway; the hole at the base of the old chimney, where the thick weeds grew and cast queer shadows in the light of the lone candle I had happened to have with me. What still remained down in that hell-hive, lurking and waiting for the thunder to arouse it, I did not know. Two had been killed; perhaps that had finished it. But still there remained that burning determination to reach the innermost secret of the fear, which I had once more come to deem definite, material, and organic.

My indecisive speculation whether to explore the passage alone and immediately with my pocket-light or to try to assemble a band of squatters for the quest, was interrupted after a time by a sudden rush of wind from the outside which blew out the candle and left me in stark blackness. The moon no longer shone through the chinks and apertures above me, and with a sense of fateful alarm I heard the sinister and significant rumble of approaching thunder. A confusion of associated ideas possessed my brain, leading me to grope back toward the farthest corner of the cellar. My eyes, however, never turned away from the horrible opening at the base of the chimney; and I began to get glimpses of the crumbling bricks and unhealthy weeds as faint glows of lightning penetrated the weeds outside and illumined the chinks in the upper wall. Every second I was consumed with a mixture of fear and curiosity. What would the storm call forth-or was there anything left for it to call? Guided by a lightning flash I settled myself down behind a dense clump of vegetation, through which I could see the opening without being seen.

If heaven is merciful, it will some day efface from my consciousness the sight that I saw, and let me live my last years in peace. I cannot sleep at night now, and have to take opiates when it thunders. The thing came abruptly and unannounced; a demon, ratlike scurrying from pits remote and unimaginable, a hellish panting and stifled grunting, and then from that opening beneath the chimney a burst of multitudinous and leprous life - a loathsome night-spawned flood of organic corruption more devastatingly hideous than the blackest conjurations of mortal madness and morbidity. Seething, stewing, surging, bubbling like serpents’ slime it rolled up and out of that yawning hole, spreading like a septic contagion and streaming from the cellar at every point of egress - streaming out to scatter through the accursed midnight forests and strew fear, madness, and death.

God knows how many there were - there must have been thousands. To see the stream of them in that faint intermittent lightning was shocking. When they had thinned out enough to be glimpsed as separate organisms, I saw that they were dwarfed, deformed hairy devils or apes-monstrous and diabolic caricatures of the monkey tribe. They were so hideously silent; there was hardly a squeal when one of the last stragglers turned with the skill of long practice to make a meal in accustomed fashion on a weaker companion. Others snapped up what it left and ate with slavering relish. Then, in spite of my daze of fright and disgust, my morbid curiosity triumphed; and as the last of the monstrosities oozed up alone from that nether world of unknown nightmare, I drew my automatic pistol and shot it under cover of the thunder.
Shrieking, slithering, torrential shadows of red viscous madness chasing one another through endless, ensanguined condors of purple fulgurous sky... formless phantasms and kaleidoscopic mutations of a ghoulish, remembered scene; forests of monstrous over-nourished oaks with serpent roots twisting and sucking unnamable juices from an earth verminous with millions of cannibal devils; mound-like tentacles groping from underground nuclei of polypous perversion... insane lightning over malignant ivied walls and demon arcades choked with fungous vegetation... Heaven be thanked for the instinct which led me unconscious to places where men dwell; to the peaceful village that slept under the calm stars of clearing skies.

I had recovered enough in a week to send to Albany for a gang of men to blow up the Martense mansion and the entire top of Tempest Mountain with dynamite, stop up all the discoverable mound-burrows, and destroy certain over-nourished trees whose very existence seemed an insult to sanity. I could sleep a little after they had done this, but true rest will never come as long as I remember that nameless secret of the lurking fear. The thing will haunt me, for who can say the extermination is complete, and that analogous phenomena do not exist all over the world? Who can, with my knowledge, think of the earth's unknown caverns without a nightmare dread of future possibilities? I cannot see a well or a subway entrance without shuddering... why cannot the doctors give me something to make me sleep, or truly calm my brain when it thunders?

What I saw in the glow of flashlight after I shot the unspeakable straggling object was so simple that almost a minute elapsed before I understood and went delirious. The object was nauseous; a filthy whitish gorilla thing with sharp yellow fangs and matted fur. It was the ultimate product of mammalian degeneration; the frightful outcome of isolated spawning, multiplication, and cannibal nutrition above and below the ground; the embodiment of all the snarling and chaos and grinning fear that lurk behind life. It had looked at me as it died, and its eyes had the same odd quality that marked those other eyes which had stared at me underground and excited cloudy recollections. One eye was blue, the other brown. They were the dissimilar Martense eyes of the old legends, and I knew in one inundating cataclysm of voiceless horror what had become of that vanished family; the terrible and thunder-crazed house of Martense.
From even the greatest of horrors irony is seldom absent. Some times it enters directly into the composition of the events, while sometimes it relates only to their fortuitous position among persons and places. The latter sort is splendidly exemplified by a case in the ancient city of Providence, where in the late forties Edgar Allan Poe used to sojourn often during his unsuccessful wooing of the gifted poetess, Mrs. Whitman. Poe generally stopped at the Mansion House in Benefit Street - the renamed Golden Ball Inn whose roof has sheltered Washington, Jefferson, and Lafayette - and his favourite walk led northward along the same street to Mrs. Whitman's home and the neighbouring hillside churchyard of St. John's whose hidden expanse of eighteenth-century gravestones had for him a peculiar fascination.

Now the irony is this. In this walk, so many times repeated, the world's greatest master of the terrible and the bizarre was obliged to pass a particular house on the eastern side of the street; a dingy, antiquated structure perched on the abruptly rising side hill, with a great unkept yard dating from a time when the region was partly open country. It does not appear that he ever wrote or spoke of it, nor is there any evidence that he even noticed it. And yet that house, to the two persons in possession of certain information, equals or outranks in horror the wildest phantasy of the genius who so often passed it unknowingly, and stands starkly leering as a symbol of all that is unutterably hideous.

The house was - and for that matter still is - of a kind to attract the attention of the curious. Originally a farm or semi-farm building, it followed the average New England colonial lines of the middle eighteenth century - the prosperous peaked-roof sort, with two stories and dormerless attic, and with the Georgian doorway and interior paneling dictated by the progress of taste at that time. It faced south, with one gable and buried to the lower windows in the east ward rising hill, and the other exposed to the foundations toward the street. Its construction, over a century and a half ago, had followed the grading and straightening of the road in that especial vicinity; for Benefit Street - at first called Back Street - was laid out as a lane winding amongst the graveyards of the first settlers, and straightened only when the removal of the bodies to the North Burial Ground made it decently possible to cut through the old family plots.

At the start, the western wall had lain some twenty feet up a precipitous lawn from the roadway; but a widening of the street at about the time of the Revolution sheared off most of the intervening space, exposing the foundations so that a brick basement wall had to be made, giving the deep cellar a street frontage with the door and two windows above ground, close to the new line of public travel. When the sidewalk was laid out a century ago the last of the intervening space was removed; and Poe in his walks must have seen
only a sheer ascent of dull grey brick flush with the sidewalk and surmounted at a height of ten feet by the antique shingled bulk of the house proper.

The farm-like grounds extended back very deeply up the hill, almost to Wheaton Street. The space south of the house, abutting on Benefit Street, was of course greatly above the existing sidewalk level, forming a terrace bounded by a high wall of damp, mossy stone pierced by a steep flight of narrow steps which led inward between canyon-like surfaces to the upper region of mangy lawn, rheumy brick walls, and neglected gardens whose dismantled cement urns, rusted kettles fallen from tripods of knotty sticks, and similar paraphernalia set off the weather beaten front door with its broken fanlight, rotting Ionic pilasters, and wormy triangular pediment.

What I heard in my youth about the shunned house was merely that people died there in alarmingly great numbers. That, I was told, was why the original owners had moved out some twenty years after building the place. It was plainly unhealthy, perhaps because of the dampness and fungous growth in the cellar, the general sickish smell, the draughts of the hallways, or the quality of the well and pump water. These things were bad enough, and these were all that gained belief among the person whom I knew. Only the notebooks of my antiquarian uncle, Dr. Elihu Whipple, revealed to me at length the darker, vaguer surmises which formed an undercurrent of folk-lore among old-time servants and humble folk, surmises which never travelled far, and which were largely forgotten when Providence grew to be a metropolis with a shifting modern population.

The general fact is, that the house was never regarded by the solid part of the community as in any real sense "haunted." There were no widespread tales of rattling chains, cold currents of air, extinguished lights, or faces at the window. Extremists sometimes said the house was "unlucky," but that is as far as even they went. What was really beyond dispute is that a frightful proportion of persons died there; or more accurately, had died there, since after some peculiar happenings over sixty years ago the building had become deserted through the sheer impossibility of renting it. These persons were not all cut off suddenly by any one cause; rather did it seem that their vitality was insidiously sapped, so that each one died the sooner from whatever tendency to weakness he may have naturally had. And those who did not die displayed in varying degree a type of anaemia or consumption, and sometimes a decline of the mental faculties, which spoke ill for the salubriousness of the building. Neighbouring houses, it must be added, seemed entirely free from the noxious quality.

This much I knew before my insistent questioning led my uncle to show me the notes which finally embarked us both on our hideous investigation. In my childhood the shunned house was vacant, with barren, gnarled and terrible old trees, long, queerly pale grass and nightmarishly misshapen weeds in the high terraced yard where birds never lingered. We boys used to overrun the place, and I can still recall my youthful terror not only at the morbid strangeness of this sinister vegetation, but at the eldritch atmosphere and odour of the dilapidated house, whose unlocked front door was often entered in quest of shudders. The small-paned windows were largely broken, and a nameless air of desolation hung round the precarious panel ling, shaky interior shutters, peeling
wallpaper, falling plaster, rickety staircases, and such fragments of battered furniture as still remained. The dust and cobwebs added their touch of the fearful; and brave indeed was the boy who would voluntarily ascend the ladder to the attic, a vast raftered length lighted only by small blinking windows in the gable ends, and filled with a massed wreckage of chests, chairs, and spinning-wheels which infinite years of deposit had shrouded and festooned into monstrous and hellish shapes.

But after all, the attic was not the most terrible part of the house. It was the dank, humid cellar which somehow exerted the strongest repulsion on us, even though it was wholly above ground on the street side, with only a thin door and window-pierced brick wall to separate it from the busy sidewalk. We scarcely knew whether to haunt it in spectral fascination, or to shun it for the sake of our souls and our sanity. For one thing, the bad odour of the house was strongest there; and for another thing, we did not like the white fungous growths which occasionally sprang up in rainy summer weather from the hard earth floor. Those fungi, grotesquely like the vegetation in the yard outside, were truly horrible in their outlines; detestable parodies of toadstools and Indian pipes, whose like we had never seen in any other situation. They rotted quickly, and at one stage became slightly phosphorescent; so that nocturnal passers-by sometimes spoke of witch-fires glowing behind the broken panes of the foetor-spreading windows.

We never - even in our wildest Hallowe'en moods - visited this cellar by night, but in some of our daytime visits could detect the phosphorescence, especially when the day was dark and wet. There was also a subtler thing we often thought we detected - a very strange thing which was, however, merely suggestive at most. I refer to a sort of cloudy whitish pattern on the dirt floor - a vague, shifting deposit of mould or nitre which we sometimes thought we could trace amidst the sparse fungous growths near the huge fireplace of the basement kitchen. Once in a while it struck us that this patch bore an uncanny resemblance to a doubled-up human figure, though generally no such kinship existed, and often there was no whitish deposit whatever. On a certain rainy afternoon when this illusion seemed phenomenally strong, and when, in addition, I had fancied I glimpsed a kind of thin, yellowish, shimmering exhalation rising from the nitrous pattern toward the yawning fireplace, I spoke to my uncle about the matter. He smiled at this odd conceit, but it seemed that his smile was tinged with reminiscence. Later I heard that a similar notion entered into some of the wild ancient tales of the common folk - a notion likewise alluding to ghoulish, wolfish shapes taken by smoke from the great chimney, and queer contours assumed by certain of the sinuous tree-roots that thrust their way into the cellar through the loose foundation-stones.

II

Not till my adult years did my uncle set before me the notes and data which he had collected concerning the shunned house. Dr. Whipple was a sane, conservative physician of the old school, and for all his interest in the place was not eager to encourage young thoughts toward the abnormal. His own view, postulating simply a building and location of markedly unsanitary qualities, had nothing to do with abnormality; but he realized that the very picturesque ness which aroused his own interest would in a boy's fanciful mind take on all manner of gruesome imaginative associations.
The doctor was a bachelor; a white-haired, clean-shaven, old-fashioned gentleman, and a local historian of note, who had often broken a lance with such controversial guardians of tradition as Sidney S. Rider and Thomas W. Bicknell. He lived with one man servant in a Georgian homestead with knocker and iron-railed steps, balanced eerily on the steep ascent of North Court Street beside the ancient brick court and colony house where his grandfather - a cousin of that celebrated privateersman, Capt. Whipple, who burnt His Majesty's armed schooner Gaspee in 1772 - had voted in the legislature on May 4, 1776, for the independence of the Rhode Island Colony. Around him in the damp, low-ceiled library with the musty white paneling, heavy carved overmantel and small-paned, vine-shaded windows, were the relics and records of his ancient family, among which were many dubious allusions to the shunned house in Benefit Street. That pest spot lies not far distant - for Benefit runs ledgewise just above the court house along the precipitous hill up which the first settlement climbed.

When, in the end, my insistent pestering and maturing years evoked from my uncle the hoarded lore I sought, there lay before me a strange enough chronicle. Long-winded, statistical, and drearily genealogical as some of the matter was, there ran through it a continuous thread of brooding, tenacious horror and preternatural malevolence which impressed me even more than it had impressed the good doctor. Separate events fitted together uncannily, and seemingly irrelevant details held mines of hideous possibilities. A new and burning curiosity grew in me, compared to which my boyish curiosity was feeble and inchoate. The first revelation led to an exhaustive research, and finally to that shuddering quest which proved so disastrous to myself and mine. For at last my uncle insisted on joining the search I had commenced, and after a certain night in that house he did not come away with me. I am lonely without that gentle soul whose long years were filled only with honour, virtue, good taste, benevolence, and learning. I have reared a marble urn to his memory in St. John's churchyard - the place that Poe loved - the hidden grove of giant willows on the hill, where tombs and head stones huddle quietly between the hoary bulk of the church and the houses and bank walls of Benefit Street.

The history of the house, opening amidst a maze of dates, revealed no trace of the sinister either about its construction or about the prosperous and honourable family who built it. Yet from the first a taint of calamity, soon increased to boding significance, was apparent. My uncle's carefully compiled record began with the building of the structure in 1763, and followed the theme with an unusual amount of detail. The shunned house, it seems, was first inhabited by William Harris and his wife Rhoby Dexter, with their children, Elkanah, born in 1755, Abigail, born in 1757, William, Jr., born in 1759, and Ruth, born in 1761. Harris was a substantial merchant and seaman in the West India trade, connected with the firm of Obadiah Brown and his nephews. After Brown's death in 1761, the new firm of Nicholas Brown & Co. made him master of the brig Prudence, providence-built, of 120 tons, thus enabling him to erect the new homestead he had desired ever since his marriage.

The site he had chosen - a recently straightened part of the new and fashionable Back Street, which ran along the side of the hill above crowded Cheapside - was all that could be wished, and the building did justice to the location. It was the best that moderate means could afford, and Harris hastened to move in before the birth of a fifth child which
the family expected. That child, a boy, came in December; but was still-born. Nor was any child to be born alive in that house for a century and a half.

The next April sickness occurred among the children, and Abigail and Ruth died before the month was over. Dr. Job Ives diagnosed the trouble as some infantile fever, though others declared it was more of a mere wasting-away or decline. It seemed, in any event, to be contagious; for Hannah Bowen, one of the two servants, died of it in the following June. Eli Lideason, the other servant, constantly complained of weakness; and would have returned to his father's farm in Rehoboth but for a sudden attachment for Mehitabel Pierce, who was hired to succeed Hannah. He died the next year - a sad year in deed, since it marked the death of William Harris himself, enfeebled as he was by the climate of Martinique, where his occupation had kept him for considerable periods during the preceding decade.

The widowed Rhoby Harris never recovered from the shock of her husband's death, and the passing of her firstborn Elkanah two years later was the final blow to her reason. In 1768 she fell victim to a mild form of insanity, and was thereafter confined to the upper part of the house, her elder maiden sister, Mercy Dexter, having moved in to take charge of the family. Mercy was a plain, raw-boned woman of great strength, but her health visibly declined from the time of her advent. She was greatly devoted to her unfortunate sister, and had an especial affection for her only surviving nephew William, who from a sturdy infant had become a sickly, spindling lad. In this year the servant Mehitabel died, and the other servant, Preserved Smith, left without coherent explanation - or at least, with only some wild tales and a complaint that he disliked the smell of the place. For a time Mercy could secure no more help, since the seven deaths and case of madness, all occurring within five years' space, had begun to set in motion the body of fireside rumour which later became so bizarre. Ultimately, however, she obtained new servants from out of town; Ann White, a morose woman from that part of North Kingstown now set off as the township of Exeter, and a capable Boston man named Zenas Low.

It was Ann White who first gave definite shape to the sinister idle talk. Mercy should have known better than to hire anyone from the Nooseneck Hill country, for that remote bit of backwoods was then, as now, a seat of the most uncomfortable superstitions. As lately as 1892 an Exeter community exhumed a dead body and ceremoniously burnt its heart in order to prevent certain alleged visitations injurious to the public health and peace, and one may imagine the point of view of the same section in 1768. Ann's tongue was perniciously active, and within a few months Mercy discharged her, filling her place with a faithful and amiable Amazon from Newport, Maria Robbins.

Meanwhile poor Rhoby Harris, in her madness, gave voice to dreams and imaginings of the most hideous sort. At times her screams became insupportable, and for long periods she would utter shrieking horrors which necessitated her son's temporary residence with his cousin, Peleg Harris, in Presbyterian Lane near the new college building. The boy would seem to improve after these visits, and had Mercy been as wise as she was well-meaning, she would have let him live permanently with Peleg. Just what Mrs. Harris cried out in her fits of violence, tradition hesitates to say; or rather, presents such
extravagant accounts that they nullify themselves through sheer absurdity. Certainly it sounds absurd to hear that a woman educated only in the rudiments of French often shouted for hours in a coarse and idiomatic form of that language, or that the same person, alone and guarded, complained wildly of a staring thing which bit and chewed at her. In 1772 the servant Zenas died, and when Mrs. Harris heard of it she laughed with a shocking delight utterly foreign to her. The next year she herself died, and was laid to rest in the North Burial Ground beside her husband.

Upon the outbreak of trouble with Great Britain in 1775, William Harris, despite his scant sixteen years and feeble constitution, man aged to enlist in the Army of Observation under General Greene; and from that time on enjoyed a steady rise in health and prestige.

In 1780, as a Captain in Rhode Island forces in New Jersey under Colonel Angell, he met and married Phebe Hetfield of Elizabethtown, whom he brought to Providence upon his honourable discharge in the following year.

The young soldier's return was not a thing of unmitigated happiness. The house, it is true, was still in good condition; and the street had been widened and changed in name from Back Street to Benefit Street. But Mercy Dexter's once robust frame had undergone a sag and curious decay, so that she was now a stooped and pathetic figure with hollow voice and disconcerting pallor - qualities shared to a singular degree by the one remaining servant Maria. In the autumn of 1782 Phebe Harris gave birth to a still-born daughter, and on the fifteenth of the next May Mercy Dexter took leave of a useful, austere, and virtuous life.

William Harris, at last thoroughly convinced of the radically unhealthful nature of his abode, now took steps toward quitting it and closing it forever. Securing temporary quarters for himself and wife at the newly opened Golden Ball Inn, he arranged for the building of a new and finer house in Westminster Street, in the growing part of the town across the Great Bridge. There, in 1785, his son Dutee was born; and there the family dwelt till the encroachments of commerce drove them back across the river and over the hill to Angell Street, in the newer East Side residence district, where the late Archer Harris built his sumptuous but hideous French-roofed mansion in 1876. William and Phebe both succumbed to the yellow fever epidemic in 1797, but Dutee was brought up by his cousin Rathbone Harris, Peleg's son.

Rathbone was a practical man, and rented the Benefit Street house despite William's wish to keep it vacant. He considered it an obligation to his ward to make the most of all the boy's property, nor did he concern himself with the deaths and illnesses which caused so many changes of tenants, or the steadily growing aversion with which the house was generally regarded. It is likely that he felt only vexation when, in 1804, the town council ordered him to fumigate the place with sulphur, tar and gum camphor on account of the much-discussed deaths of four persons, presumably caused by the then diminishing fever epidemic. They said the place had a febrile smell.

Dutee himself thought little of the house, for he grew up to be a privateersman, and served with distinction on the Vigilant under Capt. Cahoone in the War of 1812. He returned unharmed, married in 1814, and became a father on that memorable night of
September 23, 1815, when a great gale drove the waters of the bay over half the town, and floated a tall sloop well up Westminster Street so that its masts almost tapped the Harris windows in symbolic affirmation that the new boy, Welcome, was a seaman's son.

Welcome did not survive his father, but lived to perish gloriously at Fredericksburg in 1862. Neither he nor his son Archer knew of the shunned house as other than a nuisance almost impossible to rent - perhaps on account of the mustiness and sickly odour of unkempt old age. Indeed, it never was rented after a series of deaths culminating in 1861, which the excitement of the war tended to throw into obscurity. Carrington Harris, last of the male line, knew it only as a deserted and somewhat picturesque center of legend until I told him my experience. He had meant to tear it down and build an apartment house on the site, but after my account, decided to let it stand, install plumbing, and rent it. Nor has he yet had any difficulty in obtaining tenants. The horror has gone.

III

It may well be imagined how powerfully I was affected by the annals of the Harrises. In this continuous record there seemed to me to brood a persistent evil beyond anything in nature as I had known it; an evil clearly connected with the house and not with the family. This impression was confirmed by my uncle's less systematic array of miscellaneous data - legends transcribed from servant gossip, cuttings from the papers, copies of death certificates by fellow-physicians, and the like. All of this material I cannot hope to give, for my uncle was a tireless antiquarian and very deeply interested in the shunned house; but I may refer to several dominant points which earn notice by their recurrence through many reports from diverse sources. For example, the servant gossip was practically unanimous in attributing to the fungous and malodorous cellar of the house a vast supremacy in evil influence. There had been servants - Ann White especially - who would not use the cellar kitchen, and at least three well-defined legends bore upon the queer quasi-human or diabolic outlines assumed by tree-roots and patches of mould in that region. These latter narratives interested me profoundly, on account of what I had seen in my boyhood, but I felt that most of the significance had in each case been largely obscured by additions from the common stock of local ghost lore.

Ann White, with her Exeter superstition, had promulgated the most extravagant and at the same time most consistent tale; alleging that there must lie buried beneath the house one of those vampires - the dead who retain their bodily form and live on the blood or breath of the living - whose hideous legions send their preying shapes or spirits abroad by night. To destroy a vampire one must, the grandmothers say, exhume it and burn its heart, or at least drive a stake through that organ; and Ann's dogged insistence on a search under the cellar had been prominent in bringing about her discharge.

Her tales, however, commanded a wide audience, and were the more readily accepted because the house indeed stood on land once used for burial purposes. To me their interest depended less on this circumstance than on the peculiarly appropriate way in which they dove-tailed with certain other things - the complaint of the departing servant Preserved Smith, who had preceded Ann and never heard of her, that something "sucked his breath" at night; the death-certificates of fever victims of 1804, issued by Dr. Chad Hopkins, and showing the four deceased persons all unaccountably lacking in blood; and
the obscure passages of poor Rhoby Harris's ravings, where she complained of the sharp
teeth of a glassy-eyed, half-visible presence.

Free from unwarranted superstition though I am, these things produced in me an odd
sensation, which was intensified by a pair of widely separated newspaper cuttings
relating to deaths in the shunned house - one from the Providence Gazette and Country-
Journal of April 12, 1815, and the other from the Daily Transcript and Chronicle of
October 27, 1845 - each of which detailed an appallingly grisly circumstance whose
duplication was remarkable. It seems that in both instances the dying person, in 1815 a
gentle old lady named Stafford and in 1845 a school-teacher of middle age named
Eleazar Durfee, became transfigured in a horrible way; glaring glassily and attempting to
bite the throat of the attending physician. Even more puzzling, though, was the final case
which put an end to the renting of the house - a series of anaemia deaths preceded by
progressive madnesses wherein the patient would craftily attempt the lives of his relatives
by incisions in the neck or wrists.

This was in 1860 and 1861, when my uncle had just begun his medical practice; and
before leaving for the front he heard much of it from his elder professional colleagues.
The really inexplicable thing was the way in which the victims - ignorant people, for the
ill-smelling and widely shunned house could now be rented to no others - would babble
maledictions in French, a language they could not possibly have studied to any extent. It
made one think of poor Rhoby Harris nearly a century before, and so moved my uncle
that he commenced collecting historical data on the house after listening, some time
subsequent to his return from the war, to the first-hand account of Drs. Chase and
Whitmarsh. Indeed, I could see that my uncle had thought deeply on the subject, and that
he was glad of my own interest - an open-minded and sympathetic interest which enabled
him to discuss with me matters at which others would merely have laughed. His fancy
had not gone so far as mine, but he felt that the place was rare in its imaginative
potentialities, and worthy of note as an inspiration in the field of the grotesque and
macabre.

For my part, I was disposed to take the whole subject with profound seriousness, and
began at once not only to review the evidence, but to accumulate as much as I could. I
talked with the elderly Archer Harris, then owner of the house, many times before his
death in 1916; and obtained from him and his still surviving maiden sister Alice an
authentic corroboration of all the family data my uncle had collected. When, however, I
asked them what connection with France or its language the house could have, they
confessed themselves as frankly baffled and ignorant as I. Archer knew nothing, and all
that Miss Harris could say was that an old allusion her grandfather, Dutee Harris, had
heard of might have shed a little light. The old seaman, who had survived his son
Welcome's death in battle by two years, had not himself known the legend; but recalled
that his earliest nurse, the ancient Maria Robbins, seemed darkly aware of something that
might have lent a weird significance to the French ravings of Rhoby Harris, which she
had so often heard during the last days of that hapless woman. Maria had been at the
shunned house from 1769 till the removal of the family in 1783, and had seen Mercy
Dexter die. Once she hinted to the child Dutee of a somewhat peculiar circumstance in
Mercy's last moments, but he had soon for gotten all about it save that it was something
peculiar. The grand daughter, moreover, recalled even this much with difficulty. She and
her brother were not so much interested in the house as was Archer's son Carrington, the
present owner, with whom I talked after my experience.

Having exhausted the Harris family of all the information it could furnish, I turned my
attention to early town records and deeds with a zeal more penetrating than that which
my uncle had occasionally shown in the same work. What I wished was a comprehensive
history of the site from its very settlement in 1636 - or even before, if any Narragansett
Indian legend could be unearthed to supply the data. I found, at the start, that the land had
been part of a long strip of the lot granted originally to John Throckmorton; one of many
similar strips beginning at the Town Street beside the river and extending up over the hill
to a line roughly corresponding with the modern Hope Street. The Throckmorton lot had
later, of course, been much subdivided; and I became very assiduous in tracing that
section through which Back or Benefit Street was later run. It had, a rumour indeed said,
been the Throckmorton graveyard; but as I examined the records more carefully, I found
that the graves had all been transferred at an early date to the North Burial Ground on the
Pawtucket West Road.

Then suddenly I came - by a rare piece of chance, since it was not in the main body of
records and might easily have been missed - upon something which aroused my keenest
eagerness, fitting in as it did with several of the queerest phases of the affair. It was the
record of a lease in 1697, of a small tract of ground to an Etienne Roulet and wife. At last
the French element had appeared - that, and another deeper element of horror which the
name conjured up from the darkest recesses of my weird and heterogeneous reading - and
I feverishly studied the platting of the locality as it had been before the cutting through
and partial straightening of Back Street between 1747 and 1758. I found what I had half
expected, that where the shunned house now stood, the Roulets had laid out their
graveyard behind a one-story and attic cottage, and that no record of any transfer of
graves existed. The document, indeed, ended in much confusion; and I was forced to
ransack both the Rhode Island Historical Society and Shepley Library before I could find
a local door which the name of Etienne Roulet would unlock. In the end I did find
something; some thing of such vague but monstrous import that I set about at once to
examine the cellar of the shunned house itself with a new and ex cited minuteness.

The Roulets, it seemed, had come in 1696 from East Greenwich, down the west shore of
Narragansett Bay. They were Huguenots from Caude, and had encountered much
opposition before the Providence selectmen allowed them to settle in the town.
Unpopularity had dogged them in East Greenwich, whither they had come in 1686, after
the revocation of the Edict of Nantes, and rumour said that the cause of dislike extended
beyond mere racial and national prejudice, or the land disputes which involved other
French settlers with the English in rivalries which not even Governor Andros could quell.
But their ardent Protestantism - too ardent, some whispered - and their evident distress
when virtually driven from the village had been granted a haven; and the swarthy Etienne
Roulet, less apt at agriculture than at reading queer books and drawing queer diagrams,
was given a clerical post in the warehouse at Pardon Tillinghast's wharf, far south in
Town Street. There had, however, been a riot of
some sort later on - perhaps forty years later, after old Roulet's death - and no one seemed to hear of the family after that.

For a century and more, it appeared, the Roulets had been well remembered and frequently discussed as vivid incidents in the quiet life of a New England seaport. Etienne's son Paul, a surly fellow whose erratic conduct had probably provoked the riot which wiped out the family, was particularly a source of speculation; and though Providence never shared the witchcraft panics of her Puritan neighbours, it was freely intimated by old wives that his prayers were neither uttered at the proper time nor directed toward the proper object. All this had undoubtedly formed the basis of the legend known by old Maria Robbins. What relation it had to the French ravings of Rhoby Harris and other inhabitants of the shunned house, imagination or future discovery alone could determine. I wondered how many of those who had known the legends realized that additional link with the terrible which my wider reading had given me; that ominous item in the annals of morbid horror which tells of the creature Jacques Roulet, of Caude, who in 1598 was condemned to death as a daemoniac but afterward saved from the stake by the Paris parliament and shut in a madhouse. He had been found covered with blood and shreds of flesh in a wood, shortly after the killing and rending of a boy by a pair of wolves. One wolf was seen to lope away unhurt. Surely a pretty hearthside tale, with a queer significance as to name and place; but I decided that the Providence gossips could not have generally known of it. Had they known, the coincidence of names would have brought some drastic and frightened action - indeed, might not its limited whispering have precipitated the final riot which erased the Roulets from the town?

I now visited the accursed place with increased frequency; studying the unwholesome vegetation of the garden, examining all the walls of the building, and poring over every inch of the earthen cellar floor. Finally, with Carrington Harris's permission, I fitted a key to the disused door opening from the cellar directly upon Benefit Street, preferring to have a more immediate access to the outside world than the dark stairs, ground floor hall, and front door could give. There, where morbidity lurked most thickly, I searched and poked during long afternoons when the sunlight filtered in through the cobwebbed above-ground door which placed me only a few feet from the placid sidewalk outside. Nothing new rewarded my efforts - only the same depressing mustiness and faint suggestions of noxious odours and nitrous outlines on the floor - and I fancy that many pedestrians must have watched me curiously through the broken panes.

At length, upon a suggestion of my uncle's, I decided to try the spot nocturnally; and one stormy midnight ran the beams of an electric torch over the mouldy floor with its uncanny shapes and distorted, half-phosphorescent fungi. The place had dispirited me curiously that evening, and I was almost prepared when I saw - or thought I saw - amidst the whitish deposits a particularly sharp definition of the "huddled form" I had suspected from boyhood. Its clear ness was astonishing and unprecedented - and as I watched I seemed to see again the thin, yellowish, shimmering exhalation which had startled me on that rainy afternoon so many years before.

Above the anthropomorphic patch of mould by the fireplace it rose; a subtle, sickish, almost luminous vapour which, as it hung trembling in the dampness, seemed to develop vague and shocking suggestions of form, gradually trailing off into nebulous decay and
passing up into the blackness of the great chimney with a foetor in its wake. It was truly horrible, and the more so to me because of what I knew of the spot. Refusing to flee, I watched it fade - and as I watched I felt that it was in turn watching me greedily with eyes more imaginable than visible. When I told my uncle about it he was greatly aroused; and after a tense hour of reflection, arrived at a definite and drastic decision. Weighing in his mind the importance of the matter, and the significance of our relation to it, he insisted that we both test - and if possible destroy - the horror of the house by a joint night or nights of aggressive vigil in that musty and fungous-cursed cellar.

IV

On Wednesday, June 25, 1919, after a proper notification of Carring ton Harris which did not include surmises as to what we expected to find, my uncle and I conveyed to the shunned house two camp chairs and a folding camp cot, together with some scientific mechanism of greater weight and intricacy. These we placed in the cellar during the day, screening the windows with paper and planning to return in the evening for our first vigil. We had locked the door from the cellar to the ground floor; and having a key to the outside cellar door, we were prepared to leave our expensive and delicate apparatus - which we had obtained secretly and at great cost - as many days as our vigil might need to be protracted. It was our design to sit up together till very late, and then watch singly till dawn in two-hour stretches, myself first and then my companion; the inactive member resting on the cot.

The natural leadership with which my uncle procured the instruments from the laboratories of Brown University and the Cranston Street Armory, and instinctively assumed direction of our venture, was a marvellous commentary on the potential vitality and resilience of a man of eighty-one. Elihu Whipple had lived according to the hygienic laws he had preached as a physician, and but for what happened later would be here in full vigour today. Only two persons suspect what did happen - Carrington Harris and myself. I had to tell Harris because he owned the house and deserved to know what had gone out of it. Then, too, we had spoken to him in advance of our quest; and I felt after my uncle's going that he would understand and assist me in some vitally necessary public explanations. He turned very pale, but agreed to help me, and decided that it would now be safe to rent the house.

To declare that we were not nervous on that rainy night of watching would be an exaggeration both gross and ridiculous. We were not, as I have said, in any sense childishly superstitious, but scientific study and reflection had taught us that the known universe of three dimensions embraces the merest fraction of the whole cosmos of substance and energy. In this case an overwhelming preponderance of evidence from numerous authentic sources pointed to the tenacious existence of certain forces of great power and, so far as the human point of view is concerned, exceptional malignancy. To say that we actually believed in vampires or werewolves would be a carelessly inclusive statement. Rather must it be said that we were not prepared to deny the possibility of certain unfamiliar and unclassified modifications of vital force and attenuated matter; existing very infrequently in three-dimensional space because of its more intimate connection with other spatial units, yet close enough to the boundary of our own to
furnish us occasional manifestations which we, for lack of a proper vantage-point, may never hope to understand.

In short, it seemed to my uncle and me that an incontrovertible array of facts pointed to some lingering influence in the shunned house; traceable to one or another of the ill-favoured French settlers of two centuries before, and still operative through rare and unknown laws of atomic and electronic motion. That the family of Roulet had possessed an abnormal affinity for outer circles of entity - dark spheres which for normal folk hold only repulsion and terror - their recorded history seemed to prove. Had not, then, the riots of those bygone seventeen-thirties set moving certain kinetic patterns in the morbid brain of one or more of them - notably the sinister Paul Roulet - which obscurely survived the bodies murdered, and continued to function in some multiple-dimensioned space along the original lines of force determined by a frantic hatred of the encroaching community?

Such a thing was surely not a physical or biochemical impossibility in the light of a newer science which includes the theories of relativity and intra-atomic action. One might easily imagine an alien nucleus of substance or energy, formless or otherwise, kept alive by imperceptible or immaterial subtractions from the life-force or bodily tissue and fluids of other and more palpably living things into which it penetrates and with whose fabric it sometimes completely merges itself. It might be actively hostile, or it might be dictated merely by blind motives of self-preservation. In any case such a monster must of necessity be in our scheme of things an anomaly and an intruder, whose extirpation forms a primary duty with every man not an enemy to the world's life, health, and sanity.

What baffled us was our utter ignorance of the aspect in which we might encounter the thing. No sane person had even seen it, and few had ever felt it definitely. It might be pure energy - a form ethereal and outside the realm of substance-or it might be partly material; some unknown and equivocal mass of plasticity, capable of changing at will to nebulous approximations of the solid, liquid, gaseous, or tenuously unparticled states. The anthropomorphic patch of mould on the floor, the form of the yellowish vapour, and the curvature of the tree-roots in some of the old tales, all argued at least a remote and reminiscent connection with the human shape; but how representative or permanent that similarity might be, none could say with any kind of certainty.

We had devised two weapons to fight it; a large and specially fitted Crookes tube operated by powerful storage batteries and provided with peculiar screens and reflectors, in case it proved intangible and opposable only by vigorously destructive ether radiations, and a pair of military flame-throwers of the sort used in the World War, in case it proved partly material and susceptible of mechanical destruction - for like the superstitious Exeter rustics, we were prepared to burn the thing's heart out if heart existed to burn. All this aggressive mechanism we set in the cellar in positions carefully arranged with reference to the cot and chairs, and to the spot before the fireplace where the mould had taken strange shapes. That suggestive patch, by the way, was only faintly visible when we placed our furniture and instruments, and when we returned that evening for the actual vigil. For a moment I half-doubted that I had ever seen it in the more definitely limned form - but then I thought of the legends.
Our cellar vigil began at 10 P.M., daylight saving time, and as it continued we found no promise of pertinent developments. A weak, filtered glow from the rain-harassed street lamps outside, and a feeble phosphorescence from the detestable fungi within, showed the dripping stone of the walls, from which all traces of whitewash had vanished; the dank, foetid and mildew-tainted hard earth floor with its obscene fungi; the rotting remains of what had been stools, chairs and tables, and other more shapeless furniture; the heavy planks and massive beams of the ground floor overhead; the decrepit plank door leading to bins and chambers beneath other parts of the house; the crumbling stone staircase with ruined wooden hand-rail; and the crude and cavernous fireplace of blackened brick where rusted iron fragments revealed the past presence of hooks, andirons, spit, crane, and a door to the Dutch oven - these things, and our austere cot and camp chairs, and the heavy and intricate destructive machinery we had brought.

We had, as in my own former explorations, left the door to the street unlocked; so that a direct and practical path of escape might lie open in case of manifestations beyond our power to deal with. It was our idea that our continued nocturnal presence would call forth whatever malign entity lurked there; and that being prepared, we could dispose of the thing with one or the other of our provided means as soon as we had recognised and observed it sufficiently. How long it might require to evoke and extinguish the thing, we had no notion. It occurred to us, too, that our venture was far from safe, for in what strength the thing might appear no one could tell. But we deemed the game worth the hazard, and embarked on it alone and unhesitatingly; conscious that the seeking of outside aid would only expose us to ridicule and perhaps defeat our entire purpose. Such was our frame of mind as we talked - far into the night, till my uncle's growing drowsiness made me remind him to lie down for his two-hour sleep.

Something like fear chilled me as I sat there in the small hours alone - I say alone, for one who sits by a sleeper is indeed alone; perhaps more alone than he can realise. My uncle breathed heavily, his deep inhalations and exhalations accompanied by the rain outside, and punctuated by another nerve-racking sound of distant dripping water within - for the house was repulsively damp even in dry weather, and in this storm positively swamp-like. I studied the loose, antique-masonry of the walls in the fungous-light and the feeble rays which stole in from the street through the screened windows; and once, when the noisome atmosphere of the place seemed about to sicken me, I opened the door and looked up and down the street, feasting my eyes on familiar sights and my nostrils on whole some air. Still nothing occurred to reward my watching; and I yawned repeatedly, fatigue getting the better of apprehension.

Then the stirring of my uncle in his sleep attracted my notice. He had turned restlessly on the cot several times during the latter half of the first hour, but now he was breathing with unusual irregularity, occasionally heaving a sigh which held more than a few of the qualities of a choking moan. I turned my electric flashlight on him and found his face averted, so rising and crossing to the other side of the cot, I again flashed the light to see if he seemed in any pain. What I saw unnerved me most surprisingly, considering its relative triviality. It must have been merely the association of an odd circumstance with the sinister nature of our location and mission, for surely the circumstance was not in itself frightful or unnatural. It was merely that my uncle's facial expression, disturbed no
doubt by the strange dreams which our situation prompted, betrayed considerable agitation, and seemed not at all characteristic of him. His habitual expression was one of kindly and well-bred calm, whereas now a variety of emotions seemed struggling within him. I think, on the whole, that it was this variety which chiefly disturbed me. My uncle, as he gasped and tossed in increasing perturbation and with eyes that had now started open, seemed not one man but many men, and suggested a curious quality of alienage from himself.

All at once he commenced to mutter, and I did not like the look of his mouth and teeth as he spoke. The words were at first indistinguishable, and then - with a tremendous start - I recognised some thing about them which filled me with icy fear till I recalled the breadth of my uncle's education and the interminable translations he had made from anthropological and antiquarian articles in the Revue des Deux Mondes. For the venerable Elihu Whipple was muttering in French, and the few phrases I could distinguish seemed connected with the darkest myths he had ever adapted from the famous Paris magazine.

Suddenly a perspiration broke out on the sleeper's forehead, and he leaped abruptly up, half awake. The jumble of French changed to a cry in English, and the hoarse voice shouted excitedly, "My breath, my breath!" Then the awakening became complete, and with a subsidence of facial expression to the normal state my uncle seized my hand and began to relate a dream whose nucleus of significance I could only surmise with a kind of awe.

He had, he said, floated off from a very ordinary series of dream-pictures into a scene whose strangeness was related to nothing he had ever read. It was of this world, and yet not of it - a shadowy geometrical confusion in which could be seen elements of familiar things in most unfamiliar and perturbing combinations. There was a suggestion of queerly disordered pictures superimposed one upon another; an arrangement in which the essentials of time as well as of space seemed dissolved and mixed in the most illogical fashion. In this kaleidoscopic vortex of phantasmal images were occasional snap-shots, if one might use the term, of singular clearness but unaccountable heterogeneity.

Once my uncle thought he lay in a carelessly dug open pit, with a crowd of angry faces framed by straggling locks and three-cornered hats frowning down at him. Again he seemed to be in the interior of a house - an old house, apparently - but the details and inhabitants were constantly changing, and he could never be certain of the faces or the furniture, or even of the room itself, since doors and windows seemed in just as great a state of flux as the more presumably mobile objects. It was queer - damnably queer - and my uncle spoke almost sheepishly, as if half expecting not to be believed, when he declared that of the strange faces many had unmistakably borne the features of the Harris family. And all the while there was a personal sensation of choking, as if some pervasive presence had spread itself through his body and sought to possess itself of his vital processes. I shuddered at the thought of those vital processes, worn as they were by eighty-one years of continuous functioning, in conflict with unknown forces of which the youngest and strongest system might well be afraid; but in another moment reflected that dreams are only dreams, and that these uncomfortable visions could be, at most, no more
than my uncle's reaction to the investigations and expectations which had lately filled our minds to the exclusion of all else.

Conversation, also, soon tended to dispel my sense of strangeness; and in time I yielded to my yawns and took my turn at slumber. My uncle seemed now very wakeful, and welcomed his period of watching even though the nightmare had aroused him far ahead of his allotted two hours. Sleep seized me quickly, and I was at once haunted with dreams of the most disturbing kind. I felt, in my visions, a cosmic and abysmal loneliness; with hostility surging from all sides upon some prison where I lay confined. I seemed bound and gagged, and taunted by the echoing yells of distant multitudes who thirsted for my blood. My uncle's face came to me with less pleasant associations than in waking hours, and I recall many futile struggles and at tempts to scream. It was not a pleasant sleep, and for a second I was not sorry for the echoing shriek which clove through the barriers of dream and flung me to a sharp and startled awakeness in which every actual object before my eyes stood out with more than natural clearness and reality.

V

I had been lying with my face away from my uncle's chair, so that in this sudden flash of awakening I saw only the door to the street, the more northerly window, and the wall and floor and ceiling toward the north of the room, all photographed with morbid vividness on my brain in a light brighter than the glow of the fungi or the rays from the street outside. It was not a strong or even a fairly strong light; certainly not nearly strong enough to read an average book by. But it cast a shadow of myself and the cot on the floor, and had a yellowish, penetrating force that hinted at things more portent than luminosity. This I perceived with unhealthy sharpness despite the fact that two of my other senses were violently assailed. For on my ears rang the reverberations of that shocking scream, while my nostrils revolted at the stench which filled the place. My mind, as alert as my senses, recognised the gravely unusual; and almost automatically I leaped up and turned about to grasp the destructive instruments which we had left trained on the mouldy spot before the fireplace. As I turned, I dreaded what I was to see; for the scream had been in my uncle's voice, and I knew not against what menace I should have to defend him and myself.

Yet after all, the sight was worse than I had dreaded. There are horrors beyond horrors, and this was one of those nuclei of all dreamable hideousness which the cosmos saves to blast an accursed and unhappy few. Out of the fungous-ridden earth steamed up a vaporous corpse-light, yellow and diseased, which bubbled and lapped to a gigantic height in vague outlines half human and half monstrous, through which I could see the chimney and fireplace beyond. It was all eyes - wolfish and mocking - and the rugose insect-like head dissolved at the top to a thin stream of mist which curled putridly about and finally vanished up the chimney. I say that I saw this thing, but it is only in conscious retrospection that I ever definitely traced its damnable approach to form. At the time it was to me only a seething dimly phosphorescent cloud of fungous loathsome ness, enveloping and dissolving to an abhorrent plasticity the one object to which all my attention was focused. That object was my uncle - the venerable Elihu Whipple - who with blackening and
decaying features leered and gibbered at me, and reached out dripping claws to rend me in the fury which this horror had brought.

It was a sense of routine which kept me from going mad. I had drilled myself in preparation for the crucial moment, and blind training saved me. Recognising the bubbling evil as no substance reachable by matter or material chemistry, and therefore ignoring the flame-thrower which loomed on my left, I threw on the current of the Crookes tube apparatus, and focussed toward that scene of immortal blasphemy the strongest ether radiations which men's art can arouse from the spaces and fluids of nature. There was a bluish haze and a frenzied sputtering, and the yellowish phosphorescence grew dimmer to my eyes. But I saw the dimness was only that of contrast, and that the waves from the machine had no effect whatever.

Then, in the midst of that daemoniac spectacle, I saw a fresh horror which brought cries to my lips and sent me fumbling and staggering towards that unlocked door to the quiet street, careless of what abnormal terrors I loosed upon the world, or what thoughts or judgments of men I brought down upon my head. In that dim blend of blue and yellow the form of my uncle had commenced a nauseous liquefaction whose essence eludes all description, and in which there played across his vanishing face such changes of identity as only madness can conceive. He was at once a devil and a multitude, a charnel-house and a pageant. Lit by the mixed and uncertain beams, that gelatinous face assumed a dozen - a score - a hundred - aspects; grinning, as it sank to the ground on a body that melted like tallow, in the caricatured likeness of legions strange and yet not strange.

I saw the features of the Harris line, masculine and feminine, adult and infantile, and other features old and young, coarse and refined, familiar and unfamiliar. For a second there flashed a degraded counterfeit of a miniature of poor Rhoby Harris that I had seen in the School of Design Museum, and another time I thought I caught the rawboned image of Mercy Dexter as I recalled her from a painting in Carrington Harris's house. It was frightful beyond conception; toward the last, when a curious blend of servant and baby visages flickered close to the fungous floor where a pool of greenish grease was spreading, it seemed as though the shifting features fought against themselves, and strove to form contours like those of my uncle's kindly face. I like to think that he existed at that moment, and that he tried to bid me farewell. It seems to me I hiccoughed a farewell from my own parched throat as I lurched out into the street; a thin stream of grease following me through the door to the rain-drenched sidewalk.

The rest is shadowy and monstrous. There was no one in the soaking street, and in all the world there was no one I dared tell. I walked aimlessly south past College Hill and the Athenaeum, down Hopkins Street, and over the bridge to the business section where tall buildings seemed to guard me as modern material things guard the world from ancient and unwholesome wonder. Then the grey dawn unfolded wetly from the east, silhouetting the archaic hill and its venerable steeples, and beckoning me to the place where my terrible work was still unfinished. And in the end I went, wet, hatless, and dazed in the morning light, and entered that awful door in Benefit Street which I had left ajar, and which still swung cryptically in full sight of the early householders to whom I dared not speak.
The grease was gone, for the mouldy floor was porous. And in front of the fireplace was no vestige of the giant doubled-up form in nitre. I looked at the cot, the chairs, the instruments, my neglected hat, and the yellowed straw hat of my uncle. Dazedness was upper most, and I could scarcely recall what was dream and what was reality. Then thought trickled back, and I knew that I had witnessed things more horrible than I had dreamed. Sitting down, I tried to conjecture as nearly as sanity would let me just what had happened, and how I might end the horror, if indeed it had been real. Matter it seemed not to be, nor ether, nor anything else conceivable by mortal mind. What, then, but some exotic emanation; some vampirish vapour such as Exeter rustics tell of as lurking over certain church yards? This I felt was the clue, and again I looked at the floor before the fireplace where the mould and nitre had taken strange forms. In ten minutes my mind was made up, and taking my hat I set out for home, where I bathed, ate, and gave by telephone an order for a pick-axe, a spade, a military gas-mask, and six carboys of sulphuric acid, all to be delivered the next morning at the cellar door of the shunned house in Benefit Street. After that I tried to sleep; and failing, passed the hours in reading and in the composition of inane verses to counteract my mood.

At 11 A.M. the next day I commenced digging. It was sunny weather, and I was glad of that. I was still alone, for as much as I feared the unknown horror I sought, there was more fear in the thought of telling anybody. Later I told Harris only through sheer necessity, and because he had heard odd tales from old people which disposed him ever so little toward belief. As I turned up the stinking black earth in front of the fireplace, my spade causing a viscous yellow ichor to ooze from the white fungi which it severed, I trembled at the dubious thoughts of what I might uncover. Some secrets of inner earth are not good for mankind, and this seemed to me one of them.

My hand shook perceptibly, but still I delved; after a while standing in the large hole I had made. With the deepening of the hole, which was about six feet square, the evil smell increased; and I lost all doubt of my imminent contact with the hellish thing whose emanations had cursed the house for over a century and a half. I wondered what it would look like - what its form and substance would be, and how big it might have waxed through long ages of life-sucking. At length I climbed out of the hole and dispersed the heaped-up dirt, then arranging the great carboys of acid around and near two sides, so that when necessary I might empty them all down the aperture in quick succession. After that I dumped earth only along the other two sides; working more slowly and donning my gas-mask as the smell grew. I was nearly unnerved at my proximity to a nameless thing at the bottom of a pit.

Suddenly my spade struck something softer than earth. I shuddered and made a motion as if to climb out of the hole, which was now as deep as my neck. Then courage returned, and I scraped away more dirt in the light of the electric torch I had provided. The surface I uncovered was fishy and glassy - a kind of semi-putrid congealed jelly with suggestions of translucency. I scraped further, and saw that it had form. There was a rift where a part of the substance was folded over. The exposed area was huge and roughly cylindrical; like a mammoth soft blue-white stovepipe doubled in two, its largest part some two feet in diameter. Still more I scraped, and then abruptly I leaped out of the hole and away from the filthy thing; frantically unstopping and tilting the heavy carboys, and
precipitating their corrosive contents one after another down that charnel gulf and upon
this unthinkable abnormality whose titan elbow I had seen.

The blinding maelstrom of greenish-yellow vapour which surged tempestuously up from
that hole as the floods of acid descended, will never leave my memory. All along the hill
people tell of the yellow day, when virulent and horrible fumes arose from the factory
waste dumped in the Providence River, but I know how mistaken they are as to the
source. They tell, too, of the hideous roar which at the same time came from some
disordered water-pipe or gas main underground - but again I could correct them if I
dared. It was unspeakably shocking, and I do not see how I lived through it. I did faint
after emptying the fourth carboy, which I had to handle after the fumes had begun to
penetrate my mask; but when I recovered I saw that the hole was emitting no fresh
vapours.

The two remaining carboys I emptied down without particular result, and after a time I
felt it safe to shovel the earth back into the pit. It was twilight before I was done, but fear
had gone out of the place. The dampness was less foetid, and all the strange fungi had
withered to a kind of harmless greyish powder which blew ashlike along the floor. One of
earth's nethermost terrors had perished forever; and if there be a hell, it had received at
last the daemon soul of an unhallowed thing. And as I patted down the last spadeful of
mould, I shed the first of many tears with which I have paid unaffected tribute to my
beloved uncle's memory.

The next spring no more pale grass and strange weeds came up in the shunned house's
terraced garden, and shortly afterward Carring ton Harris rented the place. It still
spectral, but its strangeness fascinates me, and I shall find mixed with my relief a queer
regret when it is torn down to make way for a tawdry shop or vulgar apartment building.
The barren old trees in the yard have begun to bear small, sweet apples, and last year the
birds nested in their gnarled boughs.
The Case of Charles Dexter Ward

by H. P. Lovecraft

Written January 1 to March, 1927

Published May and July 1941 in Weird Tales, Vol. 35, No. 9 (May 1941), 8-40; Vol. 35, No. 10 (July 1941), 84-121.

'The essential Saltes of Animals may be so prepared and preserved, that an ingenious Man may have the whole Ark of Noah in his own Studie, and raise the fine Shape of an Animal out of its Ashes at his Pleasure; and by the lyke Method from the essential Saltes of humane Dust, a Philosopher may, without any criminal Necromancy, call up the Shape of any dead Ancestour from the Dust whereinto his Bodie has been incinerated.'

- Borellus

I. A Result and a Prologue

1

From a private hospital for the insane near Providence, Rhode Island, there recently disappeared an exceedingly singular person. He bore the name of Charles Dexter Ward, and was placed under restraint most reluctantly by the grieving father who had watched his aberration grow from a mere eccentricity to a dark mania involving both a possibility of murderous tendencies and a profound and peculiar change in the apparent contents of his mind. Doctors confess themselves quite baffled by his case, since it presented oddities of a general physiological as well as psychological character.

In the first place, the patient seemed oddly older than his twenty-six years would warrant. Mental disturbance, it is true, will age one rapidly; but the face of this young man had taken on a subtle cast which only the very aged normally acquire. In the second place, his organic processes shewed a certain queerness of proportion which nothing in medical experience can parallel. Respiration and heart action had a baffling lack of symmetry; the voice was lost, so that no sounds above a whisper were possible; digestion was incredibly prolonged and minimised, and neural reactions to standard stimuli bore no relation at all to anything heretofore recorded, either normal or pathological. The skin had a morbid chill and dryness, and the cellular structure of the tissue seemed exaggeratedly coarse and loosely knit. Even a large olive birthmark on the right hip had disappeared, whilst there had formed on the chest a very peculiar mole or blackish spot of which no trace existed before. In general, all physicians agree that in Ward the processes of metabolism had become retarded to a degree beyond precedent.

Psychologically, too, Charles Ward was unique. His madness held no affinity to any sort recorded in even the latest and most exhaustive of treatises, and was conjoined to a mental force which would have made him a genius or a leader had it not been twisted into strange and grotesque forms. Dr. Willett, who was Ward's family physician, affirms that the patient's gross mental capacity, as gauged by his response to matters outside the
sphere of his insanity, had actually increased since the seizure. Ward, it is true, was always a scholar and an antiquarian; but even his most brilliant early work did not shew the prodigious grasp and insight displayed during his last examinations by the alienists. It was, indeed, a difficult matter to obtain a legal commitment to the hospital, so powerful and lucid did the youth's mind seem; and only on the evidence of others, and on the strength of many abnormal gaps in his stock of information as distinguished from his intelligence, was he finally placed in confinement. To the very moment of his vanishement he was an omnivorous reader and as great a conversationalist as his poor voice permitted; and shrewd observers, failing to foresee his escape, freely predicted that he would not be long in gaining his discharge from custody.

Only Dr. Willett, who brought Charles Ward into the world and had watched his growth of body and mind ever since, seemed frightened at the thought of his future freedom. He had had a terrible experience and had made a terrible discovery which he dared not reveal to his sceptical colleagues. Willett, indeed, presents a minor mystery all his own in his connexion with the case. He was the last to see the patient before his flight, and emerged from that final conversation in a state of mixed horror and relief which several recalled when Ward's escape became known three hours later. That escape itself is one of the unsolved wonders of Dr. Waite's hospital. A window open above a sheer drop of sixty feet could hardly explain it, yet after that talk with Willett the youth was undeniably gone. Willett himself has no public explanations to offer, though he seems strangely easier in mind than before the escape. Many, indeed, feel that he would like to say more if he thought any considerable number would believe him. He had found Ward in his room, but shortly after his departure the attendants knocked in vain. When they opened the door the patient was not there, and all they found was the open window with a chill April breeze blowing in a cloud of fine bluish-grey dust that almost choked them. True, the dogs howled some time before; but that was while Willett was still present, and they had caught nothing and shewn no disturbance later on. Ward's father was told at once over the telephone, but he seemed more saddened than surprised. By the time Dr. Waite called in person, Dr. Willett had been talking with him, and both disavowed any knowledge or complicity in the escape. Only from certain closely confidential friends of Willett and the senior Ward have any clues been gained, and even these are too wildly fantastic for general credence. The one fact which remains is that up to the present time no trace of the missing madman has been unearthed.

Charles Ward was an antiquarian from infancy, no doubt gaining his taste from the venerable town around him, and from the relics of the past which filled every corner of his parents' old mansion in Prospect Street on the crest of the hill. With the years his devotion to ancient things increased; so that history, genealogy, and the study of colonial architecture, furniture, and craftsmanship at length crowded everything else from his sphere of interests. These tastes are important to remember in considering his madness; for although they do not form its absolute nucleus, they play a prominent part in its superficial form. The gaps of information which the alienists noticed were all related to modern matters, and were invariably offset by a correspondingly excessive though outwardly concealed knowledge of bygone matters as brought out by adroit questioning; so that one would have fancied the patient literally transferred to a former age through some obscure sort of auto-hypnosis. The odd thing was that Ward seemed no longer
interested in the antiquities he knew so well. He had, it appears, lost his regard for them through sheer familiarity; and all his final efforts were obviously bent toward mastering those common facts of the modern world which had been so totally and unmistakably expunged from his brain. That this wholesale deletion had occurred, he did his best to hide; but it was clear to all who watched him that his whole programme of reading and conversation was determined by a frantic wish to imbibe such knowledge of his own life and of the ordinary practical and cultural background of the twentieth century as ought to have been his by virtue of his birth in 1902 and his education in the schools of our own time. Alienists are now wondering how, in view of his vitally impaired range of data, the escaped patient manages to cope with the complicated world of today; the dominant opinion being that he is "lying low" in some humble and unexacting position till his stock of modern information can be brought up to the normal.

The beginning of Ward's madness is a matter of dispute among alienists. Dr. Lyman, the eminent Boston authority, places it in 1919 or 1920, during the boy's last year at the Moses Brown School, when he suddenly turned from the study of the past to the study of the occult, and refused to qualify for college on the ground that he had individual researches of much greater importance to make. This is certainly borne out by Ward's altered habits at the time, especially by his continual search through town records and among old burying-grounds for a certain grave dug in 1771; the grave of an ancestor named Joseph Curwen, some of whose papers he professed to have found behind the panelling of a very old house in Olney Court, on Stampers' Hill, which Curwen was known to have built and occupied. It is, broadly speaking, undeniable that the winter of 1919-20 saw a great change in Ward; whereby he abruptly stopped his general antiquarian pursuits and embarked on a desperate delving into occult subjects both at home and abroad, varied only by this strangely persistent search for his forefather's grave.

From this opinion, however, Dr. Willett substantially dissents; basing his verdict on his close and continuous knowledge of the patient, and on certain frightful investigations and discoveries which he made toward the last. Those investigations and discoveries have left their mark upon him; so that his voice trembles when he tells them, and his hand trembles when he tries to write of them. Willett admits that the change of 1919-20 would ordinarily appear to mark the beginning of a progressive decadence which culminated in the horrible and uncanny alienation of 1928; but believes from personal observation that a finer distinction must be made. Granting freely that the boy was always ill-balanced temperamentally, and prone to be unduly susceptible and enthusiastic in his responses to phenomena around him, he refuses to concede that the early alteration marked the actual passage from sanity to madness; crediting instead Ward's own statement that he had discovered or rediscovered something whose effect on human though was likely to be marvellous and profound. The true madness, he is certain, came with a later change; after the Curwen portrait and the ancient papers had been unearthed; after a trip to strange foreign places had been made, and some terrible invocations chanted under strange and secret circumstances; after certain answers to these invocations had been plainly indicated, and a frantic letter penned under agonising and inexplicable conditions; after the wave of vampirism and the ominous Pawtuxet gossip; and after the patient's memory commenced to exclude contemporary images whilst his physical aspect underwent the subtle modification so many subsequently noticed.
It was only about this time, Willett points out with much acuteness, that the nightmare qualities became indubitably linked with Ward; and the doctor feels shudderingly sure that enough solid evidence exists to sustain the youth's claim regarding his crucial discovery. In the first place, two workmen of high intelligence saw Joseph Curwen's ancient papers found. Secondly, the boy once shewed Dr. Willett those papers and a page of the Curwen diary, and each of the documents had every appearance of genuineness. The hole where Ward claimed to have found them was long a visible reality, and Willett had a very convincing final glimpse of them in surroundings which can scarcely be believed and can never perhaps be proved. Then there were the mysteries and coincidences of the Orne and Hutchinson letters, and the problem of the Curwen penmanship and of what the detectives brought to light about Dr. Allen; these things, and the terrible message in mediaeval minuscules found in Willett's pocket when he gained consciousness after his shocking experience.

And most conclusive of all, there are the two hideous results which the doctor obtained from a certain pair of formulae during his final investigations; results which virtually proved the authenticity of the papers and of their monstrous implications at the same time that those papers were borne forever from human knowledge.

One must look back at Charles Ward's earlier life as at something belonging as much to the past as the antiquities he loved so keenly. In the autumn of 1918, and with a considerable show of zest in the military training of the period, he had begun his junior year at the Moses Brown School, which lies very near his home. The old main building, erected in 1819, had always charmed his youthful antiquarian sense; and the spacious park in which the academy is set appealed to his sharp eye for landscape. His social activities were few; and his hours were spent mainly at home, in rambling walks, in his classes and drills, and in pursuit of antiquarian and genealogical data at the City Hall, the State House, the Public Library, the Athenaeum, the Historical Society, the John Carter Brown and John Hay Libraries of Brown University, and the newly opened Shepley Library in Benefit Street. One may picture him yet as he was in those days; tall, slim, and blond, with studious eyes and a slight droop, dressed somewhat carelessly, and giving a dominant impression of harmless awkwardness rather than attractiveness.

His walks were always adventures in antiquity, during which he managed to recapture from the myriad relics of a glamorous old city a vivid and connected picture of the centuries before. His home was a great Georgian mansion atop the well-nigh precipitous hill that rises just east of the river; and from the rear windows of its rambling wings he could look dizzily out over all the clustered spires, domes, roofs, and skyscraper summits of the lower town to the purple hills of the countryside beyond. Here he was born, and from the lovely classic porch of the double-bayed brick facade his nurse had first wheeled him in his carriage; past the little white farmhouse of two hundred years before that the town had long ago overtaken, and on toward the stately colleges along the shady, sumptuous street, whose old square brick mansions and smaller wooden houses with narrow, heavy-columned Doric porches dreamed solid and exclusive amidst their generous yards and gardens.
He had been wheeled, too, along sleepy Congdon Street, one tier lower down on the steep hill, and with all its eastern homes on high terraces. The small wooden houses averaged a greater age here, for it was up this hill that the growing town had climbed; and in these rides he had imbibed something of the colour of a quaint colonial village. The nurse used to stop and sit on the benches of Prospect Terrace to chat with policemen; and one of the child's first memories was of the great westward sea of hazy roofs and domes and steeples and far hills which he saw one winter afternoon from that great railed embankment, and violet and mystic against a fevered, apocalyptic sunset of reds and golds and purples and curious greens. The vast marble dome of the State House stood out in massive silhouette, its crowning statue haloed fantastically by a break in one of the tinted stratus clouds that barred the flaming sky.

When he was larger his famous walks began; first with his impatiently dragged nurse, and then alone in dreamy meditation. Farther and farther down that almost perpendicular hill he would venture, each time reaching older and quaintier levels of the ancient city. He would hesitate gingerly down vertical Jenckes Street with its bank walls and colonial gables to the shady Benefit Street corner, where before him was a wooden antique with an Ionic-pilastered pair of doorways, and beside him a prehistoric gambrel-roofer with a bit of primal farmyard remaining, and the great Judge Durfee house with its fallen vestiges of Georgian grandeur. It was getting to be a slum here; but the titan elms cast a restoring shadow over the place, and the boy used to stroll south past the long lines of the pre-Revolutionary homes with their great central chimneys and classic portals. On the eastern side they were set high over basements with railed double flights of stone steps, and the young Charles could picture them as they were when the street was new, and red heels and periwigs set off the painted pediments whose signs of wear were now becoming so visible.

Westward the hill dropped almost as steeply as above, down to the old "Town Street" that the founders had laid out at the river's edge in 1636. Here ran innumerable little lanes with leaning, huddled houses of immense antiquity; and fascinated though he was, it was long before he dared to thread their archaic verticality for fear they would turn out a dream or a gateway to unknown terrors. He found it much less formidable to continue along Benefit Street past the iron fence of St. John's hidden churchyard and the rear of the 1761 Colony House and the mouldering bulk of the Golden Ball Inn where Washington stopped. At Meeting Street - the successive Gaol Lane and King Street of other periods - he would look upward to the east and see the arched flight of steps to which the highway had to resort in climbing the slope, and downward to the west, glimpsing the old brick colonial schoolhouse that smiles across the road at the ancient Sign of Shakespeare's Head where the Providence Gazette and Country-Journal was printed before the Revolution. Then came the exquisite First Baptist Church of 1775, luxurious with its matchless Gibbs steeple, and the Georgian roofs and cupolas hovering by. Here and to the southward the neighbourhood became better, flowering at last into a marvellous group of early mansions; but still the little ancient lanes led off down the precipice to the west, spectral in their many-gabled archaism and dipping to a riot of iridescent decay where the wicked old water-front recalls its proud East India days amidst polyglot vice and squalor, rotting wharves, and bleary-eyed ship-chandleries, with such surviving alley names as
Packet, Bullion, Gold, Silver, Coin, Doubloon, Sovereign, Guilder, Dollar, Dime, and Cent.

Sometimes, as he grew taller and more adventurous, young Ward would venture down into this maelstrom of tottering houses, broken transoms, tumbling steps, twisted balustrades, swarthy faces, and nameless odours; winding from South Main to South Water, searching out the docks where the bay and sound steamers still touched, and returning northward at this lower level past the steep-roofed 1816 warehouses and the broad square at the Great Bridge, where the 1773 Market House still stands firm on its ancient arches. In that square he would pause to drink in the bewildering beauty of the old town as it rises on its eastward bluff, decked with its two Georgian spires and crowned by the vast new Christian Science dome as London is crowned by St. Paul's. He like mostly to reach this point in the late afternoon, when the slanting sunlight touches the Market House and the ancient hill roofs and belfries with gold, and throws magic around the dreaming wharves where Providence Indiamen used to ride at anchor. After a long look he would grow almost dizzy with a poet's love for the sight, and then he would scale the slope homeward in the dusk past the old white church and up the narrow precipitous ways where yellow gleams would begin to peep out in small-paned windows and through fanlights set high over double flights of steps with curious wrought-iron railings.

At other times, and in later years, he would seek for vivid contrasts; spending half a walk in the crumbling colonial regions northwest of his home, where the hill drops to the lower eminence of Stampers' Hill with its ghetto and negro quarter clustering round the place where the Boston stage coach used to start before the Revolution, and the other half in the gracious southerly realm about George, Benevolent, Power, and Williams Streets, where the old slope holds unchanged the fine estates and bits of walled garden and steep green lane in which so many fragrant memories linger. These rambles, together with the diligent studies which accompanied them, certainly account for a large amount of the antiquarian lore which at last crowded the modern world from Charles Ward's mind; and illustrate the mental soil upon which fell, in that fateful winter of 1919-20, the seeds that came to such strange and terrible fruition.

Dr. Willett is certain that, up to this ill-omened winter of first change, Charles Ward's antiquarianism was free from every trace of the morbid. Graveyards held for him no particular attraction beyond their quaintness and historic value, and of anything like violence or savage instinct he was utterly devoid. Then, by insidious degrees, there appeared to develop a curious sequel to one of his genealogical triumphs of the year before; when he had discovered among his maternal ancestors a certain very long-lived man named Joseph Curwen, who had come from Salem in March of 1692, and about whom a whispered series of highly peculiar and disquieting stories clustered.

Ward's great-great-grandfather Welcome Potter had in 1785 married a certain 'Ann Tillinghast, daughter of Mrs. Eliza, daughter to Capt. James Tillinghast,' of whose paternity the family had preserved no trace. Late in 1918, whilst examining a volume of original town records in manuscript, the young genealogist encountered an entry describing a legal change of name, by which in 1772 a Mrs. Eliza Curwen, widow of Joseph Curwen, resumed, along with her seven-year-old daughter Ann, her maiden name of Tillinghast; on the ground 'that her Husband's name was become a public Reproach by
Reason of what was knowne after his Decease; the which confirming an antient common Rumour, tho' not to be credited by a loyall Wife till so proven as to be wholly past Doubting.'

This entry came to light upon the accidental separation of two leaves which had been carefully pasted together and treated as one by a laboured revision of the page numbers.

It was at once clear to Charles Ward that he had indeed discovered a hitherto unknown great-great-great-grandfather. The discovery doubly excited him because he had already heard vague reports and seen scattered allusions relating to this person; about whom there remained so few publicly available records, aside from those becoming public only in modern times, that it almost seemed as if a conspiracy had existed to blot him from memory. What did appear, moreover, was of such a singular and provocative nature that one could not fail to imagine curiously what it was that the colonial recorders were so anxious to conceal and forget; or to suspect that the deletion had reasons all too valid.

Before this, Ward had been content to let his romancing about old Joseph Curwen remain in the idle stage; but having discovered his own relationship to this apparently "hushed-up" character, he proceeded to hunt out as systematically as possible whatever he might find concerning him. In this excited quest he eventually succeeded beyond his highest expectations; for old letters, diaries, and sheaves of unpublished memoirs in cobwebbed Providence garrets and elsewhere yielded many illuminating passages which their writers had not thought it worth their while to destroy. One important sidelight came from a point as remote as New York, where some Rhode Island colonial correspondence was stored in the Museum at Fraunces' Tavern. The really crucial thing, though, and what in Dr. Willett's opinion formed the definite source of Ward's undoing, was the matter found in August 1919 behind the panelling of the crumbling house in Olney Court. It was that, beyond a doubt, which opened up those black vistas whose end was deeper than the pit.

II. An Antecedent and a Horror

Joseph Curwen, as revealed by the rambling legends embodied in what Ward heard and unearthed, was a very astonishing, enigmatic, and obscurely horrible individual. He had fled from Salem to Providence - that universal haven of the odd, the free, and the dissenting - at the beginning of the great witchcraft panic; being in fear of accusation because of his solitary ways and queer chemical or alchemical experiments. He was a colourless-looking man of about thirty, and was soon found qualified to become a freeman of Providence; thereafter buying a home lot just north of Gregory Dexter's at about the foot of Olney Street. His house was built on Stampers' Hill west of the Town Street, in what later became Olney Court; and in 1761 he replaced this with a larger one, on the same site, which is still standing.

Now the first odd thing about Joseph Curwen was that he did not seem to grow much older than he had been on his arrival. He engaged in shipping enterprises, purchased wharfage near Mile-End Cove, helped rebuild the Great Bridge in 1713, and in 1723 was one of the founders of the Congregational Church on the hill; but always did he retain his
nondescript aspect of a man not greatly over thirty or thirty-five. As decades mounted up, this singular quality began to excite wide notice; but Curwen always explained it by saying that he came of hardy forefathers, and practised a simplicity of living which did not wear him out. How such simplicity could be reconciled with the inexplicable comings and goings of the secretive merchant, and with the queer gleaming of his windows at all hours of night, was not very clear to the townsfolk; and they were prone to assign other reasons for his continued youth and longevity. It was held, for the most part, that Curwen's incessant mixings and boilings of chemicals had much to do with his condition. Gossip spoke of the strange substances he brought from London and the Indies on his ships or purchased in Newport, Boston, and New York; and when old Dr. Jabez Bowen came from Rehoboth and opened his apothecary shop across the Great Bridge at the Sign of the Unicorn and Mortar, there was ceaseless talk of the drugs, acids, and metals that the taciturn recluse incessantly bought or ordered from him. Acting on the assumption that Curwen possessed a wondrous and secret medical skill, many sufferers of various sorts applied to him for aid; but though he appeared to encourage their belief in a non-committal way, and always gave them odd-coloured potions in response to their requests, it was observed that his ministrations to others seldom proved of benefit. At length, when over fifty years had passed since the stranger's advent, and without producing more than five years' apparent change in his face and physique, the people began to whisper more darkly; and to meet more than half way that desire for isolation which he had always shewn.

Private letters and diaries of the period reveal, too, a multitude of other reasons why Joseph Curwen was marvelled at, feared, and finally shunned like a plague. His passion for graveyards, in which he was glimpsed at all hours, and under all conditions, was notorious; though no one had witnessed any deed on his part which could actually be termed ghoulish. On the Pawtuxet Road he had a farm, at which he generally lived during the summer, and to which he would frequently be seen riding at various odd times of the day or night. Here his only visible servants, farmers, and caretakers were a sullen pair of aged Narragansett Indians; the husband dumb and curiously scarred, and the wife of a very repulsive cast of countenance, probably due to a mixture of negro blood. In the lead- to of this house was the laboratory where most of the chemical experiments were conducted. Curious porters and teamers who delivered bottles, bags, or boxes at the small read door would exchange accounts of the fantastic flasks, crucibles, alembics, and furnaces they saw in the low shelved room; and prophesied in whispers that the close-mouthed "chymist" - by which they meant alchemist - would not be long in finding the Philosopher's Stone. The nearest neighbours to this farm - the Fenners, a quarter of a mile away - had still queerer things to tell of certain sounds which they insisted came from the Curwen place in the night. There were cries, they said, and sustained howlings; and they did not like the large numbers of livestock which thronged the pastures, for no such amount was needed to keep a lone old man and a very few servants in meat, milk, and wool. The identity of the stock seemed to change from week to week as new droves were purchased from the Kingstown farmers. Then, too, there was something very obnoxious about a certain great stone outbuilding with only high narrow slits for windows.

Great Bridge idlers likewise had much to say of Curwen's town house in Olney Court; not so much the fine new one built in 1761, when the man must have been nearly a century
old, but the first low gambrel-roofed one with the windowless attic and shingled sides, whose timbers he took the peculiar precaution of burning after its demolition. Here there was less mystery, it is true; but the hours at which lights were seen, the secretiveness of the two swarthy foreigners who comprised the only menservants, the hideous indistinct mumbling of the incredibly aged French housekeeper, the large amounts of food seen to enter a door within which only four persons lived, and the quality of certain voices often heard in muffled conversation at highly unseasonable times, all combined with what was known of the Pawtuxet farm to give the place a bad name.

In choicer circles, too, the Curwen home was by no means undiscussed; for as the newcomer had gradually worked into the church and trading life of the town, he had naturally made acquaintances of the better sort, whose company and conversation he was well fitted by education to enjoy. His birth was known to be good, since the Curwens or Corwins of Salem needed no introduction in New England. It developed that Joseph Curwen had travelled much in very early life, living for a time in England and making at least two voyages to the Orient; and his speech, when he deigned to use it, was that of a learned and cultivated Englishman. But for some reason or other Curwen did not care for society. Whilst never actually rebuffing a visitor, he always reared such a wall of reserve that few could think of anything to say to him which would not sound inane.

There seemed to lurk in his bearing some cryptic, sardonic arrogance, as if he had come to find all human beings dull though having moved among stranger and more potent entities. When Dr. Checkley the famous wit came from Boston in 1738 to be rector of King's Church, he did not neglect calling on one of whom he soon heard so much; but left in a very short while because of some sinister undercurrent he detected in his host's discourse. Charles Ward told his father, when they discussed Curwen one winter evening, that he would give much to learn what the mysterious old man had said to the sprightly cleric, but that all diarists agree concerning Dr. Checkley's reluctance to repeat anything he had heard. The good man had been hideously shocked, and could never recall Joseph Curwen without a visible loss of the gay urbanity for which he was famed.

More definite, however, was the reason why another man of taste and breeding avoided the haughty hermit. In 1746 Mr. John Merritt, an elderly English gentleman of literary and scientific leanings, came from Newport to the town which was so rapidly overtaking it in standing, and built a fine country seat on the Neck in what is now the heart of the best residence section. He lived in considerable style and comfort, keeping the first coach and liveried servants in town, and taking great pride in his telescope, his microscope, and his well-chosen library of English and Latin books. Hearing of Curwen as the owner of the best library in Providence, Mr. Merritt early paid him a call, and was more cordially received than most other callers at the house had been. His admiration for his host's ample shelves, which besides the Greek, Latin, and English classics were equipped with a remarkable battery of philosophical, mathematical, and scientific works including Paracelsus, Agricola, Van Helmont, Sylvius, Glauber, Boyle, Boerhaave, Becher, and Stahl, led Curwen to suggest a visit to the farmhouse and laboratory whither he had never invited anyone before; and the two drove out at once in Mr. Merritt's coach.

Mr. Merritt always confessed to seeing nothing really horrible at the farmhouse, but maintained that the titles of the books in the special library of thaumaturgical, alchemical,
and theological subjects which Curwen kept in a front room were alone sufficient to
inspire him with a lasting loathing. Perhaps, however, the facial expression of the owner
in exhibiting them contributed much of the prejudice. This bizarre collection, besides a
host of standard works which Mr. Merritt was not too alarmed to envy, embraced nearly
all the cabbalists, demonologists, and magicians known to man; and was a treasure-
house of lore in the doubtful realms of alchemy and astrology. Hermes Trismegistus in
Mesnard's edition, the *Turbas Philosophorum*, Geber's *Liber Investigationsis*, and
Artephius's *Key of Wisdom* all were there; with the cabbalistic *Zohar*, Peter Jammy's set
of Albertus Magnus, Raymond Lully's *Ars Magna et Ultima* in Zetsner's edition, Roger
Bacon's *Thesaurus Chemicus*, Fludd's *Clavis Alchimiae*, and Trithemius's *De Lapide
Philosophico* crowding them close. Mediaeval Jews and Arabs were represented in
profusion, and Mr. Merritt turned pale when, upon taking down a fine volume
conspicuously labelled as the *Qanoon-e-Islam*, he found it was in truth the forbidden
*Necronomicon* of the mad Arab Abdul Alhazred, of which he had heard such monstrous
things whispered some years previously after the exposure of nameless rites at the strange
little fishing village of Kingsport, in the province of the Massachussetts-Bay.

But oddly enough, the worthy gentleman owned himself most impalpably disquieted by a
mere minor detail. On the huge mahogany table there lay face downwards a badly worn
copy of Borellus, bearing many cryptical marginalia and interlineations in Curwen's
hand. The book was open at about its middle, and one paragraph displayed such thick and
tremulous pen-strokes beneath the lines of mystic black-letter that the visitor could not
resist scanning it through. Whether it was the nature of the passage underscored, or the
feverish heaviness of the strokes which formed the underscoring, he could not tell; but
something in that combination affected him very badly and very peculiarly. He recalled it
to the end of his days, writing it down from memory in his diary and once trying to recite
it to his close friend Dr. Checkley till he saw how greatly it disturbed the urbane rector. It
read:

>'The essential Saltes of Animals may be so prepared and preserved, that an
ingenious Man may have the whole Ark of Noah in his own Studie, and
raise the fine Shape of an Animal out of its Ashes at his Pleasure; and by
the lyke Method from the essential Saltes of humane Dust, a Philosopher
may, without any criminal Necromancy, call up the Shape of any dead
Ancestour from the Dust whereinto his Bodie has been incinerated.'

It was near the docks along the southerly part of the Town Street, however, that the worst
things were muttered about Joseph Curwen. Sailors are superstitious folk; and the
seasoned salts who manned the infinite rum, slave, and molasses sloops, the rakish
privateers, and the great brigs of the Browns, Crawfords, and Tillinghasts, all made
strange furtive signs of protection when they saw the slim, deceptively young-looking
figure with its yellow hair and slight stoop entering the Curwen warehouse in Doubloon
Street or talking with captains and supercargoes on the long quay where the Curwen ships
rode restlessly. Curwen's own clerks and captains hated and feared him, and all his sailors
were mongrel riff-raff from Martinique, St. Eustatius, Havana, or Port Royal. It was, in a
way, the frequency with which these sailors were replaced which inspired the acutest and
most tangible part of the fear in which the old man was held. A crew would be turned
loose in the town on shore leave, some of its members perhaps charged with this errand
or that; and when reassembled it would be almost sure to lack one or more men. That many of the errands had concerned the farm of Pawtuxet Road, and that few of the sailors had ever been seen to return from that place, was not forgotten; so that in time it became exceedingly difficult for Curwen to keep his oddly assorted hands. Almost invariably several would desert soon after hearing the gossip of the Providence wharves, and their replacement in the West Indies became an increasingly great problem to the merchant.

By 1760 Joseph Curwen was virtually an outcast, suspected of vague horrors and daemoniac alliances which seemed all the more menacing because they could not be named, understood, or even proved to exist. The last straw may have come from the affair of the missing soldiers in 1758, for in March and April of that year two Royal regiments on their way to New France were quartered in Providence, and depleted by an inexplicable process far beyond the average rate of desertion. Rumour dwelt on the frequency with which Curwen was wont to be seen talking with the red-coated strangers; and as several of them began to be missed, people thought of the odd conditions among his own seamen. What would have happened if the regiments had not been ordered on, no one can tell.

Meanwhile the merchant's worldly affairs were prospering. He had a virtual monopoly of the town's trade in saltpetre, black pepper, and cinnamon, and easily led any other one shipping establishment save the Browns in his importation of brassware, indigo, cotton, woollens, salt, rigging, iron, paper, and English goods of every kind. Such shopkeepers as James Green, at the Sign of the Elephant in Cheapside, the Russells, at the Sign of the Golden Eagle across the Bridge, or Clark and Nightingale at the Frying-Pan and Fish near New Coffee-House, depended almost wholly upon him for their stock; and his arrangements with the local distillers, the Narragansett dairymen and horse-breeders, and the Newport candle-makers, made him one of the prime exporters of the Colony.

Ostracised though he was, he did not lack for civic spirit of a sort. When the Colony House burned down, he subscribed handsomely to the lotteries by which the new brick one - still standing at the head of its parade in the old main street - was built in 1761. In that same year, too, he helped rebuild the Great Bridge after the October gale. He replaced many of the books of the public library consumed in the Colony House fire, and bought heavily in the lottery that gave the muddy Market Parade and deep-rutted Town Street their pavement of great round stones with a brick footwalk or "causey" in the middle. About this time, also, he built the plain but excellent new house whose doorway is still such a triumph of carving. When the Whitefield adherents broke off from Dr. Cotton's hill church in 1743 and founded Deacon Snow's church across the Bridge, Curwen had gone with them; though his zeal and attendance soon abated. Now, however, he cultivated piety once more; as if to dispel the shadow which had thrown him into isolation and would soon begin to wreck his business fortunes if not sharply checked.

The sight of this strange, pallid man, hardly middle-aged in aspect yet certainly not less than a full century old, seeking at last to emerge from a cloud of fright and detestation too vague to pin down or analyse, was at once a pathetic, a dramatic, and a contemptible thing. Such is the power of wealth and of surface gestures, however, that there came

2
indeed a slight abatement in the visible aversion displayed toward him; especially after
the rapid disappearances of his sailors abruptly ceased. He must likewise have begun to
practice an extreme care and secrecy in his graveyard expeditions, for he was never again
catch at such wanderings; whilst the rumours of uncanny sounds and manoeuvres at his
Pawtuxet farm diminished in proportion. His rate of food consumption and cattle
replacement remained abnormally high; but not until modern times, when Charles Ward
examined a set of his accounts and invoices in the Shepley Library, did it occur to any
person - save one embittered youth, perhaps - to make dark comparisons between the
large number of Guinea blacks he imported until 1766, and the disturbingly small number
for whom he could produce bona fide bills of sale either to slave-dealers at the Great
Bridge or to the planters of the Narragansett Country. Certainly, the cunning and
ingenuity of this abhorred character were uncannily profound, once the necessity for their
exercise had become impressed upon him.

But of course the effect of all this belated mending was necessarily slight. Curwen
continued to be avoided and distrusted, as indeed the one fact of his continued air of
youth at a great age would have been enough to warrant; and he could see that in the end
his fortunes would be likely to suffer. His elaborate studies and experiments, whatever
they may have been, apparently required a heavy income for their maintenance; and since
a change of environment would deprive him of the trading advantages he had gained, it
would not have profited him to begin anew in a different region just then. Judgement
demanded that he patch up his relations with the townsfolk of Providence, so that his
presence might no longer be a signal for hushed conversation, transparent excuses or
errands elsewhere, and a general atmosphere of constraint and uneasiness. His clerks,
being now reduced to the shiftless and impecunious residue whom no one else would
employ, were giving him much worry; and he held to his sea-captains and mates only by
shrewdness in gaining some kind of ascendancy over them - a mortgage, a promissory
note, or a bit of information very pertinent to their welfare. In many cases, diarists have
recorded with some awe, Curwen shewed almost the power of a wizard in unearthing
family secrets for questionable use. During the final five years of his life it seemed as
though only direct talks with the long-dead could possibly have furnished some of the
data which he had so glibly at his tongue's end.

About this time the crafty scholar hit upon a last desperate expedient to regain his footing
in the community. Hitherto a complete hermit, he now determined to contract an
advantageous marriage; securing as a bride some lady whose unquestioned position
would make all ostracism of his home impossible. It may be that he also had deeper
reasons for wishing an alliance; reasons so far outside the known cosmic sphere that only
papers found a century and a half after his death caused anyone to suspect them; but of
this nothing certain can ever be learned. Naturally he was aware of the horror and
indignation with which any ordinary courtship of his would be received, hence he looked
about for some likely candidate upon whose parents he might exert a suitable pressure.
Such candidates, he found, were not at all easy to discover; since he had very particular
requirements in the way of beauty, accomplishments, and social security. At length his
survey narrowed down to the household of one of his best and oldest ship-captains, a
widower of high birth and unblemished standing named Dutee Tillinghast, whose only
daughter Eliza seemed dowered with every conceivable advantage save prospects as an
heiress. Capt. Tillinghast was completely under the domination of Curwen; and consented, after a terrible interview in his cupolaed house on Power's Lane hill, to sanction the blasphemous alliance.

Eliza Tillinghast was at that time eighteen years of age, and had been reared as gently as the reduced circumstances of her father permitted. She had attended Stephen Jackson's school opposite the Court-House Parade; and had been diligently instructed by her mother, before the latter's death of smallpox in 1757, in all the arts and refinements of domestic life. A sampler of hers, worked in 1753 at the age of nine, may still be found in the rooms of the Rhode Island Historical Society. After her mother's death she had kept the house, aided only by one old black woman. Her arguments with her father concerning the proposed Curwen marriage must have been painful indeed; but of these we have no record. Certain it is that her engagement to young Ezra Weeden, second mate of the Crawford packet Enterprise, was dutifully broken off, and that her union with Joseph Curwen took place on the seventh of March, 1763, in the Baptist church, in the presence of the most distinguished assemblages which the town could boast; the ceremony being performed by the younger Samuel Winsor. The Gazette mentioned the event very briefly, and in most surviving copies the item in question seems to be cut or torn out. Ward found a single intact copy after much search in the archives of a private collector of note, observing with amusement the meaningless urbanity of the language:

'Monday evening last, Mr. Joseph Curwen, of this Town, Merchant, was married to Miss Eliza Tillinghast, Daughter of Capt. Dutee Tillinghast, a young Lady who has real Merit, added to a beautiful Person, to grace the connubial State and perpetuate its Felicity.'

The collection of Durfee-Arnold letters, discovered by Charles Ward shortly before his first reputed madness in the private collection of Melville F. Peters, Esq., of George St., and covering this and a somewhat antecedent period, throws vivid light on the outrage done to public sentiment by this ill-assorted match. The social influence of the Tillinghasts, however, was not to be denied; and once more Joseph Curwen found his house frequented by persons whom he could never otherwise have induced to cross his threshold. His acceptance was by no means complete, and his bride was socially the sufferer through her forced venture; but at all events the wall of utter ostracism was somewhat torn down. In his treatment of his wife the strange bridegroom astonished both her and the community by displaying an extreme graciousness and consideration. The new house in Olney Court was now wholly free from disturbing manifestations, and although Curwen was much absent at the Pawtuxet farm which his wife never visited, he seemed more like a normal citizen than at any other time in his long years of residence. Only one person remained in open enmity with him, this being the youthful ship's officer whose engagement to Eliza Tillinghast had been so abruptly broken. Ezra Weeden had frankly vowed vengeance; and though of a quiet and ordinarily mild disposition, was now gaining a hate-bred, dogged purpose which boded no good to the usurping husband.

On the seventh of May, 1765, Curwen's only child Ann was born; and was christened by the Rev. John Graves of King's Church, of which both husband and wife had become communicants shortly after their marriage, in order to compromise between their respective Congregational and Baptist affiliations. The record of this birth, as well as that
of the marriage two years before, was stricken from most copies of the church and town annals where it ought to appear; and Charles Ward located both with the greatest difficulty after his discover of the widow's change of name had apprised him of his own relationship, and engendered the feverish interest which culminated in his madness. The birth entry, indeed, was found very curiously through correspondence with the heirs of the loyalist Dr. Graves, who had taken with him a duplicate set of records when he left his pastorate at the outbreak of the Revolution. Ward had tried this source because he knew that his great-great-grandmother Ann Tillinghast Potter had been an Episcopalian.

Shortly after the birth of his daughter, an event he seemed to welcome with a fervour greatly out of keeping with his usual coldness, Curwen resolved to sit for a portrait. This he had painted by a very gifted Scotsman named Cosmo Alexander, then a resident of Newport, and since famous as the early teacher of Gilbert Stuart. The likeness was said to have been executed on a wall-panel of the library of the house in Olney Court, but neither of the two old diaries mentioning it gave any hint of its ultimate disposition. At this period the erratic scholar shewed signs of unusual abstraction, and spent as much time as he possibly could at his farm on the Pawtuxet Road. He seemed, as was stated, in a condition of suppressed excitement or suspense; as if expecting some phenomenal thing or on the brink of some strange discovery. Chemistry or alchemy would appear to have played a great part, for he took from his house to the farm the greater number of his volumes on that subject.

His affectation of civic interest did not diminish, and he lost no opportunities for helping such leaders as Stephen Hopkins, Joseph Brown, and Benjamin West in their efforts to raise the cultural tone of the town, which was then much below the level of Newport in its patronage of the liberal arts. He had helped Daniel Jenckes found his bookshop in 1763, and was thereafter his best customer; extending aid likewise to the struggling *Gazette* that appeared each Wednesday at the Sign of Shakespeare's Head. In politics he ardently supported Governor Hopkins against the Ward party whose prime strength was in Newport, and his really eloquent speech at Hacher's Hall in 1765 against the setting off of North Providence as a separate town with a pro-Ward vote in the General Assembly did more than any other thing to wear down the prejudice against him. But Ezra Weeden, who watched him closely, sneered cynically at all this outward activity; and freely swore it was no more than a mask for some nameless traffick with the blackest gulfs of Tartarus. The revengeful youth began a systematic study of the man and his doings whenever he was in port; spending hours at night by the wharves with a dory in readiness when he saw lights in the Curwen warehouses, and following the small boat which would sometimes steal quietly off and down the bay. He also kept as close a watch as possible on the Pawtuxet farm, and was once severely bitten by the dogs the old Indian couple loosed upon him.

In 1766 came the final change in Joseph Curwen. It was very sudden, and gained wide notice amongst the curious townsfolk; for the air of suspense and expectancy dropped like an old cloak, giving instant place to an ill-concealed exaltation of perfect triumph. Curwen seemed to have difficulty in restraining himself from public harangues on what he had found or learned or made; but apparently the need of secrecy was greater than the
longing to share his rejoicing, for no explanation was ever offered by him. It was after this transition, which appears to have come early in July, that the sinister scholar began to astonish people by his possession of information which only their long-dead ancestors would seem to be able to impart.

But Curwen's feverish secret activities by no means ceased with this change. On the contrary, they tended rather to increase; so that more and more of his shipping business was handled by the captains whom he now bound to him by ties of fear as potent as those of bankruptcy had been. He altogether abandoned the slave trade, alleging that its profits were constantly decreasing. Every possible moment was spent at the Pawtuxet farm; although there were rumours now and then of his presence in places which, though not actually near graveyards, were yet so situated in relation to graveyards that thoughtful people wondered just how thorough the old merchant's change of habits really was. Ezra Weeden, though his periods of espionage were necessarily brief and intermittent on account of his sea voyaging, had a vindictive persistence which the bulk of the practical townsfolk and farmers lacked; and subjected Curwen's affairs to a scrutiny such as they had never had before.

Many of the odd manoeuvres of the strange merchant's vessels had been taken for granted on account of the unrest of the times, when every colonist seemed determined to resist the provisions of the Sugar Act which hampered a prominent traffick. Smuggling and evasion were the rule in Narragansett Bay, and nocturnal landings of illicit cargoes were continuous commonplaces. But Weeden, night after night following the lighters or small sloops which he saw steal off from the Curwen warehouses at the Town Street docks, soon felt assured that it was not merely His Majesty's armed ships which the sinister skulker was anxious to avoid. Prior to the change in 1766 these boats had for the most part contained chained negroes, who were carried down and across the bay and landed at an obscure point on the shore just north of Pawtuxet; being afterward driven up the bluff and across country to the Curwen farm, where they were locked in that enormous stone outbuilding which had only five high narrow slits for windows. After that change, however, the whole programme was altered. Importation of slaves ceased at once, and for a time Curwen abandoned his midnight sailings. Then, about the spring of 1767, a new policy appeared. Once more the lighters grew wont to put out from the black, silent docks, and this time they would go down the bay some distance, perhaps as far as Namquit Point, where they would meet and receive cargo from strange ships of considerable size and widely varied appearance. Curwen's sailors would then deposit this cargo at the usual point on the shore, and transport it overland to the farm; locking it in the same cryptical stone building which had formerly received the negroes. The cargo consisted almost wholly of boxes and cases, of which a large proportion were oblong and heavy and disturbingly suggestive of coffins.

Weeden always watched the farm with unremitting assiduity; visiting it each night for long periods, and seldom letting a week go by without a sight except when the ground bore a footprint-revealing snow. Even then he would often walk as close as possible in the travelled road or on the ice of the neighbouring river to see what tracks others might have left. Finding his own vigils interrupted by nautical duties, he hired a tavern companion named Eleazar Smith to continue the survey during his absence; and between
them the two could have set in motion some extraordinary rumours. That they did not do so was only because they knew the effect of publicity would be to warn their quarry and make further progress impossible. Instead, they wished to learn something definite before taking any action. What they did learn must have been startling indeed, and Charles Ward spoke many times to his parents of his regret at Weeden's later burning of his notebooks. All that can be told of their discoveries is what Eleazar Smith jotted down in a non too coherent diary, and what other diarists and letter-writers have timidly repeated from the statements which they finally made - and according to which the farm was only the outer shell of some vast and revolting menace, of a scope and depth too profound and intangible for more than shadowy comprehension.

It is gathered that Weeden and Smith became early convinced that a great series of tunnels and catacombs, inhabited by a very sizeable staff of persons besides the old Indian and his wife, underlay the farm. The house was an old peaked relic of the middle seventeenth century with enormous stack chimney and diamond-paned lattice windows, the laboratory being in a lean-to toward the north, where the roof came nearly to the ground. This building stood clear of any other; yet judging by the different voices heard at odd times within, it must have been accessible through secret passages beneath. These voices, before 1766, were mere mumblings and negro whisperings and frenzied screams, coupled with curious chants or invocations. After that date, however, they assumed a very singular and terrible cast as they ran the gamut betwixt dronings of dull acquiescence and explosions of frantic pain or fury, rumblings of conversations and whines of entreaty, pantings of eagerness and shouts of protest. They appeared to be in different languages, all known to Curwen, whose rasping accents were frequently distinguishable in reply, reproof, or threatening. Sometimes it seemed that several persons must be in the house; Curwen, certain captives, and the guards of those captives. There were voices of a sort that neither Weeden nor Smith had ever heard before despite their wide knowledge of foreign parts, and many that they did seem to place as belonging to this or that nationality. The nature of the conversations seemed always a kind of catechism, as if Curwen were extorting some sort of information from terrified or rebellious prisoners.

Weeden had many verbatim reports of overheard scraps in his notebook, for English, French, and Spanish, which he knew, were frequently used; but of these nothing has survived. He did, however, say that besides a few ghoulish dialogues in which the past affairs of Providence families were concerned, most of the questions and answers he could understand were historical or scientific; occasionally pertaining to very remote places and ages. Once, for example, an alternately raging and sullen figure was questioned in French about the Black Prince's massacre at Limoges in 1370, as if there were some hidden reason which he ought to know. Curwen asked the prisoner - if prisoner he were - whether the order to slay was given because of the Sign of the Goat found on the altar in the ancient Roman crypt beneath the Cathedral, or whether the Dark Man of the Haute Vienne had spoken the Three Words. Failing to obtain replies, the inquisitor had seemingly resorted to extreme means; for there was a terrific shriek followed by silence and muttering and a bumping sound.

None of these colloquies was ever ocularly witnessed, since the windows were always heavily draped. Once, though, during a discourse in an unknown tongue, a shadow was
seen on the curtain which startled Weeden exceedingly; reminding him of one of the puppets in a show he had seen in the autumn of 1764 in Hacher's Hall, when a man from Germantown, Pennsylvania, had given a clever mechanical spectacle advertised as

'A View of the Famous City of Jerusalem, in which are represented Jerusalem, the Temple of Solomon, his Royal Throne, the noted Towers, and Hills, likewise the Suffering of Our Saviour from the Garden of Gethsemane to the Cross on the Hill of Golgotha; an artful piece of Statuary, Worthy to be seen by the Curious.'

It was on this occasion that the listener, who had crept close to the window of the front room whence the speaking proceeded, gave a start which roused the old Indian pair and caused them to loose the dogs on him. After that no more conversations were ever heard in the house, and Weeden and Smith concluded that Curwen had transferred his field of action to regions below.

That such regions in truth existed, seemed amply clear from many things. Faint cries and groans unmistakably came up now and then from what appeared to be the solid earth in places far from any structure; whilst hidden in the bushes along the river-bank in the rear, where the high ground sloped steeply down to the valley of the Pawtuxet, there was found an arched oaken door in a frame of heavy masonry, which was obviously an entrance to caverns within the hill. When or how these catacombs could have been constructed, Weeden was unable to say; but he frequently pointed out how easily the place might have been reached by bands of unseen workmen from the river. Joseph Curwen put his mongrel seamen to diverse uses indeed! During the heavy spring rains of 1769 the two watchers kept a sharp eye on the steep river-bank to see if any subterrene secrets might be washed to light, and were rewarded by the sight of a profusion of both human and animal bones in places where deep gullies had been worn in the banks. Naturally there might be many explanations of such things in the rear of a stock farm, and a locality where old Indian bury-grounds were common, but Weeden and Smith drew their own inferences.

It was in January 1770, whilst Weeden and Smith were still debating vainly on what, if anything, to think or do about the whole bewildering business, that the incident of the Fortaleza occurred. Exasperated by the burning of the revenue sloop Liberty at Newport during the previous summer, the customs fleet under Admiral Wallace had adopted an increased vigilance concerning strange vessels; and on this occasion His Majesty's armed schooner Cygnet, under Capt. Charles Leslie, captured after a short pursuit one early morning the scow Fortaleza of Barcelona, Spain, under Capt. Manuel Arruda, bound according to its log from Grand Cairo, Egypt, to Providence. When searched for contraband material, this ship revealed the astonishing fact that its cargo consisted exclusively of Egyptian mummies, consigned to "Sailor A. B. C.", who would come to remove his goods in a lighter just off Namquit Point and whose identity Capt. Arruda felt himself in honour bound not to reveal. The Vice-Admiralty at Newport, at a loss what to do in view of the non-contraband nature of the cargo on the one hand and of the unlawful secrecy of the entry on the other hand, compromised on Collector Robinson's recommendation by freeing the ship but forbidding it a port in Rhode Island waters.
There were later rumours of its having been seen in Boston Harbour, though it never openly entered the Port of Boston.

This extraordinary incident did not fail of wide remark in Providence, and there were not many who doubted the existence of some connexion between the cargo of mummies and the sinister Joseph Curwen. His exotic studies and his curious chemical importations being common knowledge, and his fondness for graveyards being common suspicion; it did not take much imagination to link him with a freakish importation which could not conceivably have been destined for anyone else in the town. As if conscious of this natural belief, Curwen took care to speak casually on several occasions of the chemical value of the balsams found in mummies; thinking perhaps that he might make the affair seem less unnatural, yet stopping just short of admitting his participation. Weeden and Smith, of course, felt no doubt whatsoever of the significance of the thing; and indulged in the wildest theories concerning Curwen and his monstrous labours.

The following spring, like that of the year before, had heavy rains; and the watchers kept careful track of the river-bank behind the Curwen farm. Large sections were washed away, and a certain number of bones discovered; but no glimpse was afforded of any actual subterranean chambers or burrows. Something was rumoured, however, at the village of Pawtuxet about a mile below, where the river flows in falls over a rocky terrace to join the placed landlocked cove. There, where quaint old cottages climbed the hill from the rustic bridge, and fishing-smacks lay anchored at their sleepy docks, a vague report went round of things that were floating down the river and flashing into sight for a minute as they went over the falls. Of course the Pawtuxet in a long river which winds through many settled regions abounding in graveyards, and of course the spring rains had been very heavy; but the fisherfolk about the bridge did not like the wild way that one of the things stared as it shot down to the still waters below, or the way that another half cried out although its condition had greatly departed from that of objects which normally cried out. That rumour sent Smith - for Weeden was just then at sea - in haste to the river-bank behind the farm; where surely enough there remained the evidence of an extensive cave-in. There was, however, no trace of a passage into the steep bank; for the miniature avalanche had left behind a solid wall of mixed earth and shrubbery from aloft. Smith went to the extent of some experimental digging, but was deterred by lack of success - or perhaps by fear of possible success. It is interesting to speculate on what the persistent and revengeful Weeden would have done had he been ashore at the time.

By the autumn of 1770 Weeden decided that the time was ripe to tell others of his discoveries; for he had a large number of facts to link together, and a second eye-witness to refute the possible charge that jealousy and vindictiveness had spurred his fancy. As his first confidant he selected Capt. James Mathewson of the Enterprise, who on the one hand knew him well enough not to doubt his veracity, and on the other hand was sufficiently influential in the town to be heard in turn with respect. The colloquy took place in an upper room of Sabin's Tavern near the docks, with Smith present to corroborate virtually every statement; and it could be seen that Capt. Mathewson was tremendously impressed. Like nearly everyone else in the town, he had had black suspicions of his own anent Joseph Curwen; hence it needed only this confirmation and
enlargement of data to convince him absolutely. At the end of the conference he was very grave, and enjoined strict silence upon the two younger men. He would, he said, transmit the information separately to some ten or so of the most learned and prominent citizens of Providence; ascertaining their views and following whatever advice they might have to offer. Secrecy would probably be essential in any case, for this was no matter that the town constables or militia could cope with; and above all else the excitable crowd must be kept in ignorance, lest there be enacted in these already troublous times a repetition of that frightful Salem panic of less than a century before which had first brought Curwen hither.

The right persons to tell, he believed, would be Dr. Benjamin West, whose pamphlet on the late transit of Venus proved him a scholar and keen thinker; Rev. James Manning, President of the College which had just moved up from Warren and was temporarily housed in the new King Street schoolhouse awaiting the completion of its building on the hill above Presbyterian-Lane; ex-Governor Stephen Hopkins, who had been a member of the Philosophical Society at Newport, and was a man of very broad perceptions; John Carter, publisher of the Gazette; all four of the Brown brothers, John, Joseph, Nicholas, and Moses, who formed the recognised local magnates, and of whom Joseph was an amateur scientist of parts; old Dr. Jabez Bowen, whose erudition was considerable, and who had much first-hand knowledge of Curwen's odd purchases; and Capt. Abraham Whipple, a privateersman of phenomenal boldness and energy who could be counted on to lead in any active measures needed. These men, if favourable, might eventually be brought together for collective deliberation; and with them would rest the responsibility of deciding whether or not to inform the Governor of the Colony, Joseph Wanton of Newport, before taking action.

The mission of Capt. Mathewson prospered beyond his highest expectations; for whilst he found one or two of the chosen confidants somewhat sceptical of the possible ghastly side of Weeden's tale, there was not one who did not think it necessary to take some sort of secret and coördinated action. Curwen, it was clear, formed a vague potential menace to the welfare of the town and Colony; and must be eliminated at any cost. Late in December 1770 a group of eminent townsmen met at the home of Stephen Hopkins and debated tentative measures. Weeden's notes, which he had given to Capt. Mathewson, were carefully read; and he and Smith were summoned to give testimony anent details. Something very like fear seized the whole assemblage before the meeting was over, though there ran through that fear a grim determination which Capt. Whipple's bluff and resonant profanity best expressed. They would not notify the Governor, because a more than legal course seemed necessary. With hidden powers of uncertain extent apparently at his disposal, Curwen was not a man who could safely be warned to leave town. Nameless reprisals might ensue, and even if the sinister creature complied, the removal would be no more than the shifting of an unclean burden to another place. The times were lawless, and men who had flouted the King's revenue forces for years were not the ones to balk at sterner things when duty impelled. Curwen must be surprised at his Pawtuxet farm by a large raiding-party of seasoned privateersmen and given one decisive chance to explain himself. If he proved a madman, amusing himself with shrieks and imaginary conversations in different voices, he would be properly confined. If something graver appeared, and if the underground horrors indeed turned out to be real, he and all with him
must die. It could be done quietly, and even the widow and her father need not be told how it came about.

While these serious steps were under discussion there occurred in the town an incident so terrible and inexplicable that for a time little else was mentioned for miles around. In the middle of a moon-light January night with heavy snow underfoot there resounded over the river and up the hill a shocking series of cries which brought sleepy heads to every window; and people around Weybosset Point saw a great white thing plunging frantically along the badly cleared space in front of the Turk's Head. There was a baying of dogs in the distance, but this subsided as soon as the clamour of the awakened town became audible. Parties of men with lanterns and muskets hurried out to see what was happening, but nothing rewarded their search. The next morning, however, a giant, muscular body, stark naked, was found on the jams of ice around the southern piers of the Great Bridge, where the Long Dock stretched out beside Abbott's distil-house, and the identity of this object became a theme for endless speculation and whispering. It was not so much the younger as the older folk who whispered, for only in the patriarchs did that rigid face with horror-bulging eyes strike any chord of memory. They, shaking as they did so, exchanged furtive murmurs of wonder and fear; for in those stiff, hideous features lay a resemblance so marvellous as to be almost an identity - and that identity was with a man who had died full fifty years before.

Ezra Weeden was present at the finding; and remembering the baying of the night before, set out along Weybosset Street and across Muddy Dock Bridge whence the sound had come. He had a curious expectancy, and was not surprised when, reaching the edge of the settled district where the street merged into the Pawtuxet Road, he came upon some very curious tracks in the snow. The naked giant had been pursued by dogs and many booted men, and the returning tracks of the hounds and their masters could be easily traced. They had given up the chase upon coming too near the town. Weeden smiled grimly, and as a perfunctory detail traced the footprints back to their source. It was the Pawtuxet farm of Joseph Curwen, as he well knew it would be; and he would have given much had the yard been less confusingly trampled. As it was, he dared not seem too interested in full daylight. Dr. Bowen, to whom Weeden went at once with his report, performed an autopsy on the strange corpse, and discovered peculiarities which baffled him utterly. The digestive tracts of the huge man seemed never to have been in use, whilst the whole skin had a coarse, loosely knit texture impossible to account for. Impressed by what the old men whispered of this body's likeness to the long-dead blacksmith Daniel Green, whose great-grandson Aaron Hoppin was a supercargo in Curwen's employ, Weeden asked casual questions till he found where Green was buried. That night a party of ten visited the old North Burying Ground opposite Herrenden's Lane and opened a grave. They found it vacant, precisely as they had expected.

Meanwhile arrangements had been made with the post riders to intercept Joseph Curwen's mail, and shortly before the incident of the naked body there was found a letter from one Jedediah Orne of Salem which made the coöperating citizens think deeply. Parts of it, copied and preserved in the private archives of the Smith family where Charles Ward found it, ran as follows.
I delight that you continue in ye Gett'g at Olde Matters in your Way, and doe not think better was done at Mr. Hutchinson's in Salem-Village. Certainly, there was Noth'g but ye liveliest Awfulness in that which H. rais'd upp from What he cou'd gather onlie a part of. What you sente, did not Worke, whether because of Any Thing miss'g, or because ye Wordes were not Righte from my Speak'g or yr Copy'g. I alone am at a Loss. I have not ye Chymicall art to followe Borellus, and owne my Self confounded by ye VII. Booke of ye Necronomicon that you recommende. But I wou'd have you Observe what was told to us aboute tak'g Care whom to calle upp, for you are Sensible what Mr. Mather writ in ye Magnalia of ------, and can judge how truely that Horrendous thing is reported. I say to you againe, doe not call up Any that you can not put downe; by the Which I meane, Any that can in Turne call up Somewhat against you, whereby your Powerfullest Devices may not be of use. Ask of the Lesser, lest the Greater shal not wish to Answer, and shal commande more than you. I was frighted when I read of your know'g what Ben Zariatnatmik hadde in his ebony Boxe, for I was conscious who must have tolde you. And againe I ask that you shalle write me as Jedediah and not Simon. In this Community a Man may not live too long, and you knowe my Plan by which I came back as my Son. I am desirous you will Acquaint me with what ye Black Man learnt from Sylvanus Cocidius in ye Vault, under ye Roman Wall, and will be oblig'd for ye lend'g of ye MS. you speak of.

Another and unsigned letter from Philadelphia provoked equal thought, especially for the following passage:

I will observe what you say respecting the sending of Accounts only by yr Vessels, but can not always be certain when to expect them. In the Matter spoke of, I require onlie one more thing; but wish to be sure I apprehend you exactly. You informe me, that no Part must be missing if the finest Effects are to be had, but you can not but know how hard it is to be sure. It seems a great Hazard and Burthen to take away the whole Boxe, and in Town (i.e. St. Peter's, St. Paul's, St. Mary's or Christ Church) it can scarce be done at all. But I know what Imperfections were in the one I rais'd up October last, and how many live Specimens you were forc'd to imploy before you hit upon the right Mode in the year 1766; so will be guided by you in all Matters. I am impatient for yr Brig, and inquire daily at Mr. Biddle's Wharf.

A third suspicious letter was in an unknown tongue and even an unknown alphabet. In the Smith diary found by Charles Ward a single oft-repeated combination of characters is clumsily copied; and authorities at Brown University have pronounced the alphabet Amharic or Abyssinian, although they do not recognise the word. None of these epistles was ever delivered to Curwen, though the disappearance of Jedediah Orne from Salem as recorded shortly afterward shewed that the Providence men took certain quiet steps. The Pennsylvania Historical Society also has some curious letters received by Dr. Shippen regarding the presence of an unwholesome character in Philadelphia. But more decisive steps were in the air, and it is in the secret assemblages of sworn and tested sailors and faithful old privateersmen in the Brown warehouses by night that we must look for the main fruits of Weeden's disclosures. Slowly and surely a plan of campaign was under development which would leave no trace of Joseph Curwen's noxious mysteries.
Curwen, despite all precautions, apparently felt that something was in the wind; for he was now remarked to wear an unusually worried look. His coach was seen at all hours in the town and on the Pawtuxet Road, and he dropped little by little the air of forced geniality with which he had latterly sought to combat the town's prejudice. The nearest neighbours to his farm, the Fenners, one night remarked a great shaft of light shooting into the sky from some aperture in the roof of that cryptical stone building with the high, excessively narrow windows; an event which they quickly communicated to John Brown in Providence. Mr. Brown had become the executive leader of the select group bent on Curwen's extirpation, and had informed the Fenners that some action was about to be taken. This he deemed needful because of the impossibility of their not witnessing the final raid; and he explained his course by saying that Curwen was known to be a spy of the customs officers at Newport, against whom the hand of every Providence skipper, merchant, and farmer was openly or clandestinely raised. Whether the ruse was wholly believed by neighbours who had seen so many queer things is not certain; but at any rate the Fenners were willing to connect any evil with a man of such queer ways. To them Mr. Brown had entrusted the duty of watching the Curwen farmhouse, and of regularly reporting every incident which took place there.

The probability that Curwen was on guard and attempting unusual things, as suggested by the odd shaft of light, precipitated at last the action so carefully devised by the band of serious citizens. According to the Smith diary a company of about 100 men met at 10 p.m. on Friday, April 12th, 1771, in the great room of Thurston's Tavern at the Sign of the Golden Lion on Weybosset Point across the Bridge. Of the guiding group of prominent men in addition to the leader John Brown there were present Dr. Bowen, with his case of surgical instruments, President Manning without the great periwig (the largest in the Colonies) for which he was noted, Governor Hopkins, wrapped in his dark cloak and accompanied by his seafaring brother Esek, whom he had initiated at the last moment with the permission of the rest, John Carter, Capt. Mathewson, and Capt. Whipple, who was to lead the actual raiding party. These chiefs conferred apart in a rear chamber, after which Capt. Whipple emerged to the great room and gave the gathered seamen their last oaths and instructions. Eleazar Smith was with the leaders as they sat in the rear apartment awaiting the arrival of Ezra Weeden, whose duty was to keep track of Curwen and report the departure of his coach for the farm.

About 10:30 a heavy rumble was heard on the Great Bridge, followed by the sound of a coach in the street outside; and at that hour there was no need of waiting for Weeden in order to know that the doomed man had set out for his last night of unhallowed wizardry. A moment later, as the receding coach clattered faintly over the Muddy Dock Bridge, Weeden appeared; and the raiders fell silently into military order in the street, shouldering the firelocks, fowling-pieces, or whaling harpoons which they had with them. Weeden and Smith were with the party, and of the deliberating citizens there were present for active service Capt. Whipple, the leader, Capt. Esek Hopkins, John Carter, President Manning, Capt. Mathewson, and Dr. Bowen; together with Moses Brown, who had come up at the eleventh hour though absent from the preliminary session in the tavern. All these freemen and their hundred sailors began the long march without delay,
grim and a trifle apprehensive as they left the Muddy Dock behind and mounted the gentle rise of Broad Street toward the Pawtuxet Road. Just beyond Elder Snow's church some of the men turned back to take a parting look at Providence lying outspread under the early spring stars. Steeples and gables rose dark and shapely, and salt breezes swept up gently from the cove north of the Bridge. Vega was climbing above the great hill across the water, whose crest of trees was broken by the roof-line of the unfinished College edifice. At the foot of that hill, and along the narrow mounting lanes of its side, the old town dreamed; Old Providence, for whose safety and sanity so monstrous and colossal a blasphemy was about to be wiped out.

An hour and a quarter later the raiders arrived, as previously agreed, at the Fenner farmhouse; where they heard a final report on their intended victim. He had reached his farm over half an hour before, and the strange light had soon afterward shot once more into the sky, but there were no lights in any visible windows. This was always the case of late. Even as this news was given another great glare arose toward the south, and the party realised that they had indeed come close to the scene of awesome and unnatural wonders. Capt. Whipple now ordered his force to separate into three divisions; one of twenty men under Eleazar Smith to strike across to the shore and guard the landing-place against possible reinforcements for Curwen until summoned by a messenger for desperate service, a second of twenty men under Capt. Esek Hopkins to steal down into the river valley behind the Curwen farm and demolish with axes or gunpowder the oaken door in the high, steep bank, and the third to close in on the house and adjacent buildings themselves. Of this division one third was to be led by Capt. Mathewson to the cryptical stone edifice with high narrow windows, another third to follow Capt. Whipple himself to the main farmhouse, and the remaining third to preserve a circle around the whole group of buildings until summoned by a final emergency signal.

The river party would break down the hillside door at the sound of a single whistle-blast, then wait and capture anything which might issue from the regions within. At the sound of two whistle-blasts it would advance through the aperture to oppose the enemy or join the rest of the raiding contingent. The party at the stone building would accept these respective signals in an analogous manner; forcing an entrance at the first, and at the second descending whatever passage into the ground might be discovered, and joining the general or focal warfare expected to take place within the caverns. A third or emergency signal of three blasts would summon the immediate reserve from its general guard duty; its twenty men dividing equally and entering the unknown depths through both farmhouse and stone building. Capt. Whipple's belief in the existence of catacombs was absolute, and he took no alternative into consideration when making his plans. He had with him a whistle of great power and shrillness, and did not fear any upsetting or misunderstanding of signals. The final reserve at the landing, of course, was nearly out of the whistle's range; hence would require a special messenger if needed for help. Moses Brown and John Carter went with Capt. Hopkins to the river-bank, while President Manning was detailed with Capt. Mathewson to the stone building. Dr. Bowen, with Ezra Weeden, remained in Capt. Whipple's party which was to storm the farmhouse itself. The attack was to begin as soon as a messenger from Capt. Hopkins had joined Capt. Whipple to notify him of the river party's readiness. The leader would then deliver the loud single blast, and the various advance parties would commence their simultaneous attack on
three points. Shortly before 1 a.m. the three divisions left the Fenner farmhouse; one to guard the landing, another to seek the river valley and the hillside door, and the third to subdivide and attend to the actual buildings of the Curwen farm.

Eleazar Smith, who accompanied the shore-guarding party, records in his diary an uneventful march and a long wait on the bluff by the bay; broken once by what seemed to be the distant sound of the signal whistle and again by a peculiar muffled blend of roaring and crying and a powder blast which seemed to come from the same direction. Later on one man thought he caught some distant gunshots, and still later Smith himself felt the throb of titanic and thunderous words resounding in upper air. It was just before dawn that a single haggard messenger with wild eyes and a hideous unknown odour about his clothing appeared and told the detachment to disperse quietly to their homes and never again think or speak of the night's doings or of him who had been Joseph Curwen. Something about the bearing of the messenger carried a conviction which his mere words could never have conveyed; for though he was a seaman well known to many of them, there was something obscurely lost or gained in his soul which set him for evermore apart. It was the same later on when they met other old companions who had gone into that zone of horror. Most of them had lost or gained something imponderable and indescribable. They had seen or heard or felt something which was not for human creatures, and could not forget it. From them there was never any gossip, for to even the commonest of mortal instincts there are terrible boundaries. And from that single messenger the party at the shore caught a nameless awe which almost sealed their own lips. Very few are the rumours which ever came from any of them, and Eleazar Smith's diary is the only written record which has survived from that whole expedition which set forth from the Sign of the Golden Lion under the stars.

Charles Ward, however, discovered another vague sidelight in some Fenner correspondence which he found in New London, where he knew another branch of the family had lived. It seems that the Fenners, from whose house the doomed farm was distantly visible, had watched the departing columns of raiders; and had heard very clearly the angry barking of the Curwen dogs, followed by the first shrill blast which precipitated the attack. This blast had been followed by a repetition of the great shaft of light from the stone building, and in another moment, after a quick sounding of the second signal ordering a general invasion, there had come a subdued prattle of musketry followed by a horrible roaring cry which the correspondent Luke Fenner had represented in his epistle by the characters 'Waaaahrrrrr-R'waaahrrr.'

This cry, however, had possessed a quality which no mere writing could convey, and the correspondent mentions that his mother fainted completely at the sound. It was later repeated less loudly, and further but more muffled evidences of gunfire ensued; together with a loud explosion of powder from the direction of the river. About an hour afterward all the dogs began to bark frightfully, and there were vague ground rumblings so marked that the candlesticks tottered on the mantelpiece. A strong smell of sulphur was noted; and Luke Fenner's father declared that he heard the third or emergency whistle signal, though the others failed to detect it. Muffled musketry sounded again, followed by a deep scream less piercing but even more horrible than the those which had preceded it; a kind
of throaty, nastily plastic cough or gurgle whose quality as a scream must have come more from its continuity and psychological import than from its actual acoustic value.

Then the flaming thing burst into sight at a point where the Curwen farm ought to lie, and the human cries of desperate and frightened men were heard. Muskets flashed and cracked, and the flaming thing fell to the ground. A second flaming thing appeared, and a shriek of human origin was plainly distinguished. Fenner wrote that he could even gather a few words belched in frenzy: Almighty, protect thy lamb! Then there were more shots, and the second flaming thing fell. After that came silence for about three-quarters of an hour; at the end of which time little Arthur Fenner, Luke's brother, exclaimed that he saw "a red fog" going up to the stars from the accursed farm in the distance. No one but the child can testify to this, but Luke admits the significant coincidence implied by the panic of almost convulsive fright which at the same moment arched the backs and stiffened the fur of the three cats then within the room.

Five minutes later a chill wind blew up, and the air became suffused with an intolerable stench that only the strong freshness of the sea could have prevented its being notice by the shore party or by any wakeful souls in the Pawtuxet village. This stench was nothing which any of the Fenners had ever encountered before, and produced a kind of clutching, amorphous fear beyond that of the tomb or the charnel-house. Close upon it came the awful voice which no hapless hearer will ever be able to forget. It thundered out of the sky like a doom, and windows rattled as its echoes died away. It was deep and musical; powerful as a bass organ, but evil as the forbidden books of the Arabs. What it said no man can tell, for it spoke in an unknown tongue, but this is the writing Luke Fenner set down to portray the daemoniac intonations: 'DEESMEES JESHET BONE DOSEFE DUVEMA ENITEMOSS.' Not till the year 1919 did any soul link this crude transcript with anything else in mortal knowledge, but Charles Ward paled as he recognised what Mirandola had denounced in shudders as the ultimate horror among black magic's incantations.

An unmistakable human shout or deep chorused scream seemed to answer this malign wonder from the Curwen farm, after which the unknown stench grew complex with an added odour equally intolerable. A wailing distinctly different from the scream now burst out, and was protracted ululantly in rising and falling paroxysms. At times it became almost articulate, though no auditor could trace any definite words; and at one point it seemed to verge toward the confines of diabolic and hysterical laughter. Then a yell of utter, ultimate fright and stark madness wrenched from scores of human throats - a yell which came strong and clear despite the depth from which it must have burst; after which darkness and silence ruled all things. Spirals of acrid smoke ascended to blot out the stars, though no flames appeared and no buildings were observed to be gone or injured on the following day.

Toward dawn two frightened messengers with monstrous and unplaceable odours saturating their clothing knocked at the Fenner door and requested a keg of rum, for which they paid very well indeed. One of them told the family that the affair of Joseph Curwen was over, and that the events of the night were not to be mentioned again. Arrogant as the order seemed, the aspect of him who gave it took away all resentment and lent it a fearsome authority; so that only these furtive letters of Luke Fenner, which
he urged his Connecticut relative to destroy, remain to tell what was seen and heard. The
non-compliance of that relative, whereby the letters were saved after all, has alone kept
the matter from a merciful oblivion. Charles Ward had one detail to add as a result of a
long canvass of Pawtuxet residents for ancestral traditions. Old Charles Slocum of that
village said that there was known to his grandfather a queer rumour concerning a charred,
distorted body found in the fields a week after the death of Joseph Curwen was
announced. What kept the talk alive was the notion that this body, so far as could be seen
in its burnt and twisted condition, was neither thoroughly human nor wholly allied to any
animal which Pawtuxet folk had ever seen or read about.

Not one man who participated in that terrible raid could ever be induced to say a word
concerning it, and every fragment of the vague data which survives comes from those
outside the final fighting party. There is something frightful in the care with which these
actual raiders destroyed each scrap which bore the least allusion to the matter. Eight
sailors had been killed, but although their bodies were not produced their families were
satisfied with the statement that a clash with customs officers had occurred. The same
statement also covered the numerous cases of wounds, all of which were extensively
bandaged and treated only by Dr. Jabez Bowen, who had accompanied the party. Hardest
to explain was the nameless odour clinging to all the raiders, a thing which was discussed
for weeks. Of the citizen leaders, Capt. Whipple and Moses Brown were most severely
hurt, and letters of their wives testify the bewilderment which their reticence and close
guarding of their bandages produced. Psychologically every participant was aged,
sobered, and shaken. It is fortunate that they were all strong men of action and simple,
orthodox religionists, for with more subtle introspectiveness and mental complexity they
would have fared ill indeed. President Manning was the most disturbed; but even he
outgrew the darkest shadow, and smothered memories in prayers. Every man of those
leaders had a stirring part to play in later years, and it is perhaps fortunate that this is so.
Little more than a twelvemonth afterward Capt. Whipple led the mob who burnt the
revenue ship Gaspee, and in this bold act we may trace one step in the blotting out of
unwholesome images.

There was delivered to the widow of Joseph Curwen a sealed leaden coffin of curious
design, obviously found ready on the spot when needed, in which she was told her
husband's body lay. He had, it was explained, been killed in a customs battle about which
it was not politic to give details. More than this no tongue ever uttered of Joseph
Curwen's end, and Charles Ward had only a single hint wherewith to construct a theory.
This hint was the merest thread - a shaky underscoring of a passage in Jedediah Orne's
confiscated letter to Curwen, as partly copied in Ezra Weeden's handwriting. The copy
was found in the possession of Smith's descendants; and we are left to decide whether
Weeden gave it to his companion after the end, as a mute clue to the abnormality which
had occurred, or whether, as is more probable, Smith had it before, and added the
underscoring himself from what he had managed to extract from his friend by shrewd
guessing and adroit cross-questioning. The underlined passage is merely this:
I say to you againe, doe not call up Any that you can not put downe; by the Which I meane, Any that can in Turne call up Somewhat against you, whereby your Powerfullest Devices may not be of use. Ask of the Lesser, lest the Greater shal not wish to Answer, and shal commande more than you.

In the light of this passage, and reflecting on what last unmentionable allies a beaten man might try to summon in his direst extremity, Charles Ward may well have wondered whether any citizen of Providence killed Joseph Curwen.

The deliberate effacement of every memory of the dead man from Providence life and annals was vastly aided by the influence of the raiding leaders. They had not at first meant to be so thorough, and had allowed the widow and her father and child to remain in ignorance of the true conditions; but Capt. Tillinghast was an astute man, and soon uncovered enough rumours to whet his horror and cause him to demand that the daughter and granddaughter change their name, burn the library and all remaining papers, and chisel the inscription from the slate slab above Joseph Curwen's grave. He knew Capt. Whipple well, and probably extracted more hints from that bluff mariner and anyone else ever gained respecting the end of the accursed sorcerer.

From that time on the obliteration of Curwen's memory became increasingly rigid, extending at last by common consent even to the town records and files of the Gazette. It can be compared in spirit only to the hush that lay on Oscar Wilde's name for a decade after his disgrace, and in extent only to the fate of that sinful King of Runazar in Lord Dunsany's tale, whom the Gods decided must not only cease to be, but must cease ever to have been.

Mrs. Tillinghast, as the widow became known after 1772, sold the house in Olney Court and resided with her father in Power's Lane till her death in 1817. The farm at Pawtuxet, shunned by every living soul, remained to moulder through the years; and seemed to decay with unaccountable rapidity. By 1780 only the stone and brickwork were standing, and by 1800 even these had fallen to shapeless heaps. None ventured to pierce the tangled shrubbery on the river-bank behind which the hillside door may have lain, nor did any try to frame a definite image of the scenes amidst which Joseph Curwen departed from the horrors he had wrought.

Only robust old Capt. Whipple was heard by alert listeners to mutter once in a while to himself, "Pox on that -------, but he had no business to laugh while he screamed. 'Twas as though the damn'd ------- had some'at up his sleeve. For half a crown I'd burn his ------- home.'

III. A Search and an Evocation

Charles Ward, as we have seen, first learned in 1918 of his descent from Joseph Curwen. That he at once took an intense interest in everything pertaining to the bygone mystery is not to be wondered at; for every vague rumour that he had heard of Curwen now became something vital to himself, in whom flowed Curwen's blood. No spirited and imaginative genealogist could have done otherwise than begin forthwith an avid and systematic collection of Curwen data.
In his first delvings there was not the slightest attempt at secrecy; so that even Dr. Lyman hesitates to date the youth's madness from any period before the close of 1919. He talked freely with his family - though his mother was not particularly pleased to own an ancestor like Curwen - and with the officials of the various museums and libraries he visited. In applying to private families for records thought to be in their possession he made no concealment of his object, and shared the somewhat amused scepticism with which the accounts of the old diarists and letter-writers were regarded. He often expressed a keen wonder as to what really had taken place a century and a half before at the Pawtuxet farmhouse whose site he vainly tried to find, and what Joseph Curwen really had been.

When he came across the Smith diary and archives and encountered the letter from Jedediah Orne he decided to visit Salem and look up Curwen's early activities and connexions there, which he did during the Easter vacation of 1919. At the Essex Institute, which was well known to him from former sojourns in the glamorous old town of crumbling Puritan gables and clustered gambrel roofs, he was very kindly received, and unearthed there a considerable amount of Curwen data. He found that his ancestor was born in Salem-Village, now Danvers, seven miles from town, on the eighteenth of February (O.S.) 1662-3; and that he had run away to sea at the age of fifteen, not appearing again for nine years, when he returned with the speech, dress, and manners of a native Englishman and settled in Salem proper. At that time he had little to do with his family, but spent most of his hours with the curious books he had brought from Europe, and the strange chemicals which came for him on ships from England, France, and Holland. Certain trips of his into the country were the objects of much local inquisitiveness, and were whisperingly associated with vague rumours of fires on the hills at night.

Curwen's only close friends had been one Edward Hutchinson of Salem-Village and one Simon Orne of Salem. With these men he was often seen in conference about the Common, and visits among them were by no means infrequent. Hutchinson had a house well out toward the woods, and it was not altogether liked by sensitive people because of the sounds heard there at night. He was said to entertain strange visitors, and the lights seen from his windows were not always of the same colour. The knowledge he displayed concerning long-dead persons and long-forgotten events was considered distinctly unwholesome, and he disappeared about the time the witchcraft panic began, never to be heard from again. At that time Joseph Curwen also departed, but his settlement in Providence was soon learned of. Simon Orne lived in Salem until 1720, when his failure to grow visibly old began to excite attention. He thereafter disappeared, though thirty years later his precise counterpart and self-styled son turned up to claim his property. The claim was allowed on the strength of documents in Simon Orne's known hand, and Jedediah Orne continued to dwell in Salem till 1771, when certain letters from Providence citizens to the Rev. Thomas Barnard and others brought about his quiet removal to parts unknown.

Certain documents by and about all of the strange characters were available at the Essex Institute, the Court House, and the Registry of Deeds, and included both harmless commonplaces such as land titles and bills of sale, and furtive fragments of a more provocative nature. There were four or five unmistakable allusions to them on the
witchcraft trial records; as when one Hepzibah Lawson swore on July 10, 1692, at the Court of Oyer and Terminer under Judge Hathorne, that: 'fortie Witches and the Blacke Man were wont to meete in the Woodes behind Mr. Hutchinson's house', and one Amity How declared at a session of August 8th before Judge Gedney that:'Mr. G. B. (Rev. George Burroughs) on that Nighte putt ye Divell his Marke upon Bridget S., Jonathan A., Simon O., Deliverance W., Joseph C., Susan P., Mehitable C., and Deborah B.'

Then there was a catalogue of Hutchinson's uncanny library as found after his disappearance, and an unfinished manuscript in his handwriting, couched in a cipher none could read. Ward had a photostatic copy of this manuscript made, and began to work casually on the cipher as soon as it was delivered to him. After the following August his labours on the cipher became intense and feverish, and there is reason to believe from his speech and conduct that he hit upon the key before October or November. He never stated, though, whether or not he had succeeded.

But of greatest immediate interest was the Orne material. It took Ward only a short time to prove from identity of penmanship a thing he had already considered established from the text of the letter to Curwen; namely, that Simon Orne and his supposed son were one and the same person. As Orne had said to his correspondent, it was hardly safe to live too long in Salem, hence he resorted to a thirty-year sojourn abroad, and did not return to claim his lands except as a representative of a new generation. Orne had apparently been careful to destroy most of his correspondence, but the citizens who took action in 1771 found and preserved a few letters and papers which excited their wonder. There were cryptic formulae and diagrams in his and other hands which Ward now either copied with care or had photographed, and one extremely mysterious letter in a chirography that the searcher recognised from items in the Registry of Deeds as positively Joseph Curwen's.

This Curwen letter, though undated as to the year, was evidently not the one in answer to which Orne had written the confiscated missive; and from internal evidence Ward placed it not much later than 1750. It may not be amiss to give the text in full, as a sample of the style of one whose history was so dark and terrible. The recipient is addressed as "Simon", but a line (whether drawn by Curwen or Orne Ward could not tell) is run through the word.

Providence, 1. May

Brother:-

My honour'd Antient Friende, due Respects and earnest Wishes to Him whom we serue for yr eternall Power. I am just come upon That which you ought to knowe, concern'g the Matter of the Laste Extremitie and what to doe regard'g yt. I am not dispos'd to followe you in go'g Away on acct. of my Yeares, for Providenc hath not ye Sharpeness of ye Bay in hunt'g oute uncommon Things and bringinge to Tryall. I am ty'd up in Shippes and Goodes, and cou'd not doe as you did, besides the Whiche my Farme at Patuxet hath under it What you Knowe, and wou'd not waite for my com'g Backe as an Other.
But I am unreadie for harde Fortunes, as I haue tolde you, and haue longe
work'd upon ye Way of get'g Backe after ye Laste. I laste Night strucke on
ye Wordes that bringe up YOGGE-SOTHOTHE, and sawe for ye first
Time that Face spoke of by Ibn Schacabao in ye ------. And IT said, that ye
III Psalme in ye Liber-Damnatus holdes ye Clauicle. With Sunne in V
House, Saturne in Trine, drawe ye Pentagram of Fire, and saye ye ninth
Uerse thrice. This Uerse repeate eache Roodemas and Hallow's Eue; and
ye Thing will breede in ye Outside Spheres.

And of ye Seede of Olde shal One be borne who shal looke Backe, tho'
know'g not what he seekes.

Yett will this auaile Nothing if there be no Heir, and if the Saltes, or the
Way to make the Saltes, bee not Readie for his Hande; and here I will
owne, I haue not taken needed Stepps nor founde Much. Ye Process is
plaguy harde to come neare; and it used up such a Store of Specimens, I
am harde putte to it to get Enough, notwithstanding'g the Sailors I haue from
ye Indies. Ye People aboute are become curious, but I can stande them off.
Ye Gentry are worse that the Populace, be'g more Circumstantiall in their
Accts. and more belieu'd in what they tell. That Parson and Mr. Merritt
haue talk'd Some, I am fearfull, but no Thing soe far is Dangerous. Ye
Chymical Substances are easie of get'g, there be'g II. goode Chymists in
Towne, Dr, Bowen and Sam: Carew. I am foll'g oute what Borellus saith,
and haue Helpe in Abdool Al-Hazred his VII. Booke. Whateuer I gette,
you shal haue. And in ye meane while, do not neglect to make use of ye
Wordes I haue here giuen. I haue them Righte, but if you Desire to see
HIM, imploy the Writings on ye Piece of ------ that I am putt'g in this
Packet. Saye ye Uerses euery Roodmas and Hallow's Eue; and if ye Line
runn out not, one shal bee in yeares to come that shal looke backe and use
what Saltes or Stuff for Saltes you shal leaue him. Job XIV. XIV.

I rejoice you are again at Salem, and hope I may see you not longe hence.
I haue a gooode Stallion, and am think'g of get'g a Coach, there be'g one
(Mr. Merritt's) in Prouidence already, tho' ye Roades are bad. If you are
dispos'd to Trauel, doe not pass me bye. From Boston take ye Post Rd.
thro' Dedham, Wrentham, and Attleborough, gooode Tauerns be'g at all
these Townes. Stop at Mr. Balcom's in Wrentham, where ye Beddes are
finer than Mr. Hatch's, but eate at ye other House for their Cooke is better.
Turne into Prou. by Patucket Falls, and ye Rd. past Mr. Sayles's Tauern.
My House opp. Mr. Epenetus Olney's Tauern off ye Towne Street, Ist on
ye N. side of Olney's Court. Distance from Boston Stone abt. XLIIV Miles.

Sir, I am ye olde and true Friend and Serut. in Almonsin-Metraton.

Josephus C.

To Mr. Simon Orne,
William's-Lane, in Salem.
This letter, oddly enough, was what first gave Ward the exact location of Curwen's Providence home; for none of the records encountered up to that time had been at all specific. The discovery was doubly striking because it indicated as the newer Curwen house, built in 1761 on the site of the old, a dilapidated building still standing in Olney Court and well known to Ward in his antiquarian rambles over Stampers' Hill. The place was indeed only a few squares from his own home on the great hill's higher ground, and was now the abode of a negro family much esteemed for occasional washing, housecleaning, and furnace-tending services. To find, in distant Salem, such sudden proof of the significance of this familiar rookery in his own family history, was a highly impressive thing to Ward; and he resolved to explore the place immediately upon his return. The more mystical phases of the letter, which he took to be some extravagant kind of symbolism, frankly baffled him; though he noted with a thrill of curiosity that the Biblical passage referred to - Job 14,14 - was the familiar verse, 'If a man die, shall he live again? All the days of my appointed time will I wait, until my change come.'

Young Ward came home in a state of pleasant excitement, and spent the following Saturday in a long and exhaustive study of the house in Olney Court. The place, now crumbling with age, had never been a mansion; but was a modest two-and-a-half story wooden town house of the familiar Providence colonial type, with plain peaked roof, large central chimney, and artistically carved doorway with rayed fanlight, triangular pediment, and trim Doric pilasters. It had suffered but little alteration externally, and Ward felt he was gazing on something very close to the sinister matters of his quest. The present negro inhabitants were known to him, and he was very courteously shewn about the interior by old Asa and his stout wife Hannah. Here there was more change than the outside indicated, and Ward saw with regret that fully half of the fine scroll-and-urn overmantels and shell-carved cupboard linings were gone, whilst most of the fine wainscoting and bolection moulding was marked, hacked, and gouged, or covered up altogether with cheap wall-paper. In general, the survey did not yield as much as Ward had somehow expected; but it was at least exciting to stand within the ancestral walls which had housed such a man of horror as Joseph Curwen. He saw with a thrill that a monogram had been very carefully effaced from the ancient brass knocker.

From then until after the close of school Ward spent his time on the photostatic copy of the Hutchinson cipher and the accumulation of local Curwen data. The former still proved unyielding; but of the latter he obtained so much, and so many clues to similar data elsewhere, that he was ready by July to make a trip to New London and New York to consult old letters whose presence in those places was indicated. This trip was very fruitful, for it brought him the Fenner letters with their terrible description of the Pawtuxet farmhouse raid, and the Nightingale-Talbot letters in which he learned of the portrait painted on a panel of the Curwen library. This matter of the portrait interested him particularly, since he would have given much to know just what Joseph Curwen looked like; and he decided to make a second search of the house in Olney Court to see if there might not be some trace of the ancient features beneath peeling coats of later paint or layers of mouldy wall-paper.
Early in August that search took place, and Ward went carefully over the walls of every room sizeable enough to have been by any possibility the library of the evil builder. He paid especial attention to the large panels of such overmantels as still remained; and was keenly excited after about an hour, when on a broad area above the fireplace in a spacious ground-floor room he became certain that the surface brought out by the peeling of several coats of paint was sensibly darker than any ordinary interior paint or the wood beneath it was likely to have been. A few more careful tests with a thin knife, and he knew that he had come upon an oil portrait of great extent. With truly scholarly restraint the youth did not risk the damage which an immediate attempt to uncover the hidden picture with the knife might have been, but just retired from the scene of his discovery to enlist expert help. In three days he returned with an artist of long experience, Mr. Walter C. Dwight, whose studio is near the foot of College Hill; and that accomplished restorer of paintings set to work at once with proper methods and chemical substances. Old Asa and his wife were duly excited over their strange visitors, and were properly reimbursed for this invasion of their domestic hearth.

As day by the day the work of restoration progressed, Charles Ward looked on with growing interest at the lines and shades gradually unveiled after their long oblivion. Dwight had begun at the bottom; hence since the picture was a three-quarter-length one, the face did not come out for some time. It was meanwhile seen that the subject was a spare, well-shaped man with dark-blue coat, embroidered waistcoat, black satin small-clothes, and white silk stockings, seated in a carved chair against the background of a window with wharves and ships beyond. When the head came out it was observed to bear a neat Albemarle wig, and to possess a thin, calm, undistinguished face which seemed somehow familiar to both Ward and the artist. Only at the very last, though, did the restorer and his client begin to grasp with astonishment at the details of that lean, pallid visage, and to recognise with a touch of awe the dramatic trick which heredity had played. For it took the final bath of oil and the final stroke of the delicate scraper to bring out fully the expression which centuries had hidden; and to confront the bewildered Charles Dexter Ward, dweller in the past, with his own living features in the countenance of his horrible great-great-great-grandfather.

Ward brought his parents to see the marvel he had uncovered, and his father at once determined to purchase the picture despite its execution on stationary panelling. The resemblance to the boy, despite an appearance of rather great age, was marvellous; and it could be seen that through some trick of atavism the physical contours of Joseph Curwen had found precise duplication after a century and a half. Mrs. Ward's resemblance to her ancestor was not at all marked, though she could recall relatives who had some of the facial characteristics shared by her son and by the bygone Curwen. She did not relish the discovery, and told her husband that he had better burn the picture instead of bringing it home. There was, she averred, something unwholesome about it; not only intrinsically, but in its very resemblance to Charles. Mr. Ward, however, was a practical man of power and affairs - a cotton manufacturer with extensive mills at Riverpoint in the Pawtuxet Valley - and not one to listen to feminine scruples. The picture impressed him mightily with its likeness to his son, and he believed the boy deserved it as a present. In this opinion, it is needless to say, Charles most heartily concurred; and a few days later Mr. Ward located the owner of the house - a small rodentfeatured person with a guttural
accent - and obtained the whole mantel and overmantel bearing the picture at a curtly fixed price which cut short the impending torrent of unctuous haggling.

It now remained to take off the panelling and remove it to the Ward home, where provisions were made for its thorough restoration and installation with an electric mock-fireplace in Charles's third-floor study or library. To Charles was left the task of superintending this removal, and on the twenty-eighth of August he accompanied two expert workmen from the Crooker decorating firm to the house in Olney Court, where the mantel and portrait-bearing overmantel were detached with great care and precision for transportation in the company's motor truck. There was left a space of exposed brickwork marking the chimney's course, and in this young Ward observed a cubical recess about a foot square, which must have lain directly behind the head of the portrait. Curious as to what such a space might mean or contain, the youth approached and looked within; finding beneath the deep coatings of dust and soot some loose yellowed papers, a crude, thick copybook, and a few mouldering textile shreds which may have formed the ribbon binding the rest together. Blowing away the bulk of the dirt and cinders, he took up the book and looked at the bold inscription on its cover. It was in a hand which he had learned to recognise at the Essex Institute, and proclaimed the volume as the 'Journall and Notes of Jos: Curwen, Gent. of Providence-Plantations, Late of Salem.'

Excited beyond measure by his discovery, Ward shewed the book to the two curious workmen beside him. Their testimony is absolute as to the nature and genuineness of the finding, and Dr. Willett relies on them to help establish his theory that the youth was not mad when he began his major eccentricities. All the other papers were likewise in Curwen's handwriting, and one of them seemed especially portentous because of its inscription: 'To Him Who Shal Come After, & How He May Gett Beyonde Time & Ye Spheres.'

Another was in a cipher; the same, Ward hoped, as the Hutchinson cipher which had hitherto baffled him. A third, and here the searcher rejoiced, seemed to be a key to the cipher; whilst the fourth and fifth were addressed respectively to:'Edw: Hutchinson, Armiger' and Jedediah Orne, esq., 'or Their Heir or Heirs, or Those Represent'g Them.' The sixth and last was inscribed: 'Joseph Curwen his Life and Travells Bet'n ye yeares 1678 and 1687: Of Whither He Voyag'd, Where He Stay'd, Whom He Sawe, and What He Learnt.'

We have now reached the point from which the more academic school of alienists date Charles Ward's madness. Upon his discovery the youth had looked immediately at a few of the inner pages of the book and manuscripts, and had evidently seen something which impressed him tremendously. Indeed, in shewing the titles to the workmen, he appeared to guard the text itself with peculiar care, and to labour under a perturbation for which even the antiquarian and genealogical significance of the find could hardly account. Upon returning home he broke the news with an almost embarrassed air, as if he wished to convey an idea of its supreme importance without having to exhibit the evidence itself. He did not even shew the titles to his parents, but simply told them that he had found some documents in Joseph Curwen's handwriting, 'mostly in cipher', which would have to
be studied very carefully before yielding up their true meaning. It is unlikely that he
would have shewn what he did to the workmen, had it not been for their unconcealed
curiosity. As it was he doubtless wished to avoid any display of peculiar reticence which
would increase their discussion of the matter.

That night Charles Ward sat up in his room reading the new-found book and papers, and
when day came he did not desist. His meals, on his urgent request when his mother called
to see what was amiss, were sent up to him; and in the afternoon he appeared only briefly
when the men came to install the Curwen picture and mantelpiece in his study. The next
night he slept in snatches in his clothes, meanwhile wrestling feverishly with the
unravelling of the cipher manuscript. In the morning his mother saw that he was at work
on the photostatic copy of the Hutchinson cipher, which he had frequently shewn her
before; but in response to her query he said that the Curwen key could not be applied to
it. That afternoon he abandoned his work and watched the men fascinatedly as they
finished their installation of the picture with its woodwork above a cleverly realistic
electric log, setting the mock-fireplace and overmantel a little out from the north wall as
if a chimney existed, and boxing in the sides with panelling to match the room's. The
front panel holding the picture was sawn and hinged to allow cupboard space behind it.
After the workmen went he moved his work into the study and sat down before it with his
eyes half on the cipher and half on the portrait which stared back at him like a year-
adding and century-recalling mirror.

His parents, subsequently recalling his conduct at this period, give interesting details
anent the policy of concealment which he practised. Before servants he seldom hid any
paper which he might by studying, since he rightly assumed that Curwen's intricate and
archaic chirography would be too much for them. With his parents, however, he was
more circumspect; and unless the manuscript in question were a cipher, or a mere mass of
cryptic symbols and unknown ideographs (as that entitled 'To Him Who Shal Come After,
etc.' seemed to be), he would cover it with some convenient paper until his caller had
departed. At night he kept the papers under lock and key in an antique cabinet of his,
where he also placed them whenever he left the room. He soon resumed fairly regular
hours and habits, except that his long walks and other outside interests seemed to cease.
The opening of school, where he now began his senior year, seemed a great bore to him;
and he frequently asserted his determination never to bother with college. He had, he
said, important special investigations to make, which would provide him with more
avenues toward knowledge and the humanities than any university which the world could
boast.

Naturally, only one who had always been more or less studious, eccentric, and solitary
could have pursued this course for many days without attracting notice. Ward, however,
was constitutionally a scholar and a hermit; hence his parents were less surprised than
regretful at the close confinement and secrecy he adopted. At the same time, both his
father and mother thought it odd that he would shew them no scrap of his treasure-trove,
nor give any connected account of such data as he had deciphered. This reticence he
explained away as due to a wish to wait until he might announce some connected
revelation, but as the weeks passed without further disclosures there began to grow up
between the youth and his family a kind of constraint; intensified in his mother's case by her manifest disapproval of all Curwen delvings.

During October Ward began visiting the libraries again, but no longer for the antiquarian matter of his former days. Witchcraft and magic, occultism and daemonology, were what he sought now; and when Providence sources proved unfruitful he would take the train for Boston and tap the wealth of the great library in Copley Square, the Widener Library at Harvard, or the Zion Research Library in Brookline, where certain rare works on Biblical subjects are available. He bought extensively, and fitted up a whole additional set of shelves in his study for newly acquired works on uncanny subjects; while during the Christmas holidays he made a round of out-of-town trips including one to Salem to consult certain records at the Essex Institute.

About the middle of January, 1920, there entered Ward's bearing an element of triumph which he did not explain, and he was no more found at work upon the Hutchinson cipher. Instead, he inaugurated a dual policy of chemical research and record-scanning; fitting up for the one a laboratory in the unused attic of the house, and for the latter haunting all the sources of vital statistics in Providence. Local dealers in drugs and scientific supplies, later questioned, gave astonishingly queer and meaningless catalogues of the substances and instruments he purchased; but clerks at the State House, the City Hall, and the various libraries agree as to the definite object of his second interest. He was searching intensely and feverishly for the grave of Joseph Curwen, from whose slate slab an older generation had so wisely blotted the name.

Little by little there grew upon the Ward family the conviction that something was wrong. Charles had had freaks and changes of minor interests before, but this growing secrecy and absorption in strange pursuits was unlike even him. His school work was the merest pretence; and although he failed in no test, it could be seen that the older application had all vanished. He had other concernments now; and when not in his new laboratory with a score of obsolete alchemical books, could be found either poring over old burial records down town or glued to his volumes of occult lore in his study, where the startlingly - one almost fancied increasingly - similar features of Joseph Curwen stared blandly at him from the great overmantel on the North wall.

Late in March Ward added to his archive-searching a ghoulish series of rambles about the various ancient cemeteries of the city. The cause appeared later, when it was learned from City Hall clerks that he had probably found an important clue. His quest had suddenly shifted from the grave of Joseph Curwen to that of one Naphthali Field; and this shift was explained when, upon going over the files that he had been over, the investigators actually found a fragmentary record of Curwen's burial which had escaped the general obliteration, and which stated that the curious leaden coffin had been interred '10 ft. S. and 5 ft. W. of Naphthali Field's grave in y-.' The lack of a specified burying-ground in the surviving entry greatly complicated the search, and Naphthali Field's grave seemed as elusive as that of Curwen; but here no systematic effacement had existed, and one might reasonably be expected to stumble on the stone itself even if its record had perished. Hence the rambles - from which St. John's (the former King's) Churchyard and the ancient Congregational burying-ground in the midst of Swan Point Cemetery were
excluded, since other statistics had shewn that the only Naphthali Field (obii 1729) whose grave could have been meant had been a Baptist.

It was toward May when Dr. Willett, at the request of the senior Ward, and fortified with all the Curwen data which the family had gleaned from Charles in his non-secretive days, talked with the young man. The interview was of little value or conclusiveness, for Willett felt at every moment that Charles was thorough master of himself and in touch with matters of real importance; but it at least force the secretive youth to offer some rational explanation of his recent demeanour. Of a pallid, impassive type not easily shewing embarrassment, Ward seemed quite ready to discuss his pursuits, though not to reveal their object. He stated that the papers of his ancestor had contained some remarkable secrets of early scientific knowledge, for the most part in cipher, of an apparent scope comparable only to the discoveries of Friar Bacon and perhaps surpassing even those. They were, however, meaningless except when correlated with a body of learning now wholly obsolete; so that their immediate presentation to a world equipped only with modern science would rob them of all impressiveness and dramatic significance. To take their vivid place in the history of human thought they must first be correlated by one familiar with the background out of which they evolved, and to this task of correlation Ward was now devoting himself. He was seeking to acquire as fast as possible those neglected arts of old which a true interpreter of the Curwen data must possess, and hoped in time to made a full announcement and presentation of the utmost interest to mankind and to the world of thought. Not even Einstein, he declared, could more profoundly revolutionise the current conception of things.

As to his graveyard search, whose object he freely admitted, but the details of whose progress he did not relate, he said he had reason to think that Joseph Curwen's mutilated headstone bore certain mystic symbols - carved from directions in his will and ignorantly spared by those who had effaced the name - which were absolutely essential to the final solution of his cryptic system. Curwen, he believed, had wish to guard his secret with care; and had consequently distributed the data in an exceedingly curious fashion. When Dr. Willett asked to see the mystic documents, Ward displayed much reluctance and tried to put him off with such things as photostatic copies of the Hutchinson cipher and Orne formulae and diagrams; but finally shewed him the exteriors of some of the real Curwen finds - the 'Journall and Notes', the cipher (title in cipher also), and the formula-filled message 'To Him Who Shal Come After' - and let him glance inside such as were in obscure characters.

He also opened the diary at a page carefully selected for its innocuousness and gave Willett a glimpse of Curwen's connected handwriting in English. The doctor noted very closely the crabbed and complicated letters, and the general aura of the seventeenth century which clung round both penmanship and style despite the writer's survival into the eighteenth century, and became quickly certain that the document was genuine. The text itself was relatively trivial, and Willett recalled only a fragment:

'Wedn. 16 Octr. 1754. My Sloope the Wakeful this Day putt in from London with XX newe Men pick'd up in ye Indies, Spaniards from
Martineco and 2 Dutch Men from Surinam. Ye Dutch Men are like to Desert from have'g hearde Somewhat ill of these Ventures, but I will see to ye Inducing of them to Staye. For Mr. Knight Dexter of ye Bay and Book 120 Pieces Camblets, 100 Pieces Assrtd. Cambleteens, 20 Pieces blue Duffles, 100 Pieces Shalloons, 50 Pieces Calamancoes, 300 Pieces each, Shendsoy and Humhums. For Mr. Green at ye Elephant 50 Gallon Cyttles, 20 Warm'g Pannes, 15 Bake Cyttles, 10 pr. Smoke'g Tonges. For Mr. Perrigo 1 Sett of Awles. For Mr. Nightingale 50 Reames prime Foolscape. Say'd ye SABAOTH thrice last Nighte but None appear'd. I must heare more from Mr. H. in Transylvania, tho' it is Harde reach'g him and exceeding strange he can not give me the Use of What he hath so well us'd these hundred Yeares. Simon hath not writ these V. Weekes, but I expecte soon hear'g from Him.'

When upon reaching this point Dr. Willett turned the leaf he was quickly checked by Ward, who almost snatched the book from his grasp. All that the doctor had a chance to see on the newly opened page was a brief pair of sentences; but these, strangely enough, lingered tenacious in his memory. They ran: 'Ye Verse from Liber-Damnatus be'g spoke V Roodmasses and IV Hallows-Eves, I am Hopeful ye Thing is breed'g Outside ye Spheres. It will drawe One who is to Come, if I can make sure he shal Bee, and he shal think on Past Thinges and look back thro' all ye Yeares, against ye Which I must have ready ye Saltes or That to make 'em with.'

Willett saw no more, but somehow this small glimpse gave a new and vague terror to the painted features of Joseph Curwen which stared blandly down from the overmantel. Even after that he entertained the odd fancy - which his medical skill of course assured him was only a fancy - that the eyes of the portrait had a sort of wish, if not an actual tendency, to follow young Charles Ward as he move about the room. He stopped before leaving to study the picture closely, marvelling at its resemblance to Charles and memorising every minute detail of the cryptical, colourless face, even down to a slight scar or pit in the smooth brow above the right eye. Cosmo Alexander, he decided, was a painter worthy of the Scotland that produced Raeburn, and a teacher worthy of his illustrious pupil Gilbert Stuart.

Assured by the doctor that Charles's mental health was in no danger, but that on the other hand he was engaged in researches which might prove of real importance, the Wards were more lenient than they might otherwise have been when during the following June the youth made positive his refusal to attend college. He had, he declared, studies of much more vital importance to pursue; and intimated a wish to go abroad the following year in order to avail himself of certain sources of data not existing in America. The senior Ward, while denying this latter wish as absurd for a boy of only eighteen, acquiesced regarding the university; so that after a none too brilliant graduation from the Moses Brown School there ensued for Charles a three-year period of intensive occult study and graveyard searching. He became recognised as an eccentric, and dropped even more completely from the sight of his family's friends than he had been before; keeping close to his work and only occasionally making trips to other cities to consult obscure records. Once he went south to talk to a strange mulatto who dwelt in a swamp and about
whom a newspaper hand printed a curious article. Again he sought a small village in the Adirondacks whence reports of certain odd ceremonial practices had come. But still his parents forbade him the trip to the Old World which he desired.

Coming of age in April, 1923, and having previously inherited a small competence from his maternal grandfather, Ward determined at last to take the European trip hitherto denied him. Of his proposed itinerary he would say nothing save that the needs of his studies would carry him to many places, but he promised to write his parents fully and faithfully. When they saw he could not be dissuaded, they ceased all opposition and helped as best they could; so that in June the young man sailed for Liverpool with the farewell blessings of his father and mother, who accompanied him to Boston and waved him out of sight from the White Star pier in Charlestown. Letters soon told of his safe arrival, and of his securing good quarters in Great Russell Street, London; where he proposed to stay, shunning all family friends, till he had exhausted the resources of the British Museum in a certain direction. Of his daily life he wrote by little, for there was little to write. Study and experiment consumed all his time, and he mentioned a laboratory which he had established in one of his rooms. That he said nothing of antiquarian rambles in the glamorous old city with its luring skyline of ancient domes and steeples and its tangles of roads and alleys whose mystic convolutions and sudden vistas alternately beckon and surprise, was taken by his parents as a good index of the degree to which his new interests had engrossed his mind.

In June, 1924, a brief note told of his departure for Paris, to which he had before made one or two flying trips for material in the Bibliothèque Nationale. For three months thereafter he sent only postal cards, giving an address in the Rue St. Jacques and referring to a special search among rare manuscripts in the library of an unnamed private collector. He avoided acquaintances, and no tourists brought back reports of having seen him. Then came a silence, and in October the Wards received a picture card from Prague, Czecho-Slovakia, stating that Charles was in that ancient town for the purpose of conferring with a certain very aged man supposed to be the last living possessor of some very curious mediaeval information. He gave an address in the Neustadt, and announced no move till the following January; when he dropped several cards from Vienna telling of his passage through that city on the way toward a more easterly region whither one of his correspondents and fellow-delvers into the occult had invited him.

The next card was from Klausenburg in Transylvania, and told of Ward's progress toward his destination. He was going to visit a Baron Ferenczy, whose estate lay in the mountains east of Rakus; and was to be addressed at Rakus in the care of that nobleman. Another card from Rakus a week later, saying that his host's carriage had met him and that he was leaving the village for the mountains, was his last message for a considerable time; indeed, he did reply to his parents' frequent letters until May, when he wrote to discourage the plan of his mother for a meeting in London, Paris, or Rome during the summer, when the elder Wards were planning to travel to Europe. His researches, he said, were such that he could not leave his present quarters; while the situation of Baron Ferenczy's castle did not favour visits. It was on a crag in the dark wooded mountains, and the region was so shunned by the country folk that normal people could not help feeling ill at ease. Moreover, the Baron was not a person likely to appeal to correct and
conservative New England gentlefolk. His aspect and manners had idiosyncrasies, and his age was so great as to be disquieting. It would be better, Charles said, if his parents would wait for his return to Providence; which could scarcely be far distant.

That return did not, however, take place until May 1926, when after a few heralding cards the young wanderer quietly slipped into New York on the *Homer*ic and traversed the long miles to Providence by motor-coach, eagerly drinking in the green rolling hills, and fragrant, blossoming orchards, and the white steepled towns of vernal Connecticut; his first taste of ancient New England in nearly four years. When the coach crossed the Pawcatuck and entered Rhode Island amidst the faery goldenness of a late spring afternoon his heart beat with quickened force, and the entry to Providence along Reservoir and Elmwood Avenues was a breathless and wonderful thing despite the depths of forbidden lore to which he had delved. At the high square where Broad, Weybosset, and Empire Streets join, he saw before and below him in the fire of sunset the pleasant, remembered houses and domes and steeples of the old town; and his head swam curiously as the vehicle rolled down to the terminal behind the Biltmore, bringing into view the great dome and soft, roof-pierced greenery of the ancient hill across the river, and the tall colonial spire of the First Baptist Church limned pink in the magic evening against the fresh springtime verdure of its precipitous background.

Old Providence! It was this place and the mysterious forces of its long, continuous history which had brought him into being, and which had drawn him back toward marvels and secrets whose boundaries no prophet might fix. Here lay the arcana, wondrous or dreadful as the case may be, for which all his years of travel and application had been preparing him. A taxicab whirled him through Post Office Square with its glimpse of the river, the old Market House, and the head of the bay, and up the steep curved slope of Waterman Street to Prospect, where the vast gleaming dome and sunset-flushed Ionic columns of the Christian Science Church beckoned northward. Then eight squares past the fine old estates his childish eyes had known, and the quaint brick sidewalks so often trodden by his youthful feet. And at last the little white overtaken farmhouse on the right, on the left the classic Adam porch and stately facade of the great brick house where he was born. It was twilight, and Charles Dexter Ward had come home.

A school of alienists slightly less academic than Dr. Lyman's assign to Ward's European trip the beginning of his true madness. Admitting that he was sane when he started, they believe that his conduct upon returning implies a disastrous change. But even to this claim Dr. Willett refuses to concede. There was, he insists, something later; and the queerness of the youth at this stage he attributes to the practice of rituals learned abroad - odd enough things, to be sure, but by no means implying mental aberration on the part of their celebrant. Ward himself, though visibly aged and hardened, was still normal in his general reactions; and in several talks with Dr. Willett displayed a balance which no madman - even an incipient one - could feign continuously for long. What elicited the notion of insanity at this period were the *sounds* heard at all hours from Ward's attic laboratory, in which he kept himself most of the time. There were chantings and repetitions, and thunderous declamations in uncanny rhythms; and although these sounds
were always in Ward's own voice, there was something in the quality of that voice, and in the accents of the formulae it pronounced, which could not by chill the blood of every hearer. It was noticed that Nig, the venerable and beloved black cat of the household, bristled and arched his back perceptibly when certain of the tones were heard.

The odours occasionally wafted from the laboratory were likewise exceedingly strange. Sometimes they were very noxious, but more often they were aromatic, with a haunting, elusive quality which seemed to have the power of inducing fantastic images. People who smelled them had a tendency to glimpse momentary mirages of enormous vistas, with strange hills or endless avenues of sphinxes and hippocliffs stretching off into infinite distance. Ward did not resume his old-time rambles, but applied himself diligently to the strange books he had brought home, and to equally strange delvings within his quarters; explaining that European sources had greatly enlarged the possibilities of his work, and promising great revelations in the years to come. His older aspect increased to a startling degree his resemblance to the Curwen portrait in his library; and Dr. Willett would often pause by the latter after a call, marveling at the virtual identity, and reflecting that only the small pit above the picture's right eye now remained to differentiate the long-dead wizard from the living youth. These calls of Willett's, undertaken at the request of the senior Wards, were curious affairs. Ward at no time repulsed the doctor, but the latter saw that he could never reach the young man's inner psychology. Frequently he noted peculiar things about; little wax images of grotesque design on the shelves or tables, and the half-erased remnants of circles, triangles, and pentagrams in chalk or charcoal on the cleared central space of the large room. And always in the night those rhythms and incantations thundered, till it became very difficult to keep servants or suppress furtive talk of Charles's madness.

In January, 1927, a peculiar incident occurred. One night about midnight, as Charles was chanting a ritual whose weird cadence echoed unpleasantly through the house below, there came a sudden gust of chill wind from the bay, and a faint, obscure trembling of the earth which everyone in the neighbourhood noted. At the same time the cat exhibited phenomenal traces of fright, while dogs bayed for as much as a mile around. This was the prelude to a sharp thunderstorm, anomalous for the season, which brought with it such a crash that Mr. and Mrs. Ward believed the house had been struck. They rushed upstairs to see what damage had been done, but Charles met them at the door to the attic; pale, resolute, and portentous, with an almost fearsome combination of triumph and seriousness on his face. He assured them that the house had not really been struck, and that the storm would soon be over. They paused, and looking through a window saw that he was indeed right; for the lightning flashed farther and farther off, whilst the trees ceased to bend in the strange frigid gust from the water. The thunder sank to a sort of dull mumbling chuckle and finally died away. Stars came out, and the stamp of triumph on Charles Ward's face crystallised into a very singular expression.

For two months or more after this incident Ward was less confined than usual to his laboratory. He exhibited a curious interest in the weather, and made odd inquiries about the date of the spring thawing of the ground. One night late in March he left the house after midnight, and did not return till almost morning; when his mother, being wakeful, heard a rumbling motor draw up to the carriage entrance. Muffled oaths could be
distinguished, and Mrs. Ward, rising and going to the window, saw four dark figures removing a long, heavy box from a truck at Charles's direction and carrying it within by the side door. She heard laboured breathing and ponderous footfalls on the stairs, and finally a dull thumping in the attic; after which the footfalls descended again, and the four reappeared outside and drove off in their truck.

The next day Charles resumed his strict attic seclusion, drawing down the dark shades of his laboratory windows and appearing to be working on some metal substance. He would open the door to no one, and steadfastly refused all proffered food. About noon a wrenching sound followed by a terrible cry and a fall were heard, but when Mrs. Ward rapped at the door her son at length answered faintly, and told her that nothing had gone amiss. The hideous and indescribable stench now welling out was absolutely harmless and unfortunately necessary. Solitude was the one prime essential, and he would appear later for dinner. That afternoon, after the conclusion of some odd hissing sounds which came from behind the locked portal, he did finally appear; wearing an extremely haggard aspect and forbidding anyone to enter the laboratory upon any pretext. This, indeed, proved the beginning of a new policy of secrecy; for never afterward was any other person permitted to visit either the mysterious garret workroom or the adjacent storeroom which he cleaned out, furnished roughly, and added to his inviolable private domain as a sleeping apartment. Here he lived, with books brought up from his library beneath, till the time he purchased the Pawtuxet bungalow and moved to it all his scientific effects.

In the evening Charles secured the paper before the rest of the family and damaged part of it through an apparent accident. Later on Dr. Willett, having fixed the date from statements by various members of the household, looked up an intact copy at the Journal office and found that in the destroyed section the following small item had occurred:

Nocturnal Diggers Surprised in North Burial Ground

Robert Hart, night watchman at the North Burial Ground, this morning discovered a party of several men with a motor truck in the oldest part of the cemetery, but apparently frightened them off before they had accomplished whatever their object may have been.

The discovery took place at about four o'clock, when Hart's attention was attracted by the sound of a motor outside his shelter. Investigating, he saw a large truck on the main drive several rods away; but could not reach it before the noise of his feet on the gravel had revealed his approach. The men hastily placed a large box in the truck and drove away toward the street before they could be overtaken; and since no known grave was disturbed, Hart believes that this box was an object which they wished to bury.

The diggers must have been at work for a long while before detection, for Hart found an enormous hold dug at a considerable distance back from the roadway in the lot of Amasa Field, where most of the old stones have long ago disappeared. The hole, a place as large and deep as a grave, was
empty; and did not coincide with any interment mentioned in the cemetery records.

Sergt. Riley of the Second Station viewed the spot and gave the opinion that the hole was dug by bootleggers rather gruesomely and ingeniously seeking a safe cache for liquor in a place not likely to be disturbed. In reply to questions Hart said he though the escaping truck had headed up Rochambeau Avenue, though he could not be sure.

During the next few days Charles Ward was seldom seen by his family. Having added sleeping quarters to his attic realm, he kept closely to himself there, ordering food brought to the door and not taking it in until after the servant had gone away. The droning of monotonous formulae and the chanting of bizarre rhythms recurred at intervals, while at other times occasional listeners could detect the sound of tinkling glass, hissing chemicals, running water, or roaring gas flames. Odours of the most unplaceable quality, wholly unlike any before noted, hung at times around the door; and the air of tension observable in the young recluse whenever he did venture briefly forth was such as to excite the keenest speculation. Once he made a hasty trip to the Athenaeum for a book he required, and again he hired a messenger to fetch him a highly obscure volume from Boston. Suspense was written portentously over the whole situation, and both the family and Dr. Willett confessed themselves wholly at a loss what to do or think about it.

Then on the fifteenth of April a strange development occurred. While nothing appeared to grow different in kind, there was certainly a very terrible difference in degree; and Dr. Willett somehow attaches great significance to the change. The day was Good Friday, a circumstance of which the servants made much, but which others quite naturally dismiss as an irrelevant coincidence. Late in the afternoon young Ward began repeating a certain formula in a singularly loud voice, at the same time burning some substance so pungent that its fumes escaped over the entire house. The formula was so plainly audible in the hall outside the locked door that Mrs. Ward could not help memorising it as she waited and listened anxiously, and later on she was able to write it down at Dr. Willett's request. It ran as follows, and experts have told Dr. Willett that its very close analogue can be found in the mystic writings of "Eliphas Levi", that cryptic soul who crept through a crack in the forbidden door and glimpsed the frightful vistas of the void beyond:

'Per Adonai Eloim, Adonai Jehovah, Adonai Sabaoth, Metraton On Agla Mathon, verbum pythonicum, mysterium salamandrae, conventus sylvorum, antra gnomorum, daemonia Coeli God, Almonsin, Gibor, Jehosua, Evam, Zariatnatmik, veni, veni, veni.'

This had been going on for two hours without change or intermission when over all the neighbourhood a pandaemoniac howling of dogs set in. The extent of this howling can be judged from the space it received in the papers the next day, but to those in the Ward household it was overshadowed by the odour which instantly followed it; a hideous, all-
pervasive odour which none of them had ever smelt before or have ever smelt since. In the
midst of this mephitic flood there came a very perceptible flash like that of lightning,
which would have been blinding and impressive but for the daylight around; and then
was heard the voice that no listener can ever forget because of its thunderous remoteness,
its incredible depth, and its eldritch dissimilarity to Charles Ward's voice. It shook the
house, and was clearly heard by at least two neighbours above the howling of the dogs.
Mrs. Ward, who had been listening in despair outside her son's locked laboratory,
shivered as she recognised its hellish imports; for Charles had told of its evil fame in dark
books, and of the manner in which it had thundered, according to the Fenner letter, above
the doomed Pawtuxet farmhouse on the night of Joseph Curwen's annihilation. There was
no mistaking that nightmare phrase, for Charles had described it too vividly in the old
days when he had talked frankly of his Curwen investigations. And yet it was only this
fragment of an archaic and forgotten language: 'DIES MIES JESCHET BOENE
DOESEF DOUVEMA ENITEMAUS.'

Close upon this thundering there came a momentary darkening of the daylight, though
sunset was still an hour distant, and then a puff of added odour different from the first but
equally unknown and intolerable. Charles was chanting again now and his mother could
hear syllables that sounded like 'Yi nash Yog Sothoth he lgeb throdag' - ending in a 'Yah!'
whose maniacal force mounted in an ear-splitting crescendo. A second later all previous
memories were effaced by the wailing scream which burst out with frantic explosiveness
and gradually changed form to a paroxysm of diabolic and hysterical laughter. Mrs.
Ward, with the mingled fear and blind courage of maternity, advanced and knocked
affrightedly at the concealing panels, but obtained no sign of recognition. She knocked
again, but paused nervelessly as a second shriek arose, this one unmistakably in the
familiar voice of her son, and sounding concurrently with the still bursting cachinnations
of that other voice. Presently she fainted, although she is still unable to recall the precise
and immediate cause. Memory sometimes makes merciful deletions.

Mr. Ward returned from the business section at about quarter past six; and not finding his
wife downstairs, was told by the frightened servants that she was probably watching at
Charles's door, from which the sounds had been far stranger than ever before. Mounting
the stairs at once, he saw Mrs. Ward stretched out at full length on the floor of the
corridor outside the laboratory; and realising that she had fainted, hastened to fetch a
glass of water from a set bowl in a neighbouring alcove. Dashing the cold fluid in her
face, he was heartened to observe an immediate response on her part, and was watching
the bewildered opening of her eyes when a chill shot through him and threatened to
reduce him to the very state from which she was emerging. For the seemingly silent
laboratory was not as silent as it had appeared to be, but held the murmurs of a tense,
muffled conversation in tones too low for comprehension, yet of a quality profoundly
disturbing to the soul.

It was not, of course, new for Charles to mutter formulae; but this muttering was
definitely different. It was so palpably a dialogue, or imitation of a dialogue, with the
regular alteration of inflections suggesting question and answer, statement and response.
One voice was undisguisedly that of Charles, but the other had a depth and hollowness
which the youth's best powers of ceremonial mimicry had scarcely approached before.
There was something hideous, blasphemous, and abnormal about it, and but for a cry from his recovering wife which cleared his mind by arousing his protective instincts it is not likely that Theodore Howland Ward could have maintained for nearly a year more his old boast that he had never fainted. As it was, he seized his wife in his arms and bore her quickly downstairs before she could notice the voices which had so horribly disturbed him. Even so, however, he was not quick enough to escape catching something himself which caused him to stagger dangerously with his burden. For Mrs. Ward's cry had evidently been heard by others than he, and there had come in response to it from behind the locked door the first distinguishable words which that masked and terrible colloquy had yielded. They were merely an excited caution in Charles's own voice, but somehow their implications held a nameless fright for the father who overheard them. The phrase was just this: 'Sshh!-write!'

Mr. and Mrs. Ward conferred at some length after dinner, and the former resolved to have a firm and serious talk with Charles that very night. No matter how important the object, such conduct could no longer be permitted; for these latest developments transcended every limit of sanity and formed a menace to the order and nervous well-being of the entire household. The youth must indeed have taken complete leave of his senses, since only downright madness could have prompted the wild screams and imaginary conversations in assumed voices which the present day had brought forth. All this must be stopped, or Mrs. Ward would be made ill and the keeping of servants become an impossibility.

Mr. Ward rose at the close of the meal and started upstairs for Charles's laboratory. On the third floor, however, he paused at the sounds which he heard proceeding from the now disused library of his son. Books were apparently being flung about and papers wildly rustled, and upon stepping to the door Mr. Ward beheld the youth within, excitedly assembling a vast armful of literary matter of every size and shape. Charles's aspect was very drawn and haggard, and he dropped his entire load with a start at the sound of his father's voice. At the elder man's command he sat down, and for some time listened to the admonitions he had so long deserved. There was no scene. At the end of the lecture he agreed that his father was right, and that his noises, mutterings, incantations, and chemical odours were indeed inexcusable nuisances. He agreed to a policy of great quiet, though insisting on a prolongation of his extreme privacy. Much of his future work, he said, was in any case purely book research; and he could obtain quarters elsewhere for any such vocal rituals as might be necessary at a later stage. For the fright and fainting of his mother he expressed the keenest contrition, and explained that the conversation later heard was part of an elaborate symbolism designed to create a certain mental atmosphere. His use of abstruse technical terms somewhat bewildered Mr. Ward, but the parting impression was one of undeniable sanity and poise despite a mysterious tension of the utmost gravity. The interview was really quite inconclusive, and as Charles picked up his armful and left the room Mr. Ward hardly knew what to make of the entire business. It was as mysterious as the death of poor old Nig, whose stiffening form had been found an hour before in the basement, with staring eyes and fear-distorted mouth.
Driven by some vague detective instinct, the bewildered parent now glanced curiously at the vacant shelves to see what his son had taken up to the attic. The youth's library was plainly and rigidly classified, so that one might tell at a glance the books or at least the kind of books which had been withdrawn. On this occasion Mr. Ward was astonished to find that nothing of the occult or the antiquarian, beyond what had been previously removed, was missing. These new withdrawals were all modern items; histories, scientific treatises, geographies, manuals of literature, philosophic works, and certain contemporary newspapers and magazines. It was a very curious shift from Charles Ward's recent run of reading, and the father paused in a growing vortex of perplexity and an engulfing sense of strangeness. The strangeness was a very poignant sensation, and almost clawed at his chest as he strove to see just what was wrong around him. Something was indeed wrong, and tangibly as well as spiritually so. Ever since he had been in this room he had known that something was amiss, and at last it dawned upon him what it was.

On the north wall rose still the ancient carved overmantel from the house in Olney Court, but to the cracked and precariously restored oils of the large Curwen portrait disaster had come. Time and unequal heating had done their work at last, and at some time since the room's last cleaning the worst had happened. Peeling clear of the wood, curling tighter and tighter, and finally crumbling into small bits with what must have been malignly silent suddenness, the portrait of Joseph Curwen had resigned forever its staring surveillance of the youth it so strangely resembled, and now lay scattered on the floor as a thin coating of fine blue-grey dust.

IV. A Mutation and a Madness

In the week following that memorable Good Friday Charles Ward was seen more often than usual, and was continually carrying books between his library and the attic laboratory. His actions were quiet and rational, but he had a furtive, hunted look which his mother did not like, and developed an incredibly ravenous appetite as gauged by his demands upon the cook. Dr. Willett had been told of those Friday noises and happenings, and on the following Tuesday had a long conversation with the youth in the library where the picture stared no more. The interview was, as always, inconclusive; but Willett is still ready to swear that the youth was sane and himself at the time. He held out promises of an early revelation, and spoke of the need of securing a laboratory elsewhere. At the loss of the portrait he grieved singularly little considering his first enthusiasm over it, but seemed to find something of positive humour in its sudden crumbling.

About the second week Charles began to be absent from the house for long periods, and one day when good old black Hannah came to help with the spring cleaning she mentioned his frequent visits to the old house in Olney Court, where he would come with a large valise and perform curious delvings in the cellar. He was always very liberal to her and to old Asa, but seemed more worried than he used to be; which grieved her very much, since she had watched him grow up from birth. Another report of his doings came from Pawtuxet, where some friends of the family saw him at a distance a surprising number of times. He seemed to haunt the resort and canoe-house of Rhodes-on-the-
Pawtuxet, and subsequent inquiries by Dr. Willett at that place brought out the fact that his purpose was always to secure access to the rather hedged-in river-bank, along which he would walk toward the north, usually not reappearing for a very long while.

Late in May came a momentary revival of ritualistic sounds in the attic laboratory which brought a stern reproof from Mr. Ward and a somewhat distracted promise of amendment from Charles. It occurred one morning, and seemed to form a resumption of the imaginary conversation noted on that turbulent Good Friday. The youth was arguing or remonstrating hotly with himself, for there suddenly burst forth a perfectly distinguishable series of clashing shouts in differentiated tones like alternate demands and denials which caused Mrs. Ward to run upstairs and listen at the door. She could hear no more than a fragment whose only plain words were 'must have it red for three months', and upon her knocking all sounds ceased at once. When Charles was later questioned by his father he said that there were certain conflicts of spheres of consciousness which only great skill could avoid, but which he would try to transfer to other realms.

About the middle of June a queer nocturnal incident occurred. In the early evening there had been some noise and thumping in the laboratory upstairs, and Mr. Ward was on the point of investigating when it suddenly quieted down. That midnight, after the family had retired, the butler was nightlocking the front door when according to his statement Charles appeared somewhat blunderingly and uncertainly at the foot of the stairs with a large suitcase and made signs that he wished egress. The youth spoke no word, but the worthy Yorkshireman caught one sight of his fevered eyes and trembled causelessly. He opened the door and young Ward went out, but in the morning he presented his resignation to Mrs. Ward. There was, he said, something unholy in the glance Charles had fixed on him. It was no way for a young gentleman to look at an honest person, and he could not possibly stay another night. Mrs. Ward allowed the man to depart, but she did not value his statement highly. To fancy Charles in a savage state that night was quite ridiculous, for as long as she had remained awake she had heard faint sounds from the laboratory above; sounds as if of sobbing and pacing, and of a sighing which told only of despair's profoundest depths. Mrs. Ward had grown used to listening for sounds in the night, for the mystery of her son was fast driving all else from her mind.

The next evening, much as on another evening nearly three months before, Charles Ward seized the newspaper very early and accidentally lost the main section. This matter was not recalled till later, when Dr. Willett began checking up loose ends and searching out missing links here and there. In the Journal office he found the section which Charles had lost, and marked two items as of possible significance. They were as follows:

More Cemetery Delving

It was this morning discovered by Robert Hart, night watchman at the North Burial Ground, that ghouls were again at work in the ancient portion of the cemetery. The grave of Ezra Weeden, who was born in 1740 and died in 1824 according to his uprooted and savagely splintered slate headstone, was found excavated and rifled, the work being evidently done with a spade stolen from an adjacent tool-shed.
Whatever the contents may have been after more than a century of burial, all was gone except a few slivers of decayed wood. There were no wheel tracks, but the police have measured a single set of footprints which they found in the vicinity, and which indicate the boots of a man of refinement.

Hart is inclined to link this incident with the digging discovered last March, when a party in a motor truck were frightened away after making a deep excavation; but Sergt. Riley of the Second Station discounts this theory and points to vital differences in the two cases. In March the digging had been in a spot where no grave was known; but this time a well-marked and cared-for grave had been rifled with every evidence of deliberate purpose, and with a conscious malignity expressed in the splintering of the slab which had been intact up to the day before.

Members of the Weeden family, notified of the happening, expressed their astonishment and regret; and were wholly unable to think of any enemy who would care to violate the grave of their ancestor. Hazard Weeden of 598 Angell Street recalls a family legend according to which Ezra Weeden was involved in some very peculiar circumstances, not dishonourable to himself, shortly before the Revolution; but of any modern feud or mystery he is frankly ignorant. Inspector Cunningham has been assigned to the case, and hopes to uncover some valuable clues in the near future.

Dogs Noisy in Pawtuxet

Residents of Pawtuxet were aroused about 3 a.m. today by a phenomenal baying of dogs which seemed to centre near the river just north of Rhodes-on-the-Pawtuxet. The volume and quality of the howling were unusually odd, according to most who heart it; and Fred Lemdin, night watchman at Rhodes, declares it was mixed with something very like the shrieks of a man in mortal terror and agony. A sharp and very brief thunderstorm, which seemed to strike somewhere near the bank of the river, put an end to the disturbance. Strange and unpleasant odours, probably from the oil tanks along the bay, are popularly linked with this incident; and may have had their share in exciting the dogs.

The aspect of Charles now became very haggard and hunted, and all agreed in retrospect that he may have wished at this period to make some statement or confession from which sheer terror withheld him. The morbid listening of his mother in the night brought out the fact that he made frequent sallies abroad under cover of darkness, and most of the more academic alienists unite at present in charging him with the revolting cases of vampirism which the press so sensationally reported about this time, but which have not yet been definitely traced to any known perpetrator. These cases, too recent and celebrated to need detailed mention, involved victims of every age and type and seemed to cluster around two distinct localities; the residential hill and the North End, near the Ward home, and the suburban districts across the Cranston line near Pawtuxet. Both late wayfarers and sleepers with open windows were attacked, and those who lived to tell the tale spoke
unanimously of a lean, lithe, leaping monster with burning eyes which fastened its teeth in the throat or upper arm and feasted ravenously.

Dr. Willett, who refuses to date the madness of Charles Ward as far back as even this, is cautious in attempting to explain these horrors. He has, he declares, certain theories of his own; and limits his positive statements to a peculiar kind of negation: 'I will not,' he says, 'state who or what I believe perpetrated these attacks and murders, but I will declare that Charles Ward was innocent of them. I have reason to be sure he was ignorant of the taste of blood, as indeed his continued anaemic decline and increasing pallor prove better than any verbal argument. Ward meddled with terrible things, but he has paid for it, and he was never a monster or a villain. As for now - I don't like to think. A change came, and I'm content to believe that the old Charles Ward died with it. His soul did, anyhow, for that mad flesh that vanished from Waite's hospital had another.'

Willett speaks with authority, for he was often at the Ward home attending Mrs. Ward, whose nerves had begun to snap under the strain. Her nocturnal listening had bred some morbid hallucinations which she confided to the doctor with hesitancy, and which he ridiculed in talking to her, although they made him ponder deeply when alone. These delusions always concerning the faint sounds which she fancied she heard in the attic laboratory and bedroom, and emphasised the occurrence of muffled sighs and sobbings at the most impossible times. Early in July Willett ordered Mrs. Ward to Atlantic City for an indefinite recuperative sojourn, and cautioned both Mr. Ward and the haggard and elusive Charles to write her only cheering letters. It is probably to this enforced and reluctant escape that she owes her life and continued sanity.

2

Not long after his mother's departure, Charles Ward began negotiating for the Pawtuxet bungalow. It was a squalid little wooden edifice with a concrete garage, perched high on the sparsely settled bank of the river slightly above Rhodes, but for some odd reason the youth would have nothing else. He gave the real-estate agencies no peace till one of them secured it for him at an exorbitant price from a somewhat reluctant owner, and as soon as it was vacant he took possession under cover of darkness, transporting in a great closed van the entire contents of his attic laboratory, including the books both weird and modern which he had borrowed from his study. He had this van loaded in the black small hours, and his father recalls only a drowsy realisation of stifled oaths and stamping feet on the night the goods were taken away. After that Charles moved back to his own old quarters on the third floor, and never haunted the attic again.

To the Pawtuxet bungalow Charles transferred all the secrecy with which he had surrounded his attic realm, save that he now appeared to have two sharers of his mysteries; a villainous-looking Portuguese half-caste from the South Main St. waterfront who acted as a servant, and a thin, scholarly stranger with dark glasses and a stubbly full beard of dyed aspect whose status was evidently that of a colleague. Neighbours vainly tried to engage these odd persons in conversation. The mulatto Gomes spoke very little English, and the bearded man, who gave his name as Dr. Allen, voluntarily followed his example. Ward himself tried to be more affable, but succeeded only in provoking curiosity with his rambling accounts of chemical research. Before long queer tales
began to circulate regarding the all-night burning of lights; and somewhat later, after this 
burning had suddenly ceased, there rose still queerer tales of disproportionate orders of 
meat from the butcher's and of the muffled shouting, declamation, rhythmic chanting, and 
screaming supposed to come from some very cellar below the place. Most distinctly the 
new and strange household was bitterly disliked by the honest bourgeoisie of the vicinity, 
and it is not remarkable that dark hints were advanced connecting the hated establishment 
with the current epidemic of vampiristic attacks and murders; especially since the radius 
of that plague seemed now confined wholly to Pawtuxet and the adjacent streets of 
Edgewood.

Ward spent most of his time at the bungalow, but slept occasionally at home and was still 
reckoned a dweller beneath his father's roof. Twice he was absent from the city on week-
long trips, whose destinations have not yet been discovered. He grew steadily paler and 
more emaciated even than before, and lacked some of his former assurance when 
repeating to Dr. Willett his old, old story of vital research and future revelations. Willett 
often waylaid him at his father's house, for the elder Ward was deeply worried and 
perplexed, and wished his son to get as much sound oversight as could be managed in the 
case of so secretive and independent an adult. The doctor still insists that the youth was 
sane even as late as this, and adduces many a conversation to prove his point.

About September the vampirism declined, but in the following January almost became 
involved in serious trouble. For some time the nocturnal arrival and departure of motor 
trucks at the Pawtuxet bungalow had been commented upon, and at this juncture an 
unforeseen hitch exposed the nature of at least one item of their contents. In a lonely spot 
near Hope Valley had occurred one of the frequent sordid waylaying of trucks by "hi-
jackers" in quest of liquor shipments, but this time the robbers had been destined to 
receive the greater shock. For the long cases they seized proved upon opening to contain 
some exceedingly gruesome things; so gruesome, in fact, that the matter could not be 
kept quiet amongst the denizens of the underworld. The thieves had hastily buried what 
they discovered, but when the State Police got wind of the matter a careful search was 
made. A recently arrived vagrant, under promise of immunity from prosecution on any 
additional charge, at last consented to guide a party of troopers to the spot; and there was 
found in that hasty cache a very hideous and shameful thing. It would not be well for the 
national - or even the international - sense of decorum if the public were ever to know 
what was uncovered by that awestruck party. There was no mistaking it, even by those 
far from studious officers; and telegrams to Washington ensued with feverish rapidity.

The cases were addressed to Charles Ward at his Pawtuxet bungalow, and State and 
Federal officials at once paid him a very forceful and serious call. They found him pallid 
and worried with his two odd companions, and received from him what seemed to be a 
valid explanation and evidence of innocence. He had needed certain anatomical 
specimens as part of a programme of research whose depth and genuineness anyone who 
had known him in the last decade could prove, and had ordered the required kind and 
number from agencies which he had thought as reasonably legitimate as such things can 
be. Of the identity of the specimens he had known absolutely nothing, and was properly 
shocked when the inspectors hinted at the monstrous effect on public sentiment and 
national dignity which a knowledge of the matter would produce. In this statement he
was firmly sustained by his bearded colleague Dr. Allen, whose oddly hollow voice carried even more conviction than his own nervous tones; so that in the end the officials took no action, but carefully set down the New York name and address which Ward gave them a basis for a search which came to nothing. It is only fair to add that the specimens were quickly and quietly restored to their proper places, and that the general public will never know of their blasphemous disturbance.

On February 9, 1928, Dr. Willett received a letter from Charles Ward which he considers of extraordinary importance, and about which he has frequently quarrelled with Dr. Lyman. Lyman believes that this note contains positive proof of a well-developed case of dementia praecox, but Willett on the other hand regards it as the last perfectly sane utterance of the hapless youth. He calls especial attention to the normal character of the penmanship; which though shewing traces of shattered nerves, is nevertheless distinctly Ward's own. The text in full is as follows:

100 Prospect St.
Providence, R.I.,
February 8, 1928.

Dear Dr. Willett:-

I feel that at last the time has come for me to make the disclosures which I have so long promised you, and for which you have pressed me so often. The patience you have shewn in waiting, and the confidence you have shewn in my mind and integrity, are things I shall never cease to appreciate.

And now that I am ready to speak, I must own with humiliation that no triumph such as I dreamed of can ever by mine. Instead of triumph I have found terror, and my talk with you will not be a boast of victory but a plea for help and advice in saving both myself and the world from a horror beyond all human conception or calculation. You recall what those Fenner letters said of the old raiding party at Pawtuxet. That must all be done again, and quickly. Upon us depends more than can be put into words - all civilisation, all natural law, perhaps even the fate of the solar system and the universe. I have brought to light a monstrous abnormality, but I did it for the sake of knowledge. Now for the sake of all life and Nature you must help me thrust it back into the dark again.

I have left that Pawtuxet place forever, and we must extirpate everything existing there, alive or dead. I shall not go there again, and you must not believe it if you ever hear that I am there. I will tell you why I say this when I see you. I have come home for good, and wish you would call on me at the very first moment that you can spare five or six hours continuously to hear what I have to say. It will take that long - and believe me when I tell you that you never had a more genuine professional duty than this. My life and reason are the very least things which hang in the balance.
I dare not tell my father, for he could not grasp the whole thing. But I have
told him of my danger, and he has four men from a detective agency
watching the house. I don't know how much good they can do, for they
have against them forces which even you could scarcely envisage or
acknowledge. So come quickly if you wish to see me alive and hear how
you may help to save the cosmos from stark hell.

Any time will do - I shall not be out of the house. Don't telephone ahead,
for there is no telling who or what may try to intercept you. And let us
pray to whatever gods there be that nothing may prevent this meeting.

In utmost gravity and desperation,

Charles Dexter Ward.

P.S. Shoot Dr. Allen on sight and dissolve his body in acid. Don't burn it.

Dr. Willett received this note about 10:30 a.m., and immediately arranged to spare the
whole late afternoon and evening for the momentous talk, letting it extend on into the
night as long as might be necessary. He planned to arrive about four o'clock, and through
all the intervening hours was so engulfed in every sort of wild speculation that most of
his tasks were very mechanically performed. Maniacal as the letter would have sounded
to a stranger, Willett had seen too much of Charles Ward's oddities to dismiss it as sheer
raving. That something very subtle, ancient, and horrible was hovering about he felt quite
sure, and the reference to Dr. Allen could almost be comprehended in view of what
Pawtuxet gossip said of Ward's enigmatical colleague. Willett had never seen the man,
but had heard much of his aspect and bearing, and could not but wonder what sort of eyes
those much-discussed dark glasses might conceal.

Promptly at four Dr. Willett presented himself at the Ward residence, but found to his
annoyance that Charles had not adhered to his determination to remain indoors. The
guards were there, but said that the young man seemed to have lost part of his timidity.
He had that morning done much apparently frightened arguing and protesting over the
telephone, one of the detectives said, replying to some unknown voice with phrases such
as 'I am very tired and must rest a while', 'I can't receive anyone for some time', 'you'll
have to excuse me', 'Please postpone decisive action till we can arrange some sort of
compromise', or 'I am very sorry, but I must take a complete vacation from everything;
I'll talk with you later.' Then, apparently gaining boldness through meditation, he had
slipped out so quietly that no one had seen him depart or knew that he had gone until he
returned about one o'clock and entered the house without a word. He had gone upstairs,
where a bit of his fear must have surged back; for he was heard to cry out in a highly
terrified fashion upon entering his library, afterward trailing off into a kind of choking
gasp. When, however, the butler had gone to inquire what the trouble was, he had
appeared at the door with a great show of boldness, and had silently gestured the man
away in a manner that terrified him unaccountably. Then he had evidently done some
rearranging of his shelves, for a great clattering and thumping and creaking ensued; after
which he had reappeared and left at once. Willett inquired whether or not any message
had been left, but was told that there was no none. The butler seemed queerly disturbed
about something in Charles's appearance and manner, and asked solicitously if there was much hope for a cure of his disordered nerves.

For almost two hours Dr. Willett waited vainly in Charles Ward's library, watching the dusty shelves with their wide gaps where books had been removed, and smiling grimly at the panelled overmantel on the north wall, whence a year before the suave features of old Joseph Curwen had looked mildly down. After a time the shadows began to gather, and the sunset cheer gave place to a vague growing terror which flew shadow-like before the night. Mr. Ward finally arrived, and shewed much surprise and anger at his son's absence after all the pains which had been taken to guard him. He had not known of Charles's appointment, and promised to notify Willett when the youth returned. In bidding the doctor goodnight he expressed his utter perplexity at his son's condition, and urged his caller to do all he could to restore the boy to normal poise. Willett was glad to escape from that library, for something frightful and unholy seemed to haunt it; as if the vanished picture had left behind a legacy of evil. He had never liked that picture; and even now, strong-nerved though he was, there lurked a quality in its vacant panel which made him feel an urgent need to get out into the pure air as soon as possible.

The next morning Willett received a message from the senior Ward, saying that Charles was still absent. Mr. Ward mentioned that Dr. Allen had telephoned him to say that Charles would remain at Pawtuxet for some time, and that he must not be disturbed. This was necessary because Allen himself was suddenly called away for an indefinite period, leaving the researches in need of Charles's constant oversight. Charles sent his best wishes, and regretted any bother his abrupt change of plans might have caused. It listening to this message Mr. Ward heard Dr. Allen's voice for the first time, and it seemed to excite some vague and elusive memory which could not be actually placed, but which was disturbing to the point of fearfulness.

Faced by these baffling and contradictory reports, Dr. Willett was frankly at a loss what to do. The frantic earnestness of Charles's note was not to be denied, yet what could one think of its writer's immediate violation of his own expressed policy? Young Ward had written that his delvings had become blasphemous and menacing, that they and his bearded colleague must be extirpated at any cost, and that he himself would never return to their final scene; yet according to latest advices he had forgotten all this and was back in the thick of the mystery. Common sense bade one leave the youth alone with his freakishness, yet some deeper instinct would not permit the impression of that frenzied letter to subside. Willett read it over again, and could not make its essence sound as empty and insane as both its bombastic verbiage and its lack of fulfilment would seem to imply. Its terror was too profound and real, and in conjunction with what the doctor already knew evoked too vivid hints of monstrosities from beyond time and space to permit of any cynical explanation. There were nameless horrors abroad; and no matter how little one might be able to get at them, one ought to stand prepared for any sort of action at any time.

For over a week Dr. Willett pondered on the dilemma which seemed thrust upon him, and became more and more inclined to pay Charles a call at the Pawtuxet bungalow. No
Willett felt that some direct conversation with his patient was necessary. Mr. Ward had been receiving brief and non-committal typed notes from his son, and said that Mrs. Ward in her Atlantic City retirement had had no better word. So at length the doctor resolved to act; and despite a curious sensation inspired by old legends of Joseph Curwen, and by more recent revelations and warnings from Charles Ward, set boldly out for the bungalow on the bluff above the river.

Willett had visited the spot before through sheer curiosity, though of course never entering the house or proclaiming his presence; hence knew exactly the route to take. Driving out Broad Street one early afternoon toward the end of February in his small motor, he thought oddly of the grim party which had taken that selfsame road a hundred and fifty-seven years before on a terrible errand which none might ever comprehend.

The ride through the city's decaying fringe was short, and trim Edgewood and sleepy Pawtuxet presently spread out ahead. Willett turned to the right down Lockwood Street and drove his car as far along that rural road as he could, then alighted and walked north to where the bluff towered above the lovely bends of the river and the sweep of misty downlands beyond. Houses were still few here, and there was no mistaking the isolated bungalow with its concrete garage on a high point of land at his left. Stepping briskly up the neglected gravel walk he rapped at the door with a firm hand, and spoke without a tremor to the evil Portuguese mulatto who opened it to the width of a crack.

He must, he said, see Charles Ward at once on vitally important business. No excuse would be accepted, and a repulse would mean only a full report of the matter to the elder Ward. The mulatto still hesitated, and pushed against the door when Willett attempted to open it; but the doctor merely raised his voice and renewed his demands. Then there came from the dark interior a husky whisper which somehow chilled the hearer through and through though he did not know why he feared it. 'Let him in, Tony,' it said, 'we may as well talk now as ever.' But disturbing as was the whisper, the greater fear was that which immediately followed. The floor creaked and the speaker hove in sight - and the owner of those strange and resonant tones was seen to be no other than Charles Dexter Ward.

The minuteness with which Dr. Willett recalled and recorded his conversation of that afternoon is due to the importance he assigns to this particular period. For at last he concedes a vital change in Charles Dexter Ward's mentality, and believes that the youth now spoke from a brain hopelessly alien to the brain whose growth he had watched for six and twenty years. Controversy with Dr. Lyman has compelled him to be very specific, and he definitely dates the madness of Charles Ward from the time the typewritten notes began to reach his parents. Those notes are not in Ward's normal style; not even in the style of that last frantic letter to Willett. Instead, they are strange and archaic, as if the snapping of the writer's mind had released a flood of tendencies and impressions picked up unconsciously through boyhood antiquarianism. There is an obvious effort to be modern, but the spirit and occasionally the language are those of the past.
The past, too, was evident in Ward's every tone and gesture as he received the doctor in that shadowy bungalow. He bowed, motioned Willett to a seat, and began to speak abruptly in that strange whisper which he sought to explain at the very outset.

'I am grown phthisical,' he began, 'from this cursed river air. You must excuse my speech. I suppose you are come from my father to see what ails me, and I hope you will say nothing to alarm him.'

Willett was studying these scraping tones with extreme care, but studying even more closely the face of the speaker. Something, he felt, was wrong; and he thought of what the family had told him about the fright of that Yorkshire butler one night. He wished it were not so dark, but did not request that the blind be opened. Instead, he merely asked Ward why he had so belied the frantic note of little more than a week before.

'I was coming to that,' the host replied. 'You must know, I am in a very bad state of nerves, and do and say queer things I cannot account for. As I have told you often, I am on the edge of great matters; and the bigness of them has a way of making me light-headed. Any man might well be frighted of what I have found, but I am not to be put off for long. I was a dunce to have that guard and stick at home; for having gone this far, my place is here. I am not well spoke of by my prying neighbours, and perhaps I was led by weakness to believe myself what they say of me. There is no evil to any in what I do, so long as I do it rightly. Have the goodness to wait six months, and I'll shew you what will pay your patience well.'

'You may as well know I have a way of learning old matters from things surer than books, and I'll leave you to judge the importance of what I can give to history, philosophy, and the arts by reason of the doors I have access to. My ancestor had all this when those witless peeping Toms came and murdered him. I now have it again, or am coming very imperfectly to have a part of it. This time nothing must happen, and least of all though any idiot fears of my own. Pray forget all I writ you, Sir, and have no fear of this place or any in it. Dr. Allen is a man of fine parts, and I own him an apology for anything ill I have said of him. I wish I had no need to spare him, but there were things he had to do elsewhere. His zeal is equal to mine in all those matters, and I suppose that when I feared the work I feared him too as my greatest helper in it.'

Ward paused, and the doctor hardly knew what to say or think. He felt almost foolish in the face of this calm repudiation of the letter; and yet there clung to him the fact that while the present discourse was strange and alien and indubitably mad, the note itself had been tragic in its naturalness and likeness to the Charles Ward he knew. Willett now tried to turn the talk on early matters, and recall to the youth some past events which would restore a familiar mood; but in this process he obtained only the most grotesque results. It was the same with all the alienists later on. Important sections of Charles Ward's store of mental images, mainly those touching modern times and his own personal life, had been unaccountably expunged; whilst all the massed antiquarianism of his youth had welled up from some profound subconsciousness to engulf the contemporary and the individual. The youth's intimate knowledge of elder things was abnormal and unholy, and he tried his best to hide it. When Willett would mention some favourite object of his boyhood archaistic studies he often shed by pure accident such a light as no normal mortal could
conceivably be expected to possess, and the doctor shuddered as the glib allusion glided by.

It was not wholesome to know so much about the way the fat sheriff's wig fell off as he leaned over at the play in Mr. Douglass's Histrionic Academy in King Street on the eleventh of February, 1762, which fell on a Thursday; or about how the actors cut the text of Steele's *Conscious Lover* so badly that one was almost glad the Baptist-ridden legislature closed the theatre a fortnight later. That Thomas Sabin's Boston coach was "damn'd uncomfortable" old letters may well have told; but what healthy antiquarian could recall how the creaking of Epenetus Olney's new signboard (the gaudy crown he set up after he took to calling his tavern the Crown Coffee House) was exactly like the first few notes of the new jazz piece all the radios in Pawtuxet were playing?

Ward, however, would not be quizzed long in this vein. Modern and personal topics he waved aside quite summarily, whilst regarding antique affairs he soon shewed the plainest boredom. What he wished clearly enough was only to satisfy his visitor enough to make him depart without the intention of returning. To this end he offered to shew Willett the entire house, and at once proceeded to lead the doctor through every room from cellar to attic. Willett looked sharply, but noted that the visible books were far too few and trivial to have ever filled the wide gaps on Ward's shelves at home, and that the meagre so-called "laboratory" was the flimsiest sort of a blind. Clearly, there were a library and a laboratory elsewhere; but just where, it was impossible to say. Essentially defeated in his quest for something he could not name, Willett returned to town before evening and told the senior Ward everything which had occurred. They agreed that the youth must be definitely out of his mind, but decided that nothing drastic need be done just then. Above all, Mrs. Ward must be kept in as complete an ignorance as her son's own strange typed notes would permit.

Mr. Ward now determined to call in person upon his son, making it wholly a surprise visit. Dr. Willett took him in his car one evening, guiding him to within sight of the bungalow and waiting patiently for his return. The session was a long one, and the father emerged in a very saddened and perplexed state. His reception had developed much like Willett's, save that Charles had been an excessively long time in appearing after the visitor had forced his way into the hall and sent the Portuguese away with an imperative demand; and in the bearing of the altered son there was no trace of filial affection. The lights had been dim, yet even so the youth had complained that they dazzled him outrageously. He had not spoken out loud at all, averring that his throat was in very poor condition; but in his hoarse whisper there was a quality so vaguely disturbing that Mr. Ward could not banish it from his mind.

Now definitely leagued together to do all they could toward the youth's mental salvation, Mr. Ward and Dr. Willett set about collecting every scrap of data which the case might afford. Pawtuxet gossip was the first item they studied, and this was relatively easy to glean since both had friends in that region. Dr. Willett obtained the most rumours because people talked more frankly to him than to a parent of the central figure, and from all he heard he could tell that young Ward's life had become indeed a strange one. Common tongues would not dissociate his household from the vampirism of the previous summer, while the nocturnal comings and goings of the motor trucks provided their share of dark
speculations. Local tradesmen spoke of the queerness of the orders brought them by the evil-looking mulatto, and in particular of the inordinate amounts of mean and fresh blood secured from the two butcher shops in the immediate neighbourhood. For a household of only three, these quantities were quite absurd.

Then there was the matter of the sounds beneath the earth. Reports of these things were harder to point down, but all the vague hints tallied in certain basic essentials. Noises of a ritual nature positively existed, and at times when the bungalow was dark. They might, of course, have come from the known cellar; but rumour insisted that there were deeper and more spreading crypts. Recalling the ancient tales of Joseph Curwen's catacombs, and assuming for granted that the present bungalow had been selected because of its situation on the old Curwen site as revealed in one of another of the documents found behind the picture, Willett and Mr. Ward gave this phase of the gossip much attention; and searched many times without success for the door in the river-bank which old manuscripts mentioned. As to popular opinions of the bungalow's various inhabitants, it was soon plain that the Brava Portuguese was loathed, the bearded and spectacled Dr. Allen feared, and the pallid young scholar disliked to a profound degree. During the last week or two Ward had obviously changed much, abandoning his attempts at affability and speaking only in hoarse but oddly repellent whispers on the few occasions that he ventured forth.

Such were the shreds and fragments gathered here and there; and over these Mr. Ward and Dr. Willett held many long and serious conferences. They strove to exercise deduction, induction, and constructive imagination to their utmost extent; and to correlate every known fact of Charles's later life, including the frantic letter which the doctor now shewed the father, with the meagre documentary evidence available concerning old Joseph Curwen. They would have given much for a glimpse of the papers Charles had found, for very clearly the key to the youth's madness lay in what he had learned of the ancient wizard and his doings.

And yet, after all, it was from no step of Mr. Ward's or Dr. Willett's that the next move in this singular case proceeded. The father and the physician, rebuffed and confused by a shadow too shapeless and intangible to combat, had rested uneasily on their oars while the typed notes of young Ward to his parents grew fewer and fewer. Then came the first of the month with its customary financial adjustments, and the clerks at certain banks began a peculiar shaking of heads and telephoning from one to the other. Officials who knew Charles Ward by sight went down to the bungalow to ask why every cheque of his appearing at this juncture was a clumsy forgery, and were reassured less than they ought to have been when the youth hoarsely explained that he hand had lately been so much affected by a nervous shock as to make normal writing impossible. He could, he said, from no written characters at all except with great difficulty; and could prove it by the fact that he had been forced to type all his recent letters, even those to his father and mother, who would bear out the assertion.

What made the investigators pause in confusion was not this circumstance alone, for that was nothing unprecedented or fundamentally suspicious, nor even the Pawtuxet gossip, of which one or two of them had caught echoes. It was the muddled discourse of the
young man which nonplussed them, implying as it did a virtually total loss of memory concerning important monetary matters which he had had at his fingertips only a month or two before. Something was wrong; for despite the apparent coherence and rationality of his speech, there could be no normal reason for this ill-concealed blankness on vital points. Moreover, although none of these men knew Ward well, they could not help observing the change in his language and manner. They had heard he was an antiquarian, but even the most hopeless antiquarians do not make daily use of obsolete phraseology and gestures. Altogether, this combination of hoarseness, palsied hands, bad memory, and altered speech and bearing must represent some disturbance or malady of genuine gravity, which no doubt formed the basis of the prevailing odd rumours; and after their departure the party of officials decided that a talk with the senior Ward was imperative.

So on the sixth of March, 1928, there was a long and serious conference in Mr. Ward's office, after which the utterly bewildered father summoned Dr. Willett in a kind of helpless resignation. Willett looked over the strained and awkward signatures of the cheque, and compared them in his mind with the penmanship of that last frantic note. Certainly, the change was radical and profound, and yet there was something damnably familiar about the new writing. It had crabbed and archaic tendencies of a very curious sort, and seemed to result from a type of stroke utterly different from that which the youth had always used. It was strange - but where had he seen it before? On the whole, it was obvious that Charles was insane. Of that there could be no doubt. And since it appeared unlikely that he could handle his property or continue to deal with the outside world much longer, something must quickly be done toward his oversight and possible cure. It was then that the alienists were called in, Drs. Peck and Waite of Providence and Dr. Lyman of Boston, to whom Mr. Ward and Dr. Willett gave the most exhaustive possible history of the case, and who conferred at length in the now unused library of their young patient, examining what books and papers of his were left in order to gain some further notion of his habitual mental cast. After scanning this material and examining the ominous note to Willett they all agreed that Charles Ward's studies had been enough to unseat or at least to warp any ordinary intellect, and wished most heartily that they could see his more intimate volumes and documents; but this latter they knew they could do, if at all, only after a scene at the bungalow itself. Willett now reviewed the whole case with febrile energy; it being at this time that he obtained the statements of the workmen who had seen Charles find the Curwen documents, and that he collated the incidents of the destroyed newspaper items, looking up the latter at the Journal office.

On Thursday, the eighth of March, Drs. Willett, Peck, Lyman, and Waite, accompanied by Mr. Ward, paid the youth their momentous call; making no concealment of their object and questioning the now acknowledged patient with extreme minuteness. Charles, although he was inordinately long in answering the summons and was still redolent of strange and noxious laboratory odours when he did finally make his agitated appearance, proved a far from recalcitrant subject; and admitted freely that his memory and balance had suffered somewhat from close application to abstruse studies. He offered no resistance when his removal to other quarters was insisted upon; and seemed, indeed, to display a high degree of intelligence as apart from mere memory. His conduct would have sent his interviewers away in bafflement had not the persistently archaic trend of his speech and unmistakable replacement of modern by ancient ideas in his consciousness...
marked him out as one definitely removed from the normal. Of his work he would say no more to the group of doctors than he had formerly said to his family and to Dr. Willett, and his frantic note of the previous month he dismissed as mere nerves and hysteria. He insisted that this shadowy bungalow possessed no library or laboratory beyond the visible ones, and waxed abstruse in explaining the absence from the house of such odours as now saturated all his clothing. Neighbourhood gossip he attributed to nothing more than the cheap inventiveness of baffled curiosity. Of the whereabouts of Dr. Allen he said he did not feel at liberty to speak definitely, but assured his inquisitors that the bearded and spectacled man would return when needed. In paying off the stolid Brava who resisted all questioning by the visitors, and in closing the bungalow which still seemed to hold such nighted secrets, Ward shewed no signs of nervousness save a barely noticed tendency to pause as though listening for something very faint. He was apparently animated by a calmly philosophic resignation, as if he removal were the merest transient incident which would cause the least trouble if facilitated and disposed of once and for all. It was clear that he trusted to his obviously unimpaired keenness of absolute mentality to overcome all the embarrassments into which his twisted memory, his lost voice and handwriting, and his secretive and eccentric behaviour had led him. His mother, it was agreed, was not to be told of the change; his father supplying typed notes in his name. Ward was taken to the restfully and picturesquely situated private hospital maintained by Dr. Waite on Conanicut Island in the bay, and subjected to the closest scrutiny and questioning by all the physicians connected with the case. It was then that the physical oddities were noticed; the slackened metabolism, the altered skin, and the disproportionate neural reactions. Dr. Willett was the most perturbed of the various examiners, for he had attended Ward all his life and could appreciate with terrible keenness the extent of his physical disorganisation. Even the familiar olive mark on his hip was gone, while on his chest was a great black mole or cicatrice which had never been there before, and which made Willett wonder whether the youth had ever submitted to any of the *witch markings* reputed to be inflicted at certain unwholesome nocturnal meetings in wild and lonely places. The doctor could not keep his mind off a certain transcribed witch-trial record from Salem which Charles had shewn him in the old non-secretive days, and which read: 'Mr. G. B. on that Nighte putt ye Divell his Marke upon Bridget S., Jonathan A., Simon O., Deliverance W., Joseph C., Susan P., Mehitable C., and Deborah B.' Ward's face, too, troubled him horribly, till at length he suddenly discovered why he was horrified. For above the young man's right eye was something which he had never previously noticed - a small scar or pit precisely like that in the crumbled painting of old Joseph Curwen, and perhaps attesting some hideous ritualistic inoculation to which both had submitted at a certain stage of their occult careers.

While Ward himself was puzzling all the doctors at the hospital a very strict watch was kept on all mail addressed either to him or to Dr. Allen, which Mr. Ward had ordered delivered at the family home. Willett had predicted that very little would be found, since any communications of a vital nature would probably have been exchanged by messenger; but in the latter part of March there did come a letter from Prague for Dr. Allen which gave both the doctor and the father deep thought. It was in a very crabbed and archaic hand; and though clearly not the effort of a foreigner, shewed almost as singular a departure from modern English as the speech of young Ward himself. It read:
Brother in Almonsin-Metraton:-

I this day receiv'd yr mention of what came up from the Saltes I sent you. It was wrong, and means clearly that ye Headstones had been chang'd when Barnabas got me the Specimen. It is often so, as you must be sensible of from the Thing you gott from ye Kings Chapell ground in 1769 and what H. gott from Olde Bury'g Point in 1690, that was like to ende him. I gott such a Thing in Aegypt 75 yeares gone, from the which came that Scar ye Boy saw on me here in 1924. As I told you longe ago, do not calle up That which you can not put downe; either from dead Saltes or out of ye Spheres beyond. Have ye Wordes for laying at all times readie, and stopp not to be sure when there is any Doubte of Whom you have. Stones are all chang'd now in Nine groundes out of 10. You are never sure till you question. I this day heard from H., who has had Trouble with the Soldiers. He is like to be sorry Transylvania is pass't from Hungary to Roumania, and wou'd change his Seat if the Castel weren't so fulle of What we Knowe. But of this he hath doubtless writ you. In my next Send'g there will be Somewhat from a Hill tomb from ye East that will delight you greatly. Meanwhile forget not I am desirous of B. F. if you can possibly get him for me. You know G. in Philada. better than I. Have him upp firste if you will, but doe not use him soe hard he will be Difficult, for I must speake to him in ye End.

Yogg-Sothoth Neblod Zin
Simon O.

To Mr. J. C. in Providence.

Mr. Ward and Dr. Willett paused in utter chaos before this apparent bit of unrelieved insanity. Only by degrees did they absorb what it seemed to imply. So the absent Dr. Allen, and not Charles Ward, had come to be the leading spirit at Pawtuxet? That must explain the wild reference and denunciation in the youth's last frantic letter. And what of this addressing of the bearded and spectacled stranger as "Mr. J. C."? There was no escaping the inference, but there are limits to possible monstrosity. Who was "Simon O."; the old man Ward had visited in Prague four years previously? Perhaps, but in the centuries behind there had been another Simon O. - Simon Orne, alias Jedediah, of Salem, who vanished in 1771, and whose peculiar handwriting Dr. Willett now unmistakably recognised from the photostatic copies of the Orne formulae which Charles had once shown him. What horrors and mysteries, what contradictions and contraventions of Nature, had come back after a century and a half to harass Old Providence with her clustered spires and domes?
The father and the old physician, virtually at a loss what to do or think, went to see Charles at the hospital and questioned him as delicately as they could about Dr. Allen, about the Prague visit, and about what he had learned of Simon or Jedediah Orne of Salem. To all these enquiries the youth was politely non-committal, merely barking in his hoarse whisper that he had found Dr. Allen to have a remarkable spiritual rapport with certain souls from the past, and that any correspondent the bearded man might have in Prague would probably be similarly gifted. When they left, Mr. Ward and Dr. Willett realised to their chagrin that they had really been the ones under catechism; and that without imparting anything vital himself, the confined youth had adroitly pumped them of everything the Prague letter had contained.

Drs. Peck, Waite, and Lyman were not inclined to attach much importance to the strange correspondence of young Ward's companion; for they knew the tendency of kindred eccentrics and monomaniacs to band together, and believed that Charles or Allen had merely unearthed an expatriated counterpart - perhaps one who had seen Orne's handwriting and copied it in an attempt to pose as the bygone character's reincarnation. Allen himself was perhaps a similar case, and may have persuaded the youth into accepting him as an avatar of the long-dead Curwen. Such things had been known before, and on the same basis the hard-headed doctors disposed of Willett's growing disquiet about Charles Ward's present handwriting, as studied from unpremeditated specimens obtained by various ruses. Willett thought he had placed its odd familiarity at last, and that what it vaguely resembled was the bygone penmanship of old Joseph Curwen himself; but this the other physicians regarded as a phase of imitativeness only to be expected in a mania of this sort, and refused to grant it any importance either favourable or unfavourable. Recognising this prosaic attitude in his colleagues, Willett advised Mr. Ward to keep to himself the letter which arrived for Dr. Allen on the second of April from Rakus, Transylvania, in a handwriting so intensely and fundamentally like that of the Hutchinson cipher that both father and physician paused in awe before breaking the seal. This read as follows:

Castle Ferenczy
7 March 1928.

Dear C.:-

Hadd a Squad of 20 Militia up to talk about what the Country Folk say. Must digg deeper and have less Hearde. These Roumanians plague me dammably, being officious and particular where you cou'd buy a Magyar off with a Drinke and Food.

Last monthe M. got me ye Sarcophagus of ye Five Sphinxes from ye Acropolis where He whome I call'd up say'd it wou'd be, and I have hadde 3 Talkes with What was therein inhum'd. It will go to S. O. in Prague directly, and thence to you. It is stubborn but you know ye Way with Such.

You shew Wisdom in having lesse about than Before; for there was no Neede to keep the Guards in Shape and eat'g off their Heads, and it made
Much to be founde in Case of Trouble, as you too welle knowe. You can now move and worke elsewhere with no Kill'g Trouble if needful, tho' I hope no Thing will soon force you to so Bothersome a Course.

I rejoice that you traffick not so much with Those Outside; for there was ever a Mortall Peril in it, and you are sensible what it did when you ask'd Protection of One not dispos'd to give it.

You excel me in gett'g ye Formulae so another may saye them with Success, but Borellus fancy'd it wou'd be so if just ye right Wordes were hadd. Does ye Boy use 'em often? I regret that he growes squeamish, as I fear'd he wou'd when I hadde him here nigh 15 Monthes, but am sensible you knowe how to deal with him. You can't saye him down with ye Formula, for that will Worke only upon such as ye other Formula hath call'd up from Saltes; but you still have strong Handes and Knife and Pistol, and Graves are not harde to digg, nor Acids loth to burne.

O. says you have promis'd him B. F. I must have him after. B. goes to you soone, and may he give you what you wishe of that Darke Thing belowe Memphis. Imploy care in what you calle up, and beware of ye Boy.

It will be ripe in a yeare's time to have up ye Legions from Underneath, and then there are no Boundes to what shal be oures. Have Confidence in what I saye, for you knowe O. and I have hadd these 150 yeares more than you to consulte these Matters in.

Nephreu - Ka nai Hadoth
Edw. H.

For J Curwen, Esq.
Providence.

But if Willett and Mr. Ward refrained from shewing this letter to the alienists, they did not refrain from acting upon it themselves. No amount of learned sophistry could controvert the fact that the strangely bearded and spectacled Dr. Allen, of whom Charles's frantic letter had spoken as such a monstrous menace, was in close and sinister correspondence with two inexplicable creatures whom Ward had visited in his travels and who plainly claimed to be survivals or avatars of Curwen's old Salem colleagues; that he was regarding himself as the reincarnation of Joseph Curwen, and that he entertained - or was at least advised to entertain - murderous designs against a "boy" who could scarcely be other than Charles Ward. There was organised horror afoot; and no matter who had started it, the missing Allen was by this time at the bottom of it. Therefore, thanking heaven that Charles was now safe in the hospital, Mr. Ward lost no time in engaging detectives to learn all they could of the cryptic, bearded doctor; finding whence he had come and what Pawtuxet knew of him, and if possible discovering his present whereabouts. Supplying the men with one of the bungalow keys which Charles yielded up, he urged them to explore Allen's vacant room which had been identified when the
patient's belongings had been packed; obtaining what clues they could from any effects he might have left about. Mr. Ward talked with the detectives in his son's old library, and they felt a marked relief when they left it at last; for there seemed to hover about the place a vague aura of evil. Perhaps it was what they had heard of the infamous old wizard whose picture had once stared from the panelled overmantel, and perhaps it was something different and irrelevant; but in any case they all half sensed an intangible miasma which centred in that carven vestige of an older dwelling and which at times almost rose to the intensity of a material emanation.

V. A Nightmare and a Cataclysm

And now swiftly followed that hideous experience which has left its indelible mark of fear on the soul of Marinus Bicknell Willett, and has added a decade to the visible age of one whose youth was even then far behind. Dr. Willett had conferred at length with Mr. Ward, and had come to an agreement with him on several points which both felt the alienists would ridicule. There was, they conceded, a terrible movement alive in the world, whose direct connexion with a necromancy even older than the Salem witchcraft could not be doubted. That at least two living men - and one other of whom they dared not think - were in absolute possession of minds or personalities which had functioned as early as 1690 or before was likewise almost unassailably proved even in the face of all known natural laws. What these horrible creatures - and Charles Ward as well - were doing or trying to do seemed fairly clear from their letters and from every bit of light both old and new which had filtered in upon the case. They were robbing the tombs of all the ages, including those of the world's wisest and greatest men, in the hope of recovering from the bygone ashes some vestige of the consciousness and lore which had once animated and informed them.

A hideous traffic was going on among these nightmare ghouls, whereby illustrious bones were bartered with the calm calculativeness of schoolboys swapping books; and from what was extorted from this centuried dust there was anticipated a power and a wisdom beyond anything which the cosmos had ever seen concentrated in one man or group. They had found unholy ways to keep their brains alive, either in the same body or different bodies; and had evidently achieved a way of tapping the consciousness of the dead whom they gathered together. There had, it seems, been some truth in chimerical old Borellus when he wrote of preparing from even the most antique remains certain "Essential Saltes" from which the shade of a long-dead living thing might be raised up. There was a formula for evoking such a shade, and another for putting it down; and it had now been so perfected that it could be taught successfully. One must be careful about evocations, for the markers of old graves are not always accurate.

Willett and Mr. Ward shivered as they passed from conclusion to conclusion. Things - presences or voices of some sort - could be drawn down from unknown places as well as from the grave, and in this process also one must be careful. Joseph Curwen had indubitably evoked many forbidden things, and as for Charles - what might one think of him? What forces "outside the spheres" had reached him from Joseph Curwen's day and turned his mind on forgotten things? He had been led to find certain directions, and he
had used them. He had talked with the man of horror in Prague and stayed long with the creature in the mountains of Transylvania. And he must have found the grave of Joseph Curwen at last. That newspaper item and what his mother had heard in the night were too significant to overlook. Then he had summoned something, and it must have come. That mighty voice aloft on Good Friday, and those different tones in the locked attic laboratory. What were they like, with their depth and hollowness? Was there not here some awful foreshadowing of the dreaded stranger Dr. Allen with his spectral bass? Yes, that was what Mr. Ward had felt with vague horror in his single talk with the man - if man it were - over the telephone!

What hellish consciousness or voice, what morbid shade or presence, had come to answer Charles Ward's secret rites behind that locked door? Those voices heard in argument - "must have it red for three months" - Good God! Was not that just before the vampirism broke out? The rifling of Ezra Weeden's ancient grave, and the cries later at Pawtuxet - whose mind had planned the vengeance and rediscovered the shunned seat of elder blasphemies? And then the bungalow and the bearded stranger, and the gossip, and the fear. The final madness of Charles neither father nor doctor could attempt to explain, but they did feel sure that the mind of Joseph Curwen had come to earth again and was following its ancient morbidities. Was daemoniac possession in truth a possibility? Allen had something to do with it, and the detectives must find out more about one whose existence menaced the young man's life. In the meantime, since the existence of some vast crypt beneath the bungalow seemed virtually beyond dispute, some effort must be made to find it. Willett and Mr. Ward, conscious of the sceptical attitude of the alienists, resolved during their final conference to undertake a joint secret exploration of unparalleled thoroughness; and agreed to meet at the bungalow on the following morning with valises and with certain tools and accessories suited to architectural search and underground exploration.

The morning of April 6th dawned clear, and both explorers were at the bungalow by ten o'clock. Mr. Ward had the key, and an entry and cursory survey were made. From the disordered condition of Dr. Allen's room it was obvious that the detectives had been there before, and the later searchers hoped that they had found some clue which might prove of value. Of course the main business lay in the cellar; so thither they descended without much delay, again making the circuit which each had vainly made before in the presence of the mad young owner. For a time everything seemed baffling, each inch of the earthen floor and stone walls having so solid and innocuous an aspect that the thought of a yearning aperture was scarcely to be entertained. Willett reflected that since the original cellar was dug without knowledge of any catacombs beneath, the beginning of the passage would represent the strictly modern delving of young Ward and his associates, where they had probed for the ancient vaults whose rumour could have reached them by no wholesome means.

The doctor tried to put himself in Charles's place to see how a delver would be likely to start, but could not gain much inspiration from this method. Then he decided on elimination as a policy, and went carefully over the whole subterranean surface both vertical and horizontal, trying to account for every inch separately. He was soon substantially narrowed down, and at last had nothing left but the small platform before
the washtubs, which he tried once before in vain. Now experimenting in every possible way, and exerting a double strength, he finally found that the top did indeed turn and slide horizontally on a corner pivot. Beneath it lay a trim concrete surface with an iron manhole, to which Mr. Ward at once rushed with excited zeal. The cover was not hard to lift, and the father had quite removed it when Willett noticed the queerness of his aspect. He was swaying and nodding dizzily, and in the gust of noxious air which swept up from the black pit beneath the doctor soon recognised ample cause.

In a moment Dr. Willett had his fainting companion on the floor above and was reviving him with cold water. Mr. Ward responded feebly, but it could be seen that the mephitic blast from the crypt had in some way gravely sickened him. Wishing to take no chances, Willett hastened out to Broad Street for a taxicab and had soon dispatched the sufferer home despite his weak-voiced protests; after which he produced an electric torch, covered his nostrils with a band of sterile gauze, and descended once more to peer into the new-found depths. The foul air had now slightly abated, and Willett was able to send a beam of light down the Stygian hold. For about ten feet, he saw, it was a sheer cylindrical drop with concrete walls and an iron ladder; after which the hole appeared to strike a flight of old stone steps which must originally have emerged to earth somewhat southwest of the present building.

Willett freely admits that for a moment the memory of the old Curwen legends kept him from climbing down alone into that malodorous gulf. He could not help thinking of what Like Fenner had reported on that last monstrous night. Then duty asserted itself and he made the plunge, carrying a great valise for the removal of whatever papers might prove of supreme importance. Slowly, as befitted one of his years, he descended the ladder and reached the slimy steps below. This was ancient masonry, his torch told him; and upon the dripping walls he saw the unwholesome moss of centuries. Down, down, ran the steps; not spirally, but in three abrupt turns; and with such narrowness that two men could have passed only with difficulty. He had counted about thirty when a sound reached him very faintly; and after that he did not feel disposed to count any more.

It was a godless sound; one of those low-keyed, insidious outrages of Nature which are not meant to be. To call it a dull wail, a doom-dragged whine, or a hopeless howl of chorused anguish and stricken flesh without mind would be to miss its quintessential loathsomeness and soul-sickening overtones. Was it for this that Ward had seemed to listen on that day he was removed? It was the most shocking thing that Willett had ever heard, and it continued from no determinate point as the doctor reached the bottom of the steps and cast his torchlight around on lofty corridor walls surmounted by Cyclopean vaulting and pierced by numberless black archways. The hall in which he stood was perhaps fourteen feet high in the middle of the vaulting and ten or twelve feet broad. Its pavement was of large chipped flagstone, and its walls and roof were of dressed masonry. Its length he could not imagine, for it stretched ahead indefinitely into the blackness. Of the archways, some had doors of the old six-panelled colonial type, whilst others had none.
Overcoming the dread induced by the smell and the howling, Willett began to explore these archways one by one; finding beyond them rooms with groined stone ceilings, each of medium size and apparently of bizarre used. Most of them had fireplaces, the upper courses of whose chimneys would have formed an interesting study in engineering. Never before or since had he seen such instruments or suggestions of instruments as here loomed up on every hand through the burying dust and cobwebs of a century and a half, in many cases evidently shattered as if by the ancient raiders. For many of the chambers seemed wholly untrodden by modern feet, and must have represented the earliest and most obsolete phases of Joseph Curwen's experimentation. Finally there came a room of obvious modernity, or at least of recent occupancy. There were oil heaters, bookshelves and tables, chairs and cabinets, and a desk piled high with papers of varying antiquity and contemporaneousness. Candlesticks and oil lamps stood about in several places; and finding a match-safe handy, Willett lighted such as were ready for use.

In the fuller gleam it appeared that this apartment was nothing less than the latest study or library of Charles Ward. Of the books the doctor had seen many before, and a good part of the furniture had plainly come from the Prospect Street mansion. Here and there was a piece well known to Willett, and the sense of familiarity became so great that he half forgot the noisomness and the wailing, both of which were plainer here than they had been at the foot of the steps. His first duty, as planned long ahead, was to find and seize any papers which might seem of vital importance; especially those portentous documents found by Charles so long ago behind the picture in Olney Court. As he search he perceived how stupendous a task the final unravelling would be; for file on file was stuffed with papers in curious hands and bearing curious designs, so that months or even years might be needed for a thorough deciphering and editing. Once he found three large packets of letters with Prague and Rakus postmarks, and in writing clearly recognisable as Orne's and Hutchinson's; all of which he took with him as part of the bundle to be removed in his valise.

At last, in a locked mahogany cabinet once gracing the Ward home, Willett found the batch of old Curwen papers; recognising them from the reluctant glimpse Charles had granted him so many years ago. The youth had evidently kept them together very much as they had been when first he found them, since all the titles recalled by the workmen were present except the papers addressed to Orne and Hutchinson, and the cipher with its key. Willett placed the entire lot in his valise and continued his examination of the files. Since young Ward's immediate condition was the greatest matter at stake, the closest searching was done among the most obviously recent matter; and in this abundance of contemporary manuscript one very baffling oddity was noted. The oddity was the slight amount in Charles's normal writing, which indeed included nothing more recent than two months before. On the other hand, there were literally reams of symbols and formulae, historical notes and philosophical comment, in a crabbed penmanship absolutely identical with the ancient script of Joseph Curwen, though of undeniably modern dating. Plainly, a part of the latter-day programme had been a sedulous imitation of the old wizard's writing, which Charles seemed to have carried to a marvellous state of perfection. Of any third hand which might have been Allen's there was not a trace. If he had indeed come to be the leader, he must have forced young Ward to act as his amanuensis.
In this new material one mystic formula, or rather pair of formulae, recurred so often that Willett had it by heart before he had half finished his quest. It consisted of two parallel columns, the left-hand one surmounted by the archaic symbol called "Dragon's Head" and used in almanacs to indicate the ascending node, and the right-hand one headed by a corresponding sign of "Dragon's Tail" or descending node. The appearance of the whole was something like this, and almost unconsciously the doctor realised that the second half was no more than the first written syllabically backward with the exception of the final monosyllables and of the odd name Yog-Sothoth, which he had come to recognise under various spellings from other things he had seen in connexion with this horrible matter. The formulae were as follows - exactly so, as Willett is abundantly able to testify - and the first one struck an odd note of uncomfortable latent memory in his brain, which he recognised later when reviewing the events of that horrible Good Friday of the previous year.

Y'AI 'NG'NGAH,                      OGTHROD AI'F
YOG-SOTHOTH                       GEB'L-EE'H
H'EE-L'geb                       YOG-SOTHOTH
F'AI THRODOG                     'NGAH'NG AI'Y
UAAAH                          ZHRO

So haunting were these formulae, and so frequently did he come upon them, that before the doctor knew it he was repeating them under his breath. Eventually, however, he felt he had secured all the papers he could digest to advantage for the present; hence resolved to examine no more till he could bring the sceptical alienists en masse for an ampler and more systematic raid. He had still to find the hidden laboratory, so leaving his valise in the lighted room he emerged again into the black noisome corridor whose vaulting echoed ceaseless with that dull and hideous whine.

The next few rooms he tried were all abandoned, or filled only with crumbling boxes and ominous-looking leaden coffins; but impressed him deeply with the magnitude of Joseph Curwen's original operations. He thought of the slaves and seamen who had disappeared, of the graves which had been violated in every part of the world, and of what that final raiding party must have seen; and then he decided it was better not to think any more. Once a great stone staircase mounted at his right, and he deduced that this must have reached to one of the Curwen outbuildings - perhaps the famous stone edifice with the high slit-like windows - provided the steps he had descended had led from the steep-roofed farmhouse. Suddenly the walls seemed to fall away ahead, and the stench and the wailing grew stronger. Willett saw that he had come upon a vast open space, so great that his torchlight would not carry across it; and as he advanced he encountered occasional stout pillars supporting the arches of the roof.

After a time he reached a circle of pillars grouped like the monoliths of Stonehenge, with a large carved altar on a base of three steps in the centre; and so curious were the carvings on that altar that he approached to study them with his electric light. But when he saw what they were he shrank away shuddering, and did not stop to investigate the dark stains which discoloured the upper surface and had spread down the sides in occasional thin lines. Instead, he found the distant wall and traced it as it swept round in a gigantic circle.
perforated by occasional black doorways and indented by a myriad of shallow cells with iron gratings and wrist and ankle bonds on chains fastened to the stone of the concave rear masonry. These cells were empty, but still the horrible odour and the dismal moaning continued, more insistent now than ever, and seemingly varied at time by a sort of slippery thumping.

From that frightful smell and that uncanny noise Willett's attention could no longer be diverted. Both were plainer and more hideous in the great pillared hall than anywhere else, and carried a vague impression of being far below, even in this dark nether world of subterrene mystery. Before trying any of the black archways for steps leading further down, the doctor cast his beam of light about the stone-flagged floor. It was very loosely paved, and at irregular intervals there would occur a slab curiously pierced by small holes in no definite arrangement, while at one point there lay a very long ladder carelessly flung down. To this ladder, singularly enough, appeared to cling a particularly large amount of the frightful odour which encompassed everything. As he walked slowly about it suddenly occurred to Willett that both the noise and the odour seemed strongest above the oddly pierced slabs, as if they might be crude trap-doors leading down to some still deeper region of horror. Kneeling by one, he worked at it with his hands, and found that with extreme difficulty he could budge it. At his touch the moaning beneath ascended to a louder key, and only with vast trepidation did he persevere in the lifting of the heavy stone. A stench unnameable now rose up from below, and the doctor's head reeled dizzily as he laid back the slab and turned his torch upon the exposed square yard of gaping blackness.

If he had expected a flight of steps to some wide gulf of ultimate abomination, Willett was destined to be disappointed; for amidst that foetor and cracked whining he discerned only the brick-faced top of a cylindrical well perhaps a yard and a half in diameter and devoid of any ladder or other means of descent. As the light shone down, the wailing changed suddenly to a series of horrible yelps; in conjunction with which there came again that sound of blind, futile scrambling and slippery thumping. The explorer trembled, unwilling even to imagine what noxious thing might be lurking in that abyss, but in a moment mustered up the courage to peer over the rough-hewn brink; lying at full length and holding the torch downward at arm's length to see what might lie below. For a second he could distinguish nothing but the slimy, moss-grown brick walls sinking illimitably into that half-tangible miasma of murk and foulness and anguished frenzy; and then he saw that something dark was leaping clumsily and frantically up and down at the bottom of the narrow shaft, which must have been from twenty to twenty-five feet below the stone floor where he lay. The torch shook in his hand, but he looked again to see what manner of living creature might be immured there in the darkness of that unnatural well; left starving by young Ward through all the long month since the doctors had taken him away, and clearly only one of a vast number prisoned in the kindred wells whose pierced stone covers so thickly studded the floor of the great vaulted cavern. Whatever the things were, they could not lie down in their cramped spaces; but must have crouched and whined and waited and feebly leaped all those hideous weeks since their master had abandoned them unheeded.
But Marinus Bicknell Willett was sorry that he looked again; for surgeon and veteran of the dissecting-room though he was, he has not been the same since. It is hard to explain just how a single sight of a tangible object with measurable dimensions could so shake and change a man; and we may only say that there is about certain outlines and entities a power of symbolism and suggestion which acts frightfully on a sensitive thinker's perspective and whispers terrible hints of obscure cosmic relationships and unnameable realities behind the protective illusions of common vision. In that second look Willett saw such an outline or entity, for during the next few instants he was undoubtedly as stark raving mad as any inmate of Dr. Waite's private hospital. He dropped the electric torch from a hand drained of muscular power or nervous coördination, nor heeded the sound of crunching teeth which told of its fate at the bottom of the pit. He screamed and screamed and screamed in a voice whose falsetto panic no acquaintance of his would ever have recognised; and though he could not rise to his feet he crawled and rolled desperately away from the damp pavement where dozens of Tartarean wells poured forth their exhausted whining and yelping to answer his own insane cries. He tore his hands on the rough, loose stones, and many times bruised his head against the frequent pillars, but still he kept on. Then at last he slowly came to himself in the utter blackness and stench, and stopped his ears against the droning wail into which the burst of yelping had subsided. He was drenched with perspiration and without means of producing a light; stricken and unnerved in the abysmal blackness and horror, and crushed with a memory he never could efface. Beneath him dozens of those things still lived, and from one of those shafts the cover was removed. He knew that what he had seen could never climb up the slippery walls, yet shuddered at the thought that some obscure foot-hold might exist.

What the thing was, he would never tell. It was like some of the carvings on the hellish altar, but it was alive. Nature had never made it in this form, for it was too palpably unfinished. The deficiencies were of the most surprising sort, and the abnormalities of proportion could not be described. Willett consents only to say that this type of thing must have represented entities which Ward called up from imperfect salts, and which he kept for servile or ritualistic purposes. If it had not had a certain significance, its image would not have been carved on that damnable stone. It was not the worst thing depicted on that stone - but Willett never opened the other pits. At the time, the first connected idea in his mind was an idle paragraph from some of the old Curwen data he had digested long before; a phrase used by Simon or Jedediah Orne in that portentous confiscated letter to the bygone sorcerer:

'Certainely, there was Noth'g but ye liveliest Awfulness in that which H. rais'd upp from What he cou'd gather onlie a part of.'

Then, horribly supplementing rather than displacing this image, there came a recollection of those ancient lingering rumours anent the burned, twisted thing found in the fields a week after the Curwen raid. Charles Ward had once told the doctor what old Slocum said of that object; that it was neither thoroughly human, nor wholly allied to any animal which Pawtuxet folk had ever seen or read about.

These words hummed in the doctor's mind as he rocked to and fro, squatting on the nitrous stone floor. He tried to drive them out, and repeated the Lord's Prayer to himself; eventually trailing off into a mnemonic hodge-podge like the modernistic Waste Land of
Mr. T. S. Eliot, and finally reverting to the oft-repeated dual formula he had lately found in Ward's underground library: 'Y'ai 'ng'ngah, Yog-Sothoth' and so on till the final underlined Zhro.

It seemed to soothe him, and he staggered to his feet after a time; lamenting bitterly his fright-lost torch and looking wildly about for any gleam of light in the clutching inkiness of the chilly air. Think he would not; but he strained his eyes in every direction for some faint glint or reflection of the bright illumination he had left in the library. After a while he thought he detected a suspicion of a glow infinitely far away, and toward this he crawled in agonised caution on hands and knees amidst the stench and howling, always feeling ahead lest he collide with the numerous great pillars or stumble into the abominable pit he had uncovered.

Once his shaking fingers touched something which he knew must be the steps leading to the hellish altar, and from this spot he recoiled in loathing. At another time he encountered the pierced slab he had removed, and here his caution became almost pitiful. But he did not come upon the dread aperture after all, nor did anything issue from that aperture to detain him. What had been down there made no sound nor stir. Evidently its crunching of the fallen electric torch had not been good for it. Each time Willett's fingers felt a perforated slab he trembled. His passage over it would sometimes increase the groaning below, but generally it would produce no effect at all, since he moved very noiselessly. Several times during his progress the glow ahead diminished perceptibly, and he realised that the various candles and lamps he had left must be expiring one by one. The thought of being lost in utter darkness without matches amidst this underground world of nightmare labyrinths impelled him to rise to his feet and run, which he could safely do now that he had passed the open pit; for he knew that once the light failed, his only hope of rescue and survival would lie in whatever relief party Mr. Ward might send after missing him for a sufficient period. Presently, however, he emerged from the open space into the narrower corridor and definitely located the glow as coming from a door on his right. In a moment he had reached it and was standing once more in young Ward's secret library, trembling with relief, and watching the sputterings of that last lamp which had brought him to safety.

In another moment he was hastily filling the burned-out lamps from an oil supply he had previously noticed, and when the room was bright again he looked about to see if he might find a lantern for further exploration. For racked though he was with horror, his sense of grim purpose was still uppermost; and he was firmly determined to leave no stone unturned in his search for the hideous facts behind Charles Ward's bizarre madness. Failing to find a lantern, he chose the smallest of the lamps to carry; also filling his pockets with candles and matches, and taking with him a gallon can of oil, which he proposed to keep for reserve use in whatever hidden laboratory he might uncover beyond the terrible open space with its unclean altar and nameless covered wells. To traverse that space again would require his utmost fortitude, but he knew it must be done. Fortunately neither the frightful altar nor the opened shaft was near the vast cell-indentled wall which bounded the cavern area, and whose black mysterious archways would form the next goals of a logical search.
So Willett went back to that great pillared hall of stench and anguished howling; turning
down his lamp to avoid any distant glimpse of the hellish altar, or of the uncovered pit
with the pierced stone slab beside it. Most of the black doorways led merely to small
chambers, some vacant and some evidently used as storerooms; and in several of the
latter he saw some very curious accumulations of various objects. One was packed with
rotting and dust-draped bales of spare clothing, and the explorer thrilled when he saw that
it was unmistakably the clothing of a century and a half before. In another room he found
numerous odds and ends of modern clothing, as if gradual provisions were being made to
equip a large body of men. But what he disliked most of all were the huge copper vats
which occasionally appeared; these, and the sinister incrustations upon them. He liked
them even less than the weirdly figured leaden bowls whose rims retained such
obnoxious deposits and around which clung repellant odours perceptible above even the
general noisomness of the crypt. When he had completed about half the entire circuit of
the wall he found another corridor like that from which he had come, and out of which
many doors opened. This he proceeded to investigate; and after entering three rooms of
medium size and of no significant contents, he came at last to a large oblong apartment
whose business-like tanks and tables, furnaces and modern instruments, occasional books
and endless shelves of jars and bottles proclaimed it indeed the long-sought laboratory of
Charles Ward - and no doubt of old Joseph Curwen before him.

After lighting the three lamps which he found filled and ready, Dr. Willett examined the
place and all the appurtenances with the keenest interest; noting from the relative
quantities of various reagents on the shelves that young Ward's dominant concern must
have been with some branch of organic chemistry. On the whole, little could be learned
from the scientific ensemble, which included a gruesome-looking dissecting-table; so that
the room was really rather a disappointment. Among the books was a tattered old copy of
Borellus in black-letter, and it was weirdly interesting to note that Ward had underlined
the same passage whose marking had so perturbed good Mr. Merritt in Curwen's
farmhouse more than a century and a half before. That old copy, of course, must have
perished along with the rest of Curwen's occult library in the final raid. Three archways
opened off the laboratory, and these the doctor proceeded to sample in turn. From his
cursory survey he saw that two led merely to small storerooms; but these he canvassed
with care, remarking the piles of coffins in various stages of damage and shuddering
violently at two or three of the few coffin-plates he could decipher. There was much
clothing also stored in these rooms, and several new and tightly nailed boxes which he
did not stop to investigate. Most interesting of all, perhaps, were some odd bits which he
judged to be fragments of old Joseph Curwen's laboratory appliances. These had suffered
damage at the hands of the raiders, but were still partly recognisable as the chemical
paraphernalia of the Georgian period.

The third archway led to a very sizeable chamber entirely lined with shelves and having
in the centre a table bearing two lamps. These lamps Willett lighted, and in their brilliant
glow studied the endless shelving which surrounded him. Some of the upper levels were
wholly vacant, but most of the space was filled with small odd-looking leaden jars of two
general types; one tall and without handles like a Grecian lekythos or oil-jug, and the
other with a single handle and proportioned like a Phaleron jug. All had metal stoppers,
and were covered with peculiar-looking symbols moulded in low relief. In a moment the
doctor noticed that these jugs were classified with great rigidity; all the lekythoi being on one side of the room with a large wooden sign reading 'Custodes' above them, and all the Phalerons on the other, correspondingly labelled with a sign reading 'Materia'.

Each of the jars of jugs, except some on the upper shelves that turned out to be vacant, bore a cardboard tag with a number apparently referring to a catalogue; and Willett resolved to look for the latter presently. For the moment, however, he was more interested in the nature of the array as a whole, and experimentally opened several of the lekythoi and Phalerons at random with a view to a rough generalisation. The result was invariable. Both types of jar contained a small quantity of a single kind of substance; a fine dusty powder of very light weight and of many shades of dull, neutral colour. To the colours which formed the only point of variation there was no apparent method of disposal; and no distinction between what occurred in the lekythoi and what occurred in the Phalerons. A bluish-grey powder might be by the side of a pinkish-white one, and any one in a Phaleron might have its exact counterpart in a lekythos. The most individual feature about the powders was their non-adhesiveness. Willett would pour one into his hand, and upon returning it to its jug would find that no residue whatever remained on his palm.

The meaning of the two signs puzzled him, and he wondered why this battery of chemicals was separated so radically from those in glass jars on the shelves of the laboratory proper. "Custodes", "Materia"; that was the Latin for "Guards" and "Materials", respectively - and then there came a flash of memory as to where he had seen that word "Guards" before in connexion with this dreadful mystery. It was, of course, in the recent letter to Dr. Allen purporting to be from old Edwin Hutchinson; and the phrase had read: 'There was no Neede to keep the Guards in Shape and eat'g off their Heads, and it made Much to be founde in Case of Trouble, as you too welle knowe.' What did this signify? But wait - was there not still another reference to "guards" in this matter which he had failed wholly to recall when reading the Hutchinson letter? Back in the old non-secretive days Ward had told him of the Eleazar Smith diary recording the spying of Smith and Weeden on the Curwen farm, and in that dreadful chronicle there had been a mention of conversations overheard before the old wizard betook himself wholly beneath the earth. There had been, Smith and Weeden insisted, terrible colloquies wherein figured Curwen, certain captives of his, and the guards of those captives. Those guards, according to Hutchinson or his avatar, had "eaten their heads off", so that now Dr. Allen did not keep them in shape. And if not in shape, how save as the "salts" to which it appears this wizard band was engaged in reducing as many human bodies or skeletons as they could?

So that was what these lekythoi contained; the monstrous fruit of unhallowed rites and deeds, presumably won or cowed to such submission as to help, when called up by some hellish incantation, in the defence of their blasphemous master or the questioning of those who were not so willing? Willett shuddered at the thought of what he had been pouring in and out of his hands, and for a moment felt an impulse to flee in panic from that cavern of hideous shelves with their silent and perhaps watching sentinels. Then he thought of the "Materia" - in the myriad Phaleron jugs on the other side of the room. Salts too - and if not the salts of "guards", then the salts of what? God! Could it be possible that here lay
the mortal relics of half the titan thinkers of all the ages; snatched by supreme ghouls from crypts where the world thought them safe, and subject to the beck and call of madmen who sought to drain their knowledge for some still wilder end whose ultimate effect would concern, as poor Charles had hinted in his frantic note, "all civilisation, all natural law, perhaps even the fate of the solar system and the universe"? And Marinus Bicknell Willett had sifted their dust through his hands!

Then he noticed a small door at the further end of the room, and calmed himself enough to approach it and examine the crude sign chiselled above. It was only a symbol, but it filled him with vague spiritual dread; for a morbid, dreaming friend of his had once drawn it on paper and told him a few of the things it means in the dark abyss of sleep. It was the sign of Koth, that dreamers see fixed above the archway of a certain black tower standing alone in twilight - and Willett did not like what his friend Randolph Carter had said of its powers. But a moment later he forgot the sign as he recognised a new acrid odour in the stench-filled air. This was a chemical rather than animal smell, and came clearly from the room beyond the door. And it was, unmistakably, the same odour which had saturated Charles Ward's clothing on the day the doctors had taken him away. So it was here that the youth had been interrupted by the final summons? He was wiser that old Joseph Curwen, for he had not resisted. Willett, boldly determined to penetrate every wonder and nightmare this nether realm might contain, seized the small lamp and crossed the threshold. A wave of nameless fright rolled out to meet him, but he yielded to no whim and deferred to no intuition. There was nothing alive here to harm him, and he would not be stayed in his piercing of the eldritch cloud which engulfed his patient.

The room beyond the door was of medium size, and had no furniture save a table, a single chair, and two groups of curious machines with clamps and wheels, which Willett recognised after a moment as mediaeval instruments of torture. On one side of the door stood a rack of savage whips, above which were some shelves bearing empty rows of shallow pedestalled cups of lead shaped like Grecian kylikes. On the other side was the table; with a powerful Argand lamp, a pad and pencil, and two of the stoppered lekythoi from the shelves outside set down at irregular places as if temporarily or in haste. Willett lighted the lamp and looked carefully at the pad, to see what notes Ward might have been jotting down when interrupted; but found nothing more intelligible than the following disjointed fragments in that crabbed Curwen chirography, which shed no light on the case as a whole:

'B. dy'd not. Escap'd into walls and founde Place below.'
'Sawe olde V. saye ye Sabaoth and learnt yee Way.'
'Rais'd Yog-Sothoth thrice and was ye nexte Day deliver'd.'
'F. soughte to wipe out all know'g howe to raise Those from Outside.'

As the strong Argand blaze lit up the entire chamber the doctor saw that the wall opposite the door, between the two groups of torturing appliances in the corners, was covered with pegs from which hung a set of shapeless-looking robes of a rather dismal yellowish-white. But far more interesting were the two vacant walls, both of which were thickly covered with mystic symbols and formulae roughly chiselled in the smooth dressed stone. The damp floor also bore marks of carving; and with but little difficulty Willett deciphered a huge pentagram in the centre, with a plain circle about three feet wide half
way between this and each corner. In one of these four circles, near where a yellowish robe had been flung carelessly down, there stood a shallow kylix of the sort found on the shelves above the whip-rack; and just outside the periphery was one of the Phaleron jugs from the shelves in the other room, its tag numbered 118. This was unstoppered, and proved upon inspection to be empty; but the explorer saw with a shiver that the kylix was not. Within its shallow area, and saved from scattering only by the absence of wind in this sequestered cavern, lay a small amount of a dry, dull-greenish efflorescent powder which must have belonged in the jug; and Willett almost reeled at the implications that came sweeping over him as he correlated little by little the several elements and antecedents of the scene. The whips and the instruments of torture, the dust or salts from the jug of "Materia", the two lekythoi from the "Custodes" shelf, the robes, the formulae on the walls, the notes on the pad, the hints from letters and legends, and the thousand glimpses, doubts, and suppositions which had come to torment the friends and parents of Charles Ward - all these engulfed the doctor in a tidal wave of horror as he looked at that dry greenish powder outspread in the pedestalled leaden kylix on the floor.

With an effort, however, Willett pulled himself together and began studying the formulae chiselled on the walls. From the stained and incrusted letters it was obvious that they were carved in Joseph Curwen's time, and their text was such as to be vaguely familiar to one who had read much Curwen material or delved extensively into the history of magic. One the doctor clearly recognised as what Mrs. Ward heard her son chanting on that ominous Good Friday a year before, and what an authority had told him was a very terrible invocation addressed to secret gods outside the normal spheres. It was not spelled here exactly as Mrs. Ward had set it down from memory, nor yet as the authority had shewn it to him in the forbidden pages of "Eliphas Levi"; but its identity was unmistakable, and such words as *Sabaoth*, *Metraton*, *Almonsin*, and *Zariatnatmik* sent a shudder of fright through the search who had seen and felt so much of cosmic abomination just around the corner.

This was on the left-hand wall as one entered the room. The right-hand wall was no less thickly inscribed, and Willett felt a start of recognition when he came up the pair of formulae so frequently occurring in the recent notes in the library. They were, roughly speaking, the same; with the ancient symbols of "Dragon's Head" and "Dragon's Tail" heading them as in Ward's scribblings. But the spelling differed quite widely from that of the modern versions, as if old Curwen had had a different way of recording sound, or as if later study had evolved more powerful and perfected variants of the invocations in question. The doctor tried to reconcile the chiselled version with the one which still ran persistently in his head, and found it hard to do. Where the script he had memorised began "Y'ai 'ng'ngah, Yog-Sothoth", this epigraph started out as "Aye, engengah, Yogge-Sothotha"; which to his mind would seriously interfere with the syllabification of the second word.

Ground as the later text was into his consciousness, the discrepancy disturbed him; and he found himself chanting the first of the formulae aloud in an effort to square the sound he conceived with the letters he found carved. Weird and menacing in that abyss of antique blasphemy rang his voice; its accents keyed to a droning sing-song either through the spell of the past and the unknown, or through the hellish example of that dull, godless
wail from the pits whose inhuman cadences rose and fell rhythmically in the distance through the stench and the darkness.

\[
\begin{align*}
Y'AI \ 'NG'NGAH, \\
YOG-SOTHOTH \\
H'EE-L'GEB \\
F'AI \ THRODOG \\
UAAAH!
\end{align*}
\]

But what was this cold wind which had sprung into life at the very outset of the chant? The lamps were sputtering woefully, and the gloom grew so dense that the letters on the wall nearly faded from sight. There was smoke, too, and an acrid odour which quite drowned out the stench from the far-away wells; an odour like that he had smelt before, yet infinitely stronger and more pungent. He turned from the inscriptions to face the room with its bizarre contents, and saw that the kylix on the floor, in which the ominous efflorescent powder had lain, was giving forth a cloud of thick, greenish-black vapour of surprising volume and opacity. That powder - Great God! it had come from the shelf of "Materia" - what was it doing now, and what had started it? The formula he had been chanting - the first of the pair - Dragon's Head, \textit{ascending node} - Blessed Saviour, could it be ...

The doctor reeled, and through his head raced wildly disjointed scraps from all he had seen, heard, and read of the frightful case of Joseph Curwen and Charles Dexter Ward. "I say to you againe, doe not call up Any that you can not put downe ... Have ye Wordes for laying at all times readie, and stopp not to be sure when there is any Doubte of Whom you have ... 3 Talkes with What was therein inhum'd ..." \textit{Mercy of Heaven, what is that shape behind the parting smoke?}

Marinus Bicknell Willett has not hope that any part of his tale will be believed except by certain sympathetic friends, hence he has made no attempt to tell it beyond his most intimate circle. Only a few outsiders have ever heard it repeated, and of these the majority laugh and remark that the doctor surely is getting old. He has been advised to take a long vacation and to shun future cases dealing with mental disturbance. But Mr. Ward knows that the veteran physician speaks only a horrible truth. Did not he himself see the noisome aperture in the bungalow cellar? Did not Willett send him home overcome and ill at eleven o'clock that portentous morning? Did he not telephone the doctor in vain that evening, and again the next day, and had he not driven to the bungalow itself on that following noon, finding his friend unconscious but unharmed on one of the beds upstairs? Willett had been breathing stertorously, and opened his eyes slowly when Mr. Ward gave him some brandy fetched from the car. Then he shuddered and screamed, crying out, 'That beard... those eyes... God, who are you?' A very strange thing to say to a trim, blue-eyed, clean-shaven gentleman whom he had known from the latter's boyhood.

In the bright noon sunlight the bungalow was unchanged since the previous morning. Willett's clothing bore no disarrangement beyond certain smudges and worn places at the
knees, and only a faint acrid odour reminded Mr. Ward of what he had smelt on his son
that day he was taken to the hospital. The doctor's flashlight was missing, but his valise
was safely there, as empty as when he had brought it. Before indulging in any
explanations, and obviously with great moral effort, Willett staggered dizzily down to the
ceiling and tried the fateful platform before the tubs. It was unyielding. Crossing to where
he had left his yet unused tool satchel the day before, he obtained a chisel and began to
pry up the stubborn planks one by one. Underneath the smooth concrete was still visible,
but of any opening or perforation there was no longer a trace. Nothing yawned this time
to sicken the mystified father who had followed the doctor downstairs; only the smooth
concrete underneath the planks - no noisome well, no world of subterrene horrors, no
secret library, no Curwen papers, no nightmare pits of stench and howling, no laboratory
or shelves or chiselled formulae, no... Dr. Willett turned pale, and clutched at the younger
man. 'Yesterday,' he asked softly, 'did you see it here ... and smell it?' And when Mr.
Ward, himself transfixed with dread and wonder, found strength to nod an affirmative,
the physician gave a sound half a sigh and half a gasp, and nodded in turn. 'Then I will
tell you', he said.

So for an hour, in the sunniest room they could find upstairs, the physician whispered his
frightful tale to the wondering father. There was nothing to relate beyond the looming up
of that form when the greenish-black vapour from the kylix parted, and Willett was too
tired to ask himself what had really occurred. There were futile, bewildered head-
shakings from both men, and once Mr. Ward ventured a hushed suggestion, 'Do you
suppose it would be of any use to dig?' The doctor was silent, for it seemed hardly fitting
for any human brain to answer when powers of unknown spheres had so vitally
encroached on this side of the Great Abyss. Again Mr. Ward asked, 'But where did it go?
It brought you here, you know, and it sealed up the hole somehow.' And Willett again let
silence answer for him.

But after all, this was not the final phase of the matter. Reaching for his handkerchief
before rising to leave, Dr. Willett's fingers closed upon a piece of paper in his pocket
which had not been there before, and which was companioned by the candles and
matches he had seized in the vanished vault. It was a common sheet, torn obviously from
the cheap pad in that fabulous room of horror somewhere underground, and the writing
upon it was that of an ordinary lead pencil - doubtless the one which had lain beside the
pad. It was folded very carelessly, and beyond the faint acrid scent of the cryptic chamber
bore no print or mark of any world but this. But in the text itself it did indeed reek with
wonder; for here was no script of any wholesome age, but the laboured strokes of
mediaeval darkness, scarcely legible to the laymen who now strained over it, yet having
combinations of symbols which seemed vaguely familiar. The briefly scrawled message
was this, and its mystery lent purpose to the shaken pair, who forthwith walked steadily
out to the Ward car and gave orders to be driven first to a quiet dining place and then to
the John Hay Library on the hill.

At the library it was easy to find good manuals of palaeography, and over these the two
men puzzled till the lights of evening shone out from the great chandelier. In the end they
found what was needed. The letters were indeed no fantastic invention, but the normal
script of a very dark period. They were the pointed Saxon minuscules of the eighth or
ninth century A.D., and brought with them memories of an uncouth time when under a fresh Christian veneer ancient faiths and ancient rites stirred stealthily, and the pale moon of Britain looked sometimes on strange deeds in the Roman ruins of Caerleon and Hexham, and by the towers along Hadrian's crumbling wall. The words were in such Latin as a barbarous age might remember - 'Corvinus necandus est. Cadaver aqua fortis dissolvendum, nec aq(u)a forti dissolvendum. Tace ut potes.' - which may roughly be translated, "Curwen must be killed. The body must be dissolved in aqua fortis, nor must anything be retained. Keep silence as best you are able."

Willett and Mr. Ward were mute and baffled. They had met the unknown, and found that they lacked emotions to respond to it as they vaguely believed they ought. With Willett, especially, the capacity for receiving fresh impressions of awe was well-nigh exhausted; and both men sat still and helpless till the closing of the library forced them to leave. Then they drove listlessly to the Ward mansion in Prospect Street, and talked to no purpose into the night. The doctor rested toward morning, but did not go home. And he was still there Sunday noon when a telephone message came from the detectives who had been assigned to look up Dr. Allen.

Mr. Ward, who was pacing nervously about in a dressing-gown, answered the call in person; and told the men to come up early the next day when he heard their report was almost ready. Both Willett and he were glad that this phase of the matter was taking form, for whatever the origin of the strange minuscule message, it seemed certain the "Curwen" who must be destroyed could be no other than the bearded and spectacled stranger. Charles had feared this man, and had said in the frantic note that he must be killed and dissolved in acid. Allen, moreover, had been receiving letters from the strange wizards in Europe under the name of Curwen, and palpably regarded himself as an avatar of the bygone necromancer. And now from a fresh and unknown source had come a message saying that "Curwen" must be killed and dissolved in acid. The linkage was too unmistakable to be factitious; and besides, was not Allen planning to murder young Ward upon the advice of the creature called Hutchinson? Of course, the letter they had seen had never reached the bearded stranger; but from its text they could see that Allen had already formed plans for dealing with the youth if he grew too "squeamish". Without doubt, Allen must be apprehended; and even if the most drastic directions were not carried out, he must be placed where he could inflict no harm upon Charles Ward.

That afternoon, hoping against hope to extract some gleam of information anent the inmost mysteries from the only available one capable of giving it, the father and the doctor went down the bay and called on young Charles at the hospital. Simply and gravely Willett told him all he had found, and noticed how pale he turned as each description made certain the truth of the discovery. The physician employed as much dramatic effect as he could, and watched for a wincing on Charles's part when he approached the matter of the covered pits and the nameless hybrids within. But Ward did not wince. Willett paused, and his voice grew indignant as he spoke of how the things were starving. He taxed the youth with shocking inhumanity, and shivered when only a sardonic laugh came in reply. For Charles, having dropped as useless his pretence that the crypt did not exist, seemed to see some ghastly jest in this affair; and chuckled hoarsely at something which amused him. Then he whispered, in accents doubly terrible because of
the cracked voice he used, 'Damn 'em, they do eat, but they don't need to! That's the rare part! A month, you say, without food? Lud, Sir, you be modest! D'ye know, that was the joke on poor old Whipple with his virtuous bluster! Kill everything off, would he? Why, damme, he was half-deaf with noise from Outside and never saw or heard aught from the wells! He never dreamed they were there at all! Devil take ye, those cursed things have been howling down there ever since Curwen was done for a hundred and fifty-seven years gone!'

But no more than this could Willett get from the youth. Horrified, yet almost convinced against his will, he went on with his tale in the hope that some incident might startle his auditor out of the mad composure he maintained. Looking at the youth's face, the doctor could not but feel a kind of terror at the changes which recent months had wrought. Truly, the boy had drawn down nameless horrors from the skies. When the room with the formulae and the greenish dust was mentioned, Charles shewed his first sign of animation. A quizzical look overspread his face as he heard what Willett had read on the pad, and he ventured the mild statement that those notes were old ones, of no possible significance to anyone not deeply initiated in the history of magic. But, he added, 'had you but known the words to bring up that which I had out in the cup, you had not been here to tell me this. 'Twas Number 118, and I conceive you would have shook had you looked it up in my list in t'other room. 'Twas never raised by me, but I meant to have it up that day you came to invite me hither.'

Then Willett told of the formula he had spoken and of the greenish-black smoke which had arisen; and as he did so he saw true fear dawn for the first time on Charles Ward's face. 'It came, and you be here alive?' As Ward croaked the words his voice seemed almost to burst free of its trammels and sink to cavernous abysses of uncanny resonance. Willett, gifted with a flash of inspiration, believed he saw the situation, and wove into his reply a caution from a letter he remembered. 'No. 118, you say? But don't forget that stones are all changed now in nine grounds out of ten. You are never sure till you question!' And then, without warning, he drew forth the minuscule message and flashed it before the patient's eyes. He could have wished no stronger result, for Charles Ward fainted forthwith.

All this conversation, of course, had been conducted with the greatest secrecy lest the resident alienists accuse the father and the physician of encouraging a madman in his delusions. Unaided, too, Dr. Willett and Mr. Ward picked up the stricken youth and placed him on the couch. In reviving, the patient mumbled many times of some word which he must get to Orne and Hutchinson at once; so when his consciousness seemed fully back the doctor told him that of those strange creatures at least one was his bitter enemy, and had given Dr. Allen advice for his assassination. This revelation produced no visible effect, and before it was made the visitors could see that their host had already the look of a hunted man. After that he would converse no more, so Willett and the father departed presently; leaving behind a caution against the bearded Allen, to which the youth only replied that this individual was very safely taken care of, and could do no one any harm even if he wished. This was said with an almost evil chuckle very painful to hear. They did not worry about any communications Charles might indite to that
There is, however, a curious sequel to the matter of Orne and Hutchinson, if such indeed the exiled wizards were. Moved by some vague presentiment amidst the horrors of that period, Willett arranged with an international press-cutting bureau for accounts of notable current crimes and accidents in Prague and in eastern Transylvania; and after six months believed that he had found two very significant things amongst the multifarious items he received and had translated. One was the total wrecking of a house by night in the oldest quarter of Prague, and the disappearance of the evil old man called Josef Nadek, who had dwelt in it alone ever since anyone could remember. The other was a titan explosion in the Transylvanian mountains east of Rakus, and the utter extirpation with all its inmates of the ill-regarded Castle Ferenczy, whose master was so badly spoken of by peasants and soldiery alike that he would shortly have been summoned to Bucharest for serious questioning had not this incident cut off a career already so long as to antedate all common memory. Willett maintains that the hand which wrote those minuscules was able to wield stronger weapons as well; and that while Curwen was left to him to dispose of, the writer felt able to find and deal with Orne and Hutchinson itself. If what their fate may have been the doctor strives sedulously not to think.

The following morning Dr. Willett hastened to the Ward home to be present when the detectives arrived. Allen's destruction or imprisonment - or Curwen's if one might regard the tacit claim to reincarnation as valid - he felt must be accomplished at any cost, and he communicated this conviction to Mr. Ward as they sat waiting for the men to come. They were downstairs this time, for the upper parts of the house were beginning to be shunned because of a particular nauseousness which hung indefinitely about; a nauseousness which the older servants connected with some curse left by the vanished Curwen portrait. At nine o'clock the three detectives presented themselves and immediately delivered all that they had to say. They had not, regrettably enough, located the Brava Tony Gomes as they had wished, nor had they found the least trace of Dr. Allen's source or present whereabouts; but they had managed to unearth a considerable number of local impressions and facts concerning the reticent stranger. Allen had struck Pawtuxet people as a vaguely unnatural being, and there was a universal belief that his thick sandy beard was either dyed or false - a belief conclusively upheld by the finding of such a false beard, together with a pair of dark glasses, in his room at the fateful bungalow. His voice, Mr. Ward could well testify from his one telephone conversation, had a depth and hollowness that could not be forgotten; and his glanced seemed malign even through his smoked and horn-rimmed glasses. One shopkeeper, in the course of negotiations, had seen a specimen of his handwriting and declared it was very queer and crabbed; this being confirmed by pencilled notes of no clear meaning found in his room and identified by the merchant. In connexion with the vampirism rumours of the preceding summer, a majority of the gossips believed that Allen rather than Ward was the actual vampire. Statements were also obtained from the officials who had visited the bungalow after the unpleasant incident of the motor truck robbery. They had felt less of the sinister in Dr. Allen, but had recognised him as the dominant figure in the queer shadowy cottage. The
place had been too dark for them to observe him clearly, but they would know him again if they saw him. His beard had looked odd, and they thought he had some slight scar above his dark spectacled right eye. As for the detectives' search of Allen's room, it yielded nothing definite save the beard and glasses, and several pencilled notes in a crabbed writing which Willett at once saw was identical with that shared by the old Curwen manuscripts and by the voluminous recent notes of young Ward found in the vanished catacombs of horror.

Dr. Willett and Mr. Ward caught something of a profound, subtle, and insidious cosmic fear from this data as it was gradually unfolded, and almost trembled in following up the vague, mad thought which had simultaneously reached their minds. The false beard and glasses - the crabbed Curwen penmanship - the old portrait and its tiny scar - and the altered youth in the hospital with such a scar - that deep, hollow voice on the telephone - was it not of this that Mr. Ward was reminded when his son barked forth those pitiable tones to which he now claimed to be reduced? Who had ever seen Charles and Allen together? Yes, the officials had once, but who later on? Was it not when Allen left that Charles suddenly lost his growing fright and began to live wholly at the bungalow? Curwen - Allen - Ward - in what blasphemous and abominable fusion had two ages and two persons become involved? That damnable resemblance of the picture to Charles - had it not used to stare and stare, and follow the boy around the room with its eyes? Why, too, did both Allen and Charles copy Joseph Curwen's handwriting, even when alone and off guard? And then the frightful work of those people - the lost crypt of horrors that had aged the doctor overnight; the starving monsters in the noisome pits; the awful formula which had yielded such nameless results; the message in minuscules found in Willett's pocket; the papers and the letters and all the talk of graves and "salts" and discoveries - whither did everything lead? In the end Mr. Ward did the most sensible thing. Steeling himself against any realisation of why he did it, he gave the detectives an article to be shewn to such Pawtuxet shopkeepers as had seen the portentous Dr. Allen. That article was a photograph of his luckless son, on which he now carefully drew in ink the pair of heavy glasses and the black pointed beard which the men had brought from Allen's room.

For two hours he waited with the doctor in the oppressive house where fear and miasma were slowly gathering as the empty panel in the upstairs library leered and leered and leered. Then the men returned. Yes, The altered photograph was a very passable likeness of Dr. Allen. Mr. Ward turned pale, and Willett wiped a suddenly dampened brow with his handkerchief. Allen - Ward - Curwen - it was becoming too hideous for coherent thought. What had the boy called out of the void, and what had it done to him? What, really, had happened from first to last? Who was this Allen who sought to kill Charles as too "squeamish", and why had his destined victim said in the postscript to that frantic letter that he must be so completely obliterated in acid? Why, too, had the miniscule message, of whose origin no one dared think, said that "Curwen" must be likewise obliterated? What was the change, and when had the final stage occurred? That day when his frantic note was received - he had been nervous all the morning, then there was an alteration. He had slipped out unseen and swaggered boldly in past the men hired to guard him. That was the time, when he was out. But no - had he not cried out in terror as he entered his study - this very room? What had he found there? Or wait - what had found him? That simulacrum which brushed boldly in without having been seen to go - was that
an alien shadow and a horror forcing itself upon a trembling figure which had never gone out at all? Had not the butler spoken of queer noises?

Willett rang for the man and asked him some low-toned questions. It had, surely enough, been a bad business. There had been noises - a cry, a gasp, a choking, and a sort of clattering or creaking or thumping, or all of these. And Mr. Charles was not the same when he stalked out without a word. The butler shivered as he spoke, and sniffed at the heavy air that blew down from some open window upstairs. Terror had settled definitely upon the house, and only the business-like detectives failed to imbibe a full measure of it. Even they were restless, for this case had held vague elements in the background which pleased them not at all. Dr. Willett was thinking deeply and rapidly, and his thoughts were terrible ones. Now and then he would almost break into muttering as he ran over in his head a new, appalling, and increasingly conclusive chain of nightmare happenings.

Then Mr. Ward made a sign that the conference was over, and everyone save him and the doctor left the room. It was noon now, but shadows as of coming night seemed to engulf the phantom-haunted mansion. Willett began talking very seriously to his host, and urged that he leave a great deal of the future investigation to him. There would be, he predicted, certain obnoxious elements which a friend could bear better than a relative. As family physician he must have a free hand, and the first thing he required was a period alone and undisturbed in the abandoned library upstairs, where the ancient overmantel had gathered about itself an aura of noisome horror more intense than when Joseph Curwen's features glanced slyly down from the painted panel.

Mr. Ward, dazed by the flood of grotesque morbidities and unthinkably maddening suggestions that poured in upon him from every side, could only acquiesce; and half an hour later the doctor was locked in the shunned room with the panelling from Olney Court. The father, listening outside, heard fumbling sounds of moving and rummaging as the moments passed; and finally a wrench and a creak, as if a tight cupboard door were being opened. Then there was a muffled cry, a kind of snorting choke, and a hasty slamming of whatever had been opened. Almost at once the key rattled and Willett appeared in the hall, haggard and ghastly, and demanding wood for the real fireplace on the south wall of the room. The furnace was not enough, he said; and the electric log had little practical use. Longing yet not daring to ask questions, Mr. Ward gave the requisite orders and a man brought some stout pine logs, shuddering as he entered the tainted air of the library to place them in the grate. Willett meanwhile had gone up to the dismantled laboratory and brought down a few odds and ends not included in the moving of the July before. They were in a covered basket, and Mr. Ward never saw what they were.

Then the doctor locked himself in the library once more, and by the clouds of smoke which rolled down past the windows from the chimney it was known that he had lighted the fire. Later, after a great rustling of newspapers, that odd wrench and creaking were heard again; followed by a thumping which none of the eavesdroppers liked. Thereafter two suppressed cries of Willett's were heard, and hard upon these came a swishing rustle of indefinable hatefulness. Finally the smoke that the wind beat down from the chimney grew very dark and acrid, and everyone wished that the weather had spared them this choking and venomous inundation of peculiar fumes. Mr. Ward's head reeled, and the servants all clustered together in a knot to watch the horrible black smoke swoop down.
After an age of waiting the vapours seemed to lighted, and half-formless sounds of scraping, sweeping, and other minor operations were heard behind the bolted door. And at last, after the slamming of some cupboard within, Willett made his appearance - sad, pale, and haggard, and bearing the cloth-draped basket he had taken from the upstairs laboratory. He had left the window open, and into that once accursed room was pouring a wealth of pure, wholesome air to mix with a queer new smell of disinfectants. The ancient overmantel still lingered; but it seemed robbed of malignity now, and rose as calm and stately in its white panelling as if it had never borne the picture of Joseph Curwen. Night was coming on, yet this time its shadows held no latent fright, but only a gentle melancholy. Of what he had done the doctor would never speak. To Mr. Ward he said, 'I can answer no questions, but I will say that there are different kinds of magic. I have made a great purgation, and those in this house will sleep the better for it.'

That Dr. Willett's "purgation" had been an ordeal almost as nerve-racking in its way as his hideous wandering in the vanished crypt is shewn by the fact that the elderly physician gave out completely as soon as he reached home that evening. For three days he rested constantly in his room, though servants later muttered something about having heard him after midnight on Wednesday, when the outer door softly opened and closed with phenomenal softness. Servants' imaginations, fortunately, are limited, else comment might have been excited by an item in Thursday's *Evening Bulletin* which ran as follows:

**North End Ghouls Again Active**

After a lull of ten months since the dastardly vandalism in the Weeden lot at the North Burial Ground, a nocturnal prowler was glimpsed early this morning in the same cemetery by Robert Hart, the night watchman. Happening to glance for a moment from his shelter at about 2 a.m., Hart observed the glow of a lantern or pocket torch not far to the northwest, and upon opening the door detected the figure of a man with a trowel very plainly silhouetted against a nearby electric light. At once starting in pursuit, he saw the figure dart hurriedly toward the main entrance, gaining the street and losing himself among the shadows before approach or capture was possible.

Like the first of the ghouls active during the past year, this intruder had done no real damage before detection. A vacant part of the Ward lot shewed signs of a little superficial digging, but nothing even nearly the size of a grave had been attempted, and no previous grave had been disturbed.

Hart, who cannot describe the prowler except as a small man probably having a full beard, inclines to the view that all three of the digging incidents have a common source; but police from the Second Station think otherwise on account of the savage nature of the second incident, where an ancient coffin was removed and its headstone violently shattered.
The first of the incidents, in which it is thought an attempt to bury something was frustrated, occurred a year ago last March, and has been attributed to bootleggers seeking a cache. It is possible, says Sergt. Riley, that this third affair is of similar nature. Officers at the Second Station are taking especial pains to capture the gang of miscreants responsible for these repeated outrages.

All day Thursday Dr. Willett rested as if recuperating from something past or nerving himself for something to come. In the evening he wrote a note to Mr. Ward, which was delivered the next morning and which caused the half-dazed parent to ponder long and deeply. Mr. Ward had not been able to go down to business since the shock of Monday with its baffling reports and its sinister "purgation", but he found something calming about the doctor's letter in spite of the despair it seemed to promise and the fresh mysteries it seemed to evoke.

10 Barnes St.,
Providence, R. I.

April 12, 1928.

Dear Theodore:-

I feel that I must say a word to you before doing what I am going to do tomorrow. It will conclude the terrible business we have been going through (for I feel that no spade is ever likely to reach that monstrous place we know of), but I'm afraid it won't set your mind at rest unless I expressly assure you how very conclusive it is.

You have known me ever since you were a small boy, so I think you will not distrust me when I hint that some matters are best left undecided and unexplored. It is better that you attempt no further speculation as to Charles's case, and almost imperative that you tell his mother nothing more than she already suspects. When I call on you tomorrow Charles will have escaped. That is all which need remain in anyone's mind. He was mad, and he escaped. You can tell his mother gently and gradually about the mad part when you stop sending the typed notes in his name. I'd advise you to join her in Atlantic City and take a rest yourself. God knows you need one after this shock, as I do myself. I am going South for a while to calm down and brace up.

So don't ask me any questions when I call. It may be that something will go wrong, but I'll tell you if it does. I don't think it will. There will be nothing more to worry about, for Charles will be very, very safe. He is now - safer than you dream. You need hold no fears about Allen, and who or what he is. He forms as much a part of the past as Joseph Curwen's picture, and when I ring your doorbell you may feel certain that there is no such person. And what wrote that minuscule message will never trouble you or yours.
But you must steel yourself to melancholy, and prepare your wife to do the same. I must tell you frankly that Charles's escape will not mean his restoration to you. He has been afflicted with a peculiar disease, as you must realise from the subtle physical as well as mental changes in him, and you must not hope to see him again. Have only this consolation - that he was never a fiend or even truly a madman, but only an eager, studious, and curious boy whose love of mystery and of the past was his undoing. He stumbled on things no mortal ought ever to know, and reached back through the years as no one ever should reach; and something came out of those years to engulf him.

And now comes the matter in which I must ask you to trust me most of all. For there will be, indeed, no uncertainty about Charles's fate. In about a year, say, you can if you wish devise a suitable account of the end; for the boy will be no more. You can put up a stone in your lot at the North Burial Ground exactly ten feet west of your father's and facing the same way, and that will mark the true resting-place of your son. Nor need you fear that it will mark any abnormality or changeling. The ashes in that grave will be those of your own unaltered bone and sinew - of the real Charles Dexter Ward whose mind you watched from infancy - the real Charles with the olive-mark on his hip and without the black witch-mark on his chest or the pit on his forehead. The Charles who never did actual evil, and who will have paid with his life for his "squeamishness".

That is all. Charles will have escaped, and a year from now you can put up his stone. Do not question me tomorrow. And believe that the honour of your ancient family remains untainted now, as it has been at all times in the past.

With profoundest sympathy, and exhortations to fortitude, calmness, and resignation, I am ever

Sincerely your friend,

Marinus B. Willett.

So on the morning of Friday, April 13, 1928, Marinus Bicknell Willett visited the room of Charles Dexter Ward at Dr. Waite's private hospital on Conanicut Island. The youth, though making no attempt to evade his caller, was in a sullen mood; and seemed disinclined to open the conversation which Willett obviously desired. The doctor's discovery of the crypt and his monstrous experience therein had of course created a new source of embarrassment, so that both hesitated perceptibly after the interchange of a few strained formalities. Then a new element of constraint crept in, as Ward seemed to read behind the doctor's mask-like face a terrible purpose which had never been there before. The patient quailed, conscious that since the last visit there had been a change whereby the solicitous family physician had given place to the ruthless and implacable avenger.

Ward actually turned pale, and the doctor was the first to speak. 'More,' he said, 'has been found out, and I must warn you fairly that a reckoning is due.'
'Digging again, and coming upon more poor starving pets?' was the ironic reply. It was evident that the youth meant to shew bravado to the last.

'No,' Willett slowly rejoined, 'this time I did not have to dig. We have had men looking up Dr. Allen, and they found the false beard and spectacles in the bungalow.'

'Excellent,' commented the disquieted host in an effort to be wittily insulting, 'and I trust they proved more becoming than the beard and glasses you now have on!'

'They would become you very well,' came the even and studied response, 'as indeed they seem to have done.'

As Willett said this, it almost seemed as though a cloud passed over the sun; though there was no change in the shadows on the floor. Then Ward ventured:

'And is this what asks so hotly for a reckoning? Suppose a man does find it now and then useful to be twofold?'

'No', said Willett gravely, 'again you are wrong. It is no business of mine if any man seeks duality; provided he has any right to exist at all, and provided he does not destroy what called him out of space.'

Ward now started violently. 'Well, Sir, what have ye found, and what d'ye want of me?'

The doctor let a little time elapse before replying, as if choosing his words for an effective answer.

'I have found', he finally intoned, 'something in a cupboard behind an ancient overmantel where a picture once was, and I have burned it and buried the ashes where the grave of Charles Dexter Ward ought to be.'

The madman choked and sprang from the chair in which he had been sitting:

'Damn ye, who did ye tell - and who'll believe it was he after these two full months, with me alive? What d'ye mean to do?'

Willett, though a small man, actually took on a kind of judicial majesty as he calmed the patient with a gesture.

'I have told no one. This is no common case - it is a madness out of time and a horror from beyond the spheres which no police or lawyers or courts or alienists could ever fathom or grapple with. Thank God some chance has left inside me the spark of imagination, that I might not go astray in thinking out this thing. You cannot deceive me, Joseph Curwen, for I know that your accursed magic is true!'

'I know how you wove the spell that brooded outside the years and fastened on your double and descendant; I know how you drew him into the past and got him to raise you up from your detestable grave; I know how he kept you hidden in his laboratory while you studied modern things and roved abroad as a vampire by night, and how you later shewed yourself in beard and glasses that no one might wonder at your godless likeness
to him; I know what you resolved to do when he balked at your monstrous rifling of the world's tombs, and at what you planned afterward, and I know how you did it.'

'You left off your beard and glasses and fooled the guards around the house. They thought it was he who went in, and they thought it was he who came out when you had strangled and hidden him. But you hadn't reckoned on the different contents of two minds. You were a fool, Joseph Curwen, to fancy that a mere visual identity would be enough. Why didn't you think of the speech and the voice and the handwriting? It hasn't worked, you see, after all. You know better than I who or what wrote that message in minuscules, but I will warn you it was not written in vain. There are abominations and blasphemies which must be stamped out, and I believe that the writer of those words will attend to Orne and Hutchinson. One of those creatures wrote you once, "do not call up any that you can not put down". You were undone once before, perhaps in that very way, and it may be that your own evil magic will undo you all again. Curwen, a man can't tamper with Nature beyond certain limits, and every horror you have woven will rise up to wipe you out.'

But here the doctor was cut short by a convulsive cry from the creature before him. Hopelessly at bay, weaponless, and knowing that any show of physical violence would bring a score of attendants to the doctor's rescue, Joseph Curwen had recourse to his one ancient ally, and began a series of cabalistic motions with his forefingers as his deep, hollow voice, now unconcealed by feigned hoarseness, bellowed out the opening words of a terrible formula.

'PER ADONAI ELOIM, ADONAI JEHOVA, ADONAI SABAOTH, METRATON ...'

But Willett was too quick for him. Even as the dogs in the yard outside began to howl, and even as a chill wind sprang suddenly up from the bay, the doctor commenced the solemn and measured intonation of that which he had meant all along to recite. An eye for an eye - magic for magic - let the outcome shew how well the lesson of the abyss had been learned! So in a clear voice Marinus Bicknell Willett began the second of that pair of formulae whose first had raised the writer of those minuscules - the cryptic invocation whose heading was the Dragon's Tail, sign of the descending node -

OGTHROD AI'F
GEB'L-EE'H
YOG-SOTHOTH
'NGAH'NG AI'Y
ZHRO!

At the very first word from Willett's mouth the previously commenced formula of the patient stopped short. Unable to speak, the monster made wild motions with his arms until they too were arrested. When the awful name of Yog-Sothoth was uttered, the hideous change began. It was not merely a dissolution, but rather a transformation or recapitulation; and Willett shut his eyes lest he faint before the rest of the incantation could be pronounced.
But he did not faint, and that man of unholy centuries and forbidden secrets never troubled the world again. The madness out of time had subsided, and the case of Charles Dexter Ward was closed. Opening his eyes before staggering out of that room of horror, Dr. Willett saw that what he had kept in memory had not been kept amiss. There had, as he had predicted, been no need for acids. For like his accursed picture a year before, Joseph Curwen now lay scattered on the floor as a thin coating of fine bluish-grey dust.
The Shadow Out of Time

by H. P. Lovecraft

Written Nov 1934-Mar 1935

Published June 1936 in Astounding Stories, Vol. 17, No. 4, p. 110-54.

I

After twenty-two years of nightmare and terror, saved only by a desperate conviction of the mythical source of certain impressions, I am unwilling to vouch for the truth of that which I think I found in Western Australia on the night of 17-18 July 1935. There is reason to hope that my experience was wholly or partly an hallucination - for which, indeed, abundant causes existed. And yet, its realism was so hideous that I sometimes find hope impossible.

If the thing did happen, then man must be prepared to accept notions of the cosmos, and of his own place in the seething vortex of time, whose merest mention is paralysing. He must, too, be placed on guard against a specific, lurking peril which, though it will never engulf the whole race, may impose monstrous and unguessable horrors upon certain venturesome members of it.

It is for this latter reason that I urge, with all the force of my being, final abandonment of all the attempts at unearthing those fragments of unknown, primordial masonry which my expedition set out to investigate.

Assuming that I was sane and awake, my experience on that night was such as has befallen no man before. It was, moreover, a frightful confirmation of all I had sought to dismiss as myth and dream. Mercifully there is no proof, for in my fright I lost the awesome object which would - if real and brought out of that noxious abyss - have formed irrefutable evidence.

When I came upon the horror I was alone - and I have up to now told no one about it. I could not stop the others from digging in its direction, but chance and the shifting sand have so far saved them from finding it. Now I must formulate some definite statement - not only for the sake of my own mental balance, but to warn such others as may read it seriously.

These pages - much in whose earlier parts will be familiar to close readers of the general and scientific press - are written in the cabin of the ship that is bringing me home. I shall give them to my son, Professor Wingate Peaslee of Miskatonic University - the only member of my family who stuck to me after my queer amnesia of long ago, and the man best informed on the inner facts of my case. Of all living persons, he is least likely to ridicule what I shall tell of that fateful night.
I did not enlighten him orally before sailing, because I think he had better have the revelation in written form. Reading and re-reading at leisure will leave with him a more convincing picture than my confused tongue could hope to convey.

He can do anything that he thinks best with this account - showing it, with suitable comment, in any quarters where it will be likely to accomplish good. It is for the sake of such readers as are unfamiliar with the earlier phases of my case that I am prefacing the revelation itself with a fairly ample summary of its background.

My name is Nathaniel Wingate Peaslee, and those who recall the newspaper tales of a generation back - or the letters and articles in psychological journals six or seven years ago - will know who and what I am. The press was filled with the details of my strange amnesia in 1908-13, and much was made of the traditions of horror, madness, and witchcraft which lurked behind the ancient Massachusetts town then and now forming my place of residence. Yet I would have it known that there is nothing whatever of the mad or sinister in my heredity and early life. This is a highly important fact in view of the shadow which fell so suddenly upon me from outside sources.

It may be that centuries of dark brooding had given to crumbling, whisper-haunted Arkham a peculiar vulnerability as regards such shadows - though even this seems doubtful in the light of those other cases which I later came to study. But the chief point is that my own ancestry and background are altogether normal. What came, came from somewhere else - where I even now hesitate to assert in plain words.

I am the son of Jonathan and Hannah (Wingate) Peaslee, both of wholesome old Haverhill stock. I was born and reared in Haverhill - at the old homestead in Boardman Street near Golden Hill - and did not go to Arkham till I entered Miskatonic University as instructor of political economy in 1895.

For thirteen years more my life ran smoothly and happily. I married Alice Keezar of Haverhill in 1896, and my three children, Robert, Wingate and Hannah were born in 1898, 1900, and 1903, respectively. In 1898 I became an associate professor, and in 1902 a full professor. At no time had I the least interest in either occultism or abnormal psychology.

It was on Thursday, 14 May 1908, that the queer amnesia came. The thing was quite sudden, though later I realized that certain brief, glimmering visions of several, hours previous - chaotic visions which disturbed me greatly because they were so unprecedented - must have formed premonitory symptoms. My head was aching, and I had a singular feeling - altogether new to me - that some one else was trying to get possession of my thoughts.

The collapse occurred about 10.20 A.M., while I was conducting a class in Political Economy VI - history and present tendencies of economics - for juniors and a few sophomores. I began to see strange shapes before my eyes, and to feel that I was in a grotesque room other than the classroom.

My thoughts and speech wandered from my subject, and the students saw that something was gravely amiss. Then I slumped down, unconscious, in my chair, in a stupor from
which no one could arouse me. Nor did my rightful faculties again look out upon the
daylight of our normal world for five years, four months, and thirteen days.

It is, of course, from others that I have learned what followed. I showed no sign of
consciousness for sixteen and a half hours though removed to my home at 27 Crane
Street, and given the best of medical attention.

At 3 A.M. May my eyes opened and began to speak and my family were thoroughly
frightened by the trend of my expression and language. It was clear that I had no
remembrance of my identity and my past, though for some reason seemed anxious to
conceal his lack of knowledge. My eyes glazed strangely at the persons around me, and
the flections of my facial muscles were altogether unfamiliar.

Even my speech seemed awkward and foreign. I used my vocal organs clumsily and
gropingly, and my diction had a curiously stilted quality, as if I had laboriously learned
the English language from books. The pronunciation was barbarously alien, whilst the
idiom seemed to include both scraps of curious archaism and expressions of a wholly
incomprehensible cast.

Of the latter, one in particular was very potently - even terrifiedly - recalled by the
youngest of the physicians twenty years afterward. For at that late period such a phrase
began to have an actual currency - first in England and then in the United States - and
though of much complexity and indisputable newness, it reproduced in every least
particular the mystifying words of the strange Arkham patient of 1908.

Physical strength returned at once, although I required an odd amount of re-education in
the use of my hands, legs, and bodily apparatus in general. Because of this and other
handicaps inherent in the mnemonic lapse, I was for some time kept under strict medical
care.

When I saw that my attempts to conceal the lapse had failed, I admitted it openly, and
became eager for information of all sorts. Indeed, it seemed to the doctors that I lost
interest in my proper personality as soon as I found the case of amnesia accepted as a
natural thing.

They noticed that my chief efforts were to master certain points in history, science, art,
language, and folklore - some of them tremendously abstruse, and some childishly simple
- which remained, very oddly in many cases, outside my consciousness.

At the same time they noticed that I had an inexplicable command of many almost
unknown sorts of knowledge - a command which I seemed to wish to hide rather than
display. I would inadvertently refer, with casual assurance, to specific events in dim ages
outside of the range of accepted history - passing off such references as a jest when I saw
the surprise they created. And I had a way of speaking of the future which two or three
times caused actual fright.

These uncanny flashes soon ceased to appear, though some observers laid their
vanishment more to a certain furtive caution on my part than to any waning of the strange
knowledge behind them. Indeed, I seemed anomalously avid to absorb the speech,
customs, and perspectives of the age around me; as if I were a studious traveller from a far, foreign land.

As soon as permitted, I haunted the college library at all hours; and shortly began to arrange for those odd travels, and special courses at American and European Universities, which evoked so much comment during the next few years.

I did not at any time suffer from a lack of learned contacts, for my case had a mild celebrity among the psychologists of the period. I was lectured upon as a typical example of secondary personality - even though I seemed to puzzle the lecturers now and then with some bizarre symptoms or some queer trace of carefully veiled mockery.

Of real friendliness, however, I encountered little. Something in my aspect and speech seemed to excite vague fears and aversions in every one I met, as if I were a being infinitely removed from all that is normal and healthful. This idea of a black, hidden horror connected with incalculable gulfs of some sort of distance was oddly widespread and persistent.

My own family formed no exception. From the moment of my strange waking my wife had regarded me with extreme horror and loathing, vowing that I was some utter alien usurping the body of her husband. In 1910 she obtained a legal divorce, nor would she ever consent to see me even after my return to normality in 1913. These feelings were shared by my elder son and my small daughter, neither of whom I have ever seen since.

Only my second son, Wingate, seemed able to conquer the terror and repulsion which my change aroused. He indeed felt that I was a stranger, but though only eight years old held fast to a faith that my proper self would return. When it did return he sought me out, and the courts gave me his custody. In succeeding years he helped me with the studies to which I was driven, and today, at thirty-five, he is a professor of psychology at Miskatonic.

But I do not wonder at the horror caused - for certainly, the mind, voice, and facial expression of the being that awakened on 15 May 1908, were not those of Nathaniel Wingate Peasteel.

I will not attempt to tell much of my life from 1908 to 1913, since readers may glean I the outward essentials - as I largely had to do - from files of old newspapers and scientific journals.

I was given charge of my funds, and spent them slowly and on the whole wisely, in travel and in study at various centres of learning. My travels, however, were singular in the extreme, involving long visits to remote and desolate places.

In 1909 I spent a month in the Himalayas, and in 1911 roused much attention through a camel trip into the unknown deserts of Arabia. What happened on those journeys I have never been able to learn.

During the summer of 1912 I chartered a ship and sailed in the Arctic, north of Spitzbergen, afterward showing signs of disappointment.
Later in that year I spent weeks - alone beyond the limits of previous or subsequent exploration in the vast limestone cavern systems of western Virginia - black labyrinths so complex that no retracing of my steps could even be considered.

My sojourns at the universities were marked by abnormally rapid assimilation, as if the secondary personality had an intelligence enormously superior to my own. I have found, also, that my rate of reading and solitary study was phenomenal. I could master every detail of a book merely by glancing over it as fast as I could turn the leaves; while my skill at interpreting complex figures in an instant was veritably awesome.

At times there appeared almost ugly reports of my power to influence the thoughts and acts of others, though I seemed to have taken care to minimize displays of this faculty.

Other ugly reports concerned my intimacy with leaders of occultist groups, and scholars suspected of connection with nameless bands of abhorrent elder-world hierophants. These rumours, though never proved at the time, were doubtless stimulated by the known tenor of some of my reading - for the consultation of rare books at libraries cannot be effected secretly.

There is tangible proof - in the form of marginal notes - that I went minutely through such things as the Comte d'Erlette's *Cultes des Goules*, Ludvig Prinn's *De Vermis Mysteriis*, the *Unaussprechlichen Kulten* of von Junzt, the surviving fragments of the puzzling *Book of Eibon*, and the dreaded *Necronomicon* of the mad Arab Abdul Alhazred. Then, too, it is undeniable that a fresh and evil wave of underground cult activity set about the time of my odd mutation.

In the summer of 1913 I began to display signs of ennui and flagging interest, and to hint to various associates that a change might soon be expected in me. I spoke of returning memories of my earlier life - though most auditors judged me insincere, since all the recollections I gave were casual, and such as might have been learned from my old private papers.

About the middle of August I returned to Arkham and re-opened my long-closed house in Crane Street. Here I installed a mechanism of the most curious aspect, constructed piecemeal by different makers of scientific apparatus in Europe and America, and guarded carefully from the sight of any one intelligent enough to analyse it.

Those who did see it - a workman, a servant, and the new housekeeper - say that it was a queer mixture of rods, wheels, and mirrors, though only about two feet tall, one foot wide, and one foot thick. The central mirror was circular and convex. All this is borne out by such makers of parts as can be located.

On the evening of Friday, 26 September, I dismissed the housekeeper and the maid until noon of the next day. Lights burned in the house till late, and a lean, dark, curiously foreign-looking man called in an automobile.

It was about one A.M. that the lights were last seen. At 2.15 A.M. a policeman observed the place in darkness, but the stranger's motor still at the curb. By 4 o'clock the motor was certainly gone.
It was at 6 o'clock that a hesitant, foreign voice on the telephone asked Dr Wilson to call at my house and bring me out of a peculiar faint. This call - a long-distance one - was later traced to a public booth in the North Station in Boston, but no sign of the lean foreigner was ever unearthed.

When the doctor reached my house he found me unconscious in the sitting room - in an easy-chair with a table drawn up before it. On the polished top were scratches showing where some heavy object had rested. The queer machine was gone, nor was anything afterward heard of it. Undoubtedly the dark, lean foreigner had taken it away.

In the library grate were abundant ashes, evidently left from the burning of the every remaining scrap of paper on which I had written since the advent of the amnesia. Dr Wilson found my breathing very peculiar, but after a hypodermic injection it became more regular.

At 11.15 A.M., 27 September, I stirred vigorously, and my hitherto masklike face began to show signs of expression. Dr Wilson remarked that the expression was not that of my secondary personality, but seemed much like that of my normal self. About 11.30 I muttered some very curious syllables - syllables which seemed unrelated to any human speech. I appeared, too, to struggle against something. Then, just afternoon - the housekeeper and the maid having meanwhile returned - I began to mutter in English.

"- of the orthodox economists of that period, Jevons typifies the prevailing trend toward scientific correlation. His attempt to link the commercial cycle of prosperity and depression with the physical cycle of the solar spots forms perhaps the apex of -"

Nathaniel Wingate Peaslee had come back - a spirit in whose time scale it was still Thursday morning in 1908, with the economics class gazing up at the battered desk on the platform.

II

My reabsorption into normal life was a painful and difficult process. The loss of over five years creates more complications than can be imagined, and in my case there were countless matters to be adjusted.

What I heard of my actions since 1908 astonished and disturbed me, but I tried to view the matter as philosophically as I could. At last, regaining custody of my second son, Wingate, I settled down with him in the Crane Street house and endeavoured to resume my teaching - my old professorship having been kindly offered me by the college.

I began work with the February, 1914, term, and kept at it just a year. By that time I realized how badly my experience had shaken me. Though perfectly sane - I hoped - and with no flaw in my original personality, I had not the nervous energy of the old days. Vague dreams and queer ideas continually haunted me, and when the outbreak of the World War turned my mind to history I found myself thinking of periods and events in the oddest possible fashion.
My conception of *time*, my ability to distinguish between consecutiveness and simultaneousness - seemed subtly disordered so that I formed chimerical notions about living in one age and casting one's mind all over eternity for knowledge of past and future ages.

The war gave me strange impressions of remembering some of its far-off consequences - as if I knew how it was coming out and could look *back* upon it in the light of future information. All such quasi-memories were attended with much pain, and with a feeling that some artificial psychological barrier was set a against them.

When I diffidently hinted to others about my impressions I met with varied responses. Some persons looked uncomfortably at me, but men in the mathematics department spoke of new developments in those theories of relativity - then discussed only in learned circles - which were later to become so famous. Dr. Albert Einstein, they said, was rapidly reducing time to the status of a mere dimension.

But the dreams and disturbed feelings gained on me, so that I had to drop my regular work in 1915. Certainly the impressions were taking an annoying shape - giving me the persistent notion that my amnesia had formed some unholy sort of exchange; that the secondary personality had indeed had suffered displacement. been an in-

Thus I was driven to vague and fright speculations concerning the whereabouts of my true self during the years that another had held my body. The curious knowledge and strange conduct of my body's late tenant troubled me more and more as I learned further details from persons, papers, and magazines.

Queernesses that had baffled others seemed to harmonize terribly with some background of black knowledge which festered in the chasms of my subconscious. I began to search feverishly for every scrap of information bearing on the studies and travels of that other one during the dark years.

Not all of my troubles were as semi-abstract as this. There were the dreams - and these seemed to grow in vividness and concreteness. Knowing how most would regard them, I seldom mentioned them to anyone but my son or certain trusted psychologists, but eventually I commenced a scientific study of other cases in order to see how typical or nontypical such visions might be among amnesia victims.

My results, aided by psychologists, historians, anthropologists, and mental specialists of wide experience, and by a study that included all records of split personalities from the days of daemonic-possession legends to the medically realistic present, at first bothered me more than they consoled me.

I soon found that my dreams had, indeed, no counterpart in the overwhelming bulk of true amnesia cases. There remained, however, a tiny residue of accounts which for years baffled and shocked me with their parallelism to my own experience. Some of them were bits of ancient folklore; others were case histories in the annals of medicine; one or two were anecdotes obscurely buried in standard histories.
It thus appeared that, while my special kind of affliction was prodigiously rare, instances of it had occurred at long intervals ever since the beginning of men's annals. Some centuries might contain one, two, or three cases, others none - or at least none whose record survived.

The essence was always the same - a person of keen thoughtfulness seized a strange secondary life and leading for a greater or lesser period an utterly alien existence typified at first by vocal and bodily awkwardness, and later by a wholesale acquisition of scientific, historic, artistic, and anthropologic knowledge; an acquisition carried on with feverish zest and with a wholly abnormal absorptive power. Then a sudden return of rightful consciousness, intermittently plagued ever after with vague unplaceable dreams suggesting fragments of some hideous memory elaborately blotted out.

And the close resemblance of those nightmares to my own - even in some of the smallest particulars - left no doubt in my mind of their significantly typical nature. One or two of the cases had an added ring of faint, blasphemous familiarity, as if I had heard of them before through some cosmic channel too morbid and frightful to contemplate. In three instances there was specific mention of such an unknown machine as had been in my house before the second change.

Another thing that worried me during my investigation was the somewhat greater frequency of cases where a brief, elusive glimpse of the typical nightmares was afforded to persons not visited well-defined amnesia.

These persons were largely of mediocre mind or less - some so primitive that they could scarcely be thought of as vehicles for abnormal scholarship and preternatural mental acquisitions. For a second they would be fired with alien force - then a backward lapse, and a thin, swift-fading memory of unhuman horrors.

There had been at least three such cases during the past half century - one only fifteen years before. Had something been groping blindly through time from some unsuspected abyss in Nature? Were these faint cases monstrous, sinister experiments of a kind and authorship utterly beyond same belief?

Such were a few of the forlorn speculations of my weaker hours - fancies abetted by myths which my studies uncovered. For I could not doubt but that certain persistent legends of immemorial antiquity, apparently unknown to the victims and physicians connected with recent amnesia cases, formed a striking and awesome elaboration of memory lapses such as mine.

Of the nature of the dreams and impressions which were growing so clamorous I still almost fear to speak. They seemed to savor of madness, and at times I believed I was indeed going mad. Was there a special type of delusion afflicting those who had suffered lapses of memory? Conceivably, the efforts of the subconscious mind to fill up a perplexing blank with pseudo-memories might give rise to strange imaginative vagaries.

This indeed - though an alternative folklore theory finally seemed to me more plausible - was the belief of many of the alienists who helped me in my search for parallel cases, and who shared my puzzlement at the exact resemblances sometimes discovered.
They did not call the condition true insanity, but classed it rather among neurotic
disorders. My course in trying to track down and analyze it, instead of vainly seeking to
dismiss or forget it, they heartily endorsed as correct according to the best psychological
principles. I especially valued the advice of such physicians as had studied me during my
possession by the other personality.

My first disturbances were not visual at all, but concerned the more abstract matters
which I have mentioned. There was, too, a feeling of profound and inexplicable horror
concerning myself. I developed a queer fear of seeing my own form, as if my eyes would
find it something utterly alien and inconceivably abhorrent.

When I did glance down and behold the familiar human shape in quiet grey or blue
clothing, I always felt a curious relief, though in order to gain this relief I had to conquer
an infinite dread. I shunned mirrors as much as possible, and was always shaved at the
barber's.

It was a long time before I correlated any of these disappointed feelings with the fleeting,
visual impressions which began to develop. The first such correlation had to do with the
odd sensation of an external, artificial restraint on my memory.

I felt that the snatches of sight I experienced had a profound and terrible meaning, and a
frightful connexion with myself, but that some purposeful influence held me from
grasping that meaning and that connexion. Then came that queerness about the element
of time, and with it desperate efforts to place the fragmentary dream-glimpses in the
chronological and spatial pattern.

The glimpses themselves were at first merely strange rather than horrible. I would seem
to be in an enormous vaulted chamber whose lofty stone aroinings were well-nigh lost in
the shadows overhead. In whatever time or place the scene might be, the principle of the
arch was known as fully and used as extensively as by the Romans.

There were colossal, round windows and high, arched doors, and pedestals or tables each
as tall as the height of an ordinary room. Vast shelves of dark wood lined the walls,
holding what seemed to be volumes of immense size with strange hieroglyphs on their
backs.

The exposed stonework held curious carvings, always in curvilinear mathematical
designs, and there were chiselled inscriptions in the same characters that the huge books
bore. The dark granite masonry was of a monstrous megathic type, with lines of convex-
topped blocks fitting the concave-bottomed courses which rested upon them.

There were no chairs, but the tops of the vast pedestals were littered with books, papers,
and what seemed to be writing materials - oddly figured jars of a purplish metal, and rods
with stained tips. Tall as the pedestals were, I seemed at times able to view them from
above. On some of them were great globes of luminous crystal serving as lamps, and
inexplicable machines formed of vitreous tubes and metal rods.

The windows were glazed, and latticed with stout-looking bars. Though I dared not
approach and peer out them, I could see from where I was he waving tops of singular
fern-like growths. The floor was of massive octagonal flagstones, while rugs and hangings were entirely lacking.

Later I had visions of sweeping through Cyclopean corridors of stone, and up and down gigantic inclined planes of the same monstrous masonry. There were no stairs anywhere, nor was any passageway less than thirty feet wide. Some of the structures through which I floated must have towered in the sky for thousands of feet.

There were multiple levels of black vaults below, and never-opened trapdoors, sealed down with metal bands and holding dim suggestions of some special peril.

I seemed to be a prisoner, and horror hung broodingly over everything I saw. I felt that the mocking curvilinear hieroglyphs on the walls would blast my soul with their message were I not guarded by a merciful ignorance.

Still later my dreams included vistas from the great round windows, and from the titanic flat roof, with its curious gardens, wide barren area, and high, scalloped parapet of stone, to which the topmost of the inclined planes led.

There were, almost endless leagues of giant buildings, each in its garden, and ranged along paved roads fully 200 feet wide. They differed greatly in aspect, but few were less than 500 feet square or a thousand feet high. Many seemed so limitless that they must have had a frontage of several thousand feet, while some shot up to mountainous altitudes in the grey, steamy heavens.

They seemed to be mainly of stone or concrete, and most of them embodied the oddly curvilinear type of masonry noticeable in the building that held me. Roofs were flat and garden-covered, and tended to have scalloped parapets. Sometimes there were terraces and higher levels, and wide, cleared spaces amidst the gardens. The great roads held hints of motion, but in the earlier visions I could not resolve this impression into details.

In certain places I beheld enormous dark cylindrical towers which climbed far above any of the other structures. These appeared to be of a totally unique nature and shewed signs of prodigious age and dilapidation. They were built of a bizarre type of square-cut basalt masonry, and tapered slightly toward their rounded tops. Nowhere in any of them could the least traces of windows or other apertures save huge doors be found. I noticed also some lower buildings - all crumbling with the weathering of aeons - which resembled these dark, cylindrical towers in basic architecture. Around all these aberrant piles of square-cut masonry there hovered an inexplicable aura of menace and concentrated fear, like that bred by the sealed trap-doors.

The omnipresent gardens were almost terrifying in their strangeness, with bizarre and unfamiliar forms of vegetation nodding over broad paths lined with curiously carven monoliths. Abnormally vast fern-like growths predominated - some green, and some of a ghastly, fungoid pallor.

Among them rose great spectral things resembling calamites, whose bamboo-like trunks towered to fabulous heights. Then there were tufted forms like fabulous cycads, and grotesque dark-green shrubs and trees of coniferous aspect.
Flowers were small, colourless, and unrecognizable, blooming in geometrical beds and at large among the greenery.

In a few of the terrace and roof-top gardens were larger and more blossoms of most offensive contours and seeming to suggest artificial breeding. Fungi of inconceivable size, outlines, and colours speckled the scene in patterns bespeaking some unknown but well-established horticultural tradition. In the larger gardens on the ground there seemed to be some attempt to preserve the irregularities of Nature, but on the roofs there was more selectiveness, and more evidences of the topiary art.

The sides were almost always moist and cloudy, and sometimes I would seem to witness tremendous rains. Once in a while, though, there would be glimpses of the sun - which looked abnormally large - and of the moon, whose markings held a touch of difference from the normal that I could never quite fathom. When - very rarely - the night sky was clear to any extent, I beheld constellations which were nearly beyond recognition. Known outlines were sometimes approximated, but seldom duplicated; and from the position of the few groups I could recognize, I felt I must be in the earth's southern hemisphere, near the Tropic of Capricorn.

The far horizon was always steamy and indistinct, but I could see that great jungles of unknown tree-ferns, calamites, lepidodendra, and sigillaria lay outside the city, their fantastic frondage waving mockingly in the shifting vapours. Now and then there would be suggestions of motion in the sky, but these my early visions never resolved.

By the autumn of 1914 I began to have infrequent dreams of strange floatings over the city and through the regions around it. I saw interminable roads through forests of fearsome growths with mottled, fluted, and banded trunks, and past other cities as strange as the one which persistently haunted me.

I saw monstrous constructions of black or iridescent tone in glades and clearings where perpetual twilight reigned, and traversed long causeways over swamps so dark that I could tell but little of their moist, towering vegetation.

Once I saw an area of countless miles strewn with age-blasted basaltic ruins whose architecture had been like that of the few windowless, round-topped towers in the haunting city.

And once I saw the sea - a boundless, steamy expanse beyond the colossal stone piers of an enormous town of domes and arches. Great shapeless suggestions of shadow moved over it, and here and there its surface was vexed with anomalous spoutings.

III

As I have said, it was not immediately that these wild visions began to hold their terrifying quality. Certainly, many persons have dreamed intrinsically stranger things - things compounded of unrelated scraps of daily life, pictures, and reading, and arranged in fantastically novel forms by the unchecked caprices of sleep.
For some time I accepted the visions as natural, even though I had never before been an extravagant dreamer. Many of the vague anomalies, I argued, must have come from trivial sources too numerous to track down; while others seemed to reflect a common text book knowledge of the plants and other conditions of the primitive world of a hundred and fifty million years ago - the world of the Permian or Triassic age.

In the course of some months, however, the element of terror did figure with accumulating force. This was when the dreams began so unfailingly to have the aspect of memories, and when my mind began to link them with my growing abstract disturbances - the feeling of mnemonic restraint, the curious impressions regarding time, and sense of a loathsome exchange with my secondary personality of 1908-13, and, considerably later, the inexplicable loathing of my own person.

As certain definite details began to enter the dreams, their horror increased a thousandfold - until by October, 1915, I felt I must do something. It was then that I began an intensive study of other cases of amnesia and visions, feeling that I might thereby obectivise my trouble and shake clear of its emotional grip.

However, as before mentioned, the result was at first almost exactly opposite. It disturbed me vastly to find that my dreams had been so closely duplicated; especially since some of the accounts were too early to admit of any geological knowledge - and therefore of any idea of primitive landscapes - on the subjects' part.

What is more, many of these accounts supplied very horrible details and explanations in connexion with the visions of great buildings and jungle gardens - and other things. The actual sights and vague impressions were bad enough, but what was hinted or asserted by some of the other dreamers savored of madness and blasphemy. Worst of all, my own pseudo-memory was aroused to milder dreams and hints of coming revelations. And yet most doctors deemed my course, on he whole, an advisable one.

I studied psychology systematically, and under the prevailing stimulus my son Wingate did the same - his studies leading eventually to his present professorship. In 1917 and 1918 I took special courses at Miskatonic. Meanwhile, my examination of medical, historical, and anthropological records became indefatigable, involving travels to distant libraries, and finally including even a reading of the hideous books of forbidden elder lore in which my secondary personality had been so disturbingly interested.

Some of the latter were the actual copies I had consulted in my altered state, and I was greatly disturbed by certain marginal notations and ostensible corrections of the hideous text in a script and idiom which somehow seemed oddly unhuman.

These markings were mostly in the respective languages of the various books, all of which the writer seemed to know with equal, though obviously academic, facility. One note appended to von Junzt's Unaussprechlichen Kulten, however, was alarmingly otherwise. It consisted of certain curvilinear hieroglyphs in the same ink as that of the German corrections, but following no recognized human pattern. And these hieroglyphs were closely and unmistakably ald in to the characters constantly met with in my dreams -
characters whose meaning I would sometimes momentarily fancy I knew, or was just on the brink of recalling.

To complete my black confusion, my librarians assured me that, in view of previous examinations and records of consultation of the volumes in question, all of these notations must have been made by myself in my secondary state. This despite the fact that I was and still am ignorant of three of the languages involved.

Piecing together the scattered records, ancient and modern, anthropological and medical, I found a fairly consistent mixture of myth and hallucination whose scope and wildness left me utterly dazed. Only one thing consoled me, the fact that the myths were of such early existence. What lost knowledge could have brought pictures of the Palaeozoic or Mesozoic landscape into these primitive fables, I could not even guess; but the pictures had been there. Thus, a basis existed for the formation of a fixed type of delusion.

Cases of amnesia no doubt created the general myth pattern - but afterward the fanciful accretions of the myths must have reacted on amnesia sufferers and coloured their pseudo-memories. I myself had read and heard all the early tales during my memory lapse - my quest had amply proved that. Was it not natural, then, for my subsequent dreams and emotional impressions to become coloured and moulded by what my memory subtly held over from my secondary state?

A few of the myths had significant connexions with other cloudy legends of the pre-human world, especially those Hindu tales involving stupefying gulfs of time and forming part of the lore of modern theosopists.

Primal myth and modern delusion joined in their assumption that mankind is only one - perhaps the least - of the highly evolved and dominant races of this planet's long and largely unknown career. Things of inconceivable shape, they implied, had reared towers to the sky and delved into every secret of Nature before the first amphibian forbear of man had crawled out of the hot sea 300 million years ago.

Some had come down from the stars; a few were as old as the cosmos itself, others had arisen swiftly from terrene germs as far behind the first germs of our life-cycle as those germs are behind ourselves. Spans of thousands of millions of years, and linkages to other galaxies and universes, were freely spoken of. Indeed, there was no such thing as time in its humanly accepted sense.

But most of the tales and impressions concerned a relatively late race, of a queer and intricate shape, resembling no life-form known to science, which had lived till only fifty million years before the advent of man. This, they indicated, was the greatest race of all because it alone had conquered the secret of time.

It had learned all things that ever were known or ever would be known on the earth, through the power of its keener minds to project themselves into the past and future, even through gulfs of millions of years, and study the lore of every age. From the accomplishments of this race arose all legends of prophets, including those in human mythology.
In its vast libraries were volumes of texts and pictures holding the whole of earth's annals—histories and descriptions of every species that had ever been or that ever would be, with full records of their arts, their achievements, their languages, and their psychologies.

With this aeon-embracing knowledge, the Great Race chose from every era and life-form such thoughts, arts, and processes as might suit its own nature and situation. Knowledge of the past, secured through a kind of mind-casting outside the recognized senses, was harder to glean than knowledge of the future.

In the latter case the course was easier and more material. With suitable mechanical aid a mind would project itself forward in time, feeling its dim, extra-sensory way till it approached the desired period. Then, after preliminary trials, it would seize on the best discoverable representative of the highest of that period's life-forms. It would enter the organism's brain and set up therein its own vibrations, while the displaced mind would strike back to the period of the displacer, remaining in the latter's body till a reverse process was set up.

The projected mind, in the body of the organism of the future, would then pose as a member of the race whose outward form it wore, learning as quickly as possible all that could be learned of the chosen age and its massed information and techniques.

Meanwhile the displaced mind, thrown back to the displacer's age and body, would be carefully guarded. It would be kept from harming the body it occupied, and would be drained of all its knowledge by trained questioners. Often it could be questioned in its own language, when previous quests into the future had brought back records of that language.

If the mind came from a body whose language the Great Race could not physically reproduce, clever machines would be made, on which the alien speech could be played as on a musical instrument.

The Great Race's members were immense rugose cones ten feet high, and with head and other organs attached to foot-thick, distensible limbs spreading from the apexes. They spoke by the clicking or scraping of huge paws or claws attached to the end of two of their four limbs, and walked by the expansion and contraction of a viscous layer attached to their vast, ten-foot bases.

When the captive mind's amazement and resentment had worn off, and when - assuming that it came from a body vastly different from the Great Race's - it had lost its horror at its unfamiliar temporary form, it was permitted to study its new environment and experience a wonder and wisdom approximating that of its displacer.

With suitable precautions, and in exchange for suitable services, it was allowed to rove all over the habitable world in titan airships or on the huge boatlike atomic-engined vehicles which traversed the great roads, and to delve freely into the libraries containing the records of the planet's past and future.
This reconciled many captive minds to their lot; since none were other than keen, and to such minds the unveiling of hidden mysteries of earth-closed chapters of inconceivable pasts and dizzying vortices of future time which include the years ahead of their own natural ages-forms always, despite the abysmal horrors often unveiled, the supreme experience of life.

Now and then certain captives were permitted to meet other captive minds seized from the future - to exchange thoughts with consciousnesses living a hundred or a thousand or a million years before or after their own ages. And all were urged to write copiously in their own languages of themselves and their respective periods; such documents to be filed in the great central archives.

It may be added that there was one special type of captive whose privileges were far greater than those of the majority. These were the dying permanent exiles, whose bodies in the future had been seized by keen-minded members of the Great Race who, faced with death, sought to escape mental extinction.

Such melancholy exiles were not as common as might be expected, since the longevity of the Great Race lessened its love of life - especially among those superior minds capable of projection. From cases of the permanent projection of elder minds arose many of those lasting changes of personality noticed in later history - including mankind's.

As for the ordinary cases of exploration - when the displacing mind had learned what it wished in the future, it would build an apparatus like that which had started its flight and reverse the process of projection. Once more it would be in its own body in its own age, while the lately captive mind would return to that body of the future to which it properly belonged.

Only when one or the other of the bodies had died during the exchange was this restoration impossible. In such cases, of course, the exploring mind had - like those of the death-escapers - to live out an alien-bodied life in the future; or else the captive mind-like the dying permanent exiles - had to end its days in the form and past age of the Great Race.

This fate was least horrible when the captive mind was also of the Great Race - a not infrequent occurrence, since in all its periods that race was intensely concerned with its own future. The number of dying permanent exiles of the Great Race was very slight - largely because of the tremendous penalties attached to displacements of future Great Race minds by the moribund.

Through projection, arrangements were made to inflict these penalties on the offending minds in their new future bodies - and sometimes forced reëxchanges were effected.

Complex cases of the displacement of exploring or already captive minds by minds in various regions of the past had been known and carefully rectified. In every age since the discovery of mind projection, a minute but well-recognised element of the population consisted of Great Race minds from past ages, sojourning for a longer or shorter while.
When a captive mind of alien origin was returned to its own body in the future, it was
purged by an intricate mechanical hypnosis of all it had learned in the Great Race's age -
this because of certain troublesome consequences inherent in the general carrying
forward of knowledge in large quantities.

The few existing instances of clear transmission had caused, and would cause at known
future times, great disasters. And it was largely in consequence of two cases of this kind -
said the old myths - that mankind had learned what it had concerning the Great Race.

Of all things surviving physically and directly from that aeon-distant world, there
remained only certain ruins of great stones in far places and under the sea, and parts of
the text of the frightful Pnakotic Manuscripts.

Thus the returning mind reached its own age with only the faintest and most fragmentary
visions of what it had undergone since its seizure. All memories that could be eradicated
were eradicated, so that in most cases only a dream-shadowed blank stretched back to the
time of the first exchange. Some minds recalled more than others, and the chance joining
of memories had at rare times brought hints of the forbidden past to future ages.

There probably never was a time when groups or cults did not secretly cherish certain of
these hints. In the *Necronomicon* the presence of such a cult among human beings was
suggested - a cult that sometimes gave aid to minds voyaging down the aeons from the
days of the Great Race.

And, meanwhile, the Great Race itself waxed well-nigh omniscient, and turned to the task
of setting up exchanges with the minds of other planets, and of exploring their pasts and
futures. It sought likewise to fathom the past years and origin of that black, aeon-dead orb
in far space whence its own mental heritage had come - for the mind of the Great Race
was older than its bodily form.

The beings of a dying elder world, wise with the ultimate secrets, had looked ahead for a
new world and species wherein they might have long life; and had sent their minds en
masse into that future race best adapted to house them - the cone-shaped beings that
peopled our earth a billion years ago.

Thus the Great Race came to be, while the myriad minds sent backward were left to die
in the horror of strange shapes. Later the race would again face death, yet would live
through another forward migration of its best minds into the bodies of others who had a
longer physical span ahead of them.

Such was the background of intertwined legend and hallucination. When, around 1920, I
had my researches in coherent shape, I felt a slight lessening of the tension which their
earlier stages had increased. After all, and in spite of the fancies prompted by blind
emotions, were not most of my phenomena readily explainable? Any chance might have
turned my mind to dark studies during the amnesia - and then I read the forbidden
legends and met the members of ancient and ill-regarded cults. That, plainly, supplied the
material for the dreams and disturbed feelings which came after the return of memory.
As for the marginal notes in dream-hieroglyphs and languages unknown to me, but laid at my door by librarians - I might easily have picked up a smattering of the tongues during my secondary state, while the hieroglyphs were doubtless coined by my fancy from descriptions in old legends, and afterward woven into my dreams. I tried to verify certain points through conversation with known cult leaders, but never succeeded in establishing the right connexions.

At times the parallelism of so many cases in so many distant ages continued to worry me as it had at first, but on the other hand I reflected that the excitant folklore was undoubtedly more universal in the past than in the present.

Probably all the other victims whose cases were like mine had had a long and familiar knowledge of the tales I had learned only when in my secondary state. When these victims had lost their memory, they had associated themselves with the creatures of their household myths - the fabulous invaders supposed to displace men's minds - and had thus embarked upon quests for knowledge which they thought they could take back to a fancied, non-human past.

Then, when their memory returned, they reversed the associative process and thought of themselves as the former captive minds instead of as the displacers. Hence the dreams and pseudo-memories following the conventional myth pattern.

Despite the seeming cumbrousness of these explanations, they came finally to supersede all others in my mind-largely because of the greater weakness of any rival theory. And a substantial number of eminent psychologists and anthropologists gradually agreed with me.

The more I reflected, the more convincing did my reasoning seem; till in the end I had a really effective bulwark against the visions and impressions which still assailed me. Suppose I did see strange things at night? These were only what I had heard and read of. Suppose I did have odd loathings and perspectives and pseudo-memories? These, too, were only echoes of myths absorbed in my secondary state. Nothing that I might dream, nothing that I might feel, could be of any actual significance.

Fortified by this philosophy, I greatly improved in nervous equilibrium, even though the visions - rather than the abstract impressions - steadily became more frequent and more disturbingly detailed. In 1922 I felt able to undertake regular work again, and put my newly gained knowledge to practical use by accepting an instructorship in psychology at the university.

My old chair of political economy had long been adequately filled - besides which, methods of teaching economics had changed greatly since my heyday. My son was at this time just entering on the post-graduate studies leading to his resent professorship, and we worked together a great deal.

IV

I continued, however, to keep a careful record of the outré dreams which crowded upon me so thickly and vividly. Such a record, I argued, was of genuine value as a
psychological document. The glimpses still seemed damnably like memories, though I fought off this impression with a goodly measure of success.

In writing, I treated the phantasmata as things seen; but at all other times I brushed them aside like any gossamer illusions of the night. I had never mentioned such matters in common conversation; though reports of them, filtering out as such things will, had aroused sundry rumors regarding my mental health. It is amusing to reflect that these rumors were confined wholly to laymen, without a single champion among physicians or psychologists.

Of my visions after 1914 I will here mention only a few, since fuller accounts and records are at the disposal of the serious student. It is evident that with time the curious inhibitions somewhat waned, for the scope of my visions vastly increased. They have never, though, become other than disjointed fragments seemingly without clear motivation.

Within the dreams I seemed gradually to acquire a greater and greater freedom of wandering. I floated through many strange buildings of stone, going from one to the other along mammoth underground passages which seemed to form the common avenues of transit. Sometimes I encountered those gigantic sealed trap-doors in the lowest level, around which such an aura of fear and forbiddenness clung.

I saw tremendously tessellated pools, and rooms of curious and inexplicable utensils of myriad sorts. Then there were colossal caverns of intricate machinery whose outlines and purpose were wholly strange to me, and whose sound manifested itself only after many years of dreaming. I may here remark that sight and sound are the only senses I have ever exercised in the visionary world.

The real horror began in May, 1915, when I first saw the living things. This was before my studies had taught me what, in view of the myths and case histories, to expect. As mental barriers wore down, I beheld great masses of thin vapour in various parts of the building and in the streets below.

These steadily grew more solid and distinct, till at last I could trace their monstrous outlines with uncomfortable ease. They seemed to be enormous, iridescent cones, about ten feet high and ten feet wide at the base, and made up of some ridgy, scaly, semi-elastic matter. From their apexes projected four flexible, cylindrical members, each a foot thick, and of a ridgy substance like that of the cones themselves.

These members were sometimes contracted almost to nothing, and sometimes extended to any distance up to about ten feet. Terminating two of them were enormous claws or nippers. At the end of a third were four red, trumpetlike appendages. The fourth terminated in an irregular yellowish globe some two feet in diameter and having three great dark eyes ranged along its central circumference.

Surmounting this head were four slender grey stalks bearing flower-like appendages, whilst from its nether side dangled eight greenish antennae or tentacles. The great base of the central cone was fringed with a rubbery, grey substance which moved the whole entity through expansion and contraction.
Their actions, though harmless, horrified me even more than their appearance - for it is not wholesome to watch monstrous objects doing what one had known only human beings to do. These objects moved intelligently about the great rooms, getting books from the shelves and taking them to the great tables, or vice versa, and sometimes writing diligently with a peculiar rod gripped in the greenish head tentacles. The huge nippers were used in carrying books and in conversation-speech consisting of a kind of clicking and scraping.

The objects had no clothing, but wore satchels or knapsacks suspended from the top of the conical trunk. They commonly carried their head and its supporting member at the level of the cone top, although it was frequently raised or lowered.

The other three great members tended to rest downward at the sides of the cone, contracted to about five feet each when not in use. From their rate of reading, writing, and operating their machines - those on the tables seemed somehow connected with thought - I concluded that their intelligence was enormously greater than man's.

Aftenvard I saw them everywhere; swarming in all the great chambers and corridors, tending monstrous machines in vaulted crypts, and racing along the vast roads in gigantic, boat-shaped cars. I ceased to be afraid of them, for they seemed to form supremely natural parts of their environment.

Individual differences amongst them began to be manifest, and a few appeared to be under some kind of restraint. These latter, though shewing no physical variation, had a diversity of gestures and habits which marked them off not only from the majority, but very largely from one another.

They wrote a great deal in what seemed to my cloudy vision a vast variety of characters - never the typical curvilinear hieroglyphs of the majority. A few, I fancied, used our own familiar alphabet. Most of them worked much more slowly than the general mass of the entities.

All this time my own part in the dreams seemed to be that of a disembodied consciousness with a range of vision wider than the normal, floating freely about, yet confined to the ordinary avenues and speeds of travel. Not until August, 1915, did any suggestions of bodily existence begin to harass me. I say harass, because the first phase was a purely abstract, though infinitely terrible, association of my previously noted body loathing with the scenes of my visions.

For a while my chief concern during dreams was to avoid looking down at myself, and I recall how grateful I was for the total absence of large mirrors in the strange rooms. I was mightily troubled by the fact that I always saw the great tables - whose height could not be under ten feet - from a level not below that of their surfaces.

And then the morbid temptation to look down at myself became greater and greater, till one night I could not resist it. At first my downward glance revealed nothing whatever. A moment later I perceived that this was because my head lay at the end of a flexible neck of enormous length. Retracting this neck and gazing down very sharply, I saw the scaly, rugose, iridescent bulk of a vast cone ten feet tall and ten feet wide at the base. That was
when I waked half of Arkham with my screaming as I plunged madly up from the abyss of sleep.

Only after weeks of hideous repetition did I grow half-reconciled to these visions of myself in monstrous form. In the dreams I now moved bodily among the other unknown entities, reading terrible books from the endless shelves and writing for hours at the great tables with a stylus managed by the green tentacles that hung down from my head.

Snatches of what I read and wrote would linger in my memory. There were horrible annals of other worlds and other universes, and of stirrings of formless life outside of all universes. There were records of strange orders of beings which had peopled the world in forgotten pasts, and frightful chronicles of grotesque-bodied intelligences which would people it millions of years after the death of the last human being.

I learned of chapters in human history whose existence no scholar of today has ever suspected. Most of these writings were in the language of the hieroglyphs; which I studied in a queer way with the aid of droning machines, and which was evidently an agglutinative speech with root systems utterly unlike any found in human languages.

Other volumes were in other unknown tongues learned in the same queer way. A very few were in languages I knew. Extremely clever pictures, both inserted in the records and forming separate collections, aided me immensely. And all the time I seemed to be setting down a history of my own age in English. On waking, I could recall only minute and meaningless scraps of the unknown tongues which my dream-self had mastered, though whole phrases of the history stayed with me.

I learned - even before my waking self had studied the parallel cases or the old myths from which the dreams doubtless sprang - that the entities around me were of the world's greatest race, which had conquered time and had sent exploring minds into every age. I knew, too, that I had been snatched from my age while another used my body in that age, and that a few of the other strange forms housed similarly captured minds. I seemed to talk, in some odd language of claw clickings, with exiled intellects from every corner of the solar system.

There was a mind from the planet we know as Venus, which would live incalculable epochs to come, and one from an outer moon of Jupiter six million years in the past. Of earthly minds there were some from the winged, starheaded, half-vegetable race of palaeanean Antarctica; one from the reptile people of fabled Valusia; three from the furry pre-human Hyperborean worshippers of Tsathoggua; one from the wholly abominable Tcho-Tchos; two from the arachnid denizens of earth's last age; five from the hardy coleopterous species immediately following mankind, to which the Great Race was some day to transfer its keenest minds en masse in the face of horrible peril; and several from different branches of humanity.

I talked with the mind of Yiang-Li, a philosopher from the cruel empire of Tsan-Chan, which is to come in 5,000 A.D.; with that of a general of the greatheaded brown people who held South Africa in 50,000 B.C.; with that of a twelfth-century Florentine monk named Bartolomeo Corsi; with that of a king of Lomar who had ruled that terrible polar
land one hundred thousand years before the squat, yellow Inutos came from the west to engulf it.

I talked with the mind of Nug-Soth, a magician of the dark conquerors of 16,000 A.D.; with that of a Roman named Titus Sempronius Blaesus, who had been a quaestor in Sulla's time; with that of Khephnes, an Egyptian of the 14th Dynasty, who told me the hideous secret of Nyarlathotep, with that of a priest of Atlantis' middle kingdom; with that of a Suffolk gentleman of Cromwell's day, James Woodville; with that of a court astronomer of pre-Inca Peru; with that of the Australian physicist Nevil Kingston-Brown, who will die in 2,518 A.D.; with that of an archimage of vanished Yhe in the Pacific; with that of Theodotides, a Greco-Bactrian official Of 200 B.C.; with that of an aged Frenchman of Louis XIII's time named Pierre-Louis Montagny; with that of Crom-Ya, a Cimmerian chieftain of 15,000 B.C.; and with so many others that my brain cannot hold the shocking secrets and dizzying marvels I learned from them.

I awaked each morning in a fever, sometimes frantically trying to verify or discredit such information as fell within the range of modern human knowledge. Traditional facts took on new and doubtful aspects, and I marvelled at the dream-fancy which could invent such surprising addenda to history and science.

I shivered at the mysteries the past may conceal, and trembled at the menaces the future may bring forth. What was hinted in the speech of post-human entities of the fate of mankind produced such an effect on me that I will not set it down here.

After man there would be the mighty beetle civilisation, the bodies of whose members the cream of the Great Race would seize when the monstrous doom overtook the elder world. Later, as the earth's span closed, the transferred minds would again migrate through time and space - to another stopping-place in the bodies of the bulbous vegetable entities of Mercury. But there would be races after them, clinging pathetically to the cold planet and burrowing to its horror-filled core, before the utter end.

Meanwhile, in my dreams, I wrote endlessly in that history of my own age which I was preparing - half voluntarily and half through promises of increased library and travel opportunities - for the Great Race's central archives. The archives were in a colossal subterranean structure near the city's center, which I came to know well through frequent labors and consultations. Meant to last as long as the race, and to withstand the fiercest of earth's convulsions, this titan repository surpassed all other buildings in the massive, mountain-like firmness of its construction.

The records, written or printed on great sheets of a curiously tenacious cellulose fabric were bound into books that opened from the top, and were kept in individual cases of a strange, extremely light, restless metal of greyish hue, decorated with mathematical designs and bearing the title in the Great Race's curvilinear hieroglyphs.

These cases were stored in tiers of rectangular vaults-like closed, locked shelves - wrought of the same rustless metal and fastened by knobs with intricate turnings. My own history was assigned a specific place in the vaults of the lowest or vertebrate level -
the section devoted to the culture of mankind and of the furry and reptilian races immediately preceding it in terrestrial dominance.

But none of the dreams ever gave me a full picture of daily life. All were the merest misty, disconnected fragments, and it is certain that these fragments were not unfolded in their rightful sequence. I have, for example, a very imperfect idea of my own living arrangements in the dream-world; though I seem to have possessed a great stone room of my own. My restrictions as a prisoner gradually disappeared, so that some of the visions included vivid travels over the mighty jungle roads, sojourns in strange cities, and explorations of some of the vast, dark, windowless ruins from which the Great Race shrank in curious fear. There were also long sea voyages in enormous, many-decked boats of incredible swiftness, and trips over wild regions in closed projectile-like airships lifted and moved by electrical repulsion.

Beyond the wide, warm ocean were other cities of the Great Race, and on one far continent I saw the crude villages of the black-snouted, winged creatures who would evolve as a dominant stock after the Great Race had sent its foremost minds into the future to escape the creeping horror. Flatness and exuberant green life were always the keynote of the scene. Hills were low and sparse, and usually displayed signs of volcanic forces.

Of the animals I saw, I could write volumes. All were wild; for the Great Race's mechanised culture had long since done away with domestic beasts, while food was wholly vegetable or synthetic. Clumsy reptiles of great bulk floundered in steaming morasses, fluttered in the heavy air, or spouted in the seas and lakes; and among these I fancied I could vaguely recognise lesser, archaic prototypes of many forms - dinosaurs, pterodactyls, ichthyosaurs, labyrinthodonts, plesiosaurs, and the like-made familiar through palaeontology. Of birds or mammals there were none that I could discover.

The ground and swamps were constantly alive with snakes, lizards, and crocodiles while insects buzzed incessantly among the lush vegetation. And far out at sea, unsped and unknown monsters spouted mountainous columns of foam into the vaporous sky. Once I was taken under the ocean in a gigantic submarine vessel with searchlights, and glimpsed some living horrors of awesome magnitude. I saw also the ruins of incredible sunken cities, and the wealth of crinoid, brachiopod, coral, and ichthyic life which everywhere abounded.

Of the physiology, psychology, folkways, and detailed history of the Great Race my visions preserved but little information, and many of the scattered points I here set down were gleaned from my study of old legends and other cases rather than from my own dreaming.

For in time, of course, my reading and research caught up with and passed the dreams in many phases, so that certain dream-fragments were explained in advance and formed verifications of what I had learned. This consolingly established my belief that similar reading and research, accomplished by my secondary self, had formed the source of the whole terrible fabric of pseudomemories.
The period of my dreams, apparently, was one somewhat less than 150,000,000 years ago, when the Palaeozoic age was giving place to the Mesozoic. The bodies occupied by the Great Race represented no surviving - or even scientifically known - line of terrestrial evolution, but were of a peculiar, closely homogeneous, and highly specialised organic type inclining as much as to the vegetable as to the animal state.

Cell action was of an unique sort almost precluding fatigue, and wholly eliminating the need of sleep. Nourishment, assimilated through the red trumpet-like appendages on one of the great flexible limbs, was always semifluid and in many aspects wholly unlike the food of existing animals.

The beings had but two of the senses which we recognise - sight and hearing, the latter accomplished through the flower-like appendages on the grey stalks above their heads. Of other and incomprehensible senses - not, however, well utilizable by alien captive minds inhabiting their bodies - they possessed many. Their three eyes were so situated as to give them a range of vision wider than the normal. Their blood was a sort of deep-greenish ichor of great thickness.

They had no sex, but reproduced through seeds or spores which clustered on their bases and could be developed only under water. Great, shallow tanks were used for the growth of their young - which were, however, reared only in small numbers on account of the longevity of individuals - four or five thousand years being the common life span.

Markedly defective individuals were quickly disposed of as soon as their defects were noticed. Disease and the approach of death were, in the absence of a sense of touch or of physical pain, recognised by purely visual symptoms.

The dead were incinerated with dignified ceremonies. Once in a while, as before mentioned, a keen mind would escape death by forward projection in time; but such cases were not numerous. When one did occur, the exiled mind from the future was treated with the utmost kindness till the dissolution of its unfamiliar tenement.

The Great Race seemed to form a single, loosely knit nation or league, with major institutions in common, though there were four definite divisions. The political and economic system of each unit was a sort of fascistic socialism, with major resources rationally distributed, and power delegated to a small governing board elected by the votes of all able to pass certain educational and psychological tests. Family organisation was not overstressed, though ties among persons of common descent were recognised, and the young were generally reared by their parents.

Resemblances to human attitudes and institutions were, of course, most marked in those fields where on the one hand highly abstract elements were concerned, or where on the other hand there was a dominance of the basic, unspecialised urges common to all organic life. A few added likenesses came through conscious adoption as the Great Race probed the future and copied what it liked.

Industry, highly mechanised, demanded but little time from each citizen; and the abundant leisure was filled with intellectual and aesthetic activities of various sorts.
The sciences were carried to an unbelievable height of development, and art was a vital part of life, though at the period of my dreams it had passed its crest and meridian. Technology was enormously stimulated through the constant struggle to survive, and to keep in existence the physical fabric of great cities, imposed by the prodigious geologic upheavals of those primal days.

Crime was surprisingly scant, and was dealt with through highly efficient policing. Punishments ranged from privilege deprivation and imprisonment to death or major emotion wrenching, and were never administered without a careful study of the criminal's motivations.

Warfare, largely civil for the last few millennia though sometimes waged against reptilian or octopodic invaders, or against the winged, star-headed Old Ones who centered in the Antarctic, was infrequent though infinitely devastating. An enormous army, using camera-like weapons which produced tremendous electrical effects, was kept on hand for purposes seldom mentioned, but obviously connected with the ceaseless fear of the dark, windowless elder ruins and of the great sealed trap-doors in the lowest subterranean levels.

This fear of the basalt ruins and trap-doors was largely a matter of unspoken suggestion - or, at most, of furtive quasi-whispers. Everything specific which bore on it was significantly absent from such books as were on the common shelves. It was the one subject lying altogether under a taboo among the Great Race, and seemed to be connected alike with horrible bygone struggles, and with that future peril which would some day force the race to send its keener minds ahead en masse in time.

Imperfect and fragmentary as were the other things presented by dreams and legends, this matter was still more bafflingly shrouded. The vague old myths avoided it - or perhaps all allusions had for some reason been excised. And in the dreams of myself and others, the hints were peculiarly few. Members of the Great Race never intentionally referred to the matter, and what could be gleaned came only from some of the more sharply observant captive minds.

According to these scraps of information, the basis of the fear was a horrible elder race of half-polypous, utterly alien entities which had come through space from immeasurably distant universes and had dominated the earth and three other solar planets about 600 million years ago. They were only partly material - as we understand matter - and their type of consciousness and media of perception differed widely from those of terrestrial organisms. For example, their senses did not include that of sight; their mental world being a strange, non-visual pattern of impressions.

They were, however, sufficiently material to use implements of normal matter when in cosmic areas containing it; and they required housing - albeit of a peculiar kind. Though their senses could penetrate all material barriers, their substance could not; and certain forms of electrical energy could wholly destroy them. They had the power of aerial motion, despite the absence of wings or any other visible means of levitation. Their minds were of such texture that no exchange with them could be effected by the Great Race.
When these things had come to the earth they had built mighty basalt cities of windowless towers, and had preyed horribly upon the beings they found. Thus it was when the minds of the Great Race sped across the void from that obscure, trans-galactic world known in the disturbing and debatable Eltdown Shards as Yith.

The newcomers, with the instruments they created, had found it easy to subdue the predatory entities and drive them down to those caverns of inner earth which they had already joined to their abodes and begun to inhabit.

Then they had sealed the entrances and left them to their fate, afterward occupying most of their great cities and preserving certain important buildings for reasons connected more with superstition than with indifference, boldness, or scientific and historical zeal.

But as the aeons passed there came vague, evil signs that the elder things were growing strong and numerous in the inner world. There were sporadic irruptions of a particularly hideous character in certain small and remote cities of the Great Race, and in some of the deserted elder cities which the Great Race had not peopled - places where the paths to the gulfs below had not been properly sealed or guarded.

After that greater precautions were taken, and many of the paths were closed forever - though a few were left with sealed trap-doors for strategic use in fighting the elder things if ever they broke forth in unexpected places.

The irruptions of the elder things must have been shocking beyond all description, since they had permanently coloured the psychology of the Great Race. Such was the fixed mood of horror that the very aspect of the creatures was left unmentioned. At no time was I able to gain a clear hint of what they looked like.

There were veiled suggestions of a monstrous plasticity, and of temporary lapses of visibility, while other fragmentary whispers referred to their control and military use of great winds. Singular whistling noises, and colossal footprints made up of five circular toe marks, seemed also to be associated with them.

It was evident that the coming doom so desperately feared by the Great Race - the doom that was one day to send millions of keen minds across the chasm of time to strange bodies in the safer future - had to do with a final successful irruption of the elder beings.

Mental projections down the ages had clearly foretold such a horror, and the Great Race had resolved that none who could escape should face it. That the foray would be a matter of vengeance, rather than an attempt to reoccupy the outer world, they knew from the planet's later history - for their projections shewed the coming and going of subsequent races untroubled by the monstrous entities.

Perhaps these entities had come to prefer earth's inner abysses to the variable, storm-ravaged surface, since light meant nothing to them. Perhaps, too, they were slowly weakening with the aeons. Indeed, it was known that they would be quite dead in the time of the post-human beetle race which the fleeing minds would tenant.
Meanwhile, the Great Race maintained its cautious vigilance, with potent weapons ceaselessly ready despite the horrified banishing of the subject from common speech and visible records. And always the shadow of nameless fear hung about the sealed trap-doors and the dark, windowless elder towers.

That is the world of which my dreams brought me dim, scattered echoes every night. I cannot hope to give any true idea of the horror and dread contained in such echoes, for it was upon a wholly intangible quality - the sharp sense of pseudo-memory - that such feelings mainly depended.

As I have said, my studies gradually gave me a defence against these feelings in the form of rational psychological explanations; and this saving influence was augmented by the subtle touch of accustomedness which comes with the passage of time. Yet in spite of everything the vague, creeping terror would return momentarily now and then. It did not, however, engulf me as it had before; and after 1922 I lived a very normal life of work and recreation.

In the course of years I began to feel that my experience - together with the kindred cases and the related folklore - ought to be definitely summarised and published for the benefit of serious students; hence I prepared a series of articles briefly covering the whole ground and illustrated with crude sketches of some of the shapes, scenes, decorative motifs, and hieroglyphs remembered from the dreams.

These appeared at various times during 1928 and 1929 in the *Journal of the American Psychological Society*, but did not attract much attention. Meanwhile I continued to record my dreams with the minutest care, even though the growing stack of reports attained troublesomely vast proportions. On July 10, 1934, there was forwarded to me by the Psychological Society the letter which opened the culminating and most horrible phase of the whole mad ordeal. It was postmarked Pilbarra, Western Australia, and bore the signature of one whom I found, upon inquiry, to be a mining engineer of considerable prominence. Enclosed were some very curious snapshots. I will reproduce the text in its entirety, and no reader can fail to understand how tremendous an effect it and the photographs had upon me.

I was, for a time, almost stunned and incredulous; for although I had often thought that some basis of fact must underlie certain phases of the legends which had coloured my dreams, I was none the less unprepared for anything like a tangible survival from a lost world remote beyond all imagination. Most devastating of all were the photographs - for here, in cold, incontrovertible realism, there stood out against a background of sand certain worn-down, water-ridged, storm-weathered blocks of stone whose slightly convex tops and slightly concave bottoms told their own story.

And when I studied them with a magnifying glass I could see all too plainly, amidst the batterings and pittings, the traces of those vast curvilinear designs and occasional hieroglyphs whose significance had become so hideous to me. But here is the letter, which speaks for itself.
My Dear Sir:

A recent conversation with Dr. E. M. Boyle of Perth, and some papers with your articles which he has just sent me, make it advisable for me to tell you about certain things I have seen in the Great Sandy Desert east of our gold field here. It would seem, in view of the peculiar legends about old cities with huge stonework and strange designs and hieroglyphs which you describe, that I have come upon something very important.

The blackfellows have always been full of talk about "great stones with marks on them," and seem to have a terrible fear of such things. They connect them in some way with their common racial legends about Buddai, the gigantic old man who lies asleep for ages underground with his head on his arm, and who will some day awake and eat up the world.

There are some very old and half-forgotten tales of enormous underground huts of great stones, where passages lead down and down, and where horrible things have happened. The blackfellows claim that once some warriors, fleeing in battle, went down into one and never came back, but that frightful winds began to blow from the place soon after they went down. However, there usually isn't much in what these natives say.

But what I have to tell is more than this. Two years ago, when I was prospecting about 500 miles east in the desert, I came on a lot of queer pieces of dressed stone perhaps 3 X 2 X 2 feet in size, and weathered and pitted to the very limit.

At first I couldn't find any of the marks the blackfellows told about, but when I looked close enough I could make out some deeply carved lines in spite of the weathering. There were peculiar curves, just like what the blackfellows had tried to describe. I imagine there must have been thirty or forty blocks, some nearly buried in the sand, and all within a circle perhaps a quarter of a mile in diameter.

When I saw some, I looked around closely for more, and made a careful reckoning of the place with my instruments. I also took pictures of ten or twelve of the most typical blocks, and will enclose the prints for you to see.
I turned my information and pictures over to the government at Perth, but they have done nothing about them.

Then I met Dr. Boyle, who had read your articles in the *Journal of the American Psychological Society*, and, in time, happened to mention the stones. He was enormously interested, and became quite excited when I shewed him my snapshots, saying that the stones and the markings were just like those of the masonry you had dreamed about and seen described in legends.

He meant to write you, but was delayed. Meanwhile, he sent me most of the magazines with your articles, and I saw at once, from your drawings and descriptions, that my stones are certainly the kind you mean. You can appreciate this from the enclosed prints. Later on you will hear directly from Dr. Boyle.

Now I can understand how important all this will be to you. Without question we are faced with the remains of an unknown civilization older than any dreamed of before, and forming a basis for your legends.

As a mining engineer, I have some knowledge of geology, and can tell you that these blocks are so ancient they frighten me. They are mostly sandstone and granite, though one is almost certainly made of a queer sort of cement or concrete.

They bear evidence of water action, as if this part of the world had been submerged and come up again after long ages - all since those blocks were made and used. It is a matter of hundreds of thousands of years - or heaven knows how much more. I don't like to think about it.

In view of your previous diligent work in tracking down the legends and everything connected with them, I cannot doubt but that you will want to lead an expedition to the desert and make some archaeological excavations. Both Dr. Boyle and I are prepared to cooperate in such work if you - or organizations known to you - can furnish the funds.

I can get together a dozen miners for the heavy digging - the blackfellows would be of no use, for I've found that they have an almost maniacal fear of this particular spot. Boyle and I are saying nothing to others, for you very obviously ought to have precedence in any discoveries or credit.

The place can be reached from Pilbarra in about four days by motor tractor - which we'd need for our apparatus. It is somewhat west and south of Warburton's path of 1873, and 100 miles southeast of Joanna Spring. We could float things up the De Grey River instead of starting from Pilbarra - but all that can be talked over later.
Roughly the stones lie at a point about 22° 3' 14" South Latitude, 125° 0' 39" East Longitude. The climate is tropical, and the desert conditions are trying.

I shall welcome further correspondence upon this subject, and am keenly eager to assist in any plan you may devise. After studying your articles I am deeply impressed with the profound significance of the whole matter. Dr. Boyle will write later. When rapid communication is needed, a cable to Perth can be relayed by wireless.

Hoping profoundly for an early message,

Believe me,
Most faithfully yours,
Robert B.F. Mackenzie

Of the immediate aftermath of this letter, much can be learned from the press. My good fortune in securing the backing of Miskatonic University was great, and both Mr. Mackenzie and Dr. Boyle proved invaluable in arranging matters at the Australian end. We were not too specific with the public about our objects, since the whole matter would have lent itself unpleasantly to sensational and jocose treatment by the cheaper newspapers. As a result, printed reports were sparing; but enough appeared to tell of our quest for reported Australian ruins and to chronicle our various preparatory steps.

Professor William Dyer of the college's geology department - leader of the Miskatonic Antarctic Expedition Of 1930-31 - Ferdinand C. Ashley of the department of ancient history, and Tyler M. Freeborn of the department of anthropology - together with my son Wingate - accompanied me.

My correspondent, Mackenzie, came to Arkham early in 1935 and assisted in our final preparations. He proved to be a tremendously competent and affable man of about fifty, admirably well-read, and deeply familiar with all the conditions of Australian travel.

He had tractors waiting at Pilbarra, and we chartered a tramp steamer sufficiently small to get up the river to that point. We were prepared to excavate in the most careful and scientific fashion, sifting every particle of sand, and disturbing nothing which might seem to be in or near its original situation.

Sailing from Boston aboard the wheezy Lexington on March 28, 1935, we had a leisurely trip across the Atlantic and Mediterranean, through the Suez Canal, down the Red Sea, and across the Indian Ocean to our goal. I need not tell how the sight of the low, sandy West Australian coast depressed me, and how I detested the crude mining town and dreary gold fields where the tractors were given their last loads.

Dr. Boyle, who met us, proved to be elderly, pleasant, and intelligent - and his knowledge of psychology led him into many long discussions with my son and me.

Discomfort and expectancy were oddly mingled in most of us when at length our party of eighteen rattled forth over the arid leagues of sand and rock. On Friday, May 31st, we
forded a branch of the De Grey and entered the realm of utter desolation. A certain positive terror grew on me as we advanced to this actual site of the elder world behind the legends - a terror, of course, abetted by the fact that my disturbing dreams and pseudo-memories still beset me with unabated force.

It was on Monday, June 3rd, that we saw the first of the half-buried blocks. I cannot describe the emotions with which I actually touched - in objective reality - a fragment of Cyclopean masonry in every respect like the blocks in the walls of my dream-buildings. There was a distinct trace of carving - and my hands trembled as I recognised part of a curvilinear decorative scheme made hellish to me through years of tormenting nightmare and baffling research.

A month of digging brought a total of some 1250 blocks in varying stages of wear and disintegration. Most of these were carven megaliths with curved tops and bottoms. A minority were smaller, flatter, plain-surfaced, and square or octagonally cut-like those of the floors and pavements in my dreams - while a few were singularly massive and curved or slanted in such a manner as to suggest use in vaulting or groining, or as parts of arches or round window casings.

The deeper - and the farther north and east - we dug, the more blocks we found; though we still failed to discover any trace of arrangement among them. Professor Dyer was appalled at the measureless age of the fragments, and Freeborn found traces of symbols which fitted darkly into certain Papuan and Polynesian legends of infinite antiquity. The condition and scattering of the blocks told mutely of vertiginous cycles of time and geologic upheavals of cosmic savagery.

We had an aëroplane with us, and my son Wingate would often go up to different heights and scan the sand-and-rock waste for signs of dim, large-scale outlines - either differences of level or trails of scattered blocks. His results were virtually negative; for whenever he would one day think he had glimpsed some significant trend, he would on his next trip find the impression replaced by another equally insubstantial - a result of the shifting, wind-blown sand.

One or two of these ephemeral suggestions, though, affected me queerly and disagreeably. They seemed, after a fashion, to dovetail horribly with something I had dreamed or read, but which I could no longer remember. There was a terrible familiarity about them - which somehow made me look furtively and apprehensively over the abominable, sterile terrain toward the north and northeast.

Around the first week in July I developed an unaccountable set of mixed emotions about that general northeasterly region. There was horror, and there was curiosity - but more than that, there was a persistent and perplexing illusion of memory.

I tried all sorts of psychological expedients to get these notions out of my head, but met with no success. Sleeplessness also gained upon me, but I almost welcomed this because of the resultant shortening of my dream-periods. I acquired the habit of taking long, lone walks in the desert late at night-usually to the north or northeast, whither the sum of my strange new impulses seemed subtly to pull me.
Sometimes, on these walks, I would stumble over nearly buried fragments of the ancient masonry. Though there were fewer visible blocks here than where we had started, I felt sure that there must be a vast abundance beneath the surface. The ground was less level than at our camp, and the prevailing high winds now and then piled the sand into fantastic temporary hillocks - exposing low traces of the elder stones while it covered other traces.

I was queerly anxious to have the excavations extend to this territory, yet at the same time dreaded what might be revealed. Obviously, I was getting into a rather bad state - all the worse because I could not account for it.

An indication of my poor nervous health can be gained from my response to an odd discovery which I made on one of my nocturnal rambles. It was on the evening of July 11th, when the moon flooded the mysterious hillocks with a curious pallor.

Wandering somewhat beyond my usual limits, I came upon a great stone which seemed to differ markedly from any we had yet encountered. It was almost wholly covered, but I stooped and cleared away the sand with my hands, later studying the object carefully and supplementing the moonlight with my electric torch.

Unlike the other very large rocks, this one was perfectly square-cut, with no convex or concave surface. It seemed, too, to be of a dark basaltic substance, wholly dissimilar to the granite and sandstone and occasional concrete of the now familiar fragments.

Suddenly I rose, turned, and ran for the camp at top speed. It was a wholly unconscious and irrational flight, and only when I was close to my tent did I fully realise why I had run. Then it came to me. The queer dark stone was something which I had dreamed and read about, and which was linked with the uttermost horrors of the aeon-old legendry.

It was one of the blocks of that basaltic elder masonry which the fabled Great Race held in such fear - the tall, windowless ruins left by those brooding, half-material, alien things that festered in earth's nether abysses and against whose wind-like, invisible forces the trap-doors were sealed and the sleepless sentinels posted.

I remained awake all night, but by dawn realised how silly I had been to let the shadow of a myth upset me. Instead of being frightened, I should have had a discoverer's enthusiasm.

The next forenoon I told the others about my find, and Dyer, Freeborn, Boyle, my son, and I set out to view the anomalous block. Failure, however, confronted us. I had formed no clear idea of the stone's location, and a late ind had wholly altered the hillocks of shifting sand.

VI

I come now to the crucial and most difficult part of my narrative - all the more difficult because I cannot be quite certain of its reality. At times I feel uncomfortably sure that I was not dreaming or deluded; and it is this feeling in view of the stupendous implications which the objective truth of my experience would raise - which impels me to make this record.
My son - a trained psychologist with the fullest and most sympathetic knowledge of my whole case - shall be the primary judge of what I have to tell.

First let me outline the externals of the matter, as those at the camp know them. On the night of July 17-18, after a windy day, I retired early but could not sleep. Rising shortly before eleven, and afflicted as usual with that strange feeling regarding the northeastward terrain, I set out on one of my typical nocturnal walks; seeing and greeting only one person - an Australian miner named Tupper - as I left our precincts.

The moon, slightly past full, shone from a clear sky, and drenched the ancient sands with a white, leprous radiance which seemed to me somehow infinitely evil. There was no longer any wind, nor did any return for nearly five hours, as amply attested by Tupper and others who saw me walking rapidly across the pallid, secret-guarding hillocks toward the northeast.

About 3:30 a.m. a violent wind blew up, waking everyone in camp and felling three of the tents. The sky was unclouded, and the desert still blazed with that leprous moonlight. As the party saw to the tents my absence was noted, but in view of my previous walks this circumstance gave no one alarm. And yet, as many as three men - all Australians - seemed to feel something sinister in the air.

Mackenzie explained to Professor Freeborn that this was a fear picked up from blackfellow folklore - the natives having woven a curious fabric of malignant myth about the high winds which at long intervals sweep across the sands under a clear sky. Such winds, it is whispered, blow out of the great stone huts under the ground, where terrible things have happened - and are never felt except near places where the big marked stones are scattered. Close to four the gale subsided as suddenly as it had begun, leaving the sand hills in new and unfamiliar shapes.

It was just past five, with the bloated, fungoid moon sinking in the west, when I staggered into camp - hatless, tattered, features scratched and ensanguined, and without my electric torch. Most of the men had returned to bed, but Professor Dyer was smoking a pipe in front of his tent. Seeing my winded and almost frenzied state, he called Dr. Boyle, and the two of them got me on my cot and made me comfortable. My son, roused by the stir, soon joined them, and they all tried to force me to lie still and attempt sleep.

But there was no sleep for me. My psychological state was very extraordinary - different from anything I had previously suffered. After a time I insisted upon talking - nervously and elaborately explaining my condition. I told them I had become fatigued, and had lain down in the sand for a nap. There had, I said, been dreams even more frightful than usual - and when I was awaked by the sudden high wind my overwrought nerves had snapped. I had fled in panic, frequently falling over half-buried stones and thus gaining my tattered and bedraggled aspect. I must have slept long - hence the hours of my absence.

Of anything strange either seen or experienced I hinted absolutely nothing - exercising the greatest self-control in that respect. But I spoke of a change of mind regarding the whole work of the expedition, and urged a halt in all digging toward the northeast. My reasoning was patently weak - for I mentioned a dearth of blocks, a wish not to offend the
superstitious miners, a possible shortage of funds from the college, and other things either untrue or irrelevant. Naturally, no one paid the least attention to my new wishes - not even my son, whose concern for my health was obvious.

The next day I was up and around the camp, but took no part in the excavations. Seeing that I could not stop the work, I decided to return home as soon as possible for the sake of my nerves, and made my son promise to fly me in the plane to Perth - a thousand miles to the southwest - as soon as he had surveyed the region I wished let alone.

If, I reflected, the thing I had seen was still visible, I might decide to attempt a specific warning even at the cost of ridicule. It was just conceivable that the miners who knew the local folklore might back me up. Humouring me, my son made the survey that very afternoon, flying over all the terrain my walk could possibly have covered. Yet nothing of what I had found remained in sight.

It was the case of the anomalous basalt block all over again - the shifting sand had wiped out every trace. For an instant I half regretted having lost a certain awesome object in my stark fright - but now I know that the loss was merciful. I can still believe my whole experience an illusion - especially if, as I devoutly hope, that hellish abyss is never found.

Wingate took me to Perth on July 20th, though declining to abandon the expedition and return home. He stayed with me until the 25th, when the steamer for Liverpool sailed. Now, in the cabin of the Empress, I am pondering long and frantically upon the entire matter, and have decided that my son at least must be informed. It shall rest with him whether to diffuse the matter more widely.

In order to meet any eventuality I have prepared this summary of my background - as already known in a scattered way to others - and will now tell as briefly as possible what seemed to happen during my absence from the camp that hideous night.

Nerves on edge, and whipped into a kind of perverse eagerness by that inexplicable, dread-mingled, mnemonic urge toward the northeast, I plodded on beneath the evil, burning moon. Here and there I saw, half shrouded by sand, those primal Cyclopean blocks left from nameless and forgotten aeons.

The incalculable age and brooding horror of this monstrous waste began to oppress me as never before, and I could not keep from thinking of my maddening dreams, of the frightful legends which lay behind them, and of the present fears of natives and miners concerning the desert and its carven stones.

And yet I plodded on as if to some eldritch rendezvous - more and more assailed by bewildering fancies, compulsions, and pseudo-memories. I thought of some of the possible contours of the lines of stones as seen by my son from the air, and wondered why they seemed at once so ominous and so familiar. Something was fumbling and rattling at the latch of my recollection, while another unknown force sought to keep the portal barred.

The night was windless, and the pallid sand curved upward and downward like frozen waves of the sea. I had no goal, but somehow ploughed along as if with fate-bound
assurance. My dreams welled up into the waking world, so that each sand-embedded megalith seemed part of endless rooms and corridors of pre-human masonry, carved and hieroglyphed with symbols that I knew too well from years of custom as a captive mind of the Great Race.

At moments I fancied I saw those omniscient, conical horrors moving about at their accustomed tasks, and I feared to look down lest I find myself one with them in aspect. Yet all the while I saw the sand-covered blocks as well as the rooms and corridors; the evil, burning moon as well as the lamps of luminous crystal; the endless desert as well as the waving ferns beyond the windows. I was awake and dreaming at the same time.

I do not know how long or how far - or indeed, in just what direction - I had walked when I first spied the heap of blocks bared by the day's wind. It was the largest group in one place that I had seen so far, and so sharply did it impress me that the visions of fabulous aeons faded suddenly away.

Again there were only the desert and the evil moon and the shards of an unguessed past. I drew close and paused, and cast the added light of my electric torch over the tumbled pile. A hillock had blown away, leaving a low, irregularly round mass of megaliths and smaller fragments some forty feet across and from two to eight feet high.

From the very outset I realized that there was some utterly unprecedented quality about those stones. Not only was the mere number of them quite without parallel, but something in the sandworn traces of design arrested me as I scanned them under the mingled beams of the moon and my torch.

Not that any one differed essentially from the earlier specimens we had found. It was something subtler than that. The impression did not come when I looked at one block alone, but only when I ran my eye over several almost simultaneously.

Then, at last, the truth dawned upon me. The curvilinear patterns on many of those blocks were closely related - parts of one vast decorative conception. For the first time in this aeon-shaken waste I had come upon a mass of masonry in its old position - tumbled and fragmentary, it is true, but none the less existing in a very definite sense.

Mounting at a low place, I clambered laboriously over the heap; here and there clearing away the sand with my fingers, and constantly striving to interpret varieties of size, shape, and style, and relationships of design.

After a while I could vaguely guess at the nature of the bygone structure, and at the designs which had once stretched over the vast surfaces of the primal masonry. The perfect identity of the whole with some of my dream-glimpses appalled and unnerved me.

This was once a Cyclopean corridor thirty feet tall, paved with octagonal blocks and solidly vaulted overhead. There would have been rooms opening off on the right, and at the farther end one of those strange inclined planes would have wound down to still lower depths.
I started violently as these conceptions occurred to me, for there was more in them than
the blocks themselves had supplied. How did I know that this level should have been far
underground? How did I know that the plane leading upward should have been behind
me? How did I know that the long subterrene passage to the Square of Pillars ought to lie
on the left one level above me?

How did I know that the room of machines and the rightward-leading tunnel to the
central archives ought to lie two levels below? How did I know that there would be one
of those horrible, metal-banded trap-doors at the very bottom four levels down?
Bewildered by this intrusion from the dream-world, I found myself shaking and bathed in
a cold perspiration.

Then, as a last, intolerable touch, I felt that faint, insidious stream of cool air trickling
upward from a depressed place near the center of the huge heap. Instantly, as once before,
my visions faded, and I saw again only the evil moonlight, the brooding desert, and the
spreading tumulus of palaeogean masonry. Something real and tangible, yet fraught with
infinite suggestions of nighted mystery, now confronted me. For that stream of air could
argue but one thing - a hidden gulf of great size beneath the disordered blocks on the
surface.

My first thought was of the sinister blackfellow legends of vast underground huts among
the megaliths where horrors happen and great winds are born. Then thoughts of my own
dreams came back, and I felt dim pseudo-memories tugging at my mind. What manner of
place lay below me? What primal, inconceivable source of age-old myth-cycles and
haunting nightmares might I be on the brink of uncovering?

It was only for a moment that I hesitated, for more than curiosity and scientific zeal was
driving me on and working against my growing fear.

I seemed to move almost automatically, as if in the clutch of some compelling fate.
Pocketing my torch, and struggling with a strength that I had not thought I possessed, I
wrenched aside first one titan fragment of stone and then another, till there welled up a
strong draught whose dampness contrasted oddly with the deserts dry air. A black rift
began to yawn, and at length - when I had pushed away every fragment small enough to
budge - the leprous moonlight blazed on an aperture of ample width to admit me.

I drew out my torch and cast a brilliant beam into the opening. Below me was a chaos of
tumbled masonry, sloping roughly down toward the north at an angle of about forty-five
degrees, and evidently the result of some bygone collapse from above.

Between its surface and the ground level was a gulf of impenetrable blackness at whose
upper edge were signs of gigantic, stress-heaved vaulting. At this point, it appeared, the
deserts sands lay directly upon a floor of some titan structure of earth's youth - how
preserved through aeons of geologic convulsion I could not then and cannot now even
attempt to guess.

In retrospect, the barest idea of a sudden, lone descent into such a doubtful abyss - and at
a time when one's whereabouts were unknown to any living soul - seems like the utter
apex of insanity. Perhaps it was - yet that night I embarked without hesitancy upon such a descent.

Again there was manifest that lure and driving of fatality which had all along seemed to direct my course. With torch flashing intermittently to save the battery, I commenced a mad scramble down the sinister, Cyclopean incline below the opening - sometimes facing forward as I found good hand - and foot-holds, and at other times turning to face the heap of megaliths as I clung and fumbled more precariously.

In two directions beside me distant walls of carven, crumbling masonry loomed dimly under the direct beams of my torch. Ahead, however, was only unbroken darkness.

I kept no track of time during my downward scramble. So seething with baffling hints and images was my mind that all objective matters seemed withdrawn into incalculable distances. Physical sensation was dead, and even fear remained as a wraith-like, inactive gargoyle leering impotently at me.

Eventually, I reached a level floor strewn with fallen blocks, shapeless fragments of stone, and sand and detritus of every kind. On either side - perhaps thirty feet apart - rose massive walls culminating in huge groinings. That they were carved I could just discern, but the nature of the carvings was beyond my perception.

What held me the most was the vaulting overhead. The beam from my torch could not reach the roof, but the lower parts of the monstrous arches stood out distinctly. And so perfect was their identity with what I had seen in countless dreams of the elder world, that I trembled actively for the first time.

Behind and high above, a faint luminous blur told of the distant moonlit world outside. Some vague shred of caution warned me that I should not let it out of my sight, lest I have no guide for my return.

I now advanced toward the wall at my left, where the traces of carving were plainest. The littered floor was nearly as hard to traverse as the downward heap had been, but I managed to pick my difficult way.

At one place I heaved aside some blocks and locked away the detritus to see what the pavement was like, and shuddered at the utter, fateful familiarity of the great octagonal stones whose buckled surface still held roughly together.

Reaching a convenient distance from the wall, I cast the searchlight slowly and carefully over its worn remnants of carving. Some bygone influx of water seemed to have acted on the sandstone surface, while there were curious incrustations which I could not explain.

In places the masonry was very loose and distorted, and I wondered how many aeons more this primal, hidden edifice could keep its remaining traces of form amidst earth's heavings.
But it was the carvings themselves that excited me most. Despite their time-crumbled state, they were relatively easy to trace at close range; and the complete, intimate familiarity of every detail almost stunned my imagination.

That the major attributes of this hoary masonry should be familiar, was not beyond normal credibility.

Powerfully impressing the weavers of certain myths, they had become embodied in a stream of cryptic lore which, somehow, coming to my notice during the amnesic period, had evoked vivid images in my subconscious mind.

But how could I explain the exact and minute fashion in which each line and spiral of these strange designs tallied with what I had dreamed for more than a score of years? What obscure, forgotten iconography could have reproduced each subtle shading and nuance which so persistently, exactly, and unvaryingly besieged my sleeping vision night after night?

For this was no chance or remote resemblance. Definitely and absolutely, the millennially ancient, aeon-hidden corridor in which I stood was the original of something I knew in sleep as intimately as I knew my own house in Crane Street, Arkham. True, my dreams shewed the place in its undecayed prime; but the identity was no less real on that account. I was wholly and horribly oriented.

The particular structure I was in was known to me. Known, too, was its place in that terrible elder city of dreams. That I could visit unerringly any point in that structure or in that city which had escaped the changes and devastations of uncounted ages, I realized with hideous and instinctive certainty. What in heaven's name could all this mean? How had I come to know what I knew? And what awful reality could lie behind those antique tales of the beings who had dwelt in this labyrinth of primordial stone?

Words can convey only fractionally the welter of dread and bewilderment which ate at my spirit. I knew this place. I knew what lay before me, and what had lain overhead before the myriad towering stories had fallen to dust and debris and the desert. No need now, I thought with a shudder, to keep that faint blur of moonlight in view.

I was torn betwixt a longing to flee and a feverish mixture of burning curiosity and driving fatality. What had happened to this monstrous megalopolis of old in the millions of years since the time of my dreams? Of the subterrene mazes which had underlain the city and linked all the titan towers, how much had still survived the writhings of earth's crust?

Had I come upon a whole buried world of unholy archaism? Could I still find the house of the writing master, and the tower where S'gg'ha, the captive mind from the star-headed vegetable carnivores of Antarctica, had chiselled certain pictures on the blank spaces of the walls?

Would the passage at the second level down, to the hall of the alien minds, be still unchoked and traversable? In that hall the captive mind of an incredible entity - a half-
plastic denizen of the hollow interior of an unknown trans-Plutonian planet eighteen million years in the future - had kept a certain thing which it had modelled from clay.

I shut my eyes and put my hand to my head in a vain, pitiful effort to drive these insane dream-fragments from my consciousness. Then, for the first time, I felt acutely the coolness, motion, and dampness of the surrounding air. Shuddering, I realized that a vast chain of aeon-dead black gulfs must indeed be yawning somewhere beyond and below me.

I thought of the frightful chambers and corridors and inclines as I recalled them from my dreams. Would the way to the central archives still be open? Again that driving fatality tugged insistently at my brain as I recalled the awesome records that once lay cased in those rectangular vaults of rustless metal.

There, said the dreams and legends, had reposed the whole history, past and future, of the cosmic space-time continuum - written by captive minds from every orb and every age in the solar system. Madness, of course - but had I not now stumbled into a nighted world as mad as I?

I thought of the locked metal shelves, and of the curious knob twistings needed to open each one. My own came vividly into my consciousness. How often had I gone through that intricate routine of varied turns and pressures in the terrestrial vertebrate section on the lowest level! Every detail was fresh and familiar.

If there were such a vault as I had dreamed of, I could open it in a moment. It was then that madness took me utterly. An instant later, and I was leaping and stumbling over the rocky debris toward the well-remembered incline to the depths below.

VII

From that point forward my impressions are scarcely to be relied on - indeed, I still possess a final, desperate hope that they all form parts of some daemonic dream or illusion born of delirium. A fever raged in my brain, and everything came to me through a kind of haze - sometimes only intermittently.

The rays of my torch shot feebly into the engulfing blackness, bringing phantasmal flashes of hideously familiar walls and carvings, all blighted with the decay of ages. In one place a tremendous mass of vaulting had fallen, so that I had to clamber over a mighty mound of stones reaching almost to the ragged, grotesquely stalactited roof.

It was all the ultimate apex of nightmare, made worse by the blasphemous tug of pseudo-memory. One thing only was unfamiliar, and that was my own size in relation to the monstrous masonry. I felt oppressed by a sense of unwonted smallness, as if the sight of these towering walls from a mere human body was something wholly new and abnormal. Again and again I looked nervously down at myself, vaguely disturbed by the human form I possessed.

Onward through the blackness of the abyss I leaped, plunged, and staggered - often falling and bruising myself, and once nearly shattering my torch. Every stone and corner
of that daemonic gulf was known to me, and at many points I stopped to cast beams of light through choked and crumbling, yet familiar, archways.

Some rooms had totally collapsed; others were bare, or debris-filled. In a few I saw masses of metal - some fairly intact, some broken, and some crushed or battered - which I recognised as the colossal pedestals or tables of my dreams. What they could in truth have been, I dared not guess.

I found the downward incline and began its descent - though after a time halted by a gaping, ragged chasm whose narrowest point could not be much less than four feet across. Here the stonework had fallen through, revealing incalculable inky depths beneath.

I knew there were two more cellar levels in this titan edifice, and trembled with fresh panic as I recalled the metal-clamped trap-door on the lowest one. There could be no guards now - for what had lurked beneath had long since done its hideous work and sunk into its long decline. By the time of the posthuman beetle race it would be quite dead. And yet, as I thought of the native legends, I trembled anew.

It cost me a terrible effort to vault that yawning chasm, since the littered floor prevented a running start - but madness drove me on. I chose a place close to the left-hand wall - where the rift was least wide and the landing-spot reasonably clear of dangerous debris - and after one frantic moment reached the other side in safety.

At last, gaining the lower level, I stumbled on past the archway of the room of machines, within which were fantastic ruins of metal, half buried beneath fallen vaulting. Everything was where I knew it would be, and I climbed confidently over the heaps which barred the entrance of a vast transverse corridor. This, I realised, would take me under the city to the central archives.

Endless ages seemed to unroll as I stumbled, leaped, and crawled along that debris-cluttered corridor. Now and then I could make out carvings on the ages-tainted walls - some familiar, others seemingly added since the period of my dreams. Since this was a subterrene house - connecting highway, there were no archways save when the route led through the lower levels of various buildings.

At some of these intersections I turned aside long enough to look down well-remembered corridors and into well-remembered rooms. Twice only did I find any radical changes from what I had dreamed of - and in one of these cases I could trace the sealed-up outlines of the archway I remembered.

I shook violently, and felt a curious surge of retarding weakness, as I steered a hurried and reluctant course through the crypt of one of those great windowless, ruined towers whose alien, basalt masonry bespoke a whispered and horrible origin.

This primal vault was round and fully two hundred feet across, with nothing carved upon the dark-hued stonework. The floor was here free from anything save dust and sand, and I could see the apertures leading upward and downward. There were no stairs or inclines -
indeed, my dreams had pictured those elder towers as wholly untouched by the fabulous Great Race. Those who had built them had not needed stairs or inclines.

In the dreams, the downward aperture had been tightly sealed and nervously guarded. Now it lay open-black and yawning, and giving forth a current of cool, damp air. Of what limitless caverns of eternal night might brood below, I would not permit myself to think.

Later, clawing my way along a badly heaped section of the corridor, I reached a place where the roof had wholly caved in. The debris rose like a mountain, and I climbed up over it, passing through a vast, empty space where my torchlight could reveal neither walls nor vaulting. This, I reflected, must be the cellar of the house of the metal-purveyors, fronting on the third square not far from the archives. What had happened to it I could not conjecture.

I found the corridor again beyond the mountain of detritus and stone, but after a short distance encountered a wholly choked place where the fallen vaulting almost touched the perilously sagging ceiling. How I managed to wrench and tear aside enough blocks to afford a passage, and how I dared disturb the tightly packed fragments when the least shift of equilibrium might have brought down all the tons of superincumbent masonry to crush me to nothingness, I do not know.

It was sheer madness that impelled and guided me - if, indeed, my whole underground adventure was not - as I hope - a hellish delusion or phase of dreaming. But I did make - or dream that I made - a passage that I could squirm through. As I wiggled over the mound of debris - my torch, switched continuously on, thrust deeply in my mouth - I felt myself torn by the fantastic stalactites of the jagged floor above me.

I was now close to the great underground archival structure which seemed to form my goal. Sliding and clambering down the farther side of the barrier, and picking my way along the remaining stretch of corridor with hand-held, intermittently flashing torch, I came at last to a low, circular crypt with arches - still in a marvelous state of preservation - opening off on every side.

The walls, or such parts of them as lay within reach of my torchlight, were densely hieroglyphed and chiselled with typical curvilinear symbols - some added since the period of my dreams.

This, I realised, was my fated destination, and I turned at once through a familiar archway on my left. That I could find a clear passage up and down the incline to all the surviving levels, I had, oddly, little doubt. This vast, earth-protected pile, housing the annals of all the solar system, had been built with supernal skill and strength to last as long as that system itself.

Blocks of stupendous size, poised with mathematical genius and bound with cements of incredible toughness, had combined to form a mass as firm as the planet's rocky core. Here, after ages more prodigious than I could sanely grasp, its buried bulk stood in all its essential contours, the vast, dust-drifted floors scarce sprinkled with the litter elsewhere so dominant.
The relatively easy walking from this point onward went curiously to my head. All the frantic eagerness hitherto frustrated by obstacles now took itself out in a kind of febrile speed, and I literally raced along the low-roofed, monstrously well-remembered aisles beyond the archway.

I was past being astonished by the familiarity of what I saw. On every hand the great hieroglyphed metal shelf-doors loomed monstrously; some yet in place, others sprung open, and still others bent and buckled under bygone geological stresses not quite strong enough to shatter the titan masonry.

Here and there a dust-covered heap beneath a gaping, empty shelf seemed to indicate where cases had been shaken down by earth tremors. On occasional pillars were great symbols or letters proclaiming classes and subclasses of volumes.

Once I paused before an open vault where I saw some of the accustomed metal cases still in position amidst the omnipresent gritty dust. Reaching up, I dislodged one of the thinner specimens with some difficulty, and rested it on the floor for inspection. It was titled in the prevailing curvilinear hieroglyphs, though something in the arrangement of the characters seemed subtly unusual.

The odd mechanism of the hooked fastener was perfectly well known to me, and I snapped up the still rustless and workable lid and drew out the book within. The latter, as expected, was some twenty by fifteen inches in area, and two inches thick; the thin metal covers opening at the top.

Its tough cellulose pages seemed unaffected by the myriad cycles of time they had lived through, and I studied the queerly pigmented, brush-drawn letters of the text-symbols unlike either the usual curved hieroglyphs or any alphabet known to human scholarship - with a haunting, half-aroused memory.

It came to me that this was the language used by a captive mind I had known slightly in my dreams - a mind from a large asteroid on which had survived much of the archaic life and lore of the primal planet whereof it formed a fragment. At the same time I recalled that this level of the archives was devoted to volumes dealing with the non-terrestrial planets.

As I ceased poring over this incredible document I saw that the light of my torch was beginning to fail, hence quickly inserted the extra battery I always had with me. Then, armed with the stronger radiance, I resumed my feverish racing through unending tangles of aisles and corridors - recognising now and then some familiar shelf, and vaguely annoyed by the acoustic conditions which made my footfalls echo incongruously in these catacombs.

The very prints of my shoes behind me in the millennially untrodden dust made me shudder. Never before, if my mad dreams held anything of truth, had human feet pressed upon those immemorial pavements.
Of the particular goal of my insane racing, my conscious mind held no hint. There was, however, some force of evil potency pulling at my dazed will and buried recollection, so that I vaguely felt I was not running at random.

I came to a downward incline and followed it to profounder depths. Floors flashed by me as I raced, but I did not pause to explore them. In my whirling brain there had begun to beat a certain rhythm which set my right hand twitching in unison. I wanted to unlock something, and felt that I knew all the intricate twists and pressures needed to do it. It would be like a modern safe with a combination lock.

Dream or not, I had once known and still knew. How any dream - or scrap of unconsciously absorbed legend - could have taught me a detail so minute, so intricate, and so complex, I did not attempt to explain to myself. I was beyond all coherent thought. For was not this whole experience - this shocking familiarity with a set of unknown ruins, and this monstrously exact identity of everything before me with what only dreams and scraps of myth could have suggested - a horror beyond all reason?

Probably it was my basic conviction then - as it is now during my saner moments - that I was not awake at all, and that the entire buried city was a fragment of febrile hallucination.

Eventually, I reached the lowest level and struck off to the right of the incline. For some shadowy reason I tiled to soften my steps, even though I lost speed thereby. There was a space I was afraid to cross on this last, deeply buried floor.

As I drew near it I recalled what thing in that space I feared. It was merely one of the metal-barred and closely guarded trap-doors. There would be no guards now, and on that account I trembled and tiptoed as I had done in passing through that black basalt vault where a similar trap-door had yawned.

I felt a current of cool, damp air as I had felt there, and wished that my course led in another direction. Why I had to take the particular course I was taking, I did not know.

When I came to the space I saw that the trap-door yawned widely open. Ahead, the shelves began again, and I glimpsed on the floor before one of them a heap very thinly covered with dust, where a number of cases had recently fallen. At the same moment a fresh wave of panic clutched me, though for some time I could not discover why.

Heaps of fallen cases were not uncommon, for all through the aeons this lightless labyrinth had been racked by the heavings of earth and had echoed at intervals of the deafening clatter of toppling objects. It was only when I was nearly across the space that I realized why I shook so violently.

Not the heap, but something about the dust of the level floor was troubling me. In the light of my torch it seemed as if that dust were not as even as it ought to be - there were places where it looked thinner, as if it had been disturbed not many months before. I could not be sure, for even the apparently thinner places were dusty enough; yet a certain suspicion of regularity in the fancied unevenness was highly disquieting.
When I brought the torchlight close to one of the queer places I did not like what I saw - for the illusion of regularity became very great. It was as if there were regular lines of composite impressions - impressions that went in threes, each slightly over a foot square, and consisting of five nearly circular three-inch prints, one in advance of the other four.

These possible lines of foot-square impressions appeared to lead in two directions, as if something had gone somewhere and returned. They were, of course, very faint, and may have been illusions or accidents; but there was an element of dim, fumbling terror about the way I thought they ran. For at one end of them was the heap of cases which must have clattered down not long before, while at the other end was the ominous trap-door with the cool, damp wind, yarning unguarded down to abysses past imagination.

VIII

That my strange sense of compulsion was deep and overwhelming is shewn by its conquest of my fear. No rational motive could have drawn me on after that hideous suspicion of prints and the creeping dream-memories it excited. Yet my right hand, even as it shook with fright, still twitched rhythmically in its eagerness to turn a lock it hoped to find. Before I knew it I was past the heap of lately fallen cases and running on tiptoe through aisles of utterly unbroken dust toward a point which I seemed to know morbidly, horribly well.

My mind was asking itself questions whose origin and relevancy I was only beginning to guess. Would the shelf be reachable by a human body? Could my human hand master all the aeon-remembered motions of the lock? Would the lock be undamaged and workable? And what would I do - what dare I do with what - as I now commenced to realise - I both hoped and feared to find? Would it prove the awesome, brain-shattering truth of something past normal conception, or shew only that I was dreaming?

The next I knew I had ceased my tiptoed racing and was standing still, staring at a row of maddeningly familiar hieroglyphed shelves. They were in a state of almost perfect preservation, and only three of the doors in this vicinity had sprung open.

My feelings toward these shelves cannot be described - so utter and insistent was the sense of old acquaintance. I was looking high up at a row near the top and wholly out of my reach, and wondering how I could climb to best advantage. An open door four rows from the bottom would help, and the locks of the closed doors formed possible holds for hands and feet. I would grip the torch between my teeth, as I had in other places where both hands were needed. Above all I must make no noise.

How to get down what I wished to remove would be difficult, but I could probably hook its movable fastener in my coat collar and carry it like a knapsack. Again I wondered whether the lock would be undamaged. That I could repeat each familiar motion I had not the least doubt. But I hoped the thing would not scrape or creak - and that my hand could work it properly.

Even as I thought these things I had taken the torch in my mouth and begun to climb. The projecting locks were poor supports; but, as I had expected, the opened shelf helped
greatly. I used both the swinging door and the edge of the aperture itself in my ascent, and managed to avoid any loud creaking.

Balanced on the upper edge of the door, and leaning far to my right, I could just reach the lock I sought. My fingers, half numb from climbing, were very clumsy at first; but I soon saw that they were anatomically adequate. And the memory-rhythm was strong in them.

Out of unknown gulfs of time the intricate, secret motions had somehow reached my brain correctly in every detail - for after less than five minutes of trying there came a click whose familiarity was all the more startling because I had not consciously anticipated it. In another instant the metal door was slowly swinging open with only the faintest grating sound.

Dazedly I looked over the row of greyish case ends thus exposed, and felt a tremendous surge of some wholly inexplicable emotion. Just within reach of my right hand was a case whose curving hieroglyphs made me shake with a pang infinitely more complex than one of mere fright. Still shaking, I managed to dislodge it amidst a shower of gritty flakes, and ease it over toward myself without any violent noise.

Like the other case I had handled, it was slightly more than twenty by fifteen inches in size, with curved mathematical designs in low relief. In thickness it just exceeded three inches.

Crudely wedging it between myself and the surface I was climbing, I fumbled with the fastener and finally got the hook free. Lifting the cover, I shifted the heavy object to my back, and let the hook catch hold of my collar. Hands now free, I awkwardly clambered down to the dusty floor, and prepared to inspect my prize.

Kneeling in the gritty dust, I swung the case around and rested it in front of me. My hands shook, and I dreaded to draw out the book within almost as much as I longed - and felt compelled - to do so. It had very gradually become clear to me what I ought to find, and this realisation nearly paralysed my faculties.

If the thing were there - and if I were not dreaining - the implications would be quite beyond the power of the human spirit to bear. What tormented me most was my momentary inability to feel that my surroundings were a dream. The sense of reality was hideous - and again becomes so as I recall the scene.

At length I tremblingly pulled the book from its container and stared fascinatedly at the well-known hieroglyphs on the cover. It seemed to be in prime condition, and the curvilinear letters of the title held me in almost as hypnotised a state as if I could read them. Indeed, I cannot swear that I did not actually read them in some transient and terrible access of abnormal memory.

I do not know how long it was before I dared to lift that thin metal cover. I temporized and made excuses to myself. I took the torch from my mouth and shut it off to save the battery. Then, in the dark, I collected my courage finally lifting the cover without turning on the light. Last of all, I did indeed flash the torch upon the exposed page - steeling myself in advance to suppress any sound no matter what I should find.
I looked for an instant, then collapsed. Clenching my teeth, however, I kept silent. I sank wholly to the floor and put a hand to my forehead amidst the engulfing blackness. What I dreaded and expected was there. Either I was dreaming, or time and space had become a mockery.

I must be dreaming - but I would test the horror by carrying this thing back and shewing it to my son if it were indeed a reality. My head swam frightfully, even though there were no visible objects in the unbroken gloom to swirl about me. Ideas and images of the starkest terror - excited by vistas which my glimpse had opened up - began to throng in upon me and cloud my senses.

I thought of those possible prints in the dust, and trembled at the sound of my own breathing as I did so. Once again I flashed on the light and looked at the page as a serpent's victim may look at his destroyer's eyes and fangs.

Then, with clumsy fingers, in the dark, I closed the book, put it in its container, and snapped the lid and the curious, hooked fastener. This was what I must carry back to the outer world if it truly existed - if the whole abyss truly existed - if I, and the world itself, truly existed.

Just when I tottered to my feet and commenced my return I cannot be certain. It comes to me oddly - as a measure of my sense of separation from the normal world - that I did not even once look at my watch during those hideous hours nderground.

Torch in hand, and with the ominous case under one arm, I eventually found myself tiptoeing in a kind of silent panic past the draught - giving abyss and those lurking suggestions of prints. I lessened my precautions as I climbed up the endless inclines, but could not shake off a shadow of apprehension which I had not felt on the downward journey.

I dreaded having to repass through the black basalt crypt that was older than the city itself, where cold draughts welled up from unguarded depths. I thought of that which the Great Race had feared, and of what might still be lurking - be it ever so weak and dying - down there. I thought of those five-circle prints and of what my dreams had told me of such prints - and of strange winds and whistling noises associated with them. And I thought of the tales of the modern blackfellows, wherein the horror of great winds and nameless subterrene ruins was dwelt upon.

I knew from a carven wall symbol the right floor to enter, and came at last after passing that other book I had examined - to the great circular space with the branching archways. On my right, and at once recognisable, was the arch through which I had arrived. This I now entered, conscious that the rest of my course would be harder because of the tumbled state of the masonry outside the archive building. My new metal-eased burden weighed upon me, and I found it harder and harder to be quiet as I stumbled among debris and fragments of every sort.

Then I came to the ceiling-high mound of debris through which I had wrenched a scanty passage. My dread at wriggling through again was infinite, for my first passage had made
some noise, and I now - after seeing those possible prints - dreaded sound above all things. The case, too, doubled the problem of traversing the narrow crevice.

But I clambered up the barrier as best I could, and pushed the case through the aperture ahead of me. Then, torch in mouth, I scrambled through myself - my back torn as before by stalactites.

As I tried to grasp the case again, it fell some distance ahead of me down the slope of the debris, making a disturbing clatter and arousing echoes which sent me into a cold perspiration. I lunged for it at once, and regained it without further noise - but a moment afterward the slipping of blocks under my feet raised a sudden and unprecedented din.

The din was my undoing. For, falsely or not, I thought I heard it answered in a terrible way from spaces far behind me. I thought I heard a shrill, whistling sound, like nothing else on earth, and beyond any adequate verbal description. If so, what followed has a grim irony - since, save for the panic of this thing, the second thing might never have happened.

As it was, my frenzy was absolute and unrelieved. Taking my torch in my hand and clutching feebly at the case, I leaped and bounded wildly ahead with no idea in my brain beyond a mad desire to race out of these nightmare ruins to the waking world of desert and moonlight which lay so far above.

I hardly knew it when I reached the mountain of debris which towered into the vast blackness beyond the caved-in roof, and bruised and cut myself repeatedly in scrambling up its steep slope of jagged blocks and fragments.

Then came the great disaster. Just as I blindly crossed the summit, unprepared for the sudden dip ahead, my feet slipped utterly and I found myself involved in a mangling avalanche of sliding masonry whose cannon-loud uproar split the black cavern air in a deafening series of earth-shaking reverberations.

I have no recollection of emerging from this chaos, but a momentary fragment of consciousness shows me as plunging and tripping and scrambling along the corridor amidst the clangour - case and torch still with me.

Then, just as I approached that primal basalt crypt I had so dreaded, utter madness came. For as the echoes of the avalanche died down, there became audible a repetition of that frightful alien whistling I thought I had heard before. This time there was no doubt about it - and what was worse, it came from a point not behind but ahead of me.

Probably I shrieked aloud then. I have a dim picture of myself as flying through the hellish basalt vault of the elder things, and hearing that damnable alien sound piping up from the open, unguarded door of limitless nether blacknesses. There was a wind, too - not merely a cool, damp draught, but a violent, purposeful blast belching savagely and frigidly from that abominable gulf whence the obscene whistling came.
There are memories of leaping and lurching over obstacles of every sort, with that torrent of wind and shrieking sound growing moment by moment, and seeming to curl and twist purposefully around me as it struck out wickedly from the spaces behind and beneath.

Though in my rear, that wind had the odd effect of hindering instead of aiding my progress; as if it acted like a noose or lasso thrown around me. Heedless of the noise I made, I clattered over a great barrier of blocks and was again in the structure that led to the surface.

I recall glimpsing the archway to the room of machines and almost crying out as I saw the incline leading down to where one of those blasphemous trap-doors must be yawning two levels below. But instead of crying out I muttered over and over to myself that this was all a dream from which I must soon awake. Perhaps I was in camp - perhaps I was at home in Arkham. As these hopes bolstered up my sanity I began to mount the incline to the higher level.

I knew, of course, that I had the four-foot cleft to re-cross, yet was too racked by other fears to realise the full horror until I came almost upon it. On my descent, the leap across had been easy - but could I clear the gap as readily when going uphill, and hampered by fright, exhaustion, the weight of the metal case, and the anomalous backward tug of that daemon wind? I thought of these things at the last moment, and thought also of the nameless entities which might be lurking in the black abysses below the chasm.

My wavering torch was growing feeble, but I could tell by some obscure memory when I neared the cleft. The chill blasts of wind and the nauseous whistling shrieks behind me were for the moment like a merciful opiate, dulling my imagination to the horror of the yawning gulf ahead. And then I became aware of the added blasts and whistling in front of me - tides of abomination surging up through the cleft itself from depths unimagined and unimaginable.

Now, indeed, the essence of pure nightmare was upon me. Sanity departed - and, ignoring everything except the animal impulse of flight, I merely struggled and plunged upward over the incline's debris as if no gulf had existed. Then I saw the chasm's edge, leaped frenziedly with every ounce of strength I possessed, and was instantly engulfed in a pandaemoniae vortex of loathsome sound and utter, materially tangible blackness.

This is the end of my experience, so far as I can recall. Any further impressions belong wholly to the domain of phantasmagoria delirium. Dream, madness, and memory merged wildly together in a series of fantastic, fragmentary delusions which can have no relation to anything real.

There was a hideous fall through incalculable leagues of viscous, sentient darkness, and a babel of noises utterly alien to all that we know of the earth and its organic life. Dormant, rudimentary senses seemed to start into vitality within me, telling of pits and voids peopled by floating horrors and leading to sunless crags and oceans and teeming cities of windowless, basalt towers upon which no light ever shone.

Secrets of the primal planet and its immemorial aeons flashed through my brain without the aid of sight or sound, and there were known to me things which not even the wildest
of my former dreams had ever suggested. And all the while cold fingers of damp vapor clutched and picked at me, and that eldritch, damnable whistling shrieked fiendishly above all the alternations of babel and silence in the whirlpools of darkness around.

Afterward there were visions of the Cyclopean city of my dreams - not in ruins, but just as I had dreamed of it. I was in my conical, non-human body again, and mingled with crowds of the Great Race and the captive minds who carried books up and down the lofty corridors and vast inclines.

Then, superimposed upon these pictures, were frightful, momentary flashes of a non-vistial consciousness involving desperate struggles, a writhing free from clutching tentacles of whistling wind, an insane, bat-like flight through half-solid air, a feverish burrowing through the cyclone-whipped dark, and a wild stumbling and scrambling over fallen masonry.

Once there was a curious, intrusive flash of half sight - a faint, diffuse suspicion of bluish radiance far overhead. Then there came a dream of wind - pursued climbing and crawling - of wriggling into a blaze of sardonic moonlight through a jumble of debris which slid and collapsed after me amidst a morbid hurricane. It was the evil, monotonous beating of that maddening moonlight which at last told me of the return of what I had once known as the objective, waking world.

I was clawing prone through the sands of the Australian desert, and around me shrieked such a tumult of wind as I had never before known on our planet's surface. My clothing was in rags, and my whole body was a mass of bruises and scratches.

Full consciousness returned very slowly, and at no time could I tell just where delirious dream left off and true memory began. There had seemed to be a mound of titan blocks, an abyss beneath it, a monstrous revelation from the past, and a nightmare horror at the end - but how much of this was real?

My flashlight was gone, and likewise any metal case I may have discovered. Had there been such a case - or any abyss - or any mound? Raising my head, I looked behind me, and saw only the sterile, undulant sands of the desert.

The daemon wind died down, and the bloated, fungoid moon sank reddeningly in the west. I lurched to my feet and began to stagger southwestward toward the camp. What in truth had happened to me? Had I merely collapsed in the desert and dragged a dream-racked body over miles of sand and buried blocks? If not, how could I bear to live any longer?

For, in this new doubt, all my faith in the myth-born unreality of my visions dissolved once more into the hellish older doubting. If that abyss was real, then the Great Race was real - and its blasphemous reachings and seizures in the cosmos-wide vortex of time were no myths or nightmares, but a terrible, soul-shattering actuality.

Had I, in full, hideous fact, been drawn back to a pre-human world of a hundred and fifty million years ago in those dark, baffling days of the amnesia? Had my present body been the vehicle of a frightful alien consciousness from palaeogean gulfs of time?
Had I, as the captive mind of those shambling horrors, indeed known that accursed city of stone in its primordial heyday, and wriggled down those familiar corridors in the loathsome shape of my captor? Were those tormenting dreams of more than twenty years the offspring of stark, monstrous memories?

Had I once veritably talked with minds from reachless corners of time and space, learned the universe's secrets, past and to come, and written the annals of my own world for the metal cases of those titan archives? And were those others - those shocking elder things of the mad winds and daemon pipings - in truth a lingering, lurking menace, waiting and slowly weakening in black abysses while varied shapes of life drag out their multimillennial courses on the planet's age-racked surface?

I do not know. If that abyss and what I held were real, there is no hope. Then, all too truly, there lies upon this world of man a mocking and incredible shadow out of time. But, mercifully, there is no proof that these things are other than fresh phases of my myth-born dreams. I did not bring back the metal case that would have been a proof, and so far those subterrene corridors have not been found.

If the laws of the universe are kind, they will never be found. But I must tell my son what I saw or thought I saw, and let him use his judgment as a psychologist in gauging the reality of my experience, and communicating this account to others.

I have said that the awful truth behind my tortured years of dreaming hinges absolutely upon the actuality of what I thought I saw in those Cyclopean, buried ruins. It has been hard for me, literally, to set down that crucial revelation, though no reader can have failed to guess it. Of course, it lay in that book within the metal case - the case which I pried out of its lair amidst the dust of a million centuries.

No eye had seen, no hand had touched that book since the advent of man to this planet. And yet, when I flashed my torch upon it in that frightful abyss, I saw that the queerly pigmented letters on the brittle, aeon-browned cellulose pages were not indeed any nameless hieroglyphs of earth's youth. They were, instead, the letters of our familiar alphabet, spelling out the words of the English language in my own handwriting.
I

During the winter of 1927-28 officials of the Federal government made a strange and secret investigation of certain conditions in the ancient Massachusetts seaport of Innsmouth. The public first learned of it in February, when a vast series of raids and arrests occurred, followed by the deliberate burning and dynamiting - under suitable precautions - of an enormous number of crumbling, worm-eaten, and supposedly empty houses along the abandoned waterfront. Uninquiring souls let this occurrence pass as one of the major clashes in a spasmodic war on liquor.

Keener news-followers, however, wondered at the prodigious number of arrests, the abnormally large force of men used in making them, and the secrecy surrounding the disposal of the prisoners. No trials, or even definite charges were reported; nor were any of the captives seen thereafter in the regular gaols of the nation. There were vague statements about disease and concentration camps, and (law) about dispersal in various naval and military prisons, (inn) nothing positive ever developed. Innsmouth itself was left almost depopulated, and it is even now only beginning to show signs of a sluggishly revived existence.

Complaints from many liberal organizations were met with long confidential discussions, and representatives were taken on trips to certain camps and prisons. As a result, these societies became surprisingly passive and reticent. Newspaper men were harder to manage, but seemed largely to cooperate with the government in the end. Only one paper - a tabloid always discounted because of its wild policy - mentioned the deep diving submarine that discharged torpedoes downward in the marine abyss just beyond Devil Reef. That item, gathered by chance in a haunt of Sailors, seemed indeed rather far-fetched; since the low, black reef lay a full mile and a half out from Innsmouth Harbour.

People around the country and in the nearby towns muttered a great deal among themselves, but said very little to the outer world. They had talked about dying and half-deserted Innsmouth for nearly a century, and nothing new could be wilder or more hideous than what they had whispered and hinted at years before. Many things had taught them secretiveness, and there was no need to exert pressure on them. Besides, they really knew little; for wide salt marshes, desolate and unpeopled, kept neighbors off from Innsmouth on the landward side.

But at last I am going to defy the ban on speech about this thing. Results, I am certain, are so thorough that no public harm save a shock of repulsion could ever accrue from a hinting of what was found by those horrified men at Innsmouth. Besides, what was found
might possibly have more than one explanation. I do not know just how much of the whole tale has been told even to me, and I have many reasons for not wishing to probe deeper. For my contact with this affair has been closer than that of any other layman, and I have carried away impressions which are yet to drive me to drastic measures.

It was I who fled frenziedly out of Innsmouth in the early morning hours of July 16, 1927, and whose frightened appeals for government inquiry and action brought on the whole reported episode. I was willing enough to stay mute while the affair was fresh and uncertain; but now that it is an old story, with public interest and curiosity gone, I have an odd craving to whisper about those few frightful hours in that ill-rumored and evilly-shadowed seaport of death and blasphemous abnormality. The mere telling helps me to restore confidence in my own faculties; to reassure myself that I was not the first to succumb to a contagious nightmare hallucination. It helps me, too, in making up my mind regarding a certain terrible step which lies ahead of me.

I never heard of Innsmouth till the day before I saw it for the first and - so far - last time. I was celebrating my coming of age by a tour of New England - sightseeing, antiquarian, and genealogical - and had planned to go directly from ancient Newburyport to Arkham, whence my mother's family was derived. I had no car, but was travelling by train, trolley and motor-coach, always seeking the cheapest possible route. In Newburyport they told me that the steam train was the thing to take to Arkham; and it was only at the station ticket-office, when I demurred at the high fare, that I learned about Innsmouth. The stout, shrewd-faced agent, whose speech shewed him to be no local man, seemed sympathetic toward my efforts at economy, and made a suggestion that none of my other informants had offered.

"You could take that old bus, I suppose," he said with a certain hesitation, "but it ain't thought much of hereabouts. It goes through Innsmouth - you may have heard about that - and so the people don't like it. Run by an Innsmouth fellow - Joe Sargent - but never gets any custom from here, or Arkham either, I guess. Wonder it keeps running at all. I s'pose it's cheap enough, but I never see mor'n two or three people in it - nobody but those Innsmouth folk. Leaves the square - front of Hammond's Drug Store - at 10 a.m. and 7 p.m. unless they've changed lately. Looks like a terrible rattletrap - I've never been on it."

That was the first I ever heard of shadowed Innsmouth. Any reference to a town not shown on common map or listed in recent guidebooks would have interested me, and the agent's odd manner of allusion roused something like real curiosity. A town able to inspire such dislike in it its neighbors, I thought, must be at least rather unusual, and worthy of a tourist's attention. If it came before Arkham I would stop off there and so I asked the agent to tell me something about it. He was very deliberate, and spoke with an air of feeling slightly superior to what he said.

"Innsmouth? Well, it's a queer kind of a town down at the mouth of the Manuxet. Used to be almost a city - quite a port before the War of 1812 - but all gone to pieces in the last hundred years or so. No railroad now - B. and M. never went through, and the branch line from Rowley was given up years ago."
"More empty houses' than there are people, I guess, and no business to speak of except fishing and lobstering. Everybody trades mostly either here or in Arkham or Ipswich. Once they had quite a few mills, but nothing's left now except one gold refinery running on the leanest kind of part time.

"That refinery, though, used to he a big thing, and old man Marsh, who owns it, must be richer'n Croesus. Queer old duck, though, and sticks mighty close in his home. He's supposed to have developed some skin disease or deformity late in life that makes him keep out of sight. Grandson of Captain Obed Marsh, who founded the business. His mother seems t'been some kind of foreigner - they say a South Sea islander - so everybody raised Cain when he married an Ipswich girl fifty years ago. They always do that about Innsmouth people, and folks here and hereabouts always try to cover up any Innsmouth blood they have in 'em. But Marsh's children and grandchildren look just like anyone else far's I can see. I've had 'em pointed out to me here - though, come to think of it, the elder children don't seem to be around lately. Never saw the old man.

"And why is everybody so down on Innsmouth? Well, young fellow, you mustn't take too much stock in what people here say. They're hard to get started, but once they do get started they never let up. They've been telling things about Innsmouth - whispering 'em, mostly - for the last hundred years, I guess, and I gather they're more scared than anything else. Some of the stories would make you laugh - about old Captain Marsh driving bargains with the devil and bringing imps out of hell to live in Innsmouth, or about some kind of devil-worship and awful sacrifices in some place near the wharves that people stumbled on around 1845 or thereabouts - but I come from Panton, Vermont, and that kind of story don't go down with me.

"You ought to hear, though, what some of the old-timers tell about the black reef off the coast - Devil Reef, they call it. It's well above water a good part of the time, and never much below it, but at that your could hardly call it an island. The story is that there's a whole legion of devils seen sometimes on that reef-sprawled about, or darting in and out of some kind of caves near the top. It's a rugged, uneven thing, a good bit over a mile out, and toward the end of shipping days sailors used to make big detours just to avoid it.

"That is, sailors that didn't hail from Innsmouth. One of the things they had against old Captain Marsh was that he was supposed to land on it sometimes at night when the tide was right. Maybe he did, for I dare say the rock formation was interesting, and it's just barely possible he was looking for pirate loot and maybe finding it; but there was talk of his dealing with demons there. Fact is, I guess on the whole it was really the Captain that gave the bad reputation to the reef.

"That was before the big epidemic of 1846, when over half the folks in Innsmouth was carried off. They never did quite figure out what the trouble was, but it was probably some foreign kind of disease brought from China or somewhere by the shipping. It surely was bad enough - there was riots over it, and all sorts of ghastly doings that I don't believe ever got outside of town - and it left the place a awful shape. Never came back - there can't be more'n 300 or 400 people living there now.
"But the real thing behind the way folks feel is simply race prejudice - and I don't say I'm blaming those that hold it I hate those Innsmouth folks myself, and I wouldn't care to go to their town. I s'pose you know - though I can see you're a Westerner by your talk - what a lot our New England ships - used to have to do with queer ports in Africa, Asia, the South Seas, and everywhere else, and what queer kinds of people they sometimes brought back with 'em. You've probably heard about the Salem man that came home with a Chinese wife, and maybe you know there's still a bunch of Fiji Islanders somewhere around Cape Cod.

"Well, there must be something like that back of the Innsmouth people. The place always was badly cut off from the rest of the country by marshes and creeks and we can't be sure about the ins and outs of the matter; but it's pretty clear that old Captain Marsh must have brought home some odd specimens when he had all three of his ships in commission back in the twenties and thirties. There certainly is a strange kind of streak in the Innsmouth folks today - I don't know how to explain it but it sort of makes you crawl. You'll notice a little in Sargent if you take his bus. Some of 'em have queer narrow heads with flat noses and bulgy, starry eyes that never seem to shut, and their skin ain't quite right. Rough and scabby, and the sides of the necks are all shriveled or creased up. Get bald, too, very young. The older fellows look the worst - fact is, I don't believe I've ever seen a very old chap of that kind. Guess they must die of looking in the glass! Animals hate 'em - they used to have lots of horse trouble before the autos came in.

"Nobody around here or in Arkham or Ipswich will have anything to do with 'em, and they act kind of offish themselves when they come to town or when anyone tries to fish on their grounds. Queer how fish are always thick off Innsmouth Harbour when there ain't any anywhere else around - but just try to fish there yourself and see how the folks chase you off! Those people used to come here on the railroad - walking and taking the train at Rowley after the branch was dropped - but now they use that bus.

"Yes, there's a hotel in Innsmouth - called the Gilman House - but I don't believe it can amount to much. I wouldn't advise you to try it. Better stay over here and take the ten o'clock bus tomorrow morning; then you can get an evening bus there for Arkham at eight o'clock. There was a factory inspector who stopped at the Gilman a couple of years ago and he had a lot of unpleasant hints about the place. Seems they get a queer crowd there, for this fellow heard voices in other room - though most of 'em was empty - that gave him the shivers. It was foreign talk' he thought, but he said the bad thing about it was the kind of voice that sometimes spoke. It sounded so unnatural - slopping like, he said - that he didn't dare undress and go to sleep. Just waited up and lit out the first thing in the morning. The talk went on most all night.

"This fellow - Casey, his name was - had a lot to say about how the Innsmouth folk, watched him and seemed kind of on guard. He found the Marsh refinery a queer place - it's in an old mill on the lower falls of the Manuxet. What he said tallied up with what I'd heard. Books in bad shape, and no clear account of any kind of dealings. You know it's always been a kind of mystery where the Marshes get the gold they refine. They've never seemed to do much buying in that line, but years ago they shipped out an enormous lot of ingots.
"Used to be talk of a queer foreign kind of jewelry that the sailors and refinery men sometimes sold on the sly, or that was seen once or twice on some of the Marsh women-folks. People allowed maybe old Captain Obed traded for it in some heathen port, especially since he always ordered stacks of glass beads and trinkets such as seafaring men used to get for native trade. Others thought and still think he'd found an old pirate cache out on Devil Reef. But here's a funny thing. The old Captain's been dead these sixty years, and there's ain't been a good-sized ship out of the place since the Civil War; but just the same the Marshes still keep on buying a few of those native trade things - mostly glass and rubber gewgaws, they tell me. Maybe the Innsmouth folks like 'em to look at themselves - Gawd knows they've gotten to be about as bad as South Sea cannibals and Guinea savages.

"That plague of '46 must have taken off the best blood in the place. Anyway, they're a doubtful lot now, and the Marshes and other rich folks are as bad as any. As I told you, there probably ain't more'n 400 people in the whole town in spite of all the streets they say there are. I guess they're what they call 'white trash' down South - lawless and sly, and full of secret things. They get a lot of fish and lobsters and do exporting by truck. Queer how the fish swarm right there and nowhere else.

"Nobody can ever keep track of these people, and state school officials and census men have a devil of a time. You can bet that prying strangers ain't welcome around Innsmouth. I've heard personally of more'n one business or government man that's disappeared there, and there's loose talk of one who went crazy and is out at Danvers now. They must have fixed up some awful scare for that fellow.

"That's why I wouldn't go at night if I was you. I've never been there and have no wish to go, but I guess a daytime trip couldn't hurt you - even though the people hereabouts will advise you not to make it. If you're just sightseeing, and looking for old-time stuff, Innsmouth ought to be quite a place for you."

And so I spent part of that evening at the Newburyport Public Library looking up data about Innsmouth. When I had tried to question the natives in the shops, the lunchroom, the garages, and the are station, I had found them even harder to get started than the ticket agent had predicted; and realized that I could not spare the time to overcome their first instinctive reticence. They had a kind of obscure suspiciousness, as if there were something amiss with anyone too much interested in Innsmouth. At the Y. M. C. A., where I was stopping, the clerk merely discouraged my going to such a dismal, decadent place; and the people at the library shewed much the same attitude. Clearly, in the eyes of the educated, Innsmouth was merely an exaggerated case of civic degeneration.

The Essex County histories on the library shelves had very little to say, except that the town was founded in 1643, noted for shipbuilding before the Revolution, a seat of great marine prosperity in the early 19th century, and later a minor factory center using the Manuxet as power. The epidemic and riots of 1846 were very sparsely treated, as if they formed a discredit to the county.

References to decline were few, though the significance of the later record was unmistakable. After the Civil War air industrial life was confined to the Marsh Refining
Company, and the marketing of gold ingots formed the only remaining bit of major commerce aside from the eternal fishing. That fishing paid less and less as the price of the commodity fell and large-scale corporations offered competition, but there was never a dearth of fish around Innsmouth Harbour. Foreigners seldom settled there, and there was some discreetly veiled evidence that a number of Poles and Portuguese who had tried it had been scattered in a peculiarly drastic fashion.

Most interesting of all was a glancing reference to the strange jewelry vaguely associated with Innsmouth. It had evidently impressed the whole countryside more thin a little, for mention was made of specimens in the museum of Miskatonic University at Arkham, and in the display room of the Newburyport Historical Society. The fragmentary descriptions of these things were bald and prosaic, but they hinted to me an undercurrent of persistent strangeness. Something about them seemed so odd and provocative that I could not put them out of my mind, and despite the relative lateness of the hour I resolved to see the local sample - said to be a large, queerly-proportioned thing evidently meant for a tiara - if it could possibly be arranged.

The librarian gave me a note of introduction to the curator of the Society, a Miss Anna Tilton, who lived nearby, and after a brief explanation that ancient gentlewoman was kind enough to pilot me into the closed building, since the hour was not outrageously late. The collection was a notable one indeed, but in my present mood I had eyes for nothing but the bizarre object which glistened in a comer cupboard under the electric lights.

It took no excessive sensitiveness to beauty to make me literally gasp at the strange, unearthly splendour of the alien, opulent phantasy that rested there on a purple velvet cushion. Even now I can hardly describe what I saw, though it was clearly enough a sort of tiara, as the description had said. It was tall in front, and with a very large and curiously irregular periphery, as if designed for a head of almost freakishly elliptical outline. The material seemed to be predominantly gold, though a weird lighter lustrousness hinted at some strange alloy with an equally beautiful and scarcely identifiable metal. Its condition was almost perfect, and one could have spent hours in studying the striking and puzzlingly untraditional designs - some simply geometrical, and some plainly marine - chased or moulded in high relief on its surface with a craftsmanship of incredible skill and grace.

The longer I looked, the more the thing fascinated me; and in this fascination there was a curiously disturbing element hardly to be classified or accounted for. At first I decided that it was the queer other-worldly quality of the art which made me uneasy. All other art objects I had ever seen either belonged to some known racial or national stream, or else were consciously modernistic defiances of every recognized stream. This tiara was neither. It clearly belonged to some settled technique of infinite maturity and perfection, yet that technique was utterly remote from any - Eastern or Western, ancient or modern - which I had ever heard of or seen exemplified. It was as if the workmanship were that of another planet.

However, I soon saw that my uneasiness had a second and perhaps equally potent source residing in the pictorial and mathematical suggestion of the strange designs. The patterns
all hinted of remote secrets and unimaginable abysses in time and space, and the monotonously aquatic nature of the reliefs became almost sinister. Among these reliefs were fabulous monsters of abhorrent grotesqueness and malignity - half ichthyic and half batrachian in suggestion - which one could not dissociate from a certain haunting and uncomfortable sense of pseudomemory, as if they called up some image from deep cells and tissues whose retentive functions are wholly primal and awesomely ancestral. At times I fancied that every contour of these blasphemous fish-frogs was over-flowing with the ultimate quintessence of unknown and inhuman evil.

In odd contrast to the tiara's aspect was its brief and prosy history as related by Miss Tilton. It had been pawned for a ridiculous sum at a stop in State Street in 1873, by a drunken Innsmouth man shortly afterward killed in a brawl. The Society had acquired it directly from the pawnbroker, at once giving it a display worthy of its quality. It was labeled as of probable East-Indian or Indochinese provenance, though the attribution was frankly tentative.

Miss Tilton, comparing all possible hypotheses regarding its origin and its presence in New England, was inclined to believe that it formed part of some exotic pirate hoard discovered by old Captain Obed Marik. This view was surely not weakened by the insistent offers of purchase at a high price which the Marshes began to make as soon as they knew of its presence, and which they repeated to this day despite the Society's unvarying determination not to sell.

As the good lady shewed me out of the building she made it clear that the pirate theory of the Marsh fortune was a popular one among the intelligent people of the region. Her own attitude toward shadowed Innsmouth - which she never seen - was one of disgust at a community slipping far down the cultural scale, and she assured me that the rumours of devil-worship were partly justified by a peculiar secret cult which had gained force there and engulfed all the orthodox churches.

It was called, she said, 'The Esoteric Order of Dagon", and was undoubtedly a debased, quasi-pagan thing imported from the East a century before, at a time when the Innsmouth fisheries seemed to be going barren. Its persistence among a simple people was quite natural in view of the sudden and permanent return of abundantly fine fishing, and it soon came to be the greatest influence in the town, replacing Freemasonry altogether and taking up headquarters in the old Masonic Hall on New Church Green.

All this, to the pious Miss Tilton, formed an excellent reason for shunning the ancient town of decay and desolation; but to me it was merely a fresh incentive. To my architectural and historical anticipations was now added an acute anthropological zeal, and I could scarcely sleep in my small room at the "Y" as the night wore away.

II

Shortly before ten the next morning I stood with one small valise in front of Hammond's Drug Store in old Market Square waiting for the Innsmouth bus. As the hour for its arrival drew near I noticed a general drift of the loungers to other places up the street, or to the Ideal Lunch across the square. Evidently the ticket-agent had not exaggerated the
dislike which local People bore toward Innsmouth and its denizens. In a few moments a small motor-coach of extreme decrepitude and dirty grey colour rattled down State Street, made a turn, and drew up at the curb beside me. I felt immediately that it was the right one; a guess which the half-legible on the windshield - Arkham - Innsmouth - Newburyport - soon verified.

There were only three passengers - dark, unkempt men of sullen visage and somewhat youthful cast - and when the vehicle stopped they clumsily shambled out and began walking up State Street in a silent, almost furtive fashion. The driver also alighted, and I watched him as he went into the drug store to make some purchase. This, I reflected, must be the Joe Sargent mentioned by the ticket-agent; and even before I noticed any details there spread over me a wave of spontaneous aversion which could be neither checked nor explained. It suddenly struck me as very natural that the local people should not wish to ride on a bus owned and driven by this man, or to visit any oftener than possible the habitat of such a man and his kinsfolk.

When the driver came out of the store I looked at him more carefully and tried to determine the source of my evil impression. He was a thin, stoop-shouldered man not much under six feet tall, dressed in shabby blue civilian clothes and wearing a frayed golf cap. His age was perhaps thirty-five, but the odd, deep creases in the sides of his neck made him seem older when one did not study his dull, expressionless face. He had a narrow head, bulging, watery-blue eyes that seemed never to wink, a flat nose, a receding forehead and chin, and singularly undeveloped ears. His long thick lip and coarse-pored, greyish cheeks seemed almost beardless except for some sparse yellow hairs that straggled and curled in irregular patches; and in places the surface seemed queerly irregular, as if peeling from some cutaneous disease. His hands were large and heavily veined, and had a very unusual greyish-blue tinge. The fingers were strikingly short in proportion to the rest of the structure, and seemed to have a tendency to curl closely into the huge palm. As he walked toward the bus I observed his peculiarly shambling gait and saw that his feet were inordinately immense. The more I studied them the more I wondered how he could buy any shoes to fit them.

A certain greasiness about the fellow increased my dislike. He was evidently given to working or lounging around the fish docks, and carried with him much of their characteristic smell. Just what foreign blood was in him I could not even guess. His oddities certainly did not look Asiatic, Polynesian, Levantine or negroid, yet I could see why the people found him alien. I myself would have thought of biological degeneration rather than alienage.

I was sorry when I saw there would be no other passengers on the bus. Somehow I did not like the idea of riding alone with this driver. But as leaving time obviously approached I conquered my qualms and followed the man aboard, extending him a dollar bill and murmuring the single word "Innsmouth." He looked curiously at me for a second as he returned forty cents change without speaking. I took a seat far behind him, but on the same side of the bus, since I wished to watch the shore during the journey.

At length the decrepit vehicle stared with a jerk, and rattled noisily past the old brick buildings of state street amidst a cloud of vapour from the exhaust. Glancing at the people
on the sidewalks, I thought I detected in them a curious wish to avoid looking at the bus - or at least a wish to avoid seeming to look at it. Then we turned to the left so High Street, when the going was smoother; flying by stately old mansions of the early republic and still older colonial farmhouses, passing the Lower Green and Parker River, and finally emerging Into a long, monotonous stretch of open shore country.

The day was warm and sunny, but the landscape of sand and sedge-grass, and stunted shrubbery became more and desolate as we proceeded. Out the window I could see the blue water and the sandy line of Plum Island, and we presently drew very near the beach as our narrow road veered off from the main highway to Rowley and Ipswich. There were no visible houses, and I could tell by the state of the road that traffic was very light hereabouts. The weather-worn telephone poles carried only two wires. Now and then we crossed crude wooden bridges over tidal creeks that wound far inland and promoted the general isolation of the region.

Once in a while I noticed dead stumps and crumbling foundation-walls above the drifting sand, and recalled the old tradition quoted it one of the histories I had read, that this was once a fertile and thickly-settled countryside. The change, it was said, came simultaneously with the Innsmouth epidemic of 1846, and was thought by simple folk to have a dark connection with hidden forces of evil. Actually, it was caused by the unwise cutting of woodlands near the shore, which robbed the soil of the best protection and open the way for waves of wind-blown sand.

At last we lost sight of Plum Island and saw the vast expanse of the open Atlantic on our left. Our narrow course began to climb steeply, and I felt a singular sense of disquiet in looking at the lonely crest ahead where the rutted road-way met the sky. It was as if the bus were about to keep on in its ascent, leaving the sane earth altogether and merging with the unknown arcana of upper air and cryptical sky. The smell of the sea took on ominous implications, and the silent driver's bent, rigid back and narrow head became more and more hateful. As I looked at him I saw that the back of his head was almost as hairless as his face, having only a few straggling yellow strands upon a grey scabrous surface.

Then we reached the crest and beheld the outspread valley beyond, where the Manuxet joins the sea just north of the long line of cliffs that culminate in Kingsport Head and veer off toward Cape Ann. On the far misty horizon I could just make out the dizzy profile of the Head, topped by the queer ancient house of which so many legends are told; but for the moment all my attention was captured by the nearer panorama just below me. I had, I realized, come face to face with rumour-shadowed Innsmouth.

It was a town of wide extent and dense construction, yet one with a portentous dearth of visible life. From the tangle of chimney-pots scarcely a wisp of smoke came, and the three tall steeples loomed stark and unpainted against the seaward horizon. One of them was crumbling down at the top, and in that and another there were only black gaping holes where clock-dials should have been. The vast huddle of sagging gambrel roofs and peaked gables conveyed with offensive clearness the idea of wormy decay, and as we approached along the now descending road I could see that many roofs had wholly caved in. There were some large square Georgian houses, too, with hipped roofs, cupolas, and
railed "widow's walks." These were mostly well back from the water, and one or two seemed to be in moderately sound condition. Stretching inland from among them I saw the rusted, grass-grown line of the abandoned railway, with leaning telegraph-poles now devoid of wires, and the half-obscured lines of the old carriage roads to Rowley and Ipswich.

The decay was worst close to the waterfront, though in its very midst I could spy the white belfry of a fairly well preserved brick structure which looked like a small factory. The harbour, long clogged with sand, was enclosed by an ancient stone breakwater; on which I could begin to discern the minute forms of a few seated fishermen, and at whose end were what looked like the foundations of a bygone light house. A sandy tongue had formed inside this barrier and upon it I saw a few decrepit cabins, moored dories, and scattered lobster-pots. The only deep water seemed to be where the river poured out past the belfried structure and turned southward to join the ocean at the breakwater's end.

Here and there the ruins of wharves jutted out from the shore to end in indeterminate rottenness, those farthest south seeming the most decayed. And far out at sea, despite a high tide, I glimpsed a long, black line scarcely rising above the water yet carrying a suggestion of odd latent malignancy. This, I knew, must be Devil Reef. As I looked, a subtle, curious sense of beckoning seemed superadded to repulsion; and oddly enough, I found this overtone more disturbing than the primary impression.

We met no one on the road, but presently began to pass deserted farms in varying stages of ruin. Then I noticed a few inhabited houses with rags stuffed in the broken windows and shells and dead fish lying about the littered yards. Once or twice I saw listless-looking people working in barren gardens or digging clams on the fishy-smelling beach below, and groups of dirty, simian-visaged children playing around weed-grown doorsteps. Somehow these people seemed more disquieting than the dismal buildings, for almost every one had certain peculiarities of face and motions which I instinctively disliked without being able to define or comprehend them. For a second I thought this typical physique suggested some picture I had seen, perhaps in a book, under circumstances of particular horror or melancholy; but this pseudo-recollection passed very quickly.

As the bus reached a lower level I began to catch the steady note of a waterfall through the unnatural stillness, The leaning, unpainted houses grew thicker, lined both sides of the road, and displayed more urban tendencies than did those we were leaving behind, The panorama ahead had contracted to a street scene, and in spots I could see where a cobblestone pavement and stretches of brick sidewalk had formerly existed. All the houses were apparently deserted, and there were occasional gaps where tumbledown chimneys and cellar walls told of buildings that had collapsed. Pervading everything was the most nauseous fishy odour imaginable.

Soon cross streets and junctions began to appear; those on the left leading to shoreward realms of unpaved squalor and decay, while those on the right shewed vistas of departed grandeur. So far I had seen no people in the town, but there now came signs of a sparse habitation - curtained windows here and there, and an occasional battered motorcar at the curb. Pavement and sidewalks were increasingly well-defined, and though most of the
houses were quite old - wood and brick structures of the early 1901 century - they were obviously kept fit for habitation. At an amateur antiquarian I almost lost my olfactory disgust and my feeling of menace and repulsion amidst this rich, unaltered survival from the past.

But I was not to reach my destination without one very strong impression of poignantly disagreeable quality. The bus had come to a sort of open concourse or radial point with churches on two sides and the bedraggled remains of a circular green in the centre, and I was looking at a large pillared hall on the right-hand junction ahead. The structure's once white paint was now gray and peeling and the black and gold sign on the pediment was so faded that I could only with difficulty make out the words "Esoteric Order of Dagon". This, then was the former Masonic Hall now given over to a degraded cult. As I strained to decipher this inscription my notice was distracted by the raucous tones of a cracked bell across the street, and I quickly turned to look out the window on my side of the coach.

The sound came from a squat stone church of manifestly later date than most of the houses, built in a clumsy Gothic fashion and having a disproportionately high basement with shuttered windows. Though the hands of its clock were missing on the side I glimpsed, I knew that those hoarse strokes were tolling the hour of eleven. Then suddenly all thoughts of time were blotted out by an onrushing image of sharp intensity and unaccountable horror which had seized me before I knew what it really was. The door of the church basement was open, revealing a rectangle of blackness inside. And as I looked, a certain object crossed or seemed to cross that dark rectangle; burning into my brain a momentary conception of nightmare which was all the more maddening because analysis could not shew a single nightmarish quality in it.

It was a living object - the first except the driver that I had seen since entering the compact part of the town - and had I been in a steadier mood I would have found nothing whatever of terror in it. Clearly, as I realised a moment later, it was the pastor; clad in some peculiar vestments doubtless introduced since the Order of Dagon had modified the ritual of the local churches. The thing which had probably caught my first subconscious glance and supplied the touch of bizarre horror was the tall tiara he wore; an almost exact duplicate of the one Miss Tilton had shown me the previous evening. This, acting on my imagination, had supplied namelessly sinister qualities to the indeterminate face and robed, shambling form beneath it. There was not, I soon decided, any reason why I should have felt that shuddering touch of evil pseudo-memory. Was it not natural that a local mystery cult should adopt among its regimentals an unique type of head-dress made familiar to the community in some strange way - perhaps as treasure-trove?

A very thin sprinkling of repellent-looking youngish people now became visible on the sidewalks - lone individuals, and silent knots of two or three. The lower floors of the crumbling houses sometimes harboured small shops with dingy signs, and I noticed a parked truck or two as we rattled along. The sound of waterfalls became more and more distinct, and presently I saw a fairly deep river-gorge ahead, spanned by a wide, iron-railed highway bridge beyond which a large square opened out. As we clanked over the bridge I looked out on both sides and observed some factory buildings on the edge of the grassy bluff or part way down. The water far below was very abundant, and I could see
two vigorous sets of falls upstream on my right and at least one downstream on my left. From this point the noise was quite deafening. Then we rolled into the large semicircular square across the river and drew up on the right-hand side in front of a tall, cupola crowned building with remnants of yellow paint and with a half-effaced sign proclaiming it to be the Gilman House.

I was glad to get out of that bus, and at once proceeded to check my valise in the shabby hotel lobby. There was only one person in sight - an elderly man without what I had come to call the "Innsmouth look" - and I decided not to ask him any of the questions which bothered me; remembering that odd things had been noticed in this hotel. Instead, I strolled out on the square, from which the bus had already gone, and studied the scene minutely and appraisingly.

One side of the cobblestoned open space was the straight line of the river; the other was a semicircle of slant-roofed brick buildings of about the 1800 period, from which several streets radiated away to the southeast, south, and southwest. Lamps were depressingly few and small - all low-powered incandescents - and I was glad that my plans called for departure before dark, even though I knew the moon would be bright. The buildings were all in fair condition, and included perhaps a dozen shops in current operation; of which one was a grocery of the First National chain, others a dismal restaurant, a drug store, and a wholesale fish-dealer's office, and still another, at the eastward extremity of the square near the river an office of the town's only Industry - the Marsh Refining Company. There were perhaps ten people visible, and four or five automobiles and motor trucks stood scattered about I did not need to be told that this was the civic centre of Innsmouth. Eastward I could catch blue glimpses of the harbour, against which rose the decaying remains of three once beautiful Georgian steeples. And toward the shore on the opposite bank of the river I saw the white belfry surmounting what I took to be the Marsh refinery.

For some reason or other I chose to make my first inquiries at the chain grocery, whose personnel was not likely to be native to Innsmouth. I found a solitary boy of about seventeen in charge, and was pleased to note the brightness and affability which promised cheerful information. He seemed exceptionally eager to talk, and I soon gathered that he did not like the place, its fishy smell, or its furtive people. A word with any outsider was a relief to him. He hailed from Arkham, boarded with a family who came from Ipswich, and went back whenever he got a moment off. His family did not like him to work in Innsmouth, but the chain had transferred him there and he did not wish to give up his job.

There was, he said, no public library or chamber of commerce in Innsmouth, but I could probably find my way about. The street I had come down was Federal. West of that were the fine old residence streets - Broad, Washington, Lafayette, and Adams - and east of it were the shoreward slums. It was in these slums - along Main Street - that I would find the old Georgian churches, but they were all long abandoned. It would be well not to make oneself too conspicuous in such neighbourhoods - especially north of the river since the people were sullen and hostile. Some strangers had even disappeared.

Certain spots were almost forbidden territory, as he had learned at considerable cost. One must not, for example, linger much around the Marsh refinery, or around any of the still used churches, or around the pillared Order of Dagon Hall at New Church Green. Those
churches were very odd - all violently disavowed by their respective denominations elsewhere, and apparently using the queerest kind of ceremonials and clerical vestments. Their creeds were heterodox and mysterious, involving hints of certain marvelous transformations leading to bodily immorality - of a sort - on this earth. The youth's own pastor - Dr. Wallace of Asbury M. E. Church in Arkham - had gravely urged him not to join any church in Innsmouth.

As for the Innsmouth people - the youth hardly knew, what to make of them. They were as furtive and seldom seen as animals that live in burrows, and one could hardly imagine how they passed the time apart from their desultory fishing. Perhaps - judging from the quantities of bootleg liquor they consumed - they lay for most of the daylight hours in an alcoholic stupor. They seemed sullenly banded together in some sort of fellowship and understanding - despising the world as if they had access to other and preferable spheres of entity. Their appearance - especially those staring, unwinking eyes which one never saw shut - was certainly shocking enough; and their voices were disgusting. It was awful to hear them chanting in their churches at night, and especially during their main festivals or revivals, which fell twice a year on April 30th and October 31st.

They were very fond of the water, and swam a great deal in both river and harbour. Swimming races out to Devil Reef were very common, and everyone in sight seemed well able to share in this arduous sport. When one came to think of it, it was generally only rather young people who were seen about in public, and of these the oldest were apt to be the most tainted-looking. When exceptions did occur, they were mostly persons with no trace of aberrancy, like the old clerk at the hotel. One wondered what became of the bulk of the older folk, and whether the "Innsmouth look" were not a strange and insidious disease-phenomenon which increased its hold as years advanced.

Only a very rare affliction, of course, could bring about such vast and radical anatomical changes in a single individual after maturity - changes invoking osseous factors as basic as the shape of the skull - but then, even this aspect was no more baffling and unheard-of than the visible features of the malady as a whole. It would be hard, the youth implied, to form any real conclusions regarding such a matter; since one never came to know the natives personally no matter how long one might live in Innsmouth.

The youth was certain that many specimens even worse than the worst visible ones were kept locked indoors in some places. People sometimes heard the queerest kind of sounds. The tottering waterfront hovels north of the river were reputedly connected by hidden tunnels, being thus a veritable warren of unseen abnormalities. What kind of foreign blood - if any - these beings had, it was impossible to tell. They sometimes kept certain especially repulsive characters out of sight when government and others from the outside world came to town.

It would be of no use, my informant said, to ask the natives anything about the place. The only one who would talk was a very aged but normal looking man who lived at the poorhouse on the north rim of the town and spent his time walking about or lounging around the fire station. This hoary character, Zadok Allen, was 96 years old and somewhat touched in the head, besides being the town drunkard. He was a strange, furtive creature who constantly looked over his shoulder as if afraid of something, and
when sober could not be persuaded to talk at all with strangers. He was, however, unable
to resist any offer of his favorite poison; and once drunk would furnish the most
astonishing fragments of whispered reminiscence.

After all, though, little useful data could be gained from him; since his stories were all
insane, incomplete hints of impossible marvels and horrors which could have no source
save in his own disordered fancy. Nobody ever believe him, but the natives did not like
him to drink and talk with strangers; and it was not always safe to be seen questioning
him. It was probably from him that some of the wildest popular whispers and delusions
were derived.

Several non-native residents had reported monstrous glimpses from time to time, but
between old Zadok's tales and the malformed inhabitants it was no wonder such illusions
were current. None of the non-natives ever stayed out late at night, there being a
widespread impression that it was not wise to do so. Besides, the streets were
loathsomely dark.

As for business - the abundance of fish was certainly almost uncanny, but the natives
were taking less and less advantage of it. Moreover, prices were falling and competition
was growing. Of course the town's real business was the refinery, whose commercial
office was on the square only a few doors east of where we stood. Old Man Marsh was
never seen, but sometimes went to the works in a closed, curtained car.

There were all sorts of rumors about how Marsh 'Inc' come to look. He had once been a
great dandy; and people said he still wore the frock-coated finery of the Edwardian age
curiously adapted to certain deformities. His son had formerly conducted the office in the
square, but latterly they had been keeping out of sight a good deal and leaving the brunt
of affairs to the younger generation. The sons and their sisters had come to look very
queer, especially the elder ones; and it was said that their health was failing.

One of the Marsh daughters was a repellent, reptilian-looking woman who wore an
excess of weird jewellery clearly of the same exotic tradition as that to which the strange
tiara belonged. My informant had noticed it many times, and had heard it spoken of as
coming from some secret hoard, either of pirates or of demons. The clergymen - or
priests, or whatever they were called nowadays - also wore this kind of ornament as a
headdress; but one seldom caught glimpses of them. Other specimens the youth had not
seen, though many were rumoured to exist around Innsmouth.

The Marshes, together with the other three gently bred families of the town - the Waites,
the Gilmans, and the Eliots - were all very retiring. They lived in immense houses along
Washington Street, and several were reputed to harbour in concealment certain living
kinsfolk whose personal aspect forbade public view, and whose deaths had been reported
and recorded.

Warning me that many of the street signs were down, the youth drew for my benefit a
rough but ample and painstaking sketch map of the town's salient features. After a
moment's study I felt sure that it would be of great help, and pocketed it with profuse
thanks. Disliking the dinginess of the single restaurant I had seen, I bought a fair supply
of cheese crackers and ginger wafers to serve as a lunch later on. My program, I decided, would be to thread the principal streets, talk with any non-natives I might encounter, and catch the eight o'clock coach for Arkham. The town, I could see, formed a significant and exaggerated example of communal decay; but being no sociologist I would limit my serious observations to the field of architecture.

Thus I began my systematic though half-bewildered tour of Innsmouth's narrow, shadow-blighted ways. Crossing the bridge and turning toward the roar of the lower falls, I passed close to the Marsh refinery, which seemed to be oddly free from the noise of industry. ml. building stood on the steep river bluff near a bridge and an open confluence of streets which I took to be the earliest civic center, displaced after the Revolution by the present Town Square.

Re-crossing the gorge on the Main Street bridge, I struck a region of utter desertion which somehow made me shudder. Collapsing huddles of gambrel roofs formed a jagged and fantastic skyline, above which rose the ghoulish, decapitated steeple of an ancient church. Some houses along Main Street were tenanted, but most were tightly boarded up. Down unpaved side streets I saw the black, gaping windows of deserted hovels, many of which leaned at perilous and incredible angles through the sinking of part of the foundations. Those windows stared so spectrally that it took courage to turn eastward toward the waterfront. Certainly, the terror of a deserted house swells in geometrical rather than arithmetical progression as houses multiply to form a city of stark desolation. The sight of such endless avenues of fishy-eyed vacancy and death, and the thought of such linked infinities of black, brooding compartments given over to cob-webs and memories and the conqueror worm, start up vestigial fears and aversions that not even the stoutest philosophy can disperse.

Fish Street was as deserted as Main, though it differed in having many brick and stone warehouses still in excellent shape. Water Street was almost its duplicate, save that there were great seaward gaps where wharves had been. Not a living thing did I see except for the scattered fishermen on the distant break-water, and not a sound did I hear save the lapping of the harbour tides and the roar of the falls in the Manuxet. The town was getting more and more on my nerves, and I looked behind me furtively as I picked my way back over the tottering Water Street bridge. The Fish Street bridge, according to the sketch, was in ruins.

North of the river there were traces of squalid life - active fish-packing houses in Water Street, smoking chimneys and patched roofs here and there, occasional sounds from indeterminate sources, and infrequent shambling forms in the dismal streets and unpaved lanes - but I seemed to find this even more oppressive than the southerly desertion. For one thing, the people were more hideous and abnormal than those near the centre of the town; so that I was several times evilly reminded of something utterly fantastic which I could not quite place. Undoubtedly the alien strain in the Innsmouth folk was stronger here than farther inland - unless, indeed, the "Innsmouth look" were a disease rather than a blood stain, in which case this district might be held to harbour the more advanced cases.
One detail that annoyed me was the distribution of the few faint sounds I heard. They ought naturally to have come wholly from the visibly inhabited houses, yet in reality were often strongest inside the most rigidly boarded-up facades. There were creakings, scurryings, and hoarse doubtful noises; and I thought uncomfortably about the hidden tunnels suggested by the grocery boy. Suddenly I found myself wondering what the voices of those denizens would be like. I had heard no speech so far in this quarter, and was unaccountably anxious not to do so.

Pausing only long enough to look at two fine but ruinous old churches at Main and Church Streets, I hastened out of that vile waterfront slum. My next logical goal was New Church Green, but somehow or other I could not bear to repass the church in whose basement I had glimpsed the inexplicably frightening form of that strangely diademmed priest or pastor. Besides, the grocery youth had told me that churches, as well as the Order of Dagon Hall, were not advisable neighbourhoods for strangers.

Accordingly I kept north along Main to Martin, then turning inland, crossing Federal Street safely north of the Green, and entering the decayed patrician neighbourhood of northern Broad, Washington, Lafayette, and Adams Streets. Though these stately old avenues. were ill-surfaced and unkempt, their elm-shaded dignity had not entirely departed. Mansion after mansion claimed my gaze, most of them decrepit and boarded up amidst neglected grounds, but one or two in each street shewing signs of occupancy. In Washington Street there was a row of four or five in excellent repair and with finely-tended lawns and gardens. The most sumptuous of these - with wide terraced parterres extending back the whole way to Lafayette Street - I took to be the home of Old Man Marsh, the afflicted refinery owner.

In all these streets no living thing was visible, and I wondered at the complete absence of cats and dogs from Innsmouth. Another thing which puzzled and disturbed me, even in some of the best-preserved mansions, was the tightly shuttered condition of many third-story and attic windows. Furtiveness and secretiveness seemed universal in this hushed city of alienage and death, and I could not escape the sensation of being watched from ambush on every hand by sly, staring eyes that never shut.

I shivered as the cracked stroke of three sounded from a belfry on my left. Too well did I recall the squat church from which those notes came. Following Washington street toward the river, I now faced a new zone of former industry and commerce; noting the ruins of a factory ahead, and seeing others, with the traces of an old railway station and covered railway bridge beyond, up the gorge on my right.

The uncertain bridge now before me was posted with a warning sign, but I took the risk and crossed again to the south bank where traces of life reappeared. Furtive, shambling creatures stared cryptically in my direction, and more normal faces eyed me coldly and curiously. Innsmouth was rapidly becoming intolerable, and I turned down Paine Street toward the Square in the hope of getting some vehicle to take me to Arkham before the still-distant starting-time of that sinister bus.

It was then that I saw the tumbledown fire station on my left, and noticed the red faced, bushy-bearded, watery eyed old man in nondescript rags who sat on a bench in front of it
talking with a pair of unkempt but not abnormal looking firemen. This, of course, must be Zodak Allen, the half-crazed, liquorish nonagenarian whose tales of old Innsmouth and its shadow were so hideous and incredible.

III

It must have been some imp of the perverse - or some sardonic pull from dark, hidden sources - which made me change my plans as I did. I had long before resolved to limit my observations to architecture alone, and I was even then hurrying toward the Square in an effort to get quick transportation out of this festering city of death and decay; but the sight of old Zadok Allen set up new currents in my mind and made me slacken my pace uncertainly.

I had been assured that the old man could do nothing but hint at wild, disjointed, and incredible legends, and I had been warned that the natives made it unsafe to be seen talking with him; yet the thought of this aged witness to the town's decay, with memories going back to the early days of ships and factories, was a lure that no amount of reason could make me resist. After all, the strangest and maddest of myths are often merely symbols or allegories based upon truth - and old Zadok must have seen everything which went on around Innsmouth for the last ninety years. Curiosity flared up beyond sense and caution, and in my youthful egotism I fancied I might be able to sift a nucleus of real history from the confused, extravagant outpouring I would probably extract with the aid of raw whiskey.

I knew that I could not accost him then and there, for the firemen would surely notice and object. Instead, I reflected, I would prepare by getting some bootleg liquor at a place where the grocery boy had told me it was plentiful. Then I would loaf near the fire station in apparent casualness, and fall in with old Zadok after he had started on one of his frequent rambles. The youth had said that he was very restless, seldom sitting around the station for more than an hour or two at a time.

A quart bottle of whiskey was easily, though not cheaply, obtained in the rear of a dingy variety-store just off the Square in Eliot Street. The dirty-looking fellow who waited on me had a touch of the staring "Innsmouth look", but was quite civil in his way; being perhaps used to the custom of such convivial strangers - truckmen, gold-buyers, and the like - as were occasionally in town.

Reentering the Square I saw that luck was with me; for - shuffling out of Paine street around the comer of the Gilman House - I glimpsed nothing less than the tall, lean, tattered form of old Zadok Allen himself. In accordance with my plan, I attracted his attention by brandishing my newly-purchased bottle: and loon realised that he had begun to shuffle wistfully after me as I tinned into Waite Street on my way to the most deserted region I could think of.

I was steering my course by the map the grocery boy had prepared, and was aiming for the wholly abandoned stretch of southern waterfront which I had previously visited. The only people in sight there had been the fishermen on the distant breakwater; and by going a few squares south I could get beyond the range of these, finding a pair of seats on some
abandoned wharf and being free to question old Zadok unobserved for an indefinite time. Before I reached Main Street I could hear a faint and wheezy "Hey, Mister!" behind me and I presently allowed the old man to catch up and tab copious pulls from the quart bottle.

I began putting out feelers as we walked amidst the omnipresent desolation and crazily tilted ruins, but found that the aged tongue did not loosen as quickly as I had expected. At length I saw a grass-grown opening toward the sea between crumbling brick walls, with the weedy length of an earth-and-masonry wharf projecting beyond. Piles of moss-covered stones near the water promised tolerable seats, and the scene was sheltered from all possible view by a ruined warehouse on the north. Here, I thought was the ideal place for a long secret colloquy; so I guided my companion down the lane and picked out spots to sit in among the mossy stones. The air of death and desertion was ghoulish, and the smell of fish almost insufferable; but I was resolved to let nothing deter me.

About four hours remained for conversation if I were to catch the eight o'clock coach for Arkham, and I began to dole out more liquor to the ancient tippler; meanwhile eating my own frugal lunch. In my donations I was careful not to overshoot the mark, for I did not wish Zadok's vinous garrulousness to pass into a stupor, after an hour his furtive taciturnity shewed signs of disappearing, but much to my disappointment he still sidetracked my questions about Innsmouth and its shadow-haunted past. He would babble of current topics, revealing a wide acquaintance with newspapers and a great tendency to philosophise in a sententious village fashion.

Toward the end of the second hour I feared my quart of whiskey would not be enough to produce results, and was wondering whether I had better leave old Zadok and go back for more. Just then, however, chance made the opening which my questions had been unable to make; and the wheezing ancient's rambling took a turn that caused me to lean forward and listen alertly. My back was toward the fishy-smelling sea, but he was facing it and something or other had caused his wandering gaze to light on the low, distant line of Devil Reef, then showing plainly and almost fascinatingly above the waves. The sight seemed to displease him, for he began a series of weak curses which ended in a confidential whisper and a knowing leer. He bent toward me, took hold of my coat lapel, and hissed out some hints that could not be mistaken,

"Thar's whar it all begun - that cursed place of all wickedness whar the deep water starts. Gate o' hell - sheer drop daown to a bottom no saoundin'-line kin tech. Ol' Cap'n Obed done it - him that faound aout more'n was good fer him in the Saouth Sea islands.

"Everybody was in a bad way them days. Trade fallin' off, mills losin' business - even the new ones - an' the best of our menfolks kilt aprivateerin' in the War of 1812 or lost with the Elizy brig an' the Ranger scow - both on 'em Gilman venters. Obed Marsh he had three ships afloat - brigantine Columby, brig Hefty, an' barque Sumatry Queen. He was the only one as kep' on with the East-Injy an' Pacific trade, though Esdras Martin's barkentine Malay Bride made a venter as late as twenty-eight.

"Never was nobody like Cap'n Obed - old limb o' Satan! Heh, heh! I kin mind him a-tellin' abaout furren parts, an' callin' all the folks stupid for goin' to Christian meetin' an'
bearin' their burdans meek an' lowly. Says they'd orter git better gods like some o' the folks in the Injies - gods as ud bring 'em good fishin' in return for their sacrifices, an' ud reely answer folks's prayers.

"Matt Eliot his fust mate, talked a lot too, only he was again' folks's doin' any heathen things. Told abaout an island east of Othaheite whar they was a lot o' stone ruins older'n anybody knew anying abaout, kind o' like them on Ponape, in the Carolines, but with carven's of faces that looked like the big statues on Easter Island. Thar was a little volcanic island near thar, too, what they was other ruins with diff'rent carvin' - ruins all wore away like they'd ben under the sea onct, an' with picters of awful monsters all over 'em.

"Wal, Sir, Matt he says the natives anound thar had all the fish they cud ketch, an' sported bracelets an' armlets an' head rigs made aout o' a queer kind o' gold an' covered with picters o' monsters jest like the ones carved over the ruins on the little island - sorter fish-like frogs or froglike fishes that was drawed in all kinds o' positions likes they was human bein's. Nobody cud get aout o' them what they got all the stuff, an' all the other natives wondered haow they managed to find fish in plenty even when the very next island had lean pickin's. Matt he got to wonderon' too an' so did Cap'n Obed. Obed be notices, besides, that lots of the hn'some young folks ud drop aout o' sight fer good from year to year, an' that they wan't many old folks around. Also, he thinks some of the folks looked dinned queer even for Kanakys.

"It took Obed to git the truth aout o' them heathen. I dun't know haow he done it, but be begun by tradin' fer the gold-like things they wore. Ast 'em whar they come from, an' ef they cud git more, an' finally wormed the story aout o' the old chief - Walakea, they called him. Nobody but Obed ud ever a believed the old yeller devil, but the Cap'n cud read folks like they was books. Heh, heh! Nobody never believes me naow when I tell 'em, an' I dun't s'pose you will, young feller - though come to look at ye, ye hev kind o' got them sharp-readin' eyes like Obed had."

The old man's whisper grew fainter, and I found myself shuddering at the terrible and sincere portentousness of his intonation, even though I knew his tale could be nothing but drunken phantasy.

"Wal, Sir, Obed he 'lart that they's things on this arth as most folks never heerd about - an' wouldn't believe ef they did hear. It seems these Kanakys was sacrificin' heaps o' their young men an' maidens to some kind o' god-things that lived under the sea, an' gittin' all kinds o' favour in return. They met the things on the little islet with the queer ruins, an' it seems them awful picters o' frog-fish monsters was supposed to be picters o' these things. Mebbe they was the kind o' critters as got all the mermaid stories an' sech started.

"They had all kinds a' cities on the sea-bottom, an' this island was heaved up from thar. Seem they was some of the things alive in the stone buildin's when the island come up sudden to the surface, That's how the Kanakys got wind they was daown thar. Made sign-talk as son as they got over bein' skeert, an' pieced up a bargain afore long.
"Them things liked human sacrifices. Had had 'em ages afore, but lost track o' the upper world after a time. What they done to the victims I ain't fer me to say, an' I guess Obed was'n't none too sharp abaout askin'. But it was all right with the heathens, because they'd ben havin' a hard time an' was desp'rate abaout everything. They give a sarten number o' young folks to the sea-things twice every year - May-Eve an' Hallawe'en - reg'lar as cud be. Also give some a' the carved knick-knacks they made. What the things agreed to give in return was plenty a' fish - they druv 'em in from all over the sea - an' a few gold like things naow an' then.

"Wal, as I says, the natives met the things on the little volcanic islet - goin' thar in canoes with the sacrifices et cet'ry, and bringin' back any of the gold-like jools as was comin' to 'em. At fust the things didn't never go onto the main island, but arter a time they come to want to. Seems they hankered arter mixin' with the folks, an' havin' j'int ceremonies on the big days - May-Eve an' Hallowe'en. Ye see, they was able to live both in ant aout o' water - what they call amphibians, I guess. The Kanakys told 'em as haow folks from the other islands might wanna wipe 'an out if they got wind o' their bein' thar, but they says they dun't keer much, because they cud wipe aout the hull brood o' humans ef they was wilin' to bother - that is, any as didn't be, sarten signs sech as was used onct by the lost Old Ones, whoever they was. But not wantin' to bother, they'd lay low shun anybody visited the island.

"When it come to matin' with them toad-lookin' fishes, the Kanakys kind o' balked, but finally they larnt something as put a new face on the matter. Seems that human folks has got a kind a' relation to sech water-beasts - that everything alive come aout o' the water onct an' only needs a little change to go back agin. Them things told the Kanakys that ef they mixed bloods there'd be children as ud look human at fust, but later turn more'n more like the things, till finally they'd take to the water an' jine the main lot o' things daown har. An' this is the important part, young feller - them as turned into fish things an' went into the water wouldn't never die. Them things never died excep' they was kilt violent.

"Wal, Sir, it seems by the time Obed knowed them islanders they was all full o' fish blood from them deep water things. When they got old an' begun to shew it, they was kep' hid until they felt like takin' to the water an' quittin' the place. Some was more teched than others, an' some never did change quite enough to take to the water; but mosily they turned out jest the way them things said. Them as was born more like the things changed arly, but them as was nearly human sometimes stayed on the island till they was past seventy, though they'd usually go daown under for trial trips afore that. Folks as had took to the water gen'rally come back a good deal to visit, so's a man ud often be a'talkin' to his own five-times-great-grandfather who'd left the dry land a couple o' hundred years or so afore.

"Everybody got aout o' the idee o' dyin' - excep' in canoe wars with the other islanders, or as sacrifices to the sea-gods daown below, or from snakebite or plague or sharp gallopin' ailments or somethin' afore they cud take to the water - but simply looked forrad to a kind o' change that wa'n't a bit horrible artet a while. They thought what they'd got was well wuth all they'd had to give up - an' I guess Obed kind o' come to think the same hisself when he'd chewed over old Walakea's story a bit. Walakea, though, was one of the few as
hadn't got none of the fish blood - bein' of a royal line that intermarried with royal lines on other islands.

"Walakea he shewed Obed a lot o' rites an' incantations as had to do with the sea things, an' let him see some o' the folks in the village as had changed a lot from human shape. Somehaow or other, though, he never would let him see one of the reg'lar things from right aout o' the water. In the end he give him a funny kind o' thingumajig made aout o' lead or something, that he said ud bring up the fish things from any place in the water what they might be a nest o' 'em. The idee was to drop it daown with the right kind o' prayers an' sech. Walakea allowed as the things was scattered all over the world, so's anybody that looked abaout cud find a nest an' bring 'em up ef they was wanted.

"Matt he didn't like this business at all, an' wanted Obed shud keep away from the island; but the Cap'n was sharp fer gain, an' faound he cud get them gold-like things so cheap it ud pay him to make a specialty of them. Things went on that way for years an' Obed got enough o' that gold-like stuff to make him start the refinery in Waite's old run-daown fullin' mill. He didn't dass sell the pieces like they was, for folks ud be all the time askin' questions. All the same his crews ud get a piece an' dispose of it naow and then, even though they was swore to keep quiet; an' he let his women-folks wear some o' the pieces as was more human-like than most.

"Well, come abaout thutty-eight - when I was seven year' old - Obed he faound the island people all wiped aout between v'yages. Seems the other islanders had got wind o' what was goin' on, and had took matters into their own hands. S'pose they must a had, after all, them old magic signs as the sea things says was the only things they was afraid of. No tellin' what any o' them Kanakys will chance to git a holt of when the sea-bottom throws up some island with ruins older'n the deluge. Pious cusses, these was - they didn't leave nothin' standin' on either the main island or the little volcanic islet except' what parts of the ruins was too big to knock daown. In some places they was little stones strewed abaout - like charms - with somethin' on 'em like what ye call a swastika naowadays. Prob'ly them was the Old Ones' signs. Folks all wiped aout no trace o' no gold-like things an' none the nearby Kanakys ud breathe a word abaout the matter. Wouldn't even admit they'd ever ben any people on that island.

"That naturally hit Obed pretty hard, seein' as his normal trade was doin' very poor. It hit the whole of Innsmouth, too, because in seafarint days what profited the master of a ship gen'lly profited the crew proportionate. Most of the folks araound the taown took the hard times kind o' sheep-like an' resigned, but they was in bad shape because the fishin' was peterin' aout an' the mills wan't doin' none too well.

"Then's the time Obed he begun a-cursin' at the folks fer bein' dull sheep an' prayin' to a Christian heaven as didn't help 'em none. He told 'em he'd knowed o' folks as prayed to gods that give somethin' ye reely need, an' says ef a good bunch o' men ud stand by him, he cud mebbe get a holt o' sarten paowers as ud bring plenty o' fish an' quite a bit of gold. 0' course them as served on the Sumatry Queen, an' seed the island knewed what he meant, an' wa'n't none too anxious to get close to sea-things like they'd heard tell on, but them as didn't know what 'twas all abaout got kind o' swayed by what Obed had to say,
and begun to ask him what he could do to sit 'em on the way to the faith as you bring 'em results."

Here the old man faltered, mumbled, and lapsed into a moody and apprehensive silence; glancing nervously over his shoulder and then turning back to stare fascinatedly at the distant black reef. When I spoke to him he did not answer, so I knew I would have to let him finish the bottle. The insane yarn I was hearing interested me profoundly, for I fancied there was contained within it a sort of crude allegory based upon the strangeness of Innsmouth and elaborated by an imagination at once creative and full of scraps of exotic legend. Not for a moment did I believe that the tale had any really substantial foundation; but none the less the account held a hint of genuine terror if only because it brought in references to strange jewels clearly akin to the malign tiara I had seen at Newburyport. Perhaps the ornaments had, after all, come from some strange island; and possibly the wild stories were lies of the bygone Obed himself rather than of this antique toper.

I handed Zadok the bottle, and he drained it to the last drop. It was curious how he could stand so much whiskey, for not even a trace of thickness had come into his high, wheezy voice. He licked the nose of the bottle and slipped it into his pocket, then beginning to nod and whisper softly to himself. I bent close to catch any articulate words he might utter, and thought I saw a sardonic smile behind the stained bushy whiskers. Yes - he was really forming words, and I could grasp a fair proportion of them.

"Poor Matt - Matt he allus was agin it - tried to line up the folks on his side, an' had long talks with the preachers - no use - they run the Congregational parson aout o' taown, an' the Methodist feller quit - never did see Resolved Babcock, the Baptist parson, agin - Wrath o' Jehovy - I was a mightly little critter, but I heerd what I heerd an, seen what I seen - Dagon an' Ashtoreth - Belial an' Beelzebub - Golden Caff an' the idols o' Canaan an' the Philistines - Babylonish abominations - Mene, mene, tekel, upharisn - -.

He stopped again, and from the look in his watery blue eyes I feared he was close to a stupor after all. But when I gently shook his shoulder he turned on me with astonishing alertness and snapped out some more obscure phrases.

"Dun't believe me, hey? Hey, heh, heh - then jest tell me, young feller, why Cap'n Obed an' twenty odd other folks used to row aout to Devil Reef in the dead o' night an' chant things so laoud ye cud hear 'em all over taown when the wind was right? Tell me that, hey? An' tell me why Obed was allus droppin' heavy things daown into the deep water t'other side o' the reef whar the bottom shoots daown like a cliff lower'a ye kin saound? Tell me what he done with that funny-shaped lead thingumajig as Walakea give him? Hey, boy? An' what did they all haowl on May-Eve, an, agin the next Hallowe'en? An' why'd the new church parsons - fellers as used to he sailors - wear them queer robes an' cover their-selves with them gold-like things Obed brung? Hey?"

The watery blue eyes were almost savage and maniacal now, and the dirty white beard bristled electrically. Old Zadok probably saw me shrink back, for he began to cackle evilly.
"Heh, heh, heh, heh! Beginni'n to see hey? Mebbe ye'd like to a ben me in them days, when I seed things at night aout to sea from the cupalo top o' my haouse. Oh, I kin tell ye' little pitchers hev big ears, an' I wa'n't missin' nothin' o' what was gossiped abaout Cap'n Obed an' the folks aout to the reef! Heh, heh, heh! Haow abaout the night I took my pa's ship's glass up to the cupalo an' seed the reef a-bristlin' thick with shapes that dove off quick soon's the moon riz?

"Obed an' the folks was in a dory, but them shapes dove off the far side into the deep water an' never come up . . .

"Haow'd ye like to be a little shaver alone up in a cupola a-watchin' shapes as wa'n't human shapes? . . .Heh? . . . Heh, heh, heh . . ."

The old man was getting hysterical, and I began to shiver with a nameless alarm. He laid a gnarled claw on my shoulder, and it seemed to me that its shaking was not altogether that of mirth.

"S'pose one night ye seed somethin' heavy heaved offen Obed's dory beyond the reef' and then learned next day a young feller was missin' from home. Hey! Did anybody ever see hide or hair o' Hiram Gilman agin. Did they? An' Nick Pierce, an' Luelly Waite, an' Adoniram Saouthwick, an' Henry Garrison Hey? Heh, heh, heh, heh . . . Shapes talkin' sign language with their hands . . . them as had reel hands . . .

"Wal, Sir, that was the time Obed begun to git on his feet agin. Folks see his three darters a-wearin' gold-like things as nobody'd never see on 'em afore, an' smoke stared comin' aout o' the refin'ry chimbley. Other folks was prosp'rin, too - fish begun to swarm into the harbour fit to kill' an' heaven knows what sized cargoes we begun to ship aout to Newb'ryport, Arkham, an' Boston. T'was then Obed got the ol' branch railrud put through. Some Kingsport fishermen heerd abaout the ketch an' come up in sloops, but they was all lost. Nobody never see 'em agin. An' jest then our folk organised the Esoteric Order 0' Dagon, an' bought Masoic Hall offen Calvary Commandery for it . . . heh, heh, heh! Mart Eliot was a Mason an' agin the sellin', but he dropped aout o' sight jest then.

"Remember, I ain't sayin' Obod was set on hevin' things jest like they was on that Kanaky isle. I dun't think he aimed at fust to do no mixin', nor raise no younguns to take to the water an' turn into fishes with eternal life. He wanted them gold things, an' was willin' to pay heavy, an' I guess the others was satisfied fer a while . . .

"Come in' forty-six the taown done some lookin' an' thinkin' fer itself. Too many folks messin'- too much wild preachin' at meetin' of a Sunday - too much talk abaout that reef. I guess I done a bit by tellin' Selectman Mowry what I see from the cupalo. They was a party one night as follered Obed's craowd aout to the reef, an' I heerd shots betwixt the dories. Nex' day Obed and thutty-two others was in gaol, with everybody a-wonderin' jest what was afoot and jest what charge agin 'em cud he got to holt. God, ef anybody'd look'd ahead . . . a couple o' weeks later, when nothin' had ben throwed into the sea fer thet long . . .

Zadok was shewing sings of fright and exhaustion, and I let him keep silence for a while, though glancing apprehensively at my watch. The tide had turned and was coming in
now, and the sound of the waves seemed to arouse him. I was glad of that tide, for at high water the fishy smell might not be so bad. Again I strained to catch his whispers.

"That awful night . . . I seed 'em. I was up in the cupalo . . . hordes of' em . . . swarms of 'em . . . all over the reef an' swimin' up the harbour into the Manuret. . . God, what happened in the streets of Innsmouth that night . . . they rattled our door, but pa wouldn't open . . . then he clumb aout the kitchen winder with his musket to find Selecman Mowry an' see what he cud; do . . . Maounds o' the dead an' the dyin' . . . shots and screams . . . shaoutin' in Ol Squar an' Taown Squar an' New Church Green - gaol threwed open . . . - proclamation . . . treason . . . called it the plague when folks come in an' faoud haff our people missin' . . . nobody left but them as ud jine in with Obed an' them things or else keep quiet . . . never heard o' my pa no more . . ."

The old man was panting and perspiring profusely. His grip on my shoulder tightened.

"Everything cleaned up in the mornin' - but they was traces . . . Obed he kinder takes charge an' says things is goin' to be changed . . . others'll worship with us at meetin'-time, an' sarten haouses hez got to entertin guests . . . they wanted to mix like they done wish the Kanakys, an' he for one didn't feel baound to stop 'em. Far gone, was 0bed . . . jest like a crazy man on the subjeck. He says they brung us fish an' treasure, an' shud hev what they hankered after . . ."

"Nothin' was to be diff'runt on the aoutsid; only we was to keep shy o' strangers ef we knew what was good fer us.

"We all hed to take the Oath o' Dagon, an' later on they was secon' an' third Oaths that wrne on us took. Them as ud help special, ud git special rewards - gold an' sech - No use balkin', fer they was millions of 'em daown thar. They'd ruther not start risin' an' wipin' aout human-kind, but ef they was gave away an' forced to, they cud do a lot toward jest that. We didn't hev them old charms to cut 'em off like folks in the Saouth Sea did, an' them Kanakys wudu't never give away their secrets.

"Yield up enough sacrifices an' savage knick-knacks an' harbourage in the taown when they wanted it, an' they'd let well enough alone. Wudn't bother no strangers as might bear tales aoutsid - that is, withaout they got pryin'. All in the band of the faithful - Order 0' Dagon - an' the children shud never die, but go back to the Mother Hydra an' Father Dagon what we all come from onct . . . la! la! Cthulhu fhtagn! Ph'nglui mglw'nafh Cthulhu R'lyeh wgah-nagl fhtaga - "

Old Zadok was fast lapsing into stark raving, and I held my breath. Poor old soul - to what pitiful depths of hallucination had his liquor, plus his hatred of the decay, alienage, and disease around him, brought that fertile, imaginative brain? He began to moan now, and tears were coursing down his channelled checks into the depths of his beard.

"God, what I seen senct I was fifteen year' old - Mene, mene, tekel, upharsin! - the folks as was missin', and them as kilt theirselves - them as told things in Arkham or Ipswich or sech places was all called crazy, like you're callin' me right naow - but God, what I seen - They'd a kilt me long ago fer' what I know, only I'd took the fust an' secon' Oaths o' Dago
offen Ohed, so was pertected unlessen a jury of 'em proved I told things knowin' an' 
delib'rit . . . but I wudn't take the third Oath - I'd a died ruther'n take that - "

"It got wuss arround Civil War time, when children born senct 'fiorty-six begun to grow 
up - some 'em, that is. I was afeared - never did no pryin' arter that awful night, an' never 
see one o' - them - clott to in all my life. That is, never no full-blooded one. I went to the 
war, an' ef I'd a had any guts or sense I'd a never come back, but settled away from here. 
But folks wrote me things wa'n't so bad. That, I s'pose, was because gov'munt draft men 
was in taown arter 'sirty-three. Arter the war it was jest as bad agin. People begun to fall 
off - mills an' shops shet daown shippin' stopped an' the harbour choked up - railrud give 
up - but they . . . they never stopped swimmin' in an' aout o' the river from that cursed 
reef o' Setan - an' more an' more attic winders got a-boarded up, an' more an' more noises 
was heerd in haouses as wa'n't s'posed to hev nobody in 'em . . .

"Folks aoutside hev their stories abaout us - s'pose you've heerd a plenty on 'em, seein' 
what questions ye ast - stories abaout things they've seed naow an' then, an' abaout that 
queer joofry as still comes in from somewhars an' ain't quite all melted up - but nothin' 
ever gits def'nite. Nobody'll believe nothin'. They call them gold-like things pirate loot, 
an' allaw the Innsmouth folks hez furren blood or is dis-tempered or somethin'. Beside, 
them that lives here shoo off as many strangers as they kin, an' encourage the rest not to 
git very cur'ous, specially raound night time. Beasts balk at the critters - hosses wuss'n 
mules - but when they got autos that was all right.

"In forty-six Cap'n Obed took a second wife that nobody in thee taown never see - some 
says he didn't want to, but was made to by them as he'd called in - had three children by 
her - two as disappeared young, but one gal as looked like anybody else an' was eddicated 
in Europe. Obed finally got her married off by a trick to an Ackham feller as didn't 
suspect nothin'. But nobody aoutside'll hav nothin' to do with Innsmouth folks 'now. 
Barnabas Marsh that runs the refin'ry now is Obed's grandson by hist first wife - son of 
Onesiphorus, his eldest eon, but his mother was another o' them as wa'n't never seen 
aoutdoors.

"Right naow Barnabas is abaout changed. Can't shet his eyes no more, an' is all aout o' 
shape. They say he still wears clothes, but he'll take to the water soon. Mebbe he's tried it 
already - they do sometimes go daown for little spells afore they go daown for good. 
Ain't ben seed abaout in public fer night on ten year'. Dun't know haow his poor wife kin 
feel - she come from Ipiwich, an' they nigh lynched Barnabas when he courted her fifty 
odd year' ago. Obed he died in 'seventy-eight an' all the next gen'ratioon is gone naow - 
the fust wife's children dead, and the rest . . . God knows . . ."

The sound of the incoming tide was flow very insistent, and little by little it seemed to 
change the old man's mood from maudlin tearfulness to watchful fear. He would pause 
now and then to renew those nervous glances over his shoulder or out toward the reef, 
and despite the wild absurdity of his tale, I could not help beginning to share his 
apprehensiveness. Zadok now grew shriller, seemed to be trying to whip up his courage 
with louder speech.
"Hey, yew, why dun't ye say somethin'? Haow'd ye like to he livin' in a taown like this, with everything a-rottin' an' dyin', an' boarded-up monsters crawlin' an' bleatin' an' barkin' an' hoppin' arooun' black cellars an' attics every way ye turn? Hey? Haow'd ye like to hear the haowlin' night arter night from the churches an' Order 0' Dagon Hall, an' know what's doin' part o' the haowlin'? Haow'd ye like to hear what comes from that awful reef every May-Eve an' Hallowmass? Hey? Think the old man's crazy, eh? Wal, Sir, let me tell ye that ain't the wust!"

Zadok was really screaming now, and the mad frenzy of his voice disturbed me more than I care to own.

"Curse ye, dun't set thar a'starin' at me with them eyes - I tell Obed Marsh he's in hell, an', hez got to stay thar! Heh, heh . . . in hell, I says! Can't git me - I hain't done nothin' nor told nobody nothin' - -

"Oh, you, young feller? Wal, even ef I hain't told nobody nothin' yet, I'm a'goin' to naow! Yew jest set still an' listen to me, boy - this is what I ain't never told nobody. . . I says I didn't get to do pryin' arter that night - but I faound things about jest the same!"

"Yew want to know what the reel horror is, hey? Wal, it's this - it ain't what them fish devils hez done, but what they're a-goin' to do! They're a-brinin' things up aout o' whar they come from into the taown - been doin' it fer years, an' slackenin' up lately. Them haouses north o' the river be-twixt Water an' Main Streets is full of 'em - them devils an' what they brung - an' when they git ready . . . I say, when they git... ever hear tell of a shoggoth?

"Hey, d'ye hear me? I tell ye I know what them things be - I seen 'em one mght when . . . eh-ahhh-ah! e'yahhh . . . "

The hideous suddenness and inhuman frightfulness of the old man's shriek almost made me faint. His eyes, looking past me toward the malodorous sea, were positively starting from his head; while his face was a mask of fear worthy of Greek tragedy. His bony claw dug monstrously into my shoulder, and he made no motion as I turned my head to look at whatever he had glimpsed.

There was nothing that I could see. Only the incoming tide, with perhaps one set of ripples more local than the long-flung line of breakers. But now Zadok was shaking me, and I turned back to watch the melting of that fear-frozen face into a chaos of twitching eyelids and mumbling gums. Presently his voice came back - albeit as a trembling whisper.

"Git aout o' here! Get aout o' here! They seen us - git aout fer your life! Dun't wait fer nothin' - they know naow - Run fer it - quick - aout o' this taown - -"

Another heavy wave dashed against the loosing masonry of the bygone wharf, and changed the mad ancient's whisper to another inhuman and blood-curdlng scream. "E-yaahhhh! . . . Yheaaaaaa! . . ."
Before I could recover my scattered wits he had relaxed his clutch on my shoulder and
dashed wildly inland toward the street, reeling northward around the ruined warehouse
wall.

I glanced back at the sea, but there was nothing there. And when I reached Water Street
and looked along it toward the north there was no remaining trace of Zadok Allen.

IV

I can hardly describe the mood in which I was left by this harrowing episode - an episode
at once mad and pitiful, grotesque and terrifying. The grocery boy had prepared me for it,
yet the reality left me none the less bewildered and disturbed. Puerile though the story
was, old Zadok's insane earnestness and horror had communicated to me a mounting
unrest which joined with my earlier sense of loathing for the town and its blight of
intangible shadow.

Later I might sift the tale and extract some nucleus of historic allegory; just now I wished
to put it out of my head. The hour grown perilously late - my watch said 7:15, and the
Arkham bus left Town Square at eight - so I tied to give my thoughts as neutral and
practical a cast as possible, meanwhile walking rapidly through the deserted streets of
gaping roofs and leaning houses toward the hotel where I had checked my valise and
would find my bus.

Though the golden light of late afternoon gave the ancient roofs and decrepit chimneys an
air of mystic loveliness and peace, I could not help glancing over my shoulder now and
then. I would surely be very glad to get out of malodorous and fear-shadowed Innsmouth,
and wished there were some other vehicle than the bus driven by that sinister-looking
fellow Sargent. Yet I did not hurry too precipitately, for there were architectural details
worth viewing at every dent corner; and I could easily, I calculated, cover the necessary
distance in a half-hour.

Studying the grocery youth's map and seeking a route I had not traversed before, I chose
Marsh Street instead of State for my approach to Town Square. Near the corner of Fall
street I began to see scattered groups of furtive whisperers, and when I finally reached the
Square I saw that almost all the loiterers were congregated around the door of the Gilman
House. It seemed as if many bulging, watery, unwinking eyes looked oddly at me as I
claimed my valise in the lobby, and I hoped that none of these unpleasant creatures would
be my fellow-passengers on the coach.

The bus, rather early, rattled in with three passengers somewhat before eight, and an evil-
looking fellow on the sidewalk muttered a few indistinguishable words to the driver.
Sargent threw out a mail-bag and a roll of newspapers, and entered the hotel; while the
passengers - the same men whom I had seen arriving in Newburyport that morning -
shambled to the sidewalk and exchanged some faint guttural words with a loafer in a
language I could have sworn was not English. I boarded the empty coach and took the
seat I had taken before, but was hardly settled before Sargent re-appeared and began
mumbling in a throaty voice of peculiar repulsiveness.
I was, it appeared, in very bad luck. There had been something wrong with the engine, despite the excellent time made from Newburyport, and the bus could not complete the journey to Arkham. No, it could not possibly be repaired that night, nor was there any other way of getting transportation out of Innsmouth either to Arkham or elsewhere. Sargent was sorry, but I would have to stop over at the Gilman. Probably the clerk would make the price easy for me, but there was nothing else to do. Almost dazed by this sudden obstacle, and violently dreading the fall of night in this decaying and half-unlighted town, I left the bus and reentered the hotel lobby; where the sullen queer-looking night clerk told me I could have Room 428 on next the top floor - large, but without running water - for a dollar.

Despite what I had heard of this hotel in Newburyport, I signed the register, paid my dollar, let the clerk take my valise, and followed that sour, solitary attendant up three creaking flights of stairs past dusty corridors which seemed wholly devoid of life. My room was a dismal rear one with two windows and bare, cheap furnishings, overlooked a dingy court-yard otherwise hemmed in by low, deserted brick blocks, and commanded a view of decrepit westward-stretching roofs with a marshy countryside beyond. At the end of the corridor was a bathroom - a discouraging relique with ancient marble bowl, tin tub, faint electric light, and musty wooded paneling around all the plumbing fixtures.

It being still daylight, I descended to the Square and looked around for a dinner of some sort; noticing as I did so the strange glances I received from the unwholesome loafers. Since the grocery was closed, I was forced to patronise the restaurant I had shunned before; a stooped, narrow-headed man with staring, unwinking eyes, and a flat-nosed wench with unbelievably thick, clumsy hands being in attendance. The service was all of the counter type, and it relieved me to find that much was evidently served from cans and packages. A bowl of vegetable soup with crackers was enough for me, and I soon headed back for my cheerless roam at the Gilman; getting an evening paper and a fly-specked magazine from the evil-visaged clerk at the rickety stand beside his desk.

As twilight deepened I turned on the one feeble electric bulb over the cheap, iron-framed bed, and tried as best I could to continue the reading I had begun. I felt it advisable to keep my mind wholesomely occupied, for it would not do to brood over the abnormalities of this ancient, blight-shadowed town while I was still within its borders. The insane yarn I had heard from the aged drunkard did not promise very pleasant dreams, and I felt I must keep the image of his wild, watery eyes as far as possible from my imagination. Also, I must not dwell on what that factory inspector had told the Newburyport ticket-agent about the Gilman House and the voices of its nocturnal tenants - not on that, nor on the face beneath the tiara in the black church doorway; the face for whose horror my conscious mind could not account. It would perhaps have been easier to keep my thoughts from disturbing topics had the room not been so gruesomely musty. As it was, the lethal mustiness blended hideously with the town's general fishy odour and persistently focussed one's fancy on death and decay.

Another thing that disturbed me was the absence of a bolt on the door of my room. One had been there, as marks clearly shewed, but there were signs of recent removal. No doubt it had been out of order, like so many other things in this decrepit edifice. In my
nervousness I looked around and discovered a bolt on the clothes press which seemed to be of the same size, judging from the marks, as the one formerly on the door. To gain a partial relief from the general tension I busied myself by transferring this hardware to the vacant place with the aid of a handy three-in-one device including a screwdriver which I kept on my key-ring. The bolt fitted perfectly, and I was somewhat relieved when I knew that I could shoot it firmly upon retiring. Not that I had any real apprehension of its need, but that any symbol of security was welcome in an environment of this kind. There were adequate bolts on the two lateral doors to connecting rooms, and these I proceeded to fasten.

I did not undress, but decided to read till I was sleepy and then lie down with only my coat, collar, and shoes off. Taking a pocket flash light from my valise, I placed it in my trousers, so that I could read my watch if I woke up later in the dark. Drowsiness, however, did not come; and when I stopped to analyse my thoughts I found to my disquiet that I was really unconsciously listening for something - listening for something which I dreaded but could not name. That inspector's story must have worked on my imagination more deeply than I had suspected. Again I tried to read, but found that I made no progress.

After a time I seemed to hear the stairs and corridors creak at intervals as if with footsteps, and wondered if the other rooms were beginning to fill up. There were no voices, however, and it struck me that there was something subtly furtive about the creaking. I did not like it, and debated whether I had better try to sleep at all. This town had some queer people, and there had undoubtedly been several disappearances. Was this one of those inns where travelers were slain for their money? Surely I had no look of excessive prosperity. Or were the towns folk really so resentful about curious visitors? Had my obvious sightseeing, with its frequent map-consultations, aroused unfavorable notice. It occurred to me that I must be in a highly nervous state to let a few random creakings set me off speculating in this fashion - but I regretted none the less that I was unarmed.

At length, feeling a fatigue which had nothing of drowsiness in it, I bolted the newly outfitted hall door, turned off the light, and threw myself down on the hard, uneven bed - coat, collar, shoes, and all. In the darkness every faint noise of the night seemed magnified, and a flood of doubly unpleasant thoughts swept over me. I was sorry I had put out the light, yet was too tired to rise and turn it on again. Then, after a long, dreary interval, and prefaced by a fresh creaking of stairs and corridor, there came that soft; damnably unmistakable sound which seemed like a malign fulfillment of all my apprehensions. Without the lean shadow of a doubt, the lock of my door was being tried - cautiously, furtively, tentatively - with a key.

My sensations upon recognising this sign of actual peril were perhaps less rather than more tumultuous because of my previous vague fear I had about, albeit without definite reason, instinctively on my guard - and that was to my advantage in the new and real crisis, whatever it might turn out to be. Nevertheless the change in the menace from vague premonition to immediate reality was a profound shock, and fell upon me with the force of a genuine blow. It never once occurred to me that the fumbling might be a mere
mistake. Malign purpose was all I could think of, and I kept deathly quiet, awaiting the would-he intruder's next move.

After a time the cautious rattling ceased, and I heard the room to the north entered with a pass key. Then the lock of the connecting door to my room was softly tried. The bolt held, of course, and I heard the floor creak as the prowler left the room. After a moment there came another soft rattling, and I knew that the room to the south of me was being entered. Again a furtive trying of a bolted connecting door, and again a receding creaking. This time the creaking went along the hall and down the stairs, so I knew that the prowler had raised the bolted condition of my doors and was giving up his attempt for a greater or lesser time, as the future would shew.

The readiness with which I fell into a plan of action proves that I must have been subconsciously fearing some menace and considering possible avenues of escape for hours. From the first I felt that the unseen fumbler meant a danger not to be met or dealt with, but only to be fled from as precipitately as possible. The one thing to do was to get out of that hotel alive as quickly as I could, and through some channel other than the front stairs and lobby.

Rising softly and throwing my flashlight on the switch, I sought to light the bulb over my bed in order to choose and pocket some belongings for a swift, valiseless flight. Nothing, however, happened; and I saw that the power had been cut off. Clearly, some cryptic, evil movement was afoot on a large scale - just what, I could not say. As I stood pondering with my hand on the now useless switch I heard a muffled creaking on the floor below, and thought I could barely distinguish voices in conversation. A moment later I felt less sure that the deeper sounds were voices, since the apparent hoarse barkings and loose-syllabled croakings bore so little resemblance to recognized human speech. Then I thought with renewed force of what the factory inspector had heard in the night in this mouldering and pestilential building.

Having filled my pockets with the flashlight's aid, I put on my hat and tiptoed to the windows to consider chances of descent. Despite the state's safety regulations there was no fire escape on this side of the hotel, and I saw that my windows commanded only a sheer three story drop to the cobbled courtyard. On the right and left, however, some ancient brick business blocks abutted on the hotel; their slant roofs coming up to a reasonable jumping distance from my fourth-story level. To reach either of these lines of buildings I would have to be in a room two from my own - in one case on the north and in the other case on the south - and my mind instantly set to work what chances I had of making the transfer.

I could not, I decided, risk an emergence into the corridor; where my footsteps would surely be heard, and where the difficulties of entering the desired room would be insuperable. My progress, if it was to be made at all, would have to be through the less solidly-built connecting doors of the rooms; the locks and bolts of which I would have to force violently, using my shoulder as a battering-ram whenever they were set against me. This, I thought, would be possible owing to the rickety nature of the house and its fixtures; but I realised I could not do it noiselessly. I would have to count on sheer speed, and the chance of getting to a window before any hostile forces became coordinated.
enough to open the right door toward me with a pass-key. My own outer door I reinforced by pushing the bureau against it - little by little, in order to make a minimum of sound.

I perceived that my chances were very slender, and was fully prepared for any calamity. Even getting to another roof would not solve the problem for there would then remain the task of reaching the ground and escaping from the town. One thing in my favour was the deserted and ruinous state of the abutting building and the number of skylights gaping blackly open in each row.

Gathering from the grocery boy's map that the best route out of town was southward, I glanced first at the connecting door on the south side of the room. It was designed to open in my direction, hence I saw - after drawing the bolt and finding other fastening in place - it was not a favorable one for forcing. Accordingly abandoning it as a route, I cautiously moved the bedstead against it to hamper any attack which might be made on it later from the next room. The door on the north was hung to open away from me, and this - though a test proved it to be locked or bolted from the other side - I knew must be my route. If I could gain the roofs of the buildings in Paine Street and descend successfully to the ground level, I might perhaps dart through the courtyard and the adjacent or opposite building to Washington or Bates - or else emerge in Paine and edge around southward into Washington. In any case, I would aim to strike Washington somehow and get quickly out of the Town Square region. My preference would be to avoid Paine, since the fire station there might be open all night.

As I thought of these things I looked out over the squalid sea of decaying roof below me, now brightened by the beams of a moon not much past full. On the right the black gash of the river-gorge clove the panorama; abandoned factories and railway station clinging barnacle-like to its sides. Beyond it the rusted railway and the Rowley road led off through a flat marshy terrain dotted with islets of higher and dryer scrub-grown land. On the left the creek-threaded country-side was nearer, the narrow road to Ipswich gleaming white in the moonlight. I could not see from my side of the hotel the southward route toward Arkham which I had determined to take.

I was irresolutely speculating on when I had better attack the northward door, and on how I could least audibly manage it, when I noticed that the vague noises underfoot had given place to a fresh and heavier creaking of the stairs. A wavering flicker of light shewed through my transom, and the boards of the corridor began to groan with a ponderous load. Muffled sounds of possible vocal origin approached, and at length a firm knock came at my outer door.

For a moment I simply held my breath and waited. Eternities seemed to elapse, and the nauseous fishy odour of my environment seemed to mount suddenly and spectacularly. Then the knocking was repeated - continuously, and with growing insistence. I knew that the time for action had come, and forthwith drew the bolt of the northward connecting door, bracing myself for the task of battering it open. The knocking waxed louder, and I hoped that its volume would cover the sound of my efforts. At last beginning my attempt, I lunged again and again at the thin paneling with my left shoulder, heedless of shock or
pain. The door resisted even more than I expected, but I did not give in. And all the while the clamour at the outer door increased.

Finally the connecting door gave, but with such a crash that I knew those outside must have heard. Instantly the outside knocking became a violent battering, while keys sounded ominously in the hall doors of the rooms on both sides of me. Rushing through the newly opened connexion, I succeeded in bolting the northerly hall door before the lock could he turned; but even as I did so I heard the hall door of the third room—the one from whose window I had hoped to reach the roof below—being tried with a pass key.

For an instant I felt absolute despair, since my trapping in a chamber with no window egress seemed complete. A wave of almost abnormal horror swept over me, and invested with a terrible but unexplainable singularity the flashlight-glimpsed dust prints made by the intruder who had lately tried my door from this room. Then, with a dazed automatism which persisted despite hopelessness, I made for the next connecting door and performed the blind motion of pushing at it in an effort to get through and granting that fastenings might be as providentially intact as in this second room—bolt the hall door beyond before the lock could be turned from outside.

Sheer fortunate chance gave me my reprieve - for the connecting door before me was not only unlocked but actually ajar. In a second I was though, and had my right knee and shoulder against a hall door which was visibly opening inward. My pressure took the opener off guard, for the thing shut as I pushed, so that I could slip the well-conditioned bolt as I had done with the other door. As I gained this respite I heard the battering at the two other doors abate, while a confused clatter came from the connecting door I had shielded with the bedstead. Evidently the bulk of my assailants had entered the southerly room and were massing in a lateral attack. But at the same moment a pass key sounded in the next door to the north, and I knew that a nearer peril was at hand.

The northward connecting door was wide open, but there was no time to think about checking the already turning lock in the hall. All I could do was to shut and bolt the open connecting door, as well as its mate on the opposite side - pushing a bedstead against the one and a bureau against the other, and moving a washstand in front of the hall door. I must, I saw, trust to such makeshift barriers to shield me till I could get out the window and on the roof of the Paine Street block. But even in this acute moment my chief horror was something apart from the immediate weakness of my defenses. I was shuddering because not one of my pursuers, despite some hideous panting, grunting, and subdued barkings at odd intervals, was uttering an unmuffled or intelligible vocal sound.

As I moved the furniture and rushed toward the windows I heard a frightful scurrying along the corridor toward the room north of me, and perceived that the southward battering had ceased. Plainly, most of my opponents were about to concentrate against the feeble connecting door which they knew must open directly on me. Outside, the moon played on the ridgepole of the block below, and I saw that the jump would be desperately hazardous because of the steep surface on which I must land.

Surveying the conditions, I chose the more southerly of the two windows as my avenue of escape; planning to land on the inner slope of the roof and make for the nearest sky-
light. Once inside one of the decrepit brick structures I would have to reckon with
pursuit; but I hoped to descend and dodge in and out of yawning doorways along the
shadowed courtyard, eventually getting to Washington Street and slipping out of town
toward the south.

The clatter at the northerly connecting door was now terrific, and I saw that the weak
panelling was beginning to splinter. Obviously, the besiegers had brought some
ponderous object into play as a battering-ram. The bedstead, how-ever, still held firm; so
that I had at least a faint chance of making good my escape. As I opened the window I
noticed that it was flanked by heavy velour draperies suspended from a pole by brass
rings, and also that there was a large projecting catch for the shutters on the exterior.
Seeing a possible means of avoiding the dangerous jump, I yanked at the hangings and
brought them down, pole and all; then quickly hooking two of the rings in the shutter
catch and flinging the drapery outside. The heavy folds reached fully to the abutting roof,
and I saw that the rings and catch would be likely to bear my weight. So, climbing out of
the window and down the improvised rope ladder, I left behind me forever the morbid

I landed safely on the loose slates of the steep roof, and succeeded in gaining the gaping
black skylight without a slip. Glancing up at the window I had left, I observed it was still
dark, though far across the crumbling chimneys to the north I could see lights ominously
blazing in the Order of Dagon Hall, the Baptist church, and the Congregational church
which I recalled so shiveringly. There had seemed to be no one in the courtyard below,
and I hoped there would be a chance to get away before the spreading of a general alarm.

Flash ing my pocket lamp into the skylight, I saw that there were no steps down. The
distance was slight, however, so I clambered over the brink and dropped; striking a dusty
floor littered with crumbling boxes and barrels.

The place was ghoulish-looking, but I was past minding such impressions and made at
once for the staircase revealed by my flashlight - after a hasty glance at my watch, which
shewed the hour to be 2 a.m. The steps creaked, but seemed tolerably sound; and I raced
down past a barnlike second storey to the ground floor. The desolation was complete, and
only echoes answered my footfalls. At length I reached the lower hall at the end of which
I saw a faint luminous rectangle marking the ruined Paine Street doorway. Heading the
other way, I found the back door also open; and darted out and down five stone steps to
the grass-grown cobblestones of the courtyard.

The moonbeams did not reach down here, but I could just see my way about without
using the flashlight. Some of the windows on the Gilman House side were faintly
glowing, and I thought I heard confused sounds within. Walking softly over to the
Washington Street side I perceived several open doorways, and chose the nearest as my
route out. The hallway inside was black, and when I reached the opposite end I saw that
the street door was wedged immovably shut. Resolved to try another building, I groped
my way back toward the courtyard, but stopped short when close to the doorway.

For out of an opened door in the Gilman House a large crowd of doubtful shapes was
pouring - lanterns bobbing in the darkness, and horrible croaking voices exchanging low
cries in what was certainly not English. The figures moved uncertainly, and I realized to
my relief that they did not know where I had gone; but for all that they sent a shiver of horror through my frame. Their features were indistinguishable, but their crouching, shambling gait was abominably repellent. And worst of all, I perceived that one figure was strangely robed, and unmistakably surmounted by a tall tiara of a design altogether too familiar. As the figures spread throughout the courtyard, I felt my fears increase. Suppose I could find no egress from this building on the street side? The fishy odour was detestable, and I wondered I could stand it without fainting. Again groping toward the street, I opened a door off the hall and came upon an empty room with closely shuttered but sashless windows. Fumbling in the rays of my flashlight, I found I could open the shutters; and in another moment had climbed outside and was fully closing the aperture in its original manner.

I was now in Washington Street, and for the moment saw no living thing nor any light save that of the moon. From several directions in the distance, however, I could hear the sound of hoarse voices, of footsteps, and of a curious kind of pattering which did not sound quite like footsteps. Plainly I had no time to lose. The points of the compass were clear to me, and I was glad that all the street lights were turned off, as is often the custom on strongly moonlit nights in prosperous rural regions. Some of the sounds came from the south, yet I retained my design of escaping in that direction. There would, I knew, be plenty of deserted doorways to shelter me in case I met any person or group who looked like pursuers.

I walked rapidly, softly, and close to the ruined houses. While hatless and dishevelled after my arduous climb, I did not look especially noticeable; and stood a good chance of passing unheeded if forced to encounter any casual wayfarer.

At Bates Street I drew into a yawning vestibule while two shambling figures crossed in front of me, but was soon on my way again and approaching the open space where Eliot Street obliquely crosses Washington at the intersection of South. Though I had never seen this space, it had looked dangerous to me on the grocery youth's map; since the moonlight would have free play there. There was no use trying to evade it, for any alternative course would involve detours of possibly disastrous visibility and delaying effect. The only thing to do was to cross it boldly and openly; imitating the typical shamble of the Innsmouth folk as best I could, and trusting that no one - or at least no pursuer of mine - would be there.

Just how fully the pursuit was organised - and indeed, just what its purpose might be - I could form no idea. There seemed to be unusual activity in the town, but I judged that the news of my escape from the Gilman had not yet spread. I would, of course, soon have to shift from Washington to some other southward street; for that party from the hotel would doubtless be after me. I must have left dust prints in that last old building, revealing how I had gained the street.

The open space was, as I had expected, strongly moonlit; and I saw the remains of a parklike, iron-railed green in its center. Fortunately no one was about though a curious sort of buzz or roar seemed to be increasing in the direction of Town Square. South Street was very wide, leading directly down a slight declivity to the waterfront and commanding
a long view out a sea; and I hoped that no one would be glancing up it from afar as I crossed in the bright moonlight.

My progress was unimpeded, and no fresh sound arose to hint that I had been spied. Glancing about me, I involuntarily let my pace slacken for a second to take in the sight of the sea, gorgeous in the burning moonlight at the street's end. Far out beyond the breakwater was the dim, dark line of Devil Reef, and as I glimpsed it I could not help thinking of all the hideous legends I had heard in the last twenty-four hours - legends which portrayed this ragged rock as a veritable gateway to realms of unfathomed horror and inconceivable abnormality.

Then, without warning, I saw the intermittent flashes of light on the distant reef. They were definite and unmistakable, and awaked in my mind a blind horror beyond all rational proportion. My muscles tightened for panic flight, held in only by a certain unconscious caution and half-hypnotic fascination. And to make matters worse, there now flashed forth from the lofty cupola of the Gilman House, which loomed up to the northeast behind me, a series of analogous though differently spaced gleams which could be nothingness than an answering signal.

Controlling my muscles, and realising afresh - how plainly visible I was, I resumed my brisker and feignedly shambling pace; though keeping my eyes on that hellish and ominous reef as long as the opening of South Street gave me a seaward view. What the whole proceeding meant, I could not imagine; unless it involved some strange rite connected with Devil Reef, or unless some party had landed from a ship on that sinister rock. I now bent to the left around the ruinous green; still gazing toward the ocean as it blazed in the spectral summer moonlight, and watching the cryptical flashing of those nameless, unexplainable beacons.

It was then that the most horrible impression of all was borne in upon me - the impression which destroyed my last vestige of self-control and sent me running frantically southward past the yawning black doorways and fishily staring windows of that deserted nightmare street. For at a closer glance I saw that the moonlit waters between the reef and the shore were far from empty. They were alive with a teeming horde of shapes swimming inward toward the town; and even at my vast distance and in my single moment of perception I could tell that the bobbing heads and flailing arms were alien and aberrant in a way scarcely to be expressed or consciously formulated.

My frantic running ceased before I had covered a block, for at my left I began to hear something like the hue and cry of organised pursuit. There were footsteps and gutteral sounds, and a rattling motor wheezed south along Federal Street. In a second all my plans were utterly changed - for if the southward highway were blocked ahead of me, I must clearly find another egress from Innsmouth. I paused and drew into a gaping doorway, reflecting how lucky I was to have left the moonlit open space before these pursuers came down the parallel street.

A second reflection was less comforting. Since the pursuit was down another street, it was plain that the party was not following me directly. It had not seen me, but was simply obeying a general plan of cutting off my escape. This, however, implied that all roads
leading out of Innsmouth were similarly patrolled; for the people could not have known what route I intended to take. If this were so, I would have to make my retreat across country away from any road; but how could I do that in view of the marshy and creek-riddled nature of all the surrounding region? For a moment my brain reeled - both from sheer hopelessness and from a rapid increase in the omnipresent fishy odour.

Then I thought of the abandoned railway to Rowley, whose solid line of ballasted; weed-grown earth still stretched off to the northwest from the crumbling station on the edge at the river-gorge. There was just a chance that the townsfolk would not think of that; since its briar-choked desertion made it half-impassable, and the unlikeliest of all avenues for a fugitive to choose. I had seen it clearly from my hotel window and knew about how it lay. Most of its earlier length was uncomfortably visible from the Rowley road, and from high places in the town itself; but one could perhaps crawl inconspicuously through the undergrowth. At any rate, it would form my only chance of deliverance, and there was nothing to do but try it.

Drawing inside the hall of my deserted shelter, I once more consulted the grocery boy's map with the aid of the flashlight. The immediate problem was how to reach the ancient railway; and I now saw that the safest course was ahead to Babson Street; then west to Lafayette - there edging around but not crossing an open space homologous to the one I had traversed - and subsequently back northward and westward in a zigzagging line through Lafayette, Bates, Adam, and Bank streets - the latter skirting the river gorge - to the abandoned and dilapidated station I had seen from my window. My reason for going ahead to Babson was that I wished neither to recross the earlier open space nor to begin my westward course along a cross street as broad as South.

Starting once more, I crossed the street to the right-hand side in order to edge around into Babeon as inconspicuously as possible. Noises still continued in Federal Street, and as I glanced behind me I thought I saw a gleam of light near the building through which I had escaped. Anxious to leave Washington Street, I broke into a quiet dogtrot, trusting to luck not to encounter any observing eye. Next the corner of Babson Street I saw to my alarm that one of the houses was still inhabited, as attested by curtains at the window; but there were no lights within, and I passed it without disaster.

In Babson Street, which crossed Federal and might thus reveal me to the searchers, I clung as closely as possible to the sagging, uneven buildings; twice pausing in a doorway as the noises behind me momentarily increased. The open space ahead shone wide and desolate under the moon, but my route would not force me to cross it. During my second pause I began to detect a fresh distribution of vague sounds; and upon looking cautiously out from cover beheld a motor car darting across the open space, bound outward along Eliot Street, which there intersects both Babson and Lafayette.

As I watched - choked by a sudden rise in the fishy odour after a short abatement - I saw a band of uncouth, crouching shapes loping and shambling in the same direction; and knew that this must be the party guarding the Ipswich road, since that highway forms an extension of Eliot Street. Two of the figures I glimpsed were in voluminous robes, and one wore a peaked diadem which glistened whitely in the moonlight. The gait of this
figure was so odd that it sent a chill through me - for it seemed to me the creature was almost hopping.

When the last of the band was out of sight I resumed my progress, darting around the corner into Lafayette Street, and crossing Eliot very hurriedly lest stragglers of the party be still advancing along that thoroughfare. I did hear some croaking and clattering sounds far off toward Town Square, but accomplished the passage without disaster. My greatest dread was in re-crossing broad and moonlit South Street - with its seaward view - and I had to nerve myself for the ordeal. Someone might easily be looking, and possible Eliot Street stragglers could not fail to glimpse me from either of two points. At the last moment I decided I had better slacken my trot and make the crossing as before in the shambling gait of an average Innsmouth native.

When the view of the water again opened out - this time on my right - I was half-determined not to look at it at all. I could not however, resist; but cast a sidelong glance as I carefully and imitatively shamboled toward the protecting shadows ahead. There was no ship visible, as I had half-expected there would be. Instead, the first thing which caught my eye was a small rowboat pulling in toward the abandoned wharves and laden with some bulky, tarpaulin-covered object. Its rowers, though distantly and indistinctly seen, were of an especially repellent aspect. Several swimmers were still discernible; while on the far black reef I could see a faint, steady glow unlike the winking beacon visible before, and of a curious colour which I could not precisely identify. Above the slant roofs ahead and to the right there loomed the tall cupola of the Gilman House, but it was completely dark. The fishy odour, dispelled for a moment by some merciful breeze, now closed in again with maddening intensity.

I had not quite crossed the street when I heard a muttering band advancing along Washington from the north. As they reached the broad open space where I had had my first disquieting glimpse of the moonlit water I could see them plainly only a block away - and was horrified by the bestial abnormality of their faces and the doglike sub-humanness of their crouching gait. One man moved in a positively simian way, with long arms frequently touching the ground; while another figure - robed and tiaraed - seemed to progress in an almost hopping fashion. I judged this party to be the one I had seen in the Gilman's courtyard - the one, therefore, most closely on my trail. As some of the figures turned to look in my direction I was transfixed with fright, yet managed to preserve the casual, shambling gait I had assumed. To this day I do not know whether they saw me or not. If they did, my stratagem must have deceived them, for they passed on across the moonlit space without varying their course - meanwhile croaking and jabbering in more hateful guttural patois I could not identify.

Once more in shadow, I resumed my former dog-trot past the leaning and decrepit houses that stared blankly into the night. Having crossed to the western sidewalk I rounded the nearest corner into Bates Street where I kept close to the buildings on the southern side. I passed two houses shewing signs of habitation, one of which had faint lights in upper rooms, yet met with no obstacle. As I turned into Adams Street I felt measurably safer, but received a shock when a man reeled out of a black doorway directly in front of me. He proved, however, too hopelessly drunk to be a menace; so that I reached the dismal ruins of the Bank Street warehouses in safety.
No one was fluting in that dead street beside the river-gorge, and the roar of the waterfalls quite drowned my footsteps. It was a long dog-trot to the ruined station, and the great brick warehouse walls around me seemed somehow more terrifying than the fronts of private houses. At last I saw the ancient arcaded station - or what was left of it - and made directly for the tracks that started from its farther end.

The rails were rusty but mainly intact, and not more than half the ties had rotted away. Walking or running on such a surface was very difficult; but I did my best, and on the whole made very fair time. For some distance the line kept on along the gorge's brink, but at length I reached the long covered bridge where it crossed the chasm at a dizzying height. The condition of this bridge would determine my next step. If humanly possible, I would use it; if not, I would have to risk more street wandering and take the nearest intact high-way bridge.

The vast, barnlike length of the old bridge gleamed spectrally in the moonlight, and I saw that the ties were safe for at least a few feet within. Entering, I began to use my flashlight, and was almost knocked down by the cloud of bats that flapped past me. About half-way across there was a perilous gap in the ties which I feared for a moment would halt me; but in the end I risked a desperate jump which fortunately succeeded.

I was glad to see the moonlight again when I emerged from that macabre tunnel. The old tracks crossed River Street at grade, and at once veered off into a region increasingly rural and with less and less of Innsmouth's abhorrent fishy odour. Here the dense growth of weeds and briers hindered me and cruelly tore at my clothes, but I was none the less glad that they were there to give me concealment in case of peril. I knew that much of my route must be visible from the Rowley road.

The marshy region began very abruptly, with the single track on a low, grassy embankment where the weedy growth was somewhat thinner. Then came a sort of island of higher ground, where the line passed through a shallow open cut choked with bushes and brambles. I was very glad of this partial shelter, since at this point the Rowley road was uncomfortably near according to my window view. At the end of the cut it would cross the track and swerve off to a safer distance; but meanwhile I must be exceedingly careful. I was by this time thankfully certain that the railway itself was not patrolled.

Just before entering the cut I glanced behind me, but saw no pursuer. The ancient spires and roofs of decaying Innsmouth gleamed lovely and ethereal in the magic yellow moonlight, and I thought of how they must have looked in the old days before the shadow fell. Then, as my gaze circled inland from the town, something less tranquil arrested my notice and held me immobile for a second.

What I saw - or fancied I saw - was a disturbing suggestion of undulant motion far to the south; a suggestion which made me conclude that a very large horde must be pouring out of the city along the level Ipswich road. The distance was great and I could distinguish nothing in detail; but I did not at all like the look of that moving column. It undulated too much, and glistened too brightly in the rays of the now westerling moon. There was a suggestion of sound, too, though the wind was blowing the other way - a suggestion of
bestial scraping and bellowing even worse than the muttering of the parties I had lately overheard.

All sorts of unpleasant conjectures crossed my mind. I thought of those very extreme Innsmouth types said to be hidden in crumbling, centuried warrens near the waterfront; I thought, too, of those nameless swimmers I had seen. Counting the parties so far glimpsed, as well as those presumably covering other roads, the number of my pursuers must be strangely large for a town as depopulated as Innsmouth.

Whence could come the dense personnel of such a column as I now beheld? Did those ancient, unplumbed warrens teem with a twisted, uncatalogued, and unsuspected life? Or had some unseen ship indeed landed a legion of unknown outsiders on that hellish reef? Who were they? Why were they here? And if such a column of them was scouring the Ipswich road, would the patrols on the other roads be likewise augmented?

I had entered the brush-grown cut and was struggling along at a very slow pace when that damnable fishy odour again waxed dominant. Had the wind suddenly changed eastward, so that it blew in from the sea and over the town? It must have, I concluded, since I now began to hear shocking guttural murmurs from that hitherto silent direction. There was another sound, too - a kind of wholesale, colossal flopping or pattering which somehow called up images of the most detestable sort. It made me think illogically of that unpleasantly undulating column on the far-off Ipswich road.

And then both stench and sounds grew stronger, so that I paused shivering and grateful for the cut's protection. It was here, I recalled, that the Rowley road drew so close to the old railway before crossing westward and diverging. Something was coming along that road, and. I must lie low till its passage and vanishment in the distance. Thank heaven these creatures employed no dogs for tracking - though perhaps that would have been impossible amidst the omnipresent regional odour. Crouched in the bushes of that sandy cleft I felt reasonably safe, even though I knew the searchers would have to cross the track in front of me not much more than a hundred yards away. I would be able to see them, but they could not, except by a malign miracle, see me.

All at once I began dreading to look at them as they passed. I saw the close moonlit space where they would surge by, and had curious thoughts about the irredeemable pollution of that space. They would perhaps be the worst of all Innsmouth types - something one would not care to remember.

The stench waxed overpowering, and the noises swelled to a bestial babel of croaking, baying and barking without the least suggestion of human speech. Were these indeed the voices of my pursuers? Did they have dogs after all? So far I had seen none of the lower animals in Innsmouth. That flopping or pattering was monstrous - I could not look upon the degenerate creatures responsible for it. I would keep my eyes shut till the sound receded toward the west. The horde was very close now - air foul with their hoarse snarlings, and the ground almost shaking with their alien-rhythmed footfalls. My breath nearly ceased to come, and I put every ounce of will-power into the task of holding my eyelids down.
I am not even yet willing to say whether what followed was a hideous actuality or only a nightmare hallucination. The later action of the government, after my frantic appeals, would tend to confirm it as a monstrous truth; but could not an hallucination have been repeated under the quasi-hypnotic spell of that ancient, haunted, and shadowed town? Such places have strange properties, and the legacy of insane legend might well have acted on more than one human imagination amidst those dead, stench-cursed streets and huddles of rotting roofs and crumbling steeples. Is it not possible that the germ of an actual contagious madness lurks in the depths of that shadow over Innsmouth? Who can be sure of reality after hearing things like the tale of old Zadok Allen? The government men never found poor Zadok, and have no conjectures to make as to what became of him. Where does madness leave off and reality begin? Is it possible that even my latest fear is sheer delusion?

But I must try to tell what I thought I saw that night under the mocking yellow moon - saw surging and hopping down the Rowley road in plain sight in front of me as I crouched among the wild brambles of that desolate railway cut. Of course my resolution to keep my eyes shut had failed. It was foredoomed to failure - for who could crouch blindly while a legion of croaking, baying entities of unknown source flopped noisomely past, scarcely more than a hundred yards away?

I thought I was prepared for the worst, and I really ought to have been prepared considering what I had seen before.

My other pursuers had been accursedly abnormal - so should I not have been ready to face a strengthening of the abnormal element; to look upon forms in which there was no mixture of the normal at all? I did not open my eyes until the raucous clamour came loudly from a point obviously straight ahead. Then I knew that a long section of them must be plainly in sight where the sides of the cut flattened Girt and the road crossed the track - and I could no longer keep myself from sampling whatever honor that leering yellow moon might have to shew.

It was the end, for whatever remains to me of life on the surface of this earth, of every vestige of mental peace and confidence in the integrity of nature and of the human mind. Nothing that I could have imagined - nothing, even, that I could have gathered had I credited old Zadok's crazy tale in the most literal way - would be in any way comparable to the demoniac, blasphemous reality that I saw - or believe I saw. I have tied to hint what it was in order to postpone the horror of writing it down baldly. Can it be possible that dim planet has actually spawned such things; that human eyes have truly seen, as objective flesh, what man has hitherto known only in febrile phantasy and tenuous legend?

And yet I saw them in a limitless stream - flopping, hopping, croaking, bleating - urging inhumanly through the spectral moonlight in a grotesque, malignant saraband of fantastic nightmare. And some of them had tall tiaras of that nameless whitish-gold metal . . . and some were strangely robed . . . and one, who led the way, was clad in a ghoulishly humped black coat and striped trousers, and had a man's felt hat perched on the shapeless thing that answered for a head.
I think their predominant colour was a greyish-green, though they had white bellies. They were mostly shiny and slippery, but the ridges of their backs were scaly. Their forms vaguely suggested the anthropoid, while their heads were the heads of fish, with prodigious bulging eyes that never closed. At the sides of their necks were palpitating gills, and their long paws were webbed. They hopped irregularly, sometimes on two legs and sometimes on four. I was somehow glad that they had no more than four limbs. Their croaking, baying voices, clearly wed to articulate speech, held all the dark shades of expression which their staring faces lacked.

But for all of their monstrousness they were not unfamiliar to me. I knew too well what they must be - for was not the memory of the evil tiara at Newburyport still fresh? They were the blasphemous fish-frogs of the nameless design - living and horrible - and as I saw them I knew also of what that humped, tiaraed priest in the black church basement had fearfully reminded me. Their number was past guessing. It seemed to me that there were limitless swarms of them and certainly my momentary glimpse could have shewn only the least fraction. In another instant everything was blotted out by a merciful fit of fainting; the first I had ever had.

It was a gentle daylight rain that awaked me front my stupor in the brush-grown railway cut, and when I staggered out to the roadway ahead I saw no trace of any prints in the fresh mud. The fishy odour, too, was gone, Innsmouth's ruined roofs and toppling steeples loomed up greyly toward the southeast, but not a living creature did I spy in all the desolate salt marshes around. My watch was still going, and told me that the hour was past noon.

The reality of what I had been through was highly uncertain in my mind, but I felt that something hideous lay in the background. I must get away from evil-shadowed Innsmouth - and accordingly I began to test my cramped, wearied powers of locomotion. Despite weakness hunger, horror, and bewilderment I found myself after a time able to walk; so started slowly along the muddy road to Rowley. Before evening I was in village, getting a meal and providing myself with presentable cloths. I caught the night train to Arkham, and the next day talked long and earnestly with government officials there; a process I later repeated in Boston. With the main result of these colloquies the public is now familiar - and I wish, for normality's sake, there were nothing more to tell. Perhaps it is madness that is overtaking me - yet perhaps a greater horror - or a greater marvel - is reaching out.

As may well be imagined, I gave up most of the forplanned features of the rest of my tour - the scenic, architectural, and antiquarian diversions on which I had counted so heavily. Nor did I dare look for that piece of strange jewelry said to be in the Miskatonic University Museum. I did, however, improve my stay in Arkham by collecting some genealogical notes I had long wished to possess; very rough and hasty data, it is true, but capable of good use later no when I might have time to collate and codify them. The curator of the historical society there - Mr. B. Lapham Peabody - was very courteous about assisting me, and expressed unusual interest when I told him I was a grandson of
Eliza Orne of Arkham, who was born in 1867 and had married James Williamson of Ohio at the age of seventeen.

It seemed that a material uncle of mine had been there many years before on a quest much like my own; and that my grandmother's family was a topic of some local curiosity. There had, Mr. Peabody said, been considerable discussion about the marriage of her father, Benjamin Orne, just after the Civil War; since the ancestry of the bride was peculiarly puzzling. That bride was understood to have been an orphaned Marsh of New Hampshire - a cousin of the Essex County Marshes - but her education had been in France and she knew very little of her family. A guardian had deposited funds in a Boston bank to maintain her and her French governess; but that guardian's name was unfamiliar to Arkham people, and in time he dropped out of sight, so that the governess assumed the role by court appointment. The Frenchwoman - now long dead - was very taciturn, and there were those who said she would have told more than she did.

But the most baffling thing was the inability of anyone to place the recorded parents of the young woman - Enoch and Lydia (Meserve) Marsh - among the known families of New Hampshire. Possibly, many suggested, she was the natural daughter of some Marsh of prominence - she certainly had the true Marsh eyes. Most of the puzzling was done after her early death, which took place at the birth of my grandmother - her only child. Having formed some disagreeable impressions connected with the name of Marsh, I did not welcome the news that it belonged on my own ancestral tree; nor was I pleased by Mr. Peabody's suggestion that I had the true Marsh eyes myself. However, I was grateful for data which I knew would prove valuable; and took copious notes and lists of book references regarding the well-documented Orne family.

I went directly home to Toledo from Boston, and later spent a month at Maumee recuperating from my ordeal. In September I entered Oberlin for my final year, and from then till the next June was busy with studies and other wholesome activities - reminded of the bygone terror only by occasional official visits from government men in connexion with the campaign which my pleas and evidence had started. Around the middle of July - just a year after the Innsmouth experience - I spent a week with my late mother's family in Cleveland; checking some of my new genealogical data with the various notes, traditions, and bits of heirloom material in existence there, and seeing what kind of a connected chart I could construct.

I did not exactly relish this task, for the atmosphere of the Williamson home had always depressed me. There was a strain of morbidity there, and my mother had never encouraged my visiting her parents as a child, although she always welcomed her father when he came to Toledo. My Arkham-born grandmother had seemed strange and almost terrifying to me, and I do not think I grieved when she disappeared. I was eight years old then, and it was said that she had wandered off in grief after the suicide of my Uncle Douglas, her eldest son. He had shot himself after a trip to New England - the same trip, no doubt, which had caused him to be recalled at the Arkham Historical Society.

This uncle had resembled her, and I had never liked him either. Something about the staring, unwinking expression of both of them had given me a vague, unaccountable uneasiness. My mother and Uncle Walter had not looked like that. They were like their
father, though poor little cousin Lawrence - Walter's son - had been almost perfect
duplicate of his grandmother before his condition took him to the permanent seclusion of
a sanitarium at Canton. I had not seen him in four years, but my uncle once implied that
his state, both mental and physical, was very bad. This worry had probably been a major
cause of his mother's death two years before.

My grandfather and his widowed son Walter now comprised the Cleveland household,
but the memory of older times hung thickly over it. I still disliked the place, and tried to
get my researches done as quickly as possible. Williamson records and traditions were
supplied in abundance by my grandfather; though for Orne material I had to depend on
my uncle Walter, who put at my disposal the contents of all his files, including notes,
letters, cuttings, heirlooms, photographs, and miniatures.

It was in going over the letters and pictures on the Orne side that I began to acquire a
kind of terror of my own ancestry. As I have said, my grandmother and Uncle Douglas
had always disturbed me. Now, years after their passing, I gazed at their pictured faces
with a measurably heightened feeling of repulsion and alienation. I could not at first
understand the change, but gradually a horrible sort of comparison began to obtrude itself
on my unconscious mind despite the steady refusal of my consciousness to admit even
the least suspicion of it. It was clear that the typical expression of these faces now
suggested something it had not suggested before - something which would bring stark
panic if too openly thought of.

But the worst shock came when my uncle shewed me the Orne jewellery in a downtown
safe deposit vault. Some of the items were delicate and inspiring enough, but there was
one box of strange old pieces descended from my mysterious great-grandmother which
my uncle was almost reluctant to produce. They were, he said, of very grotesque and
almost repulsive design, and had never to his knowledge been publicly worn; though my
grandmother used to enjoy looking at them. Vague legends of bad luck clustered around
them, and my great-grandmother's French governess had said they ought not to be worn
in New England, though it would be quite safe to wear them in Europe.

As my uncle began slowly and grudgingly to unwrap the things he urged me not to be
shocked by the strangeness and frequent hideousness of the designs. Artists and
archaeologists who had seen them pronounced their workmanship superlatively and
exotically exquisite, though no one seemed able to define their exact material or assign
them to any specific art tradition. There were two armlets, a tiara, and a kind of pectoral;
the latter having in high relief certain figures of almost unbearable extravagance.

During this description I had kept a tight rein on my emotions, but my face must have
betrayed my mounting fears. My uncle looked concerned, and paused in his unwrapping
to study my countenance. I motioned to him to continue, which he did with renewed
signs of reluctance. He seemed to expect some demonstration when the first piece - the
tiara - became visible, but I doubt if he expected quite what actually happened. I did not
expect it, either, for I thought I was thoroughly forewarned regarding what the jewellery
would turn out to be. What I did was to faint silently away, just as I had done in that brier
choked railway cut a year before.
From that day on my life has been a nightmare of brooding and apprehension nor do I know how much is hideous truth and how much madness. My great-grandmother had been a Marsh of unknown source whose husband lived in Arkham - and did not old Zadok say that the daughter of Obed Marsh by a monstrous mother was married to an Arkham man through trick? What was it the ancient toper had muttered about the line of my eyes to Captain Obed's? In Arkham, too, the curator had told me I had the true Marsh eyes. Was Obed Marsh my own great-great-grandfather? Who - or what - then, was my great-great-grandmother? But perhaps this was all madness. Those whitish-gold ornaments might easily have been bought from some Innsmouth sailor by the father of my great-grand-mother, whoever he was. And that look in the staring-eyed faces of my grandmother and self-slain uncle might be sheer fancy on my part - sheer fancy, bolstered up by the Innsmouth shadow which had so darkly coloured my imagination. But why had my uncle killed himself after an ancestral quest in New England?

For more than two years I fought off these reflections with partial success. My father secured me a place in an insurance office, and I buried myself in routine as deeply as possible. In the winter of 1930-31, however, the dreams began. They were very sparse and insidious at first, but increased in frequency and vividness as the weeks went by. Great watery spaces opened out before me, and I seemed to wander through titanic sunken porticos and labyrinths of weedy cyclopean walls with grotesque fishes as my companions. Then the other shapes began to appear, filling me with nameless horror the moment I awoke. But during the dreams they did not horrify me at all - I was one with them; wearing their unhuman trappings, treading their aqueous ways, and praying monstrously at their evil sea-bottom temples.

There was much more than I could remember, but even what I did remember each morning would be enough to stamp me as a madman or a genius if ever I dared write it down. Some frightful influence, I felt, was seeking gradually to drag me out of the sane world of wholesome life into up namable abysses of blackness and alienage; and the process told heavily on me. My health and appearance grew steadily worse, till finally I was forced to give up my position and adopt the static, secluded life of an invalid. Some odd nervous affliction had me in its grip, and I found myself at times almost unable to shut my eyes.

It was then that I began to study the mirror with mounting alarm. The slow ravages of disease are not pleasant to watch, but in my case there was something subtler and more puzzling in the background. My father seemed to notice it, too, for he began looking at me curiously and almost affrightedly. What was taking place in me? Could it be that I was coming to resemble my grandmother and uncle Douglas?

One night I had a frightful dream in which I met my grandmother under the sea. She lived in a phosphorescent palace of many terraces, with gardens of strange leprous corals and grotesque brachiate efflorescences, and welcomed me with a warmth that may have been sardonic. She had changed - as those who take to the water change - and told me she had never died. Instead, she had gone to a spot her dead son had learned about, and had leaped to a realm whose wonders - destined for him as well - he had spurned with a smoking pistol. This was to be my realm, too - I could not escape it. I would never die, but would live with those who had lived since before man ever walked the earth.
I met also that which had been her grandmother. For eighty thousand years Pth'hya-l'yi had lived in Y'ha-nthlei, and thither she had gone back after Obed Marsh was dead. Y'ha-nthlei was not destroyed when the upper-earth men shot death into the sea. It was hurt, but not destroyed. The Deep Ones could never be destroyed, even though the palaeogean magic of the forgotten Old Ones might sometimes check them. For the present they would rest; but some day, if they remembered, they would rise again for the tribute Great Cthulhu craved. It would be a city greater than Innsmouth next time. They had planned to spread, and had brought up that which would help them, but now they must wait once more. For bringing the upper-earth men's death I must do a penance, but that would not be heavy. This was the dream in which I saw a shoggoth for the first time, and the sight set me awake in a frenzy of screaming. That morning the mirror definitely told me I had acquired the Innsmouth look.

So far I have not shot myself as my uncle Douglas did. I bought an automatic and almost took the step, but certain dreams deterred me. The tense extremes of horror are lessening, and I feel queerly drawn toward the unknown sea-deeps instead of fearing them. I hear and do strange things in sleep, and awake with a kind of exaltation instead of terror. I do not believe I need to wait for the full change as most have waited. If I did, my father would probably shut me up in a sanitarium as my poor little cousin is shut up. Stupendous and unheard-of splendors await me below, and I shall seek them soon. Ia-R'lyehl Cihuiha flgagnl id Ia! No, I shall not shoot myself - I cannot be made to shoot myself!

I shall plan my cousin's escape from that Canton mad-house, and together we shall go to marvel-shadowed Innsmouth. We shall swim out to that brooding reef in the sea and dive down through black abysses to Cyclopean and many-columned Y'ha-nthlei, and in that lair of the Deep Ones we shall dwell amidst wonder and glory for ever.
The Whisperer in Darkness

I

Bear in mind closely that I did not see any actual visual horror at the end. To say that a mental shock was the cause of what I inferred - that last straw which sent me racing out of the lonely Akeley farmhouse and through the wild domed hills of Vermont in a commandeered motor at night - is to ignore the plainest facts of my final experience. Notwithstanding the deep things I saw and heard, and the admitted vividness the impression produced on me by these things, I cannot prove even now whether I was right or wrong in my hideous inference. For after all Akeley's disappearance establishes nothing. People found nothing amiss in his house despite the bullet-marks on the outside and inside. It was just as though he had walked out casually for a ramble in the hills and failed to return. There was not even a sign that a guest had been there, or that those horrible cylinders and machines had been stored in the study. That he had mortally feared the crowded green hills and endless trickle of brooks among which he had been born and reared, means nothing at all, either; for thousands are subject to just such morbid fears. Eccentricity, moreover, could easily account for his strange acts and apprehensions toward the last.

The whole matter began, so far as I am concerned, with the historic and unprecedented Vermont floods of November 3, 1927. I was then, as now, an instructor of literature at Miskatonic University in Arkham, Massachusetts, and an enthusiastic amateur student of New England folklore. Shortly after the flood, amidst the varied reports of hardship, suffering, and organized relief which filled the press, there appeared certain odd stories of things found floating in some of the swollen rivers; so that many of my friends embarked on curious discussions and appealed to me to shed what light I could on the subject. I felt flattered at having my folklore study taken so seriously, and did what I could to belittle the wild, vague tales which seemed so clearly an outgrowth of old rustic superstitions. It amused me to find several persons of education who insisted that some stratum of obscure, distorted fact might underlie the rumors.

The tales thus brought to my notice came mostly through newspaper cuttings; though one yarn had an oral source and was repeated to a friend of mine in a letter from his mother in Hardwick, Vermont. The type of thing described was essentially the same in all cases, though there seemed to be three separate instances involved - one connected with the Winooski River near Montpelier, another attached to the West River in Windham County beyond Newfane, and a third centering in the Passumpsic in Caledonia County above Lyndonville. Of course many of the stray items mentioned other instances, but on analysis they all seemed to boil down to these three. In each case country folk reported seeing one or more very bizarre and disturbing objects in the surging waters that poured
down from the unfrequented hills, and there was a widespread tendency to connect these sights with a primitive, half-forgotten cycle of whispered legend which old people resurrected for the occasion.

What people thought they saw were organic shapes not quite like any they had ever seen before. Naturally, there were many human bodies washed along by the streams in that tragic period; but those who described these strange shapes felt quite sure that they were not human, despite some superficial resemblances in size and general outline. Nor, said the witnesses, could they have been any kind of animal known to Vermont. They were pinkish things about five feet long; with crustaceous bodies bearing vast pairs of dorsal fins or membranous wings and several sets of articulated limbs, and with a sort of convoluted ellipsoid, covered with multitudes of very short antennae, where a head would ordinarily be. It was really remarkable how closely the reports from different sources tended to coincide; though the wonder was lessened by the fact that the old legends, shared at one time throughout the hill country, furnished a morbidly vivid picture which might well have coloured the imaginations of all the witnesses concerned. It was my conclusion that such witnesses - in every case naive and simple backwoods folk - had glimpsed the battered and bloated bodies of human beings or farm animals in the whirling currents; and had allowed the half-remembered folklore to invest these pitiful objects with fantastic attributes.

The ancient folklore, while cloudy, evasive, and largely forgotten by the present generation, was of a highly singular character, and obviously reflected the influence of still earlier Indian tales. I knew it well, though I had never been in Vermont, through the exceedingly rare monograph of Eli Davenport, which embraces material orally obtained prior to 1839 among the oldest people of the state. This material, moreover, closely coincided with tales which I had personally heard from elderly rustics in the mountains of New Hampshire. Briefly summarized, it hinted at a hidden race of monstrous beings which lurked somewhere among the remoter hills - in the deep woods of the highest peaks, and the dark valleys where streams trickle from unknown sources. These beings were seldom glimpsed, but evidences of their presence were reported by those who had ventured farther than usual up the slopes of certain mountains or into certain deep, steep-sided gorges that even the wolves shunned.

There were queer footprints or claw-prints in the mud of brook-margins and barren patches, and curious circles of stones, with the grass around them worn away, which did not seem to have been placed or entirely shaped by Nature. There were, too, certain caves of problematical depth in the sides of the hills; with mouths closed by boulders in a manner scarcely accidental, and with more than an average quota of the queer prints leading both toward and away from them - if indeed the direction of these prints could be justly estimated. And worst of all, there were the things which adventurous people had seen very rarely in the twilight of the remotest valleys and the dense perpendicular woods above the limits of normal hill-climbing.

It would have been less uncomfortable if the stray accounts of these things had not agreed so well. As it was, nearly all the rumors had several points in common; averring that the creatures were a sort of huge, light-red crab with many pairs of legs and with two great batlike wings in the middle of the back. They sometimes walked on all their legs, and
sometimes on the hindmost pair only, using the others to convey large objects of indeterminate nature. On one occasion they were spied in considerable numbers, a detachment of them wading along a shallow woodland watercourse three abreast in evidently disciplined formation. Once a specimen was seen flying - launching itself from the top of a bald, lonely hill at night and vanishing in the sky after its great flapping wings had been silhouetted an instant against the full moon.

These things seemed content, on the whole, to let mankind alone; though they were at times held responsible for the disappearance of venturesome individuals - especially persons who built houses too close to certain valleys or too high up on certain mountains. Many localities came to be known as inadvisable to settle in, the feeling persisting long after the cause was forgotten. People would look up at some of the neighbouring mountain-precipices with a shudder, even when not recalling how many settlers had been lost, and how many farmhouses burnt to ashes, on the lower slopes of those grim, green sentinels.

But while according to the earliest legends the creatures would appear to have harmed only those trespassing on their privacy; there were later accounts of their curiosity respecting men, and of their attempts to establish secret outposts in the human world. There were tales of the queer claw-prints seen around farmhouse windows in the morning, and of occasional disappearances in regions outside the obviously haunted areas. Tales, besides, of buzzing voices in imitation of human speech which made surprising offers to lone travelers on roads and cart-paths in the deep woods, and of children frightened out of their wits by things seen or heard where the primal forest pressed close upon their door-yards. In the final layer of legends - the layer just preceding the decline of superstition and the abandonment of close contact with the dreaded places - there are shocked references to hermits and remote farmers who at some period of life appeared to have undergone a repellent mental change, and who were shunned and whispered about as mortals who had sold themselves to the strange beings. In one of the northeastern counties it seemed to be a fashion about 1800 to accuse eccentric and unpopular recluses of being allies or representatives of the abhorred things.

As to what the things were - explanations naturally varied. The common name applied to them was "those ones," or "the old ones," though other terms had a local and transient use. Perhaps the bulk of the Puritan settlers set them down bluntly as familiars of the devil, and made them a basis of awed theological speculation. Those with Celtic legendry in their heritage - mainly the Scotch-Irish element of New Hampshire, and their kindred who had settled in Vermont on Governor Wentworth's colonial grants - linked them vaguely with the malign fairies and "little people" of the bogs and raths, and protected themselves with scraps of incantation handed down through many generations. But the Indians had the most fantastic theories of all. While different tribal legends differed, there was a marked consensus of belief in certain vital particulars; it being unanimously agreed that the creatures were not native to this earth.

The Pennacook myths, which were the most consistent and picturesque, taught that the Winged Ones came from the Great Bear in the sky, and had mines in our earthly hills whence they took a kind of stone they could not get on any other world. They did not live here, said the myths, but merely maintained outposts and flew back with vast cargoes of
stone to their own stars in the north. They harmed only those earth-people who got too near them or spied upon them. Animals shunned them through instinctive hatred, not because of being hunted. They could not eat the things and animals of earth, but brought their own food from the stars. It was bad to get near them, and sometimes young hunters who went into their hills never came back. It was not good, either, to listen to what they whispered at night in the forest with voices like a bee's that tried to be like the voices of men. They knew the speech of all kinds of men - Pennacooks, Hurons, men of the Five Nations - but did not seem to have or need any speech of their own. They talked with their heads, which changed colour in different ways to mean different things.

All the legendry, of course, white and Indian alike, died down during the nineteenth century, except for occasional atavistical flareups. The ways of the Vermonters became settled; and once their habitual paths and dwellings were established according to a certain fixed plan, they remembered less and less what fears and avoidances had determined that plan, and even that there had been any fears or avoidances. Most people simply knew that certain hilly regions were considered as highly unhealthy, unprofitable, and generally unlucky to live in, and that the farther one kept from them the better off one usually was. In time the ruts of custom and economic interest became so deeply cut in approved places that there was no longer any reason for going outside them, and the haunted hills were left deserted by accident rather than by design. Save during infrequent local scares, only wonder-loving grandmothers and retrospective nonagenarians ever whispered of beings dwelling in those hills; and even such whispers admitted that there was not much to fear from those things now that they were used to the presence of houses and settlements, and now that human beings let their chosen territory severely alone.

All this I had long known from my reading, and from certain folk tales picked up in New Hampshire; hence when the flood-time rumours began to appear, I could easily guess what imaginative background had evolved them. I took great pains to explain this to my friends, and was correspondingly amused when several contentious souls continued to insist on a possible element of truth in the reports. Such persons tried to point out that the early legends had a significant persistence and uniformity, and that the virtually unexplored nature of the Vermont hills made it unwise to be dogmatic about what might or might not dwell among them; nor could they be silenced by my assurance that all the myths were of a well-known pattern common to most of mankind and determined by early phases of imaginative experience which always produced the same type of delusion.

It was of no use to demonstrate to such opponents that the Vermont myths differed but little in essence from those universal legends of natural personification which filled the ancient world with fauns and dryads and satyrs, suggested the kallikanzarai of modern Greece, and gave to wild Wales and Ireland their dark hints of strange, small, and terrible hidden races of troglodytes and burrowers. No use, either, to point out the even more startlingly similar belief of the Nepalese hill tribes in the dreaded Mi-Go or "Abominable Snow-Men" who lurk hideously amidst the ice and rock pinnacles of the Himalayan summits. When I brought up this evidence, my opponents turned it against me by claiming that it must imply some actual historicity for the ancient tales; that it must argue the real existence of some queer elder earth-race, driven to hiding after the advent and
dominance of mankind, which might very conceivably have survived in reduced numbers to relatively recent times - or even to the present.

The more I laughed at such theories, the more these stubborn friends asseverated them; adding that even without the heritage of legend the recent reports were too clear, consistent, detailed, and sanely prosaic in manner of telling, to be completely ignored. Two or three fanatical extremists went so far as to hint at possible meanings in the ancient Indian tales which gave the hidden beings a nonterrestrial origin; citing the extravagant books of Charles Fort with their claims that voyagers from other worlds and outer space have often visited the earth. Most of my foes, however, were merely romanticists who insisted on trying to transfer to real life the fantastic lore of lurking "little people" made popular by the magnificent horror-fiction of Arthur Machen.

II

As was only natural under the circumstances, this piquant debating finally got into print in the form of letters to the *Arkham Advertiser*; some of which were copied in the press of those Vermont regions whence the flood-stories came. The *Rutland Herald* gave half a page of extracts from the letters on both sides, while the *Brattleboro Reformer* reprinted one of my long historical and mythological summaries in full, with some accompanying comments in "The Pendrifter's" thoughtful column which supported and applauded my skeptical conclusions. By the spring of 1928 I was almost a well-known figure in Vermont, notwithstanding the fact that I had never set foot in the state. Then came the challenging letters from Henry Akeley which impressed me so profoundly, and which took me for the first and last time to that fascinating realm of crowded green precipices and muttering forest streams.

Most of what I know of Henry Wentworth Akeley was gathered by correspondence with his neighbours, and with his only son in California, after my experience in his lonely farmhouse. He was, I discovered, the last representative on his home soil of a long, locally distinguished line of jurists, administrators, and gentlemen-agriculturists. In him, however, the family mentally had veered away from practical affairs to pure scholarship; so that he had been a notable student of mathematics, astronomy, biology, anthropology, and folklore at the University of Vermont. I had never previously heard of him, and he did not give many autobiographical details in his communications; but from the first I saw he was a man of character, education, and intelligence, albeit a recluse with very little worldly sophistication.

Despite the incredible nature of what he claimed, I could not help at once taking Akeley more seriously than I had taken any of the other challengers of my views. For one thing, he was really close to the actual phenomena - visible and tangible - that he speculated so grotesquely about; and for another thing, he was amazingly willing to leave his conclusions in a tentative state like a true man of science. He had no personal preferences to advance, and was always guided by what he took to be solid evidence. Of course I began by considering him mistaken, but gave him credit for being intelligently mistaken; and at no time did I emulate some of his friends in attributing his ideas, and his fear of the lonely green hills, to insanity. I could see that there was a great deal to the man, and knew that what he reported must surely come from strange circumstance deserving
investigation, however little it might have to do with the fantastic causes he assigned. Later on I received from him certain material proofs which placed the matter on a somewhat different and bewilderingly bizarre basis.

I cannot do better than transcribe in full, so far as is possible, the long letter in which Akeley introduced himself, and which formed such an important landmark in my own intellectual history. It is no longer in my possession, but my memory holds almost every word of its portentous message; and again I affirm my confidence in the sanity of the man who wrote it. Here is the text - a text which reached me in the cramped, archaic-looking scrawl of one who had obviously not mingled much with the world during his sedate, scholarly life.

R.F.D. #2,
Townshend, Windham Co., Vermont.
May 5, 1928

Albert N. Wilmarth, Esq.,
118 Saltonstall St.,
Arkham, Mass.

My Dear Sir:

I have read with great interest the Brattleboro Reformer's reprint (Apr. 23, '28) of your letter on the recent stories of strange bodies seen floating in our flooded streams last fall, and on the curious folklore they so well agree with. It is easy to see why an outlander would take the position you take, and even why "Pendrifter" agrees with you. That is the attitude generally taken by educated persons both in and out of Vermont, and was my own attitude as a young man (I am now 57) before my studies, both general and in Davenport's book, led me to do some exploring in parts of the hills hereabouts not usually visited.

I was directed toward such studies by the queer old tales I used to hear from elderly farmers of the more ignorant sort, but now I wish I had let the whole matter alone. I might say, with all proper modesty, that the subject of anthropology and folklore is by no means strange to me. I took a good deal of it at college, and am familiar with most of the standard authorities such as Tylor, Lubbock, Frazer, Quatrefages, Murray, Osborn, Keith, Boule, G. Elliott Smith, and so on. It is no news to me that tales of hidden races are as old as all mankind. I have seen the reprints of letters from you, and those agreeing with you, in the Rutland Herald, and guess I know about where your controversy stands at the present time.

What I desire to say now is, that I am afraid your adversaries are nearer right than yourself, even though all reason seems to be on your side. They are nearer right than they realise themselves - for of course they go only by theory, and cannot know what I know. If I knew as little of the matter
as they, I would feel justified in believing as they do. I would be wholly on your side.

You can see that I am having a hard time getting to the point, probably because I really dread getting to the point; but the upshot of the matter is that I have certain evidence that monstrous things do indeed live in the woods on the high hills which nobody visits. I have not seen any of the things floating in the rivers, as reported, but I have seen things like them under circumstances I dread to repeat. I have seen footprints, and of late have seen them nearer my own home (I live in the old Akeley place south of Townshend Village, on the side of Dark Mountain) than I dare tell you now. And I have overheard voices in the woods at certain points that I will not even begin to describe on paper.

At one place I heard them so much that I took a phonograph therewith a dictaphone attachment and wax blank - and I shall try to arrange to have you hear the record I got. I have run it on the machine for some of the old people up here, and one of the voices had nearly scared them paralysed by reason of its likeness to a certain voice (that buzzing voice in the woods which Davenport mentions) that their grandmothers have told about and mimicked for them. I know what most people think of a man who tells about "hearing voices" - but before you draw conclusions just listen to this record and ask some of the older backwoods people what they think of it. If you can account for it normally, very well; but there must be something behind it. Ex nihilo nihil fit, you know.

Now my object in writing you is not to start an argument but to give you information which I think a man of your tastes will find deeply interesting. This is private. Publicly I am on your side, for certain things show me that it does not do for people to know too much about these matters. My own studies are now wholly private, and I would not think of saying anything to attract people's attention and cause them to visit the places I have explored. It is true - terribly true - that there are non-human creatures watching us all the time; with spies among us gathering information. It is from a wretched man who, if he was sane (as I think he was) was one of those spies, that I got a large part of my clues to the matter. He later killed himself, but I have reason to think there are others now.

The things come from another planet, being able to live in interstellar space and fly through it on clumsy, powerful wings which have a way of resisting the aether but which are too poor at steering to be of much use in helping them about on earth. I will tell you about this later if you do not dismiss me at once as a madman. They come here to get metals from mines that go deep under the hills, and I think I know where they come from. They will not hurt us if we let them alone, but no one can say what will happen if we get too curious about them. Of course a good army of men could wipe out their mining colony. That is what they are afraid of. But if that happened, more would come from outside - any number of
them. They could easily conquer the earth, but have not tried so far because they have not needed to. They would rather leave things as they are to save bother.

I think they mean to get rid of me because of what I have discovered. There is a great black stone with unknown hieroglyphics half worn away which I found in the woods on Round Hill, east of here; and after I took it home everything became different. If they think I suspect too much they will either kill me or take me off the earth to where they come from. They like to take away men of learning once in a while, to keep informed on the state of things in the human world.

This leads me to my secondary purpose in addressing you - namely, to urge you to hush up the present debate rather than give it more publicity. People must be kept away from these hills, and in order to effect this, their curiosity ought not to be aroused any further. Heaven knows there is peril enough anyway, with promoters and real estate men flooding Vermont with herds of summer people to overrun the wild places and cover the hills with cheap bungalows.

I shall welcome further communication with you, and shall try to send you that phonograph record and black stone (which is so worn that photographs don't show much) by express if you are willing. I say "try" because I think those creatures have a way of tampering with things around here. There is a sullen furtive fellow named Brown, on a farm near the village, who I think is their spy. Little by little they are trying to cut me off from our world because I know too much about their world.

They have the most amazing way of finding out what I do. You may not even get this letter. I think I shall have to leave this part of the country and go live with my son in San Diego, Cal., if things get any worse, but it is not easy to give up the place you were born in, and where your family has lived for six generations. Also, I would hardly dare sell this house to anybody now that the creatures have taken notice of it. They seem to be trying to get the black stone back and destroy the phonograph record, but I shall not let them if I can help it. My great police dogs always hold them back, for there are very few here as yet, and they are clumsy in getting about. As I have said, their wings are not much use for short flights on earth. I am on the very brink of deciphering that stone - in a very terrible way - and with your knowledge of folklore you may be able to supply the missing links enough to help me. I suppose you know all about the fearful myths antedating the coming of man to the earth - the Yog-Sothoth and Cthulhu cycles - which are hinted at in the Necronomicon. I had access to a copy of that once, and hear that you have one in your college library under lock and key.

To conclude, Mr. Wilmarth, I think that with our respective studies we can be very useful to each other. I don't wish to put you in any peril, and
suppose I ought to warn you that possession of the stone and the record won't be very safe; but I think you will find any risks worth running for the sake of knowledge. I will drive down to Newfane or Brattleboro to send whatever you authorize me to send, for the express offices there are more to be trusted. I might say that I live quite alone now, since I can't keep hired help any more. They won't stay because of the things that try to get near the house at night, and that keep the dogs barking continually. I am glad I didn't get as deep as this into the business while my wife was alive, for it would have driven her mad.

Hoping that I am not bothering you unduly, and that you will decide to get in touch with me rather than throw this letter into the waste basket as a madman's raving, I am

Yrs. very truly,
Henry W. Akeley

P.S. I am making some extra prints of certain photographs taken by me, which I think will help to prove a number of the points I have touched on. The old people think they are monstrously true. I shall send you these very soon if you are interested.

H. W. A.

It would be difficult to describe my sentiments upon reading this strange document for the first time. By all ordinary rules, I ought to have laughed more loudly at these extravagances than at the far milder theories which had previously moved me to mirth; yet something in the tone of the letter made me take it with paradoxical seriousness. Not that I believed for a moment in the hidden race from the stars which my correspondent spoke of; but that, after some grave preliminary doubts, I grew to feel oddly sure of his sanity and sincerity, and of his confrontation by some genuine though singular and abnormal phenomenon which he could not explain except in this imaginative way. It could not be as he thought it, I reflected, yet on the other hand, it could not be otherwise than worthy of investigation. The man seemed unduly excited and alarmed about something, but it was hard to think that all cause was lacking. He was so specific and logical in certain ways - and after all, his yarn did fit in so perplexingly well with some of the old myths - even the wildest Indian legends.

That he had really overheard disturbing voices in the hills, and had really found the black stone he spoke about, was wholly possible despite the crazy inferences he had made - inferences probably suggested by the man who had claimed to be a spy of the outer beings and had later killed himself. It was easy to deduce that this man must have been wholly insane, but that he probably had a streak of perverse outward logic which made the naive Akeley - already prepared for such things by his folklore studies - believe his tale. As for the latest developments - it appeared from his inability to keep hired help that Akeley's humbler rustic neighbours were as convinced as he that his house was besieged by uncanny things at night. The dogs really barked, too.
And then the matter of that phonograph record, which I could not but believe he had obtained in the way he said. It must mean something; whether animal noises deceptively like human speech, or the speech of some hidden, night-haunting human being being decayed to a state not much above that of lower animals. From this my thoughts went back to the black hieroglyphed stone, and to speculations upon what it might mean. Then, too, what of the photographs which Akeley said he was about to send, and which the old people had found so convincingly terrible?

As I re-read the cramped handwriting I felt as never before that my credulous opponents might have more on their side than I had conceded. After all, there might be some queer and perhaps hereditarily misshapen outcasts in those shunned hills, even though no such race of star-born monsters as folklore claimed. And if there were, then the presence of strange bodies in the flooded streams would not be wholly beyond belief. Was it too presumptuous to suppose that both the old legends and the recent reports had this much of reality behind them? But even as I harboured these doubts I felt ashamed that so fantastic a piece of bizarrerie as Henry Akeley's wild letter had brought them up.

In the end I answered Akeley's letter, adopting a tone of friendly interest and soliciting further particulars. His reply came almost by return mail; and contained, true to promise, a number of Kodak views of scenes and objects illustrating what he had to tell. Glancing at these pictures as I took them from the envelope, I felt a curious sense of fright and nearness to forbidden things; for in spite of the vagueness of most of them, they had a damnably suggestive power which was intensified by the fact of their being genuine photographs - actual optical links with what they portrayed, and the product of an impersonal transmitting process without prejudice, fallibility, or mendacity.

The more I looked at them, the more I saw that my senous estimate of Akeley and his story had not been unjustified. Certainly, these pictures carried conclusive evidence of something in the Vermont hills which was at least vastly outside the radius of our common knowledge and belief. The worst thing of all was the footprint - a view taken where the sun shone on a mud patch somewhere in a deserted upland. This was no cheaply counterfeited thing, I could see at a glance; for the sharply defined pebbles and grassblades in the field of vision gave a clear index of scale and left no possibility of a tricky double exposure. I have called the thing a "footprint," but "claw-print" would be a better term. Even now I can scarcely describe it save to say that it was hideously crablike, and that there seemed to be some ambiguity about its direction. It was not a very deep or fresh print, but seemed to be about the size of an average man's foot. From a central pad, pairs of saw-toothed nippers projected in opposite directions - quite baffling as to function, if indeed the whole object were exclusively an organ of locomotion.

Another photograph - evidently a time-exposure taken in deep shadow - was of the mouth of a woodland cave, with a boulder of, rounded regularity choking the aperture. On the bare ground in front of, it one could just discern a dense network of curious tracks, and when I studied the picture with a magnifier I felt uneasily sure that the tracks were like the one in the other view. A third pictured showed a druid-like circle of standing stones on the summit of a wild hill. Around the cryptic circle the grass was very much beaten down and worn away, though I could not detect any footprints even with the glass. The
extreme remoteness of the place was apparent from the veritable sea of tenantless: mountains which formed the background and stretched away toward a misty horizon.

But if the most disturbing of all the views was that of the footprint, the most curiously suggestive was that of the great black stone found in the Round Hill woods. Akeley had photographed it on what was evidently his study table, for I could see rows of books and a bust of Milton in the background. The thing, as nearly as one might guess, had faced the camera vertically with a somewhat irregularly curved surface of one by two feet; but to say anything definite about that surface, or about the general shape of the whole mass, almost defies the power of language. What outlandish geometrical principles had guided its cutting - for artificially cut it surely was - I could not even begin to guess; and never before had I seen anything which struck me so strangely and unmistakably alien to this world. Of the hieroglyphics on the surface I could discern very few, but one or two that I did see gave rather a shock. Of course they might be fraudulent, for others besides myself had read the monstrous and abhorred Necronomicon of the mad Arab Abdul Alhazred; but it nevertheless made me shiver to recognise certain ideographs which study had taught me to link with the most blood-curdling and blasphemous whispers of things that had had a kind of mad half-existence before the earth and the other inner worlds of the solar system were made.

Of the five remaining pictures, three were of swamp and hill scenes which seemed to bear traces of hidden and unwholesome tenancy. Another was of a queer mark in the ground very near Akeley's house, which he said he had photographed the morning after a night on which the dogs had barked more violently than usual. It was very blurred, and one could really draw no certain conclusions from it; but it did seem fiendishly like that other mark or claw-print photographed on the deserted upland. The final picture was of the Akeley place itself; a trim white house of two stories and attic, about a century and a quarter old, and with a well-kept lawn and stone-bordered path leading up to a tastefully carved Georgian doorway. There were several huge police dogs on the lawn, squatting near a pleasant-faced man with a close-cropped grey beard whom I took to be Akeley himself - his own photographer, one might infer from the tube-connected bulb in his right hand.

From the pictures I turned to the bulky, closely-written letter itself; and for the next three hours was immersed in a gulf of unutterable horror. Where Akeley had given only outlines before, he now entered into minute details; presenting long transcripts of words overheard in the woods at night, long accounts of monstrous pinkish forms spied in thickets at twilight on the hills, and a terrible cosmic narrative derived from the application of profound and varied scholarship to the endless bygone discourses of the mad self-styled spy who had killed himself. I found myself faced by names and terms that I had heard elsewhere in the most hideous of connections - Yuggoth, Great Cthulhu, Tsathoggua, YogSothoth, R'lyeh, Nyarlathotep, Azathoth, Hastur, Yian, Leng, the Lake of Hali, Bethmoora, the Yellow Sign, L'mur-Kathulos, Bran, and the Magnum Innominandum - and was drawn back through nameless aeons and inconceivable dimensions to worlds of elder, outer entity at which the crazed author of the Necronomicon had only guessed in the vaguest way. I was told of the pits of primal life,
and of the streams that had trickled down therefrom; and finally, of the tiny rivulets from one of those streams which had become entangled with the destinies of our own earth.

My brain whirled; and where before I had attempted to explain things away, I now began to believe in the most abnormal and incredible wonders. The array of vital evidence was damningly vast and overwhelming; and the cool, scientific attitude of Akeley - an attitude removed as far as imaginable from the demented, the fanatical, the hysterical, or even the extravagantly speculative - had a tremendous effect on my thought and judgment. By the time I laid the frightful letter aside I could understand the fears he had come to entertain, and was ready to do anything in my power to keep people away from those wild, haunted hills. Even now, when time has dulled the impression and made me half-question my own experience and horrible doubts, there are things in that letter of Akeley's which I would not quote, or even form into words on paper. I am almost glad that the letter and record and photographs are gone now - and I wish, for reasons I shall soon make clear, that the new planet beyond Neptune had not been discovered.

With the reading of that letter my public debating about the Vermont horror permanently ended. Arguments from opponents remained unanswered or put off with promises, and eventually the controversy petered out into oblivion. During late May and June I was in constant correspondence with Akeley; though once in a while a letter would be lost, so that we would have to retrace our ground and perform considerable laborious copying. What we were trying to do, as a whole, was to compare notes in matters of obscure mythological scholarship and arrive at a clearer correlation of the Vermont horrors with the general body of primitive world legend.

For one thing, we virtually decided that these morbidities and the hellish Himalayan Mi-Go were one and the same order of incarnated nightmare. There was also absorbing zoological conjectures, which I would have referred to Professor Dexter in my own college but for Akeley's imperative command to tell no one of the matter before us. If I seem to disobey that command now, it is only because I think that at this stage a warning about those farther Vermont hills - and about those Himalayan peaks which bold explorers are more and more determined to ascend - is more conducive to public safety than silence would be. One specific thing we were leading up to was a deciphering of the hieroglyphics on that infamous black stone - a deciphering which might well place us in possession of secrets deeper and more dizzying than any formerly known to man.

III

Toward the end of June the phonograph record came - shipped from Brattleboro, since Akeley was unwilling to trust conditions on the branch line north of there. He had begun to feel an increased sense of espionage, aggravated by the loss of some of our letters; and said much about the insidious deeds of certain men whom he considered tools and agents of the hidden beings. Most of all he suspected the surly farmer Walter Brown, who lived alone on a run-down hillside place near the deep woods, and who was often seen loafing around corners in Brattleboro, Bellows Falls, Newfane, and South Londonderry in the most inexplicable and seemingly unmotivated way. Brown's voice, he felt convinced, was one of those he had overheard on a certain occasion in a very terrible conversation; and he had once found a footprint or clawprint near Brown's house which might possess the
most ominous significance. It had been curiously near some of Brown's own footprints - footprints that faced toward it.

So the record was shipped from Brattleboro, whither Akeley drove in his Ford car along the lonely Vermont back roads. He confessed in an accompanying note that he was beginning to be afraid of those roads, and that he would not even go into Townshend for supplies now except in broad daylight. It did not pay, he repeated again and again, to know too much unless one were very remote from those silent and problematical hills. He would be going to California pretty soon to live with his son, though it was hard to leave a place where all one's memories and ancestral feelings centered.

Before trying the record on the commercial machine which I borrowed from the college administration building I carefully went over all the explanatory matter in Akeley's various letters. This record, he had said, was obtained about 1 A.M. on the 1st of May, 1915, near the closed mouth of a cave where the wooded west slope of Dark Mountain rises out of Lee's swamp. The place had always been unusually plagued with strange voices, this being the reason he had brought the phonograph, dictaphone, and blank in expectation of results. Former experience had told him that May Eve - the hideous Sabbat-night of underground European legend - would probably be more fruitful than any other date, and he was not disappointed. It was noteworthy, though, that he never again heard voices at that particular spot.

Unlike most of the overheard forest voices, the substance of the record was quasi-ritualistic, and included one palpably human voice which Akeley had never been able to place. It was not Brown's, but seemed to be that of a man of greater cultivation. The second voice, however, was the real crux of the thing - for this was the accursed buzzing which had no likeness to humanity despite the human words which it uttered in good English grammar and a scholarly accent.

The recording phonograph and dictaphone had not worked uniformly well, and had of course been at a great disadvantage because of the remote and muffled nature of the overheard ritual; so that the actual speech secured was very fragmentary. Akeley had given me a transcript of what he believed the spoken words to be, and I glanced through this again as I prepared the machine for action. The text was darkly mysterious rather than openly horrible, though a knowledge of its origin and manner of gathering gave it all the associative horror which any words could well possess. I will present it here in full as I remember it - and I am fairly confident that I know it correctly by heart, not only from reading the transcript, but from playing the record itself over and over again. It is not a thing which one might readily forget!

(Indistinguishable Sounds)

(A Cultivated Male Human Voice)

...is the Lord of the Wood, even to... and the gifts of the men of Leng... so from the wells of night to the gulfs of space, and from the gulfs of space to the wells of night, ever the praises of Great Cthulhu, of Tsathoggua, and of Him Who is not to be Named. Ever Their praises, and abundance to the
Black Goat of the Woods. Ia! Shub-Niggurath! The Goat with a Thousand Young!

(A Buzzing Imitation of Human Speech)

Ia! Shub-Niggurath! The Black Goat of the Woods with a Thousand Young!

(Human Voice)

And it has come to pass that the Lord of the Woods, being... seven and nine, down the onyx steps . . . (tri)butes to Him in the Gulf, Azathoth, He of Whom Thou has taught us marvels). . . on the wings of night out beyond space, out beyond th... to That whereof Yuggoth is the youngest child, rolling alone in black aether at the rim...

(Buzzing Voice)

...go out among men and find the ways thereof, that He in the Gulf may know. To Nyarlathotep, Mighty Messenger, must all things be told. And He shall put on the semblance of men, the waxen mask and the robe that hides, and come down from the world of Seven Suns to mock...

(Human Voice)

(Nyarl)athotep, Great Messenger, bringer of strange joy to Yuggoth through the void, Father of the Million Favoured Ones, Stalker among...

(Speech Cut Off by End of Record)

Such were the words for which I was to listen when I started the phonograph. It was with a trace of genuine dread and reluctance that I pressed the lever and heard the preliminary scratching of the sapphire point, and I was glad that the first faint, fragmentary words were in a human voice - a mellow, educated voice which seemed vaguely Bostonian in accent, and which was certainly not that of any native of the Vermont hills. As I listened to the tantalisingly feeble rendering, I seemed to find the speech identical with Akeley's carefully prepared transcript. On it chanted, in that mellow Bostonian voice. . . "Ia! Shub-Niggurath! The Goat with a Thousand Young!..."

And then I heard the other voice. To this hour I shudder retrospectively when I think of how it struck me, prepared though I was by Akeley's accounts. Those to whom I have since described the record profess to find nothing but cheap imposture or madness in it; but could they have the accursed thing itself, or read the bulk of Akeley's correspondence, (especially that terrible and encyclopaedic second letter), I know they would think differently. It is, after all, a tremendous pity that I did not disobey Akeley and play the record for others - a tremendous pity, too, that all of his letters were lost. To me, with my first-hand impression of the actual sounds, and with my knowledge of the background and surrounding circumstances, the voice was a monstrous thing. It swiftly followed the human voice in ritualistic response, but in my imagination it was a morbid
echo winging its way across unimaginable abysses from unimaginable outer hells. It is more than two years now since I last ran off that blasphemous waxen cylinder; but at this moment, and at all other moments, I can still hear that feeble, fiendish buzzing as it reached me for the first time.

"Ia! Shub-Niggurath! The Black Goat of the Woods with a Thousand Young!"

But though the voice is always in my ears, I have not even yet been able to analyse it well enough for a graphic description. It was like the drone of some loathsome, gigantic insect ponderously shaped into the articulate speech of an alien species, and I am perfectly certain that the organs producing it can have no resemblance to the vocal organs of man, or indeed to those of any of the mammalia. There were singularities in timbre, range, and overtones which placed this phenomenon wholly outside the sphere of humanity and earth-life. Its sudden advent that first time almost stunned me, and I heard the rest of the record through in a sort of abstracted daze. When the longer passage of buzzing came, there was a sharp intensification of that feeling of blasphemous infinity which had struck me during the shorter and earlier passage. At last the record ended abruptly, during an unusually clear speech of the human and Bostonian voice; but I sat stupidly staring long after the machine had automatically stopped.

I hardly need say that I gave that shocking record many another playing, and that I made exhaustive attempts at analysis and comment in comparing notes with Akeley. It would be both useless and disturbing to repeat here all that we concluded; but I may hint that we agreed in believing we had secured a clue to the source of some of the most repulsive primordial customs in the cryptic elder religions of mankind. It seemed plain to us, also, that there were ancient and elaborate alliance; between the hidden outer creatures and certain members of the human race. How extensive these alliances were, and how their state today might compare with their state in earlier ages, we had no means of guessing; yet at best there was room for a limitless amount of horrified speculation. There seemed to be an awful, immemorial linkage in several definite stages betwixt man and nameless infinity. The blasphemies which appeared on earth, it was hinted, came from the dark planet Yuggoth, at the rim of the solar system; but this was itself merely the populous outpost of a frightful interstellar race whose ultimate source must lie far outside even the Einsteinian space-time continuum or greatest known cosmos.

Meanwhile we continued to discuss the black stone and the best way of getting it to Arkham - Akeley deeming it inadvisable to have me visit him at the scene of his nightmare studies. For some reason or other, Akeley was afraid to trust the thing to any ordinary or expected transportation route. His final idea was to take it across country to Bellows Falls and ship it on the Boston and Maine system through Keene and Winchendon and Fitchburg, even though this would necessitate his driving along somewhat lonelier and more forest-traversing hill roads than the main highway to Brattleboro. He said he had noticed a man around the express office at Brattleboro when he had sent the phonograph record, whose actions and expression had been far from reassuring. This man had seemed too anxious to talk with the clerks, and had taken the train on which the record was shipped. Akeley confessed that he had not felt strictly at ease about that record until he heard from me of its safe receipt.
About this time - the second week in July - another letter of mine went astray, as I learned through an anxious communication from Akeley. After that he told me to address him no more at Townshend, but to send all mail in care of the General Delivery at Brattleboro; whither he would make frequent trips either in his car or on the motor-coach line which had lately replaced passenger service on the lagging branch railway. I could see that he was getting more and more anxious, for he went into much detail about the increased barking of the dogs on moonless nights, and about the fresh claw-prints he sometimes found in the road and in the mud at the back of his farmyard when morning came. Once he told about a veritable army of prints drawn up in a line facing an equally thick and resolute line of dog-tracks, and sent a loathsomely disturbing Kodak picture to prove it. That was after a night on which the dogs had outdone themselves in barking and howling.

On the morning of Wednesday, July 18, I received a telegram from Bellows Falls, in which Akeley said he was expressing the black stone over the B. & M. on Train No. 5508, leaving Bellows Falls at 12:15 P.M., standard time, and due at the North Station in Boston at 4:12 P.M. It ought, I calculated, to get up to Arkham at least by the next noon; and accordingly I stayed in all Thursday morning to receive it. But noon came and went without its advent, and when I telephoned down to the express office I was informed that no shipment for me had arrived. My next act, performed amidst a growing alarm, was to give a long-distance call to the express agent at the Boston North Station; and I was scarcely surprised to learn that my consignment had not appeared. Train No. 5508 had pulled in only 35 minutes late on the day before, but had contained no box addressed to me. The agent promised, however, to institute a searching inquiry; and I ended the day by sending Akeley a night-letter outlining the situation.

With commendable promptness a report came from the Boston office on the following afternoon, the agent telephoning as soon as he learned the facts. It seemed that the railway express clerk on No. 5508 had been able to recall an incident which might have much bearing on my loss - an argument with a very curious-voiced man, lean, sandy, and rustic-looking, when the train was waiting at Keene, N. H., shortly after one o’clock standard time. The man, he said, was greatly excited about a heavy box which he claimed to expect, but which was neither on the train nor entered on the company’s books. He had given the name of Stanley Adams, and had had such a queerly thick droning voice, that it made the clerk abnormally dizzy and sleepy to listen to him. The clerk could not remember quite how the conversation had ended, but recalled starting into a fuller awareness when the train began to move. The Boston agent added that this clerk was a young man of wholly unquestioned veracity and reliability, of known antecedents and long with the company.

That evening I went to Boston to interview the clerk in person, having obtained his name and address from the office. He was a frank, prepossessing fellow, but I saw that he could add nothing to his original account. Oddly, he was scarcely sure that he could even recognise the strange inquirer again. Realising that he had no more to tell, I returned to Arkham and sat up till morning writing letters to Akeley, to the express company and to the police department and station agent in Keene. I felt that the strange-voiced man who had so queerly affected the clerk must have a pivotal place in the ominous business, and
hoped that Keene station employees and telegraph-office records might tell something about him and about how he happened to make his inquiry when and where he did.

I must admit, however, that all my investigations came to nothing. The queer-voiced man had indeed been noticed around the Keene station in the early afternoon of July 18, and one lounging seemed to couple him vaguely with a heavy box; but he was altogether unknown, and had not been seen before or since. He had not visited the telegraph office or received any message so far as could be learned, nor had any message which might justly be considered a notice of the black stone’s presence on No. 5508 come through the office for anyone. Naturally Akeley joined with me in conducting these inquiries, and even made a personal trip to Keene to question the people around the station; but his attitude toward the matter was more fatalistic than mine. He seemed to find the loss of the box a portentous and menacing fulfillment of inevitable tendencies, and had no real hope at all of its recovery. He spoke of the undoubted telepathic and hypnotic powers of the hill creatures and their agents, and in one letter hinted that he did not believe the stone was on this earth any longer. For my part, I was duly enraged, for I had felt there was at least a chance of learning profound and astonishing things from the old, blurred hieroglyphs. The matter would have rankled bitterly in my mind had not Akeley’s immediately subsequent letters brought up a new phase of the whole horrible hill problem which at once seized all my attention.

IV

The unknown things, Akeley wrote in a script grown pitifully tremulous, had begun to close in on him with a wholly new degree of determination. The nocturnal barking of the dogs whenever the moon was dim or absent was hideous now, and there had been attempts to molest him on the lonely roads he had to traverse by day. On the second of August, while bound for the village in his car, he had found a tree-trunk laid in his path at a point where the highway ran through a deep patch of woods; while the savage barking of the two great dogs he had with him told all too well of the things which must have been lurking near. What would have happened had the dogs not been there, he did not dare guess - but he never went out now without at least two of his faithful and powerful pack. Other road experiences had occurred on August fifth and sixth; a shot grazing his car on one occasion, and the barking of the dogs telling of unholy woodland presences on the other.

On August fifteenth I received a frantic letter which disturbed me greatly, and which made me wish Akeley could put aside his lonely reticence and call in the aid of the law. There had been frightful happening on the night of the 12-13th, bullets flying outside the farmhouse, and three of the twelve great dogs being found shot dead in the morning. There were myriads of claw-prints in the road, with the human prints of Walter Brown among them. Akeley had started to telephone to Brattleboro for more dogs, but the wire had gone dead before he had a chance to say much. Later he went to Brattleboro in his car, and learned there that linemen had found the main cable neatly cut at a point where it ran through the deserted hills north of Newfane. But he was about to start home with four fine new dogs, and several cases of ammunition for his big-game repeating rifle. The letter was written at the post office in Brattleboro, and came through to me without delay.
My attitude toward the matter was by this time quickly slipping from a scientific to an alarmedly personal one. I was afraid for Akeley in his remote, lonely farmhouse, and half afraid for myself because of my now definite connection with the strange hill problem. The thing was reaching out so. Would it suck me in and engulf me? In replying to his letter I urged him to seek help, and hinted that I might take action myself if he did not. I spoke of visiting Vermont in person in spite of his wishes, and of helping him explain the situation to the proper authorities. In return, however, I received only a telegram from Bellows Falls which read thus:

APPRECIATE YOUR POSITION BUT CAN DO NOTHING TAKE NO ACTION YOURSELF FOR IT COULD ONLY HARM BOTH WAIT FOR EXPLANATION

HENRY AKELEY

But the affair was steadily deepening. Upon my replying to the telegram I received a shaky note from Akeley with the astonishing news that he had not only never sent the wire, but had not received the letter from me to which it was an obvious reply. Hasty inquiries by him at Bellows Falls had brought out that the message was deposited by a strange sandy-haired man with a curiously thick, droning voice, though more than this he could not learn. The clerk showed him the original text as scrawled in pencil by the sender, but the handwriting was wholly unfamiliar. It was noticeable that the signature was misspelled - A-K-E-L-Y, without the second "E." Certain conjectures were inevitable, but amidst the obvious crisis he did not stop to elaborate upon them.

He spoke of the death of more dogs and the purchase of still others, and of the exchange of gunfire which had become a settled feature each moonless night. Brown’s prints, and the prints of at least one or two more shod human figures, were now found regularly among the claw-prints in the road, and at the back of the farmyard. It was, Akeley admitted, a pretty bad business; and before long he would probably have to go to live with his California son whether or not he could sell the old place. But it was not easy to leave the only spot one could really think of as home. He must try to hang on a little longer; perhaps he could scare off the intruders - especially if he openly gave up all further attempts to penetrate their secrets.

Writing Akeley at once, I renewed my offers of aid, and spoke again of visiting him and helping him convince the authorities of his dire peril. In his reply he seemed less set against that plan than his past attitude would have led one to predict, but said he would like to hold off a little while longer - long enough to get his things in order and reconcile himself to the idea of leaving an almost morbidly cherished birthplace. People looked askance at his studies and speculations and it would be better to get quietly off without setting the countryside in a turmoil and creating widespread doubts of his own sanity. He had had enough, he admitted, but he wanted to make a dignified exit if he could.

This letter reached me on the 28th of August, and I prepared and mailed as encouraging a reply as I could. Apparently the encouragement had effect, for Akeley had fewer terrors to report when he acknowledged my note. He was not very optimistic, though, and expressed the belief that it was only the full moon season which was holding the
creatures off. He hoped there would not be many densely cloudy nights, and talked vaguely of boarding in Brattleboro when the moon waned. Again I wrote him encouragingly but on September 5th there came a fresh communication which had obviously crossed my letter in the mails; and to this I could not give any such hopeful response. In view of its importance I believe I had better give it in full - as best I can do from memory of the shaky script. It ran substantially as follows:

_Monday_

Dear Wilmarth

A rather discouraging P. S. to my last. Last night was thickly cloudy - though no rain - and not a bit of moonlight got through. Things were pretty bad, and I think the end is getting near, in spite of all we have hoped. After midnight something landed on the roof of the house, and the dogs all rushed up to see what it was. I could hear them snapping and tearing around, and then one managed to get on the roof by jumping from the low ell. There was a terrible fight up there, and I heard a frightful buzzing which I’ll never forget. And then there was a shocking smell. About the same time bullets came through the window and nearly grazed me. I think the main line of the hill creatures had got close to the house when the dogs divided because of the roof business. What was up there I don’t know yet, but I’m afraid the creatures are learning to steer better with their space wings. I put out the light and used the windows for loopholes, and raked all around the house with rifle fire aimed just high enough not to hit the dogs. That seemed to end the business, but in the morning I found great pools of blood in the yard, besides pools of a green sticky stuff that had the worst odour I have ever smelled. I climbed up on the roof and found more of the sticky stuff there. Five of the dogs were killed - I’m afraid I hit one myself by aiming too low, for he was shot in the back. Now I am setting the panes the shots broke, and am going to Brattleboro for more dogs. I guess the men at the kennels think I am crazy. Will drop another note later. Suppose I’ll be ready for moving in a week or two, though it nearly kills me to think of it.

_Hastily - Akeley_

But this was not the only letter from Akeley to cross mine. On the next morning - September 6th - still another came; this time a frantic scrawl which utterly unnerved me and put me at a loss what to say or do next. Again I cannot do better than quote the text as faithfully as memory will let me.

_Tuesday_

Clouds didn’t break, so no moon again - and going into the wane anyhow. I’d have the house wired for electricity and put in a searchlight if I didn’t know they’d cut the cables as fast as they could be mended.
I think I am going crazy. It may be that all I have ever written you is a
dream or madness. It was bad enough before, but this time it is too much.
They talked to me last night - talked in that cursed buzzing voice and told
me things that I dare not repeat to you. I heard them plainly above the
barking of the dogs, and once when they were drowned out a human voice
helped them. Keep out of this, Wilmarth - it is worse than either you or I
ever suspected. They don’t mean to let me get to California now - they
want to take me off alive, or what theoretically and mentally amounts to
alive - not only to Yuggoth, but beyond that - away outside the galaxy and
possibly beyond the last curved rim of space. I told them I wouldn’t go
where they wish, or in the terrible way they propose to take me, but I’m
afraid it will be no use. My place is so far out that they may come by day
as well as by night before long. Six more dogs killed, and I felt presences
all along the wooded parts of the road when I drove to Brattleboro today.
It was a mistake for me to try to send you that phonograph record and
black stone. Better smash the record before it’s too late. Will drop you
another line tomorrow if I’m still here. Wish I could arrange to get my
books and things to Brattleboro and board there. I would run off without
anything if I could but something inside my mind holds me back. I can
slip out to Brattleboro, where I ought to be safe, but I feel just as much a
prisoner there as at the house. And I seem to know that I couldn’t get
much farther even if I dropped everything and tried. It is horrible - don’t
get mixed up in this.

Yrs - Akeley

I did not sleep at all the night after receiving this terrible thing, and was utterly baffled as
to Akeley’s remaining degree of sanity. The substance of the note was wholly insane, yet
the manner of expression - in view of all that had gone before - had a grimly potent
quality of convincingness. I made no attempt to answer it, thinking it better to wait until
Akeley might have time to reply to my latest communication. Such a reply indeed came
on the following day, though the fresh material in it quite overshadowed any of the points
brought up by the letter nominally answered. Here is what I recall of the text, scrawled
and blotted as it was in the course of a plainly frantic and hurried composition.

Wednesday

W -

Your letter came, but it’s no use to discuss anything any more. I am fully
resigned. Wonder that I have even enough will power left to fight them
off. Can’t escape even if I were willing to give up everything and run.
They’ll get me.

Had a letter from them yesterday - R.F.D. man brought it while I was at
Brattleboro. Typed and postmarked Bellows Falls. Tells what they want to
do with me - I can’t repeat it. Look out for yourself, too! Smash that
record. Cloudy nights keep up, and moon waning all the time. Wish I
dared to get help - it might brace up my will power - but everyone who
would dare to come at all would call me crazy unless there happened to be
some proof. Couldn’t ask people to come for no reason at all - am all out
of touch with everybody and have been for years.

But I haven’t told you the worst, Wilmarth. Brace up to read this, for it
will give you a shock. I am telling the truth, though. It is this - _I have seen
and touched one of the things, or part of one of the things_. God, man, but
it’s awful! It was dead, of course. One of the dogs had it, and I found it
near the kennel this morning. I tried to save it in the woodshed to convince
people of the whole thing, but it all evaporated in a few hours. Nothing
left. You know, all those things in the rivers were seen only on the first
morning after the flood. And here’s the worst. I tried to photograph it for
you, but when I developed the film _there wasn’t anything visible except
the woodshed_. What can the thing have been made of? I saw it and felt it,
and they all leave footprints. It was surely made of matter - but what kind
of matter? The shape can’t be described. It was a great crab with a lot of
pyramided fleshy rings or knots of thick, ropy stuff covered with feelers
where a man’s head would be. That green sticky stuff is its blood or juice.
And there are more of them due on earth any minute.

Walter Brown is missing - hasn’t been seen loafing around any of his
usual corners in the villages hereabouts. I must have got him with one of
my shots, though the creatures always seem to try to take their dead and
wounded away.

Got into town this afternoon without any trouble, but am afraid they’re
beginning to hold off because they’re sure of me. Am writing this in
Brattleboro P. 0. This may be goodbye - if it is, write my son George
Goodenough Akeley, 176 Pleasant St., San Diego, Cal., _but don’t come up
here_. Write the boy if you don’t hear from me in a week, and watch the
papers for news.

I’m going to play my last two cards now - if I have the will power left.
First to try poison gas on the things (I’ve got the right chemicals and have
fixed up masks for myself and the dogs) and then if that doesn’t work, tell
the sheriff. They can lock me in a madhouse if they want to - it’ll be better
than what the other creatures would do. Perhaps I can get them to pay
attention to the prints around the house - they are faint, but I can find them
every morning. Suppose, though, police would say I faked them somehow;
for they all think I’m a queer character.

Must try to have a state policeman spend a night here and see for himself -
though it would be just like the creatures to learn about it and hold off that
night. They cut my wires whenever I try to telephone in the night - the
linemen think it is very queer, and may testify for me if they don’t go and
imagine I cut them myself. I haven’t tried to keep them repaired for over a
week now.
I could get some of the ignorant people to testify for me about the reality of the horrors, but everybody laughs at what they say, and anyway, they have shunned my place for so long that they don’t know any of the new events. You couldn’t get one of those rundown farmers to come within a mile of my house for love or money. The mail-carrier hears what they say and jokes me about it - God! If I only dared tell him how real it is! I think I’ll try to get him to notice the prints, but he comes in the afternoon and they’re usually about gone by that time. If I kept one by setting a box or pan over it, he’d think surely it was a fake or joke.

Wish I hadn’t gotten to be such a hermit, so folks don’t drop around as they used to. I’ve never dared show the black stone or the Kodak pictures, or play that record, to anybody but the ignorant people. The others would say I faked the whole business and do nothing but laugh. But I may yet try showing the pictures. They give those claw-prints clearly, even if the things that made them can’t be photographed. What a shame nobody else saw that thing this morning before it went to nothing!

But I don’t know as I care. After what I’ve been through, a madhouse is as good a place as any. The doctors can help me make up my mind to get away from this house, and that is all that will save me.

Write my son George if you don’t hear soon. Goodbye, smash that record, and don’t mix up in this.

Yrs - Akeley

This letter frankly plunged me into the blackest of terror. I did not know what to say in answer, but scratched off some incoherent words of advice and encouragement and sent them by registered mail. I recall urging Akeley to move to Brattleboro at once, and place himself under the protection of the authorities; adding that I would come to that town with the phonograph record and help convince the courts of his sanity. It was time, too, I think I wrote, to alarm the people generally against this thing in their midst. It will be observed that at this moment of stress my own belief in all Akeley had told and claimed was virtually complete, though I did think his failure to get a picture of the dead monster was due not to any freak of Nature but to some excited slip of his own.

Then, apparently crossing my incoherent note and reaching me Saturday afternoon, September 8th, came that curiously different and calming letter neatly typed on a new machine; that strange letter of reassurance and invitation which must have marked so prodigious a transition in the whole nightmare drama of the lonely hills. Again I will quote from memory - seeking for special reasons to preserve as much of the flavour of the style as I can. It was postmarked Bellows Falls, and the signature as well as the body of the letter was typed - as is frequent with beginners in typing. The text, though, was marvellously accurate for a tyro’s work; and I concluded that Akeley must have used a machine at some previous period - perhaps in college. To say that the letter relieved me
would be only fair, yet beneath my relief lay a substratum of uneasiness. If Akeley had been sane in his terror, was he now sane in his deliverance? And the sort of "improved rapport" mentioned . . . what was it? The entire thing implied such a diametrical reversal of Akeley’s previous attitude! But here is the substance of the text, carefully transcribed from a memory in which I take some pride.

Townshend, Vermont,

Thursday, Sept. 6, 1928.

My dear Wilmarth: -

It gives me great pleasure to be able to set you at rest regarding all the silly things I’ve been writing you. I say "silly," although by that I mean my frightened attitude rather than my descriptions of certain phenomena. Those phenomena are real and important enough; my mistake had been in establishing an anomalous attitude toward them.

I think I mentioned that my strange visitors were beginning to communicate with me, and to attempt such communication. Last night this exchange of speech became actual. In response to certain signals I admitted to the house a messenger from those outside - a fellow-human, let me hasten to say. He told me much that neither you nor I had even begun to guess, and showed clearly how totally we had misjudged and misinterpreted the purpose of the Outer Ones in maintaining their secret colony on this planet.

It seems that the evil legends about what they have offered to men, and what they wish in connection with the earth, are wholly the result of an ignorant misconception of allegorical speech - speech, of course, moulded by cultural backgrounds and thought-habits vastly different from anything we dream of. My own conjectures, I freely own, shot as widely past the mark as any of the guesses of illiterate farmers and savage Indians. What I had thought morbid and shameful and ignominious is in reality awesome and mind-expanding and even glorious - my previous estimate being merely a phase of man’s eternal tendency to hate and fear and shrink from the utterly different.

Now I regret the harm I have inflicted upon these alien and incredible beings in the course of our nightly skirmishes. If only I had consented to talk peacefully and reasonably with them in the first place! But they bear me no grudge, their emotions being organised very differently from ours. It is their misfortune to have had as their human agents in Vermont some very inferior specimens - the late Walter Brown, for example. He prejudiced me vastly against them. Actually, they have never knowingly harmed men, but have often been cruelly wronged and spied upon by our species. There is a whole secret cult of evil men (a man of your mystical erudition will understand me when I link them with Hastur and the Yellow
devoted to the purpose of tracking them down and injuring them on behalf of monstrous powers from other dimensions. It is against these aggressors - not against normal humanity - that the drastic precautions of the Outer Ones are directed. Incidentally, I learned that many of our lost letters were stolen not by the Outer Ones but by the emissaries of this malign cult.

All that the Outer Ones wish of man is peace and non-molestation and an increasing intellectual rapport. This latter is absolutely necessary now that our inventions and devices are expanding our knowledge and motions, and making it more and more impossible for the Outer Ones’ necessary outposts to exist secretly on this planet. The alien beings desire to know mankind more fully, and to have a few of mankind’s philosophic and scientific leaders know more about them. With such an exchange of knowledge all perils will pass, and a satisfactory modus vivendi be established. The very idea of any attempt to enslave or degrade mankind is ridiculous.

As a beginning of this improved rapport, the Outer Ones have naturally chosen me - whose knowledge of them is already so considerable - as their primary interpreter on earth. Much was told me last night - facts of the most stupendous and vista-opening nature - and more will be subsequently communicated to me both orally and in writing. I shall not be called upon to make any trip outside just yet, though I shall probably wish to do so later on - employing special means and transcending everything which we have hitherto been accustomed to regard as human experience. My house will be besieged no longer. Everything has reverted to normal, and the dogs will have no further occupation. In place of terror I have been given a rich boon of knowledge and intellectual adventure which few other mortals have ever shared.

The Outer Beings are perhaps the most marvellous organic things in or beyond all space and time-members of a cosmos-wide race of which all other life-forms are merely degenerate variants. They are more vegetable than animal, if these terms can be applied to the sort of matter composing them, and have a somewhat fungoid structure; though the presence of a chlorophyll-like substance and a very singular nutritive system differentiate them altogether from true cormophytic fungi. Indeed, the type is composed of a form of matter totally alien to our part of space - with electrons having a wholly different vibration-rate. That is why the beings cannot be photographed on the ordinary camera films and plates of our known universe, even though our eyes can see them. With proper knowledge, however, any good chemist could make a photographic emulsion which would record their images.

The genus is unique in its ability to traverse the heatless and airless interstellar void in full corporeal form, and some of its variants cannot do this without mechanical aid or curious surgical transpositions. Only a few
species have the ether-resisting wings characteristic of the Vermont variety. Those inhabiting certain remote peaks in the Old World were brought in other ways. Their external resemblance to animal life, and to the sort of structure we understand as material, is a matter of parallel evolution rather than of close kinship. Their brain-capacity exceeds that of any other surviving life-form, although the winged types of our hill country are by no means the most highly developed. Telepathy is their usual means of discourse, though we have rudimentary vocal organs which, after a slight operation (for surgery is an incredibly expert and everyday thing among them), can roughly duplicate the speech of such types of organism as still use speech.

Their main immediate abode is a still undiscovered and almost lightless planet at the very edge of our solar system - beyond Neptune, and the ninth in distance from the sun. It is, as we have inferred, the object mystically hinted at as "Yuggoth" in certain ancient and forbidden writings; and it will soon be the scene of a strange focussing of thought upon our world in an effort to facilitate mental rapport. I would not be surprised if astronomers become sufficiently sensitive to these thought-currents to discover Yuggoth when the Outer Ones wish them to do so. But Yuggoth, of course, is only the stepping-stone. The main body of the beings inhabits strangely organized abysses wholly beyond the utmost reach of any human imagination. The space-time globule which we recognize as the totality of all cosmic entity is only an atom in the genuine infinity which is theirs. And as much of this infinity as any human brain can hold is eventually to be opened up to me, as it has been to not more than fifty other men since the human race has existed.

You will probably call this raving at first, Wilmarth, but in time you will appreciate the titanic opportunity I have stumbled upon. I want you to share as much of it as is possible, and to that end must tell you thousands of things that won’t go on paper. In the past I have warned you not to come to see me. Now that all is safe, I take pleasure in rescinding that warning and inviting you.

Can’t you make a trip up here before your college term opens? It would be marvelously delightful if you could. Bring along the phonograph record and all my letters to you as consultative data - we shall need them in piecing together the whole tremendous story. You might bring the Kodak prints, too, since I seem to have mislaid the negatives and my own prints in all this recent excitement. But what a wealth of facts I have to add to all this groping and tentative material - and what a stupendous device I have to supplement my additions!

Don’t hesitate - I am free from espionage now, and you will not meet anything unnatural or disturbing. Just come along and let my car meet you at the Brattleboro station - prepare to stay as long as you can, and expect many an evening of discussion of things beyond all human conjecture.
Don’t tell anyone about it, of course - for this matter must not get to the promiscuous public.

The train service to Brattleboro is not bad - you can get a timetable in Boston. Take the B. & M. to Greenfield, and then change for the brief remainder of the way. I suggest your taking the convenient 4:10 P.M. - standard-from Boston. This gets into Greenfield at 7:35, and at 9:19 a train leaves there which reaches Brattleboro at 10:01. That is weekdays. Let me know the date and I’ll have my car on hand at the station.

Pardon this typed letter, but my handwriting has grown shaky of late, as you know, and I don’t feel equal to long stretches of script. I got this new Corona in Brattleboro yesterday - it seems to work very well.

Awaiting word, and hoping to see you shortly with the phonograph record and all my letters - and the Kodak prints -

I am
Yours in anticipation,
Henry W. Akeley

TO ALBERT N. WILMARTH, ESQ.,
MISKATONIC UNIVERSITY,
ARKHAM, MASS.

The complexity of my emotions upon reading, re-reading, and pondering over this strange and unlooked-for letter is past adequate description. I have said that I was at once relieved and made uneasy, but this expresses only crudely the overtones of diverse and largely subconscious feelings which comprised both the relief and the uneasiness. To begin with, the thing was so antipodally at variance with the whole chain of horrors preceding it - the change of mood from stark terror to cool complacency and even exultation was so unheralded, lightning-like, and complete! I could scarcely believe that a single day could so alter the psychological perspective of one who had written that final frenzied bulletin of Wednesday, no matter what relieving disclosures that day might have brought. At certain moments a sense of conflicting unrealities made me wonder whether this whole distantly reported drama of fantastic forces were not a kind of half-illusory dream created largely within my own mind. Then I thought of the phonograph record and gave way to still greater bewilderment.

The letter seemed so unlike anything which could have been expected! As I analysed my impression, I saw that it consisted of two distinct phases. First, granting that Akeley had been sane before and was still sane, the indicated change in the situation itself was so swift and unthinkable. And secondly, the change in Akeley’s own manner, attitude, and language was so vastly beyond the normal or the predictable. The man’s whole personality seemed to have undergone an insidious mutation - a mutation so deep that one could scarcely reconcile his two aspects with the supposition that both represented equal sanity. Word-choice, spelling - all were subtly different. And with my academic sensitiveness to prose style, I could trace profound divergences in his commonest
reactions and rhythm-responses. Certainly, the emotional cataclysm or revelation which could produce so radical an overturn must be an extreme one indeed! Yet in another way the letter seemed quite characteristic of Akeley. The same old passion for infinity - the same old scholarly inquisitiveness. I could not a moment - or more than a moment - credit the idea of spuriousness or malign substitution. Did not the invitation - the willingness to have me test the truth of the letter in person - prove its genuineness?

I did not retire Saturday night, but sat up thinking of the shadows and marvels behind the letter I had received. My mind, aching from the quick succession of monstrous conceptions it had been forced to confront during the last four months, worked upon this startling new material in a cycle of doubt and acceptance which repeated most of the steps experienced in facing the earlier wonders; till long before dawn a burning interest and curiosity had begun to replace the original storm of perplexity and uneasiness. Mad or sane, metamorphosed or merely relieved, the chances were that Akeley had actually encountered some stupendous change of perspective in his hazardous research; some change at once diminishing his danger - real or fancied - and opening dizzy new vistas of cosmic and superhuman knowledge. My own zeal for the unknown flared up to meet his, and I felt myself touched by the contagion of the morbid barrier-breaking. To shake off the maddening and wearying limitations of time and space and natural law - to be linked with the vast outside - to come close to the nighted and abysmal secrets of the infinite and the ultimate - surely such a thing was worth the risk of one’s life, soul, and sanity! And Akeley had said there was no longer any peril - he had invited me to visit him instead of warning me away as before. I tingled at the thought of what he might now have to tell me - there was an almost paralysing fascination in the thought of sitting in that lonely and lately-beleaguered farmhouse with a man who had talked with actual emissaries from outer space; sitting there with the terrible record and the pile of letters in which Akeley had summarised his earlier conclusions.

So late Sunday morning I telegraphed Akeley that I would meet him in Brattleboro on the following Wednesday - September 12th - if that date were convenient for him. In only one respect did I depart from his suggestions, and that concerned the choice of a train. Frankly, I did not feel like arriving in that haunted Vermont region late at night; so instead of accepting the train he chose I telephoned the station and devised another arrangement. By rising early and taking the 8:07 A.M. (standard) into Boston, I could catch the 9:25 for Greenfield; arriving there at 12:22 noon. This connected exactly with a train reaching Brattleboro at 1:08 p.m. - a much more comfortable hour than 10:01 for meeting Akeley and riding with him into the close-packed, secret-guarding hills.

I mentioned this choice in my telegram, and was glad to learn in the reply which came toward evening that it had met with my prospective host’s endorsement. His wire ran thus:

ARRANGEMENT SATISFACTORY WILL MEET ONE EIGHT TRAIN WEDNESDAY DONT FORGET RECORD AND LETTERS AND PRINTS KEEP DESTINATION QUIET EXPECT GREAT REVELATIONS

AKELEY
Receipt of this message in direct response to one sent to Akeley - and necessarily delivered to his house from the Townshend station either by official messenger or by a restored telephone service - removed any lingering subconscious doubts I may have had about the authorship of the perplexing letter. My relief was marked - indeed, it was greater than I could account for at the time; since all such doubts had been rather deeply buried. But I slept soundly and long that night, and was eagerly busy with preparations during the ensuing two days.

VI

On Wednesday I started as agreed, taking with me a valise full of simple necessities and scientific data, including the hideous phonograph record, the Kodak prints, and the entire file of Akeley’s correspondence. As requested, I had told no one where I was going; for I could see that the matter demanded utmost privacy, even allowing for its most favourable turns. The thought of actual mental contact with alien, outside entities was stupefying enough to my trained and somewhat prepared mind; and this being so, what might one think of its effect on the vast masses of uninformed laymen? I do not know whether dread or adventurous expectancy was uppermost in me as I changed trains at Boston and began the long westward run out of familiar regions into those I knew less thoroughly. Waltham - Concord - Ayer - Fitchburg - Gardner - Athol -

My train reached Greenfield seven minutes late, but the northbound connecting express had been held. Transferring in haste, I felt a curious breathlessness as the cars rumbled on through the early afternoon sunlight into territories I had always read of but had never before visited. I knew I was entering an altogether older-fashioned and more primitive New England than the mechanised, urbanised coastal and southern areas where all my life had been spent; an unspoiled, ancestral New England without the foreigners and factory-smoke, bill-boards and concrete roads, of the sections which modernity has touched. There would be odd survivals of that continuous native life whose deep roots make it the one authentic outgrowth of the landscape - the continuous native life which keeps alive strange ancient memories, and fertilises the soil for shadowy, marvellous, and seldom-mentioned beliefs.

Now and then I saw the blue Connecticut River gleaming in the sun, and after leaving Northfield we crossed it. Ahead loomed green and cryptical hills, and when the conductor came around I learned that I was at last in Vermont. He told me to set my watch back an hour, since the northern hill country will have no dealings with new-fangled daylight time schemes. As I did so it seemed to me that I was likewise turning the calendar back a century.

The train kept close to the river, and across in New Hampshire I could see the approaching slope of steep Wantastiquet, about which singular old legends cluster. Then streets appeared on my left, and a green island showed in the stream on my right. People rose and filed to the door, and I followed them. The car stopped, and I alighted beneath the long train-shed of the Brattleboro station.

Looking over the line of waiting motors I hesitated a moment to see which one might turn out to be the Akeley Ford, but my identity was divined before I could take the initiative.
And yet it was clearly not Akeley himself who advanced to meet me with an outstretched hand and a mellowly phrased query as to whether I was indeed Mr. Albert N. Wilmarth of Arkham. This man bore no resemblance to the bearded, grizzled Akeley of the snapshot; but was a younger and more urbane person, fashionably dressed, and wearing only a small, dark moustache. His cultivated voice held an odd and almost disturbing hint of vague familiarity, though I could not definitely place it in my memory.

As I surveyed him I heard him explaining that he was a friend of my prospective host’s who had come down from Townshend in his stead. Akeley, he declared, had suffered a sudden attack of some asthmatic trouble, and did not feel equal to making a trip in the outdoor air. It was not serious, however, and there was to be no change in plans regarding my visit. I could not make out just how much this Mr. Noyes - as he announced himself - knew of Akeley’s researches and discoveries, though it seemed to me that his casual manner stamped him as a comparative outsider. Remembering what a hermit Akeley had been, I was a trifle surprised at the ready availability of such a friend; but did not let my puzzlement deter me from entering the motor to which he gestured me. It was not the small ancient car I had expected from Akeley’s descriptions, but a large and immaculate specimen of recent pattern - apparently Noyes’s own, and bearing Massachusetts license plates with the amusing "sacred codfish" device of that year. My guide, I concluded, must be a summer transient in the Townshend region.

Noyes climbed into the car beside me and started it at once. I was glad that he did not overflow with conversation, for some peculiar atmospheric tensity made me feel disinclined to talk. The town seemed very attractive in the afternoon sunlight as we swept up an incline and turned to the right into the main street. It drowsed like the older New England cities which one remembers from boyhood, and something in the collocation of roofs and steeples and chimneys and brick walls formed contours touching deep viol-strings of ancestral emotion. I could tell that I was at the gateway of a region half-bewitched through the piling-up of unbroken time-accumulations; a region where old, strange things have had a chance to grow and linger because they have never been stirred up.

As we passed out of Brattleboro my sense of constraint and foreboding increased, for a vague quality in the hill-crowded countryside with its towering, threatening, close-pressing green and granite slopes hinted at obscure secrets and immemorial survivals which might or might not be hostile to mankind. For a time our course followed a broad, shallow river which flowed down from unknown hills in the north, and I shivered when my companion told me it was the West River. It was in this stream, I recalled from newspaper items, that one of the morbid crablike beings had been seen floating after the floods.

Gradually the country around us grew wilder and more deserted. Archaic covered bridges lingered fearsomely out of the past in pockets of the hills, and the half-abandoned railway track paralleling the river seemed to exhale a nebulously visible air of desolation. There were awesome sweeps of vivid valley where great cliffs rose, New England’s virgin granite showing grey and austere through the verdure that scaled the crests. There were gorges where untamed streams leaped, bearing down toward the river the unimagined secrets of a thousand pathless peaks. Branching away now and then were narrow, half-
concealed roads that bored their way through solid, luxuriant masses of forest among
whose primal trees whole armies of elemental spirits might well lurk. As I saw these I
thought of how Akeley had been molested by unseen agencies on his drives along this
very route, and did not wonder that such things could be.

The quaint, sightly village of Newfane, reached in less than an hour, was our last link
with that world which man can definitely call his own by virtue of conquest and complete
occupancy. After that we cast off all allegiance to immediate, tangible, and time-touched
things, and entered a fantastic world of hushed unreality in which the narrow, ribbon-like
road rose and fell and curved with an almost sentient and purposeful caprice amidst the
tenantless green peaks and half-deserted valleys. Except for the sound of the motor, and
the faint stir of the few lonely farms we passed at infrequent intervals, the only thing that
reached my ears was the gurgling, insidious trickle of strange waters from numberless
hidden fountains in the shadowy woods.

The nearness and intimacy of the dwarfed, domed hills now became veritably breath-
taking. Their steepness and abruptness were even greater than I had imagined from
hearsay, and suggested nothing in common with the prosaic objective world we know.
The dense, unvisited woods on those inaccessible slopes seemed to harbour alien and
incredible things, and I felt that the very outline of the hills themselves held some strange
and aeron-forgotten meaning, as if they were vast hieroglyphs left by a rumoured titan
race whose glories live only in rare, deep dreams. All the legends of the past, and all the
stupefying imputations of Henry Akeley’s letters and exhibits, welled up in my memory
to heighten the atmosphere of tension and growing menace. The purpose of my visit, and
the frightful abnormalities it postulated struck at me all at once with a chill sensation that
nearly over-balanced my ardour for strange delvings.

My guide must have noticed my disturbed attitude; for as the road grew wilder and more
irregular, and our motion slower and more jolting, his occasional pleasant comments
expanded into a steadier flow of discourse. He spoke of the beauty and weirdness of the
country, and revealed some acquaintance with the folklore studies of my prospective
host. From his polite questions it was obvious that he knew I had come for a scientific
purpose, and that I was bringing data of some importance; but he gave no sign of
appreciating the depth and awfulness of the knowledge which Akeley had finally
reached.

His manner was so cheerful, normal, and urbane that his remarks ought to have calmed
and reassured me; but oddly enough, I felt only the more disturbed as we bumped and
veered onward into the unknown wilderness of hills and woods. At times it seemed as if
he were pumping me to see what I knew of the monstrous secrets of the place, and with
every fresh utterance that vague, teasing, baffling familiarity in his voice increased. It
was not an ordinary or healthy familiarity despite the thoroughly wholesome and
cultivated nature of the voice. I somehow linked it with forgotten nightmares, and felt
that I might go mad if I recognised it. If any good excuse had existed, I think I would
have turned back from my visit. As it was, I could not well do so - and it occurred to me
that a cool, scientific conversation with Akeley himself after my arrival would help
greatly to pull me together.
Besides, there was a strangely calming element of cosmic beauty in the hypnotic landscape through which we climbed and plunged fantastically. Time had lost itself in the labyrinths behind, and around us stretched only the flowering waves of faery and the recaptured loveliness of vanished centuries - the hoary groves, the untainted pastures edged with gay autumnal blossoms, and at vast intervals the small brown farmsteads nestling amidst huge trees beneath vertical precipices of fragrant brier and meadow-grass. Even the sunlight assumed a supernal glamour, as if some special atmosphere or exhalation mantled the whole region. I had seen nothing like it before save in the magic vistas that sometimes form the backgrounds of Italian primitives. Sodoma and Leonardo conceived such expanses, but only in the distance, and through the vaultings of Renaissance arcades. We were now burrowing bodily through the midst of the picture, and I seemed to find in its necromancy a thing I had innately known or inherited and for which I had always been vainly searching.

Suddenly, after rounding an obtuse angle at the top of a sharp ascent, the car came to a standstill. On my left, across a well-kept lawn which stretched to the road and flaunted a border of whitewashed stones, rose a white, two-and-a-half-story house of unusual size and elegance for the region, with a congenes of contiguous or arcade-linked barns, sheds, and windmill behind and to the right. I recognised it at once from the snapshot I had received, and was not surprised to see the name of Henry Akeley on the galvanised-iron mailbox near the road. For some distance back of the house a level stretch of marshy and sparsely-wooded land extended, beyond which soared a steep, thickly-forested hillside ending in a jagged leafy crest. This latter, I knew, was the summit of Dark Mountain, half way up which we must have climbed already.

Alighting from the car and taking my valise, Noyes asked me to wait while he went in and notified Akeley of my advent. He himself, he added, had important business elsewhere, and could not stop for more than a moment. As he briskly walked up the path to the house I climbed out of the car myself, wishing to stretch my legs a little before settling down to a sedentary conversation. My feeling of nervousness and tension had risen to a maximum again now that I was on the actual scene of the morbid beleaguering described so hauntingly in Akeley’s letters, and I honestly dreaded the coming discussions which were to link me with such alien and forbidden worlds.

Close contact with the utterly bizarre is often more terrifying than inspiring, and it did not cheer me to think that this very bit of dusty road was the place where those monstrous tracks and that foetid green ichor had been found after moonless nights of fear and death. Idly I noticed that none of Akeley’s dogs seemed to be about. Had he sold them all as soon as the Outer Ones made peace with him? Try as I might, I could not have the same confidence in the depth and sincerity of that peace which appeared in Akeley’s final and queerly different letter. After all, he was a man of much simplicity and with little worldly experience. Was there not, perhaps, some deep and sinister undercurrent beneath the surface of the new alliance?

Led by my thoughts, my eyes turned downward to the powdery road surface which had held such hideous testimonies. The last few days had been dry, and tracks of all sorts cluttered the rutted, irregular highway despite the unfrequented nature of the district. With a vague curiosity I began to trace the outline of some of the heterogeneous
impressions, trying meanwhile to curb the flights of macabre fancy which the place and its memories suggested. There was something menacing and uncomfortable in the funereal stillness, in the muffled, subtle trickle of distant brooks, and in the crowding green peaks and black-wooded precipices that choked the narrow horizon.

And then an image shot into my consciousness which made those vague menaces and flights of fancy seem mild and insignificant indeed. I have said that I was scanning the miscellaneous prints in the road with a kind of idle curiosity - but all at once that curiosity was shockingly snuffed out by a sudden and paralysing gust of active terror. For though the dust tracks were in general confused and overlapping, and unlikely to arrest any casual gaze, my restless vision had caught certain details near the spot where the path to the house joined the highway; and had recognised beyond doubt or hope the frightful significance of those details. It was not for nothing, alas, that I had pored for hours over the Kodak views of the Outer Ones’ claw-prints which Akeley had sent. Too well did I know the marks of those loathsome nippers, and that hint of ambiguous direction which stamped the horrors as no creatures of this planet. No chance had been left me for merciful mistake. Here, indeed, in objective form before my own eyes, and surely made not many hours ago, were at least three marks which stood out blasphemously among the surprising plethora of blurred footprints leading to and from the Akeley farmhouse. They were the hellish tracks of the living fungi from Yuggoth.

I pulled myself together in time to stifle a scream. After all, what more was there than I might have expected, assuming that I had really believed Akeley’s letters? He had spoken of making peace with the things. Why, then, was it strange that some of them had visited his house? But the terror was stronger than the reassurance. Could any man be expected to look unmoved for the first time upon the claw-marks of animate beings from outer depths of space? Just then I saw Noyes emerge from the door and approach with a brisk step. I must, I reflected, keep command of myself, for the chances were that this genial friend knew nothing of Akeley’s profoundest and most stupendous probings into the forbidden.

Akeley, Noyes hastened to inform me, was glad and ready to see me; although his sudden attack of asthma would prevent him from being a very competent host for a day or two. These spells hit him hard when they came, and were always accompanied by a debilitating fever and general weakness. He never was good for much while they lasted - had to talk in a whisper, and was very clumsy and feeble in getting about. His feet and ankles swelled, too, so that he had to bandage them like a gouty old beef-eater. Today he was in rather bad shape, so that I would have to attend very largely to my own needs; but he was none the less eager for conversation. I would find him in the study at the left of the front hall - the room where the blinds were shut. He had to keep the sunlight out when he was ill, for his eyes were very sensitive.

As Noyes bade me adieu and rode off northward in his car I began to walk slowly toward the house. The door had been left ajar for me; but before approaching and entering I cast a searching glance around the whole place, trying to decide what had struck me as so intangibly queer about it. The barns and sheds looked trimly prosaic enough, and I noticed Akeley’s battered Ford in its capacious, unguarded shelter. Then the secret of the queerness reached me. It was the total silence. Ordinarily a farm is at least moderately
murmurous from its various kinds of livestock, but here all signs of life were missing.
What of the hens and the dogs? The cows, of which Akeley had said he possessed
several, might conceivably be out to pasture, and the dogs might possibly have been sold;
but the absence of any trace of cackling or grunting was truly singular.

I did not pause long on the path, but resolutely entered the open house door and closed it
behind me. It had cost me a distinct psychological effort to do so, and now that I was shut
inside I had a momentary longing for precipitate retreat. Not that the place was in the
least sinister in visual suggestion; on the contrary, I thought the graceful late-colonial
hallway very tasteful and wholesome, and admired the evident breeding of the man who
had furnished it. What made me wish to flee was something very attenuated and
indefinable. Perhaps it was a certain odd odour which I thought I noticed - though I well
knew how common musty odours are in even the best of ancient farmhouses.

VII

Refusing to let these cloudy qualms overmaster me, I recalled Noyes’s instructions and
pushed open the six-panelled, brass-latched white door on my left. The room beyond was
darkened as I had known before; and as I entered it I noticed that the queer odour was
stronger there. There likewise appeared to be some faint, half-imaginary rhythm or
vibration in the air. For a moment the closed blinds allowed me to see very little, but then
a kind of apologetic hacking or whispering sound drew my attention to a great easy-chair
in the farther, darker corner of the room. Within its shadowy depths I saw the white blur
of a man’s face and hands; and in a moment I had crossed to greet the figure who had
tried to speak. Dim though the light was, I perceived that this was indeed my host. I had
studied the Kodak picture repeatedly, and there could be no mistake about this firm,
weather-beaten face with the cropped, grizzled beard.

But as I looked again my recognition was mixed with sadness and anxiety; for certainly,
his face was that of a very sick man. I felt that there must be something more than asthma
behind that strained, rigid, immobile expression and unwinking glassy stare; and realised
how terribly the strain of his frightful experiences must have told on him. Was it not
enough to break any human being - even a younger man than this intrepid delver into the
forbidden? The strange and sudden relief, I feared, had come too late to save him from
something like a general breakdown. There was a touch of the pitiful in the limp, lifeless
way his lean hands rested in his lap. He had on a loose dressing-gown, and was swathed
around the head and high around the neck with a vivid yellow scarf or hood.

And then I saw that he was trying to talk in the same hacking whisper with which he had
greeted me. It was a hard whisper to catch at first, since the grey moustache concealed all
movements of the lips, and something in its timbre disturbed me greatly; but by
concentrating my attention I could soon make out its purport surprisingly well. The
accent was by no means a rustic one, and the language was even more polished than
correspondence had led me to expect.

"Mr. Wilmarth, I presume? You must pardon my not rising. I am quite ill, as Mr. Noyes
must have told you; but I could not resist having you come just the same. You know what
I wrote in my last letter - there is so much to tell you tomorrow when I shall feel better. I
can’t say how glad I am to see you in person after all our many letters. You have the file with you, of course? And the Kodak prints and records? Noyes put your valise in the hall - I suppose you saw it. For tonight I fear you’ll have to wait on yourself to a great extent. Your room is upstairs - the one over this - and you’ll see the bathroom door open at the head of the staircase. There’s a meal spread for you in the dining-room - right through this door at your right - which you can take whenever you feel like it. I’ll be a better host tomorrow - but just now weakness leaves me helpless.

"Make yourself at home - you might take out the letters and pictures and records and put them on the table here before you go upstairs with your bag. It is here that we shall discuss them - you can see my phonograph on that corner stand.

"No, thanks - there’s nothing you can do for me. I know these spells of old. Just come back for a little quiet visiting before night, and then go to bed when you please. I’ll rest right here - perhaps sleep here all night as I often do. In the morning I’ll be far better able to go into the things we must go into. You realise, of course, the utterly stupendous nature of the matter before us. To us, as to only a few men on this earth, there will be opened up gulfs of time and space and knowledge beyond anything within the conception of human science or philosophy.

"Do you know that Einstein is wrong, and that certain objects and forces can move with a velocity greater than that of light? With proper aid I expect to go backward and forward in time, and actually see and feel the earth of remote past and future epochs. You can’t imagine the degree to which those beings have carried science. There is nothing they can’t do with the mind and body of living organisms. I expect to visit other planets, and even other stars and galaxies. The first trip will be to Yuggoth, the nearest world fully peopled by the beings. It is a strange dark orb at the very rim of our solar system - unknown to earthly astronomers as yet. But I must have written you about this. At the proper time, you know, the beings will direct thought-currents toward us and cause it to be discovered - or perhaps let one of their human allies give the scientists a hint.

"There are mighty cities on Yuggoth - great tiers of terraced towers built of black stone like the specimen I tried to send you. That came from Yuggoth. The sun shines there no brighter than a star, but the beings need no light. They have other subtler senses, and put no windows in their great houses and temples. Light even hurts and hampers and confuses them, for it does not exist at all in the black cosmos outside time and space where they came from originally. To visit Yuggoth would drive any weak man mad - yet I am going there. The black rivers of pitch that flow under those mysterious cyclopean bridges - things built by some elder race extinct and forgotten before the beings came to Yuggoth from the ultimate voids - ought to be enough to make any man a Dante or Poe if he can keep sane long enough to tell what he has seen.

"But remember - that dark world of fungoid gardens and windowless cities isn’t really terrible. It is only to us that it would seem so. Probably this world seemed just as terrible to the beings when they first explored it in the primal age. You know they were here long before the fabulous epoch of Cthulhu was over, and remember all about sunken R’lyeh when it was above the waters. They’ve been inside the earth, too - there are openings which human beings know nothing of - some of them in these very Vermont hills - and
great worlds of unknown life down there; blue-litten K’n-yan, red-litten Yoth, and black, lightless N’kai. It’s from N’kai that frightful Tsathoggua came - you know, the amorphous, toad-like god-creature mentioned in the *Pnakotic Manuscripts* and the *Necronomicon* and the Commoriom myth-cycle preserved by the Atlantean high-priest Klarkash-Ton.

"But we will talk of all this later on. It must be four or five o’clock by this time. Better bring the stuff from your bag, take a bite, and then come back for a comfortable chat."

Very slowly I turned and began to obey my host; fetching my valise, extracting and depositing the desired articles, and finally ascending to the room designated as mine. With the memory of that roadside claw-print fresh in my mind, Akeley’s whispered paragraphs had affected me queerly; and the hints of familiarity with this unknown world of fungous life - forbidden Yuggoth - made my flesh creep more than I cared to own. I was tremendously sorry about Akeley’s illness, but had to confess that his hoarse whisper had a hateful as well as pitiful quality. If only he wouldn’t gloat so about Yuggoth and its black secrets!

My room proved a very pleasant and well-furnished one, devoid alike of the musty odour and disturbing sense of vibration; and after leaving my valise there I descended again to greet Akeley and take the lunch he had set out for me. The dining-room was just beyond the study, and I saw that a kitchen ell extended still farther in the same direction. On the dining-table an ample array of sandwiches, cake, and cheese awaited me, and a Thermos-bottle beside a cup and saucer testified that hot coffee had not been forgotten. After a well-relished meal I poured myself a liberal cup of coffee, but found that the culinary standard had suffered a lapse in this one detail. My first spoonful revealed a faintly unpleasant acrid taste, so that I did not take more. Throughout the lunch I thought of Akeley sitting silently in the great chair in the darkened next room.

Once I went in to beg him to share the repast, but he whispered that he could eat nothing as yet. Later on, just before he slept, he would take some malted milk - all he ought to have that day.

After lunch I insisted on clearing the dishes away and washing them in the kitchen sink - incidentally emptying the coffee which I had not been able to appreciate. Then returning to the darkened study I drew up a chair near my host’s corner and prepared for such conversation as he might feel inclined to conduct. The letters, pictures, and record were still on the large centre-table, but for the nonce we did not have to draw upon them. Before long I forgot even the bizarre odour and curious suggestions of vibration.

I have said that there were things in some of Akeley’s letters - especially the second and most voluminous one - which I would not dare to quote or even form into words on paper. This hesitancy applies with still greater force to the things I heard whispered that evening in the darkened room among the lonely hills. Of the extent of the cosmic horrors unfolded by that raucous voice I cannot even hint. He had known hideous things before, but what he had learned since making his pact with the Outside Things was almost too much for sanity to bear. Even now I absolutely refused to believe what he implied about the constitution of ultimate infinity, the juxtaposition of dimensions, and the frightful
position of our known cosmos of space and time in the unending chain of linked cosmos-atoms which makes up the immediate super-cosmos of curves, angles, and material and semi-material electronic organisation.

Never was a sane man more dangerously close to the arcana of basic entity - never was an organic brain nearer to utter annihilation in the chaos that transcends form and force and symmetry. I learned whence Cthulhu first came, and why half the great temporary stars of history had flared forth. I guessed - from hints which made even my informant pause timidly - the secret behind the Magellanic Clouds and globular nebulae, and the black truth veiled by the immemorial allegory of Tao. The nature of the Doels was plainly revealed, and I was told the essence (though not the source) of the Hounds of Tindalos. The legend of Yig, Father of Serpents, remained figurative no longer, and I started with loathing when told of the monstrous nuclear chaos beyond angled space which the Necronomicon had mercifully cloaked under the name of Azathoth. It was shocking to have the foulest nightmares of secret myth cleared up in concrete terms whose stark, morbid hatefulness exceeded the boldest hints of ancient and mediaeval mystics. Ineluctably I was led to believe that the first whisperers of these accursed tales must have had discourse with Akeley’s Outer Ones, and perhaps have visited outer cosmic realms as Akeley now proposed visiting them.

I was told of the Black Stone and what it implied, and was glad that it had not reached me. My guesses about those hieroglyphics had been all too correct! And yet Akeley now seemed reconciled to the whole fiendish system he had stumbled upon; reconciled and eager to probe farther into the monstrous abyss. I wondered what beings he had talked with since his last letter to me, and whether many of them had been as human as that first emissary he had mentioned. The tension in my head grew insufferable, and I built up all sorts of wild theories about that queer, persistent odour and those insidious hints of vibration in the darkened room.

Night was falling now, and as I recalled what Akeley had written me about those earlier nights I shuddered to think there would be no moon. Nor did I like the way the farmhouse nestled in the lee of that colossal forested slope leading up to Dark Mountain’s unvisited crest. With Akeley’s permission I lighted a small oil lamp, turned it low, and set it on a distant bookcase beside the ghostly bust of Milton; but afterward I was sorry I had done so, for it made my host’s strained, immobile face and listless hands look damnably abnormal and corpselike. He seemed half-incapable of motion, though I saw him nod stiffly once in awhile.

After what he had told, I could scarcely imagine what profounder secrets he was saving for the morrow; but at last it developed that his trip to Yuggoth and beyond - and my own possible participation in it - was to be the next day’s topic. He must have been amused by the start of horror I gave at hearing a cosmic voyage on my part proposed, for his head wabbled violently when I showed my fear. Subsequently he spoke very gently of how human beings might accomplish - and several times had accomplished - the seemingly impossible flight across the interstellar void. It seemed that complete human bodies did not indeed make the trip, but that the prodigious surgical, biological, chemical, and mechanical skill of the Outer Ones had found a way to convey human brains without their concomitant physical structure.
There was a harmless way to extract a brain, and a way to keep the organic residue alive during its absence. The bare, compact cerebral matter was then immersed in an occasionally replenished fluid within an ether-tight cylinder of a metal mined in Yuggoth, certain electrodes reaching through and connecting at will with elaborate instruments capable of duplicating the three vital faculties of sight, hearing, and speech. For the winged fungus-beings to carry the brain-cylinders intact through space was an easy matter. Then, on every planet covered by their civilisation, they would find plenty of adjustable faculty-instruments capable of being connected with the encased brains; so that after a little fitting these travelling intelligences could be given a full sensory and articulate life - albeit a bodiless and mechanical one - at each stage of their journeying through and beyond the space-time continuum. It was as simple as carrying a phonograph record about and playing it wherever a phonograph of corresponding make exists. Of its success there could be no question. Akeley was not afraid. Had it not been brilliantly accomplished again and again?

For the first time one of the inert, wasted hands raised itself and pointed stiffly to a high shelf on the farther side of the room. There, in a neat row, stood more than a dozen cylinders of a metal I had never seen before - cylinders about a foot high and somewhat less in diameter, with three curious sockets set in an isosceles triangle over the front convex surface of each. One of them was linked at two of the sockets to a pair of singular-looking machines that stood in the background. Of their purport I did not need to be told, and I shivered as with ague. Then I saw the hand point to a much nearer corner where some intricate instruments with attached cords and plugs, several of them much like the two devices on the shelf behind the cylinders, were huddled together.

"There are four kinds of instruments here, Wilmarth," whispered the voice. "Four kinds - three faculties each - makes twelve pieces in all. You see there are four different sorts of beings represented in those cylinders up there. Three humans, six fungoid beings who can’t navigate space corporeally, two beings from Neptune (God! if you could see the body this type has on its own planet!), and the rest entities from the central caverns of an especially interesting dark star beyond the galaxy. In the principal outpost inside Round Hill you’ll now and then find more cylinders and machines - cylinders of extra-cosmic brains with different senses from any we know - allies and explorers from the uttermost Outside - and special machines for giving them impressions and expression in the several ways suited at once to them and to the comprehensions of different types of listeners. Round Hill, like most of the beings’ main outposts all through the various universes, is a very cosmopolitan place. Of course, only the more common types have been lent to me for experiment.

"Here - take the three machines I point to and set them on the table. That tall one with the two glass lenses in front - then the box with the vacuum tubes and sounding-board - and now the one with the metal disc on top. Now for the cylinder with the label ‘B-67’ pasted on it. Just stand in that Windsor chair to reach the shelf. Heavy? Never mind! Be sure of the number - B-67. Don’t bother that fresh, shiny cylinder joined to the two testing instruments - the one with my name on it. Set B-67 on the table near where you’ve put the machines - and see that the dial switch on all three machines is jammed over to the extreme left.
"Now connect the cord of the lens machine with the upper socket on the cylinder - there! Join the tube machine to the lower left-hand socket, and the disc apparatus to the outer socket. Now move all the dial switches on the machine over to the extreme right - first the lens one, then the disc one, and then the tube one. That’s right. I might as well tell you that this is a human being - just like any of us. I’ll give you a taste of some of the others tomorrow."

To this day I do not know why I obeyed those whispers so slavishly, or whether I thought Akeley was mad or sane. After what had gone before, I ought to have been prepared for anything; but this mechanical mummer seemed so like the typical vagaries of crazed inventors and scientists that it struck a chord of doubt which even the preceding discourse had not excited. What the whisperer implied was beyond all human belief - yet were not the other things still farther beyond, and less preposterous only because of their remoteness from tangible concrete proof?

As my mind reeled amidst this chaos, I became conscious of a mixed grating and whirring from all three of the machines lately linked to the cylinder - a grating and whirring which soon subsided into a virtual noiselessness. What was about to happen? Was I to hear a voice? And if so, what proof would I have that it was not some cleverly concocted radio device talked into by a concealed but closely watched speaker? Even now I am unwilling to swear just what I heard, or just what phenomenon really took place before me. But something certainly seemed to take place.

To be brief and plain, the machine with the tubes and sound-box began to speak, and with a point and intelligence which left no doubt that the speaker was actually present and observing us. The voice was loud, metallic, lifeless, and plainly mechanical in every detail of its production. It was incapable of inflection or expressiveness, but scraped and rattled on with a deadly precision and deliberation.

"Mr. Wilmarth," it said, "I hope I do not startle you. I am a human being like yourself, though my body is now resting safely under proper vitalising treatment inside Round Hill, about a mile and a half east of here. I myself am here with you - my brain is in that cylinder and I see, hear, and speak through these electronic vibrators. In a week I am going across the void as I have been many times before, and I expect to have the pleasure of Mr. Akeley’s company. I wish I might have yours as well; for I know you by sight and reputation, and have kept close track of your correspondence with our friend. I am, of course, one of the men who have become allied with the outside beings visiting our planet. I met them first in the Himalayas, and have helped them in various ways. In return they have given me experiences such as few men have ever had.

"Do you realise what it means when I say I have been on thirty-seven different celestial bodies - planets, dark stars, and less definable objects - including eight outside our galaxy and two outside the curved cosmos of space and time? All this has not harmed me in the least. My brain has been removed from my body by fissions so adroit that it would be crude to call the operation surgery. The visiting beings have methods which make these extractions easy and almost normal - and one’s body never ages when the brain is out of it. The brain, I may add, is virtually immortal with its mechanical faculties and a limited nourishment supplied by occasional changes of the preserving fluid."
"Altogether, I hope most heartily that you will decide to come with Mr. Akeley and me. The visitors are eager to know men of knowledge like yourself, and to show them the great abysses that most of us have had to dream about in fanciful ignorance. It may seem strange at first to meet them, but I know you will be above minding that. I think Mr. Noyes will go along, too - the man who doubtless brought you up here in his car. He has been one of us for years - I suppose you recognised his voice as one of those on the record Mr. Akeley sent you."

At my violent start the speaker paused a moment before concluding. "So Mr. Wilmarth, I will leave the matter to you; merely adding that a man with your love of strangeness and folklore ought never to miss such a chance as this. There is nothing to fear. All transitions are painless; and there is much to enjoy in a wholly mechanised state of sensation. When the electrodes are disconnected, one merely drops off into a sleep of especially vivid and fantastic dreams.

"And now, if you don’t mind, we might adjourn our session till tomorrow. Good night - just turn all the switches back to the left; never mind the exact order, though you might let the lens machine be last. Good night, Mr. Akeley - treat our guest well! Ready now with those switches?"

That was all. I obeyed mechanically and shut off all three switches, though dazed with doubt of everything that had occurred. My head was still reeling as I heard Akeley’s whispering voice telling me that I might leave all the apparatus on the table just as it was. He did not essay any comment on what had happened, and indeed no comment could have conveyed much to my burdened faculties. I heard him telling me I could take the lamp to use in my room, and deduced that he wished to rest alone in the dark. It was surely time he rested, for his discourse of the afternoon and evening had been such as to exhaust even a vigorous man. Still dazed, I bade my host good night and went upstairs with the lamp, although I had an excellent pocket flashlight with me.

I was glad to be out of that downstairs study with the queer odour and vague suggestions of vibration, yet could not of course escape a hideous sense of dread and peril and cosmic abnormality as I thought of the place I was in and the forces I was meeting. The wild, lonely region, the black, mysteriously forested slope towering so close behind the house; the footprint in the road, the sick, motionless whisperer in the dark, the hellish cylinders and machines, and above all the invitations to strange surgery and stranger voyagings - these things, all so new and in such sudden succession, rushed in on me with a cumulative force which sapped my will and almost undermined my physical strength.

To discover that my guide Noyes was the human celebrant in that monstrous bygone Sabbat-ritual on the phonograph record was a particular shock, though I had previously sensed a dim, repellent familiarity in his voice. Another special shock came from my own attitude toward my host whenever I paused to analyse it; for much as I had instinctively liked Akeley as revealed in his correspondence, I now found that he filled me with a distinct repulsion. His illness ought to have excited my pity; but instead, it gave me a kind of shudder. He was so rigid and inert and corpselike - and that incessant whispering was so hateful and unhuman!
It occurred to me that this whispering was different from anything else of the kind I had ever heard; that, despite the curious motionlessness of the speaker’s moustache-screened lips, it had a latent strength and carrying-power remarkable for the wheezing of an asthmatic. I had been able to understand the speaker when wholly across the room, and once or twice it had seemed to me that the faint but penetrant sounds represented not so much weakness as deliberate repression - for what reason I could not guess. From the first I had felt a disturbing quality in their timbre. Now, when I tried to weigh the matter, I thought I could trace this impression to a kind of subconscious familiarity like that which had made Noyes’s voice so hazily ominous. But when or where I had encountered the thing it hinted at, was more than I could tell.

One thing was certain - I would not spend another night here. My scientific zeal had vanished amidst fear and loathing, and I felt nothing now but a wish to escape from this net of morbidity and unnatural revelation. I knew enough now. It must indeed be true that strange cosmic linkages do exist - but such things are surely not meant for normal human beings to meddle with.

Blasphemous influences seemed to surround me and press chokingly upon my senses. Sleep, I decided, would be out of the question; so I merely extinguished the lamp and threw myself on the bed fully dressed. No doubt it was absurd, but I kept ready for some unknown emergency; gripping in my right hand the revolver I had brought along, and holding the pocket flashlight in my left. Not a sound came from below, and I could imagine how my host was sitting there with cadaverous stiffness in the dark.

Somewhere I heard a clock ticking, and was vaguely grateful for the normality of the sound. It reminded me, though, of another thing about the region which disturbed me - the total absence of animal life. There were certainly no farm beasts about, and now I realised that even the accustomed night-noises of wild living things were absent. Except for the sinister trickle of distant unseen waters, that stillness was anomalous - interplanetary - and I wondered what star-spawned, intangible blight could be hanging over the region. I recalled from old legends that dogs and other beasts had always hated the Outer Ones, and thought of what those tracks in the road might mean.

VIII

Do not ask me how long my unexpected lapse into slumber lasted, or how much of what ensued was sheer dream. If I tell you that I awakened at a certain time, and heard and saw certain things, you will merely answer that I did not wake then; and that everything was a dream until the moment when I rushed out of the house, stumbled to the shed where I had seen the old Ford, and seized that ancient vehicle for a mad, aimless race over the haunted hills which at last landed me - after hours of jolting and winding through forest-threatened labyrinths - in a village which turned out to be Townshend.

You will also, of course, discount everything else in my report; and declare that all the pictures, record-sounds, cylinder-and-machine sounds, and kindred evidences were bits of pure deception practiced on me by the missing Henry Akeley. You will even hint that he conspired with other eccentrics to carry out a silly and elaborate hoax - that he had the express shipment removed at Keene, and that he had Noyes make that terrifying wax
record. It is odd, though, that Noyes has not ever yet been identified; that he was unknown at any of the villages near Akeley’s place, though he must have been frequently in the region. I wish I had stopped to memorize the license-number of his car - or perhaps it is better after all that I did not. For I, despite all you can say, and despite all I sometimes try to say to myself, know that loathsome outside influences must be lurking there in the half-unknown hills - and that, those influences have spies and emissaries in the world of men. To keep as far as possible from such influences and such emissaries is all that I ask of life in future.

When my frantic story sent a sheriff’s posse out to the farmhouse, Akeley was gone without leaving a trace. His loose dressing gown, yellow scarf, and foot-bandages lay on the study floor near his corner. easy-chair, and it could not be decided whether any of his other apparel had vanished with him. The dogs and livestock were indeed missing, and there were some curious bullet-holes both on the house’s exterior and on some of the walls within; but beyond this nothing unusual could be detected. No cylinders or machines, none of the evidences I had brought in my valise, no queer odour or vibration-sense, no foot-prints in the road, and none of the problematical things I glimpsed at the very last.

I stayed a week in Brattleboro after my escape, making inquiries among people of every kind who had known Akeley; and the results convince me that the matter is no figment of dream or delusion.’ Akeley’s queer purchase of dogs and ammunition and chemicals, and the cutting of his telephone wires, are matters of record; while all who knew him - including his son in California - concede that his occasional remarks on strange studies had a certain consistency. Solid citizens believe he was mad, and unhesitatingly pronounce all reported evidences mere hoaxes devised with insane cunning and perhaps abetted by eccentric associates; but the lowlier country folk sustain his statements in every detail. He had showed some of these rustics his photographs and black stone, and had played the hideous record for them; and they all said the footprints and buzzing voice were like those described in ancestral legends.

They said, too, that suspicious sights and sounds had been noticed increasingly around Akeley’s house after he found the black stone, and that the place was now avoided by everybody except the mail man and other casual, tough-minded people. Dark Mountain and Round Hill were both notoriously haunted spots, and I could find no one who had ever closely explored either. Occasional disappearances of natives throughout the district’s history were well attested, and these now included the semi-vagabond Walter Brown, whom Akeley’s letters had mentioned. I even came upon one farmer who thought he had personally glimpsed one of the queer bodies at flood-time in the swollen West River, but his tale was too confused to be really valuable.

When I left Brattleboro I resolved never to go back to Vermont, and I feel quite certain I shall keep my resolution. Those wild hills are surely the outpost of a frightful cosmic race - as I doubt all the less since reading that a new ninth planet has been glimpsed beyond Neptune, just as those influences had said it would be glimpsed. Astronomers, with a hideous appropriateness they little suspect, have named this thing "Pluto." I feel, beyond question, that it is nothing less than nighted Yuggoth - and I shiver when I try to figure out the real reason why its monstrous denizens wish it to be known in this way at this
especial time. I vainly try to assure myself that these daemoniac creatures are not gradually leading up to some new policy hurtful to the earth and its normal inhabitants.

But I have still to tell of the ending of that terrible night in the farmhouse. As I have said, I did finally drop into a troubled doze; a doze filled with bits of dream which involved monstrous landscape-glimpses. Just what awaked me I cannot yet say, but that I did indeed awake at this given point I feel very certain. My first confused impression was of stealthily creaking floor-boards in the hall outside my door, and of a clumsy, muffled fumbling at the latch. This, however, ceased almost at once; so that my really clear impressions begin with the voices heard from the study below. There seemed to be several speakers, and I judged that they were controversially engaged.

By the time I had listened a few seconds I was broad awake, for the nature of the voices was such as to make all thought of sleep ridiculous. The tones were curiously varied, and no one who had listened to that accursed phonograph record could harbour any doubts about the nature of at least two of them. Hideous though the idea was, I knew that I was under the same roof with nameless things from abysmal space; for those two voices were unmistakably the blasphemous buzzings which the Outside Beings used in their communication with men. The two were individually different - different in pitch, accent, and tempo - but they were both of the same damnable general kind.

A third voice was indubitably that of a mechanical utterance-machine connected with one of the detached brains in the cylinders. There was as little doubt about that as about the buzzings; for the loud, metallic, lifeless voice of the previous evening, with its inflectionless, expressionless scraping and rattling, and its impersonal precision and deliberation, had been utterly unforgettable. For a time I did not pause to question whether the intelligence behind the scraping was the identical one which had formerly talked to me; but shortly afterward I reflected that any brain would emit vocal sounds of the same quality if linked to the same mechanical speech-producer; the only possible differences being in language, rhythm, speed, and pronunciation. To complete the eldritch colloquy there were two actually human voices - one the crude speech of an unknown and evidently rustic man, and the other the suave Bostonian tones of my erstwhile guide Noyes.

As I tried to catch the words which the stoutly-fashioned floor so bafflingly intercepted, I was also conscious of a great deal of stirring and scratching and shuffling in the room below; so that I could not escape the impression that it was full of living beings - many more than the few whose speech I could single out. The exact nature of this stirring is extremely hard to describe, for very few good bases of comparison exist. Objects seemed now and then to move across the room like conscious entities; the sound of their footfalls having something about it like a loose, hard-surfaced clattering - as of the contact of ill-coordinated surfaces of horn or hard rubber. It was, to use a more concrete but less accurate comparison, as if people with loose, splintery wooden shoes were shambling and rattling about on the polished board floor. Of the nature and appearance of those responsible for the sounds, I did not care to speculate.

Before long I saw that it would be impossible to distinguish any connected discourse. Isolated words - including the names of Akeley and myself - now and then floated up,
especially when uttered by the mechanical speech-producer; but their true significance was lost for want of continuous context. Today I refuse to form any definite deductions from them, and even their frightful effect on me was one of suggestion rather than of revelation. A terrible and abnormal conclave, I felt certain, was assembled below me; but for what shocking deliberations I could not tell. It was curious how this unquestioned sense of the malign and the blasphemous pervaded me despite Akeley’s assurances of the Outsider’s friendliness.

With patient listening I began to distinguish clearly between voices, even though I could not grasp much of what any of the voices said. I seemed to catch certain typical emotions behind some of the speakers. One of the buzzing voices, for example, held an unmistakable note of authority; whilst the mechanical voice, notwithstanding its artificial loudness and regularity, seemed to be in a position of subordination and pleading. Noyes’s tones exuded a kind of conciliatory atmosphere. The others I could make no attempt to interpret. I did not hear the familiar whisper of Akeley, but well knew that such a sound could never penetrate the solid flooring of my room.

I will try to set down some of the few disjointed words and other sounds I caught, labelling the speakers of the words as best I know how. It was from the speech-machine that I first picked up a few recognisable phrases.

(The Speech-Machine)
"...brought it on myself... sent back the letters and the record... end on it... taken in... seeing and hearing... damn you... impersonal force, after all... fresh, shiny cylinder... great God..."

(First Buzzing Voice)
"...time we stopped... small and human... Akeley... brain... saying..."

(Second Buzzing Voice)
"Nyarlathotep... Wilmarth... records and letters... cheap imposture..."

(Noyes)
"...(an unpronounceable word or name, possibly N’gah-Kthun) harmless... peace... couple of weeks... theatrical... told you that before..."

(First Buzzing Voice)
"...no reason... original plan... effects... Noyes can watch Round Hill... fresh cylinder... Noyes’s car..."

(Noyes)
"...well... all yours... down here... rest... place..."

(Several Voices at Once in Indistinguishable Speech)
That is the substance of what my ears brought me as I lay rigid upon that strange upstairs bed in the haunted farmhouse among the daemoniac hills - lay there fully dressed, with a revolver clenched in my right hand and a pocket flashlight gripped in my left. I became, as I have said, broad awake; but a kind of obscure paralysis nevertheless kept me inert till long after the last echoes of the sounds had died away. I heard the wooden, deliberate ticking of the ancient Connecticut clock somewhere far below, and at last made out the irregular snoring of a sleeper. Akeley must have dozed off after the strange session, and I could well believe that he needed to do so.

Just what to think or what to do was more than I could decide. After all, what had I heard beyond things which previous information might have led me to expect? Had I not known that the nameless Outsiders were now freely admitted to the farmhouse? No doubt Akeley had been surprised by an unexpected visit from them. Yet something in that fragmentary discourse had chilled me immeasurably, raised the most grotesque and horrible doubts, and made me wish fervently that I might wake up and prove everything a dream. I think my subconscious mind must have caught something which my consciousness has not yet recognised. But what of Akeley? Was he not my friend, and would he not have protested if any harm were meant me? The peaceful snoring below seemed to cast ridicule on all my suddenly intensified fears.

Was it possible that Akeley had been imposed upon and used as a lure to draw me into the hills with the letters and pictures and phonograph record? Did those beings mean to engulf us both in a common destruction because we had come to know too much? Again I thought of the abruptness and unnaturalness of that change in the situation which must have occurred between Akeley’s penultimate and final letters. Something, my instinct told me, was terribly wrong. All was not as it seemed. That acrid coffee which I refused - had there not been an attempt by some hidden, unknown entity to drug it? I must talk to Akeley at once, and restore his sense of proportion. They had hypnotised him with their promises of cosmic revelations, but now he must listen to reason. We must get out of this before it would be too late. If he lacked the will power to make the break for liberty, I would supply it. Or if I could not persuade him to go, I could at least go myself. Surely he would let me take his Ford and leave it in a garage in Brattleboro. I had noticed it in the shed - the door being left unlocked and open now that peril was deemed past - and I believed there was a good chance of its being ready for instant use. That momentary dislike of Akeley which I had felt during and after the evening’s conversation was all gone now. He was in a position much like my own, and we must stick together. Knowing his indisposed condition, I hated to wake him at this juncture, but I knew that I must. I could not stay in this place till morning as matters stood.
At last I felt able to act, and stretched myself vigorously to regain command of my muscles. Arising with a caution more impulsive than deliberate, I found and donned my hat, took my valise, and started downstairs with the flashlight’s aid. In my nervousness I kept the revolver clutched in my right hand, being able to take care of both valise and flashlight with my left. Why I exerted these precautions I do not really know, since I was even then on my way to awaken the only other occupant of the house.

As I half-tiptoed down the creaking stairs to the lower hall I could hear the sleeper more plainly, and noticed that he must be in the room on my left - the living-room I had not entered. On my right was the gaping blackness of the study in which I had heard the voices. Pushing open the unlatched door of the living-room I traced a path with the flashlight toward the source of the snoring, and finally turned the beams on the sleeper’s face. But in the next second I hastily turned them away and commenced a catlike retreat to the hall, my caution this time springing from reason as well as from instinct. For the sleeper on the couch was not Akeley at all, but my quondam guide Noyes.

Just what the real situation was, I could not guess; but common sense told me that the safest thing was to find out as much as possible before arousing anybody. Regaining the hall, I silently closed and latched the living-room door after me; thereby lessening the chances of awakening Noyes. I now cautiously entered the dark study, where I expected to find Akeley, whether asleep or awake, in the great corner chair which was evidently his favorite resting-place. As I advanced, the beams of my flashlight caught the great centre-table, revealing one of the hellish cylinders with sight and hearing machines attached, and with a speech machine standing close by, ready to be connected at any moment. This, I reflected, must be the encased brain I had heard talking during the frightful conference; and for a second I had a perverse impulse to attach the speech machine and see what it would say.

It must, I thought, be conscious of my presence even now; since the sight and hearing attachments could not fail to disclose the rays of my flashlight and the faint creaking of the floor beneath my feet. But in the end I did not dare meddle with the thing. Idly saw that it was the fresh shiny cylinder with Akeley’s name on it, which I had noticed on the shelf earlier in the evening and which my host had told me not to bother. Looking back at that moment, I can only regret my timidity and wish that I had boldly caused the apparatus to speak. God knows what mysteries and horrible doubts and questions of identity it might have cleared up! But then, it may be merciful that I let it alone.

From the table I turned my flashlight to the corner where I thought Akeley was, but found to my perplexity that the great easy-chair was empty of any human occupant asleep or awake. From the seat to the floor there trailed voluminously the familiar old dressing-gown, and near it on the floor lay the yellow scarf and the huge foot-bandages I had thought so odd. As I hesitated, striving to conjecture where Akeley might be, and why he had so suddenly discarded his necessary sick-room garments, I observed that the queer odour and sense of vibration were no longer in the room. What had been their cause? Curiously it occurred to me that I had noticed them only in Akeley’s vicinity. They had been strongest where he sat, and wholly absent except in the room with him or just outside the doors of that room. I paused, letting the flashlight wander about the dark study and racking my brain for explanations of the turn affairs had taken.
Would to Heaven I had quietly left the place before allowing that light to rest again on the vacant chair. As it turned out, I did not leave quietly; but with a muffled shriek which must have disturbed, though it did not quite awake, the sleeping sentinel across the hall. That shriek, and Noyes’s still-unbroken snore, are the last sounds I ever heard in that morbidity-choked farmhouse beneath the black-wooded crest of haunted mountain - that focus of transcasmic horror amidst the lonely green hills and curse-muttering brooks of a spectral rustic land.

It is a wonder that I did not drop flashlight, valise, and revolver in my wild scramble, but somehow I failed to lose any of these. I actually managed to get out of that room and that house without making any further noise, to drag myself and my belongings safely into the old Ford in the shed, and to set that archaic vehicle in motion toward some unknown point of safety in the black, moonless night. The ride that followed was a piece of delirium out of Poe or Rimbaud or the drawings of Dore, but finally I reached Townshend. That is all. If my sanity is still unshaken, I am lucky. Sometimes I fear what the years will bring, especially since that new planet Pluto has been so curiously discovered.

As I have implied, I let my flashlight return to the vacant easy-chair after its circuit of the room; then noticing for the first time the presence of certain objects in the seat, made inconspicuous by the adjacent loose folds of the empty dressing-gown. These are the objects, three in number, which the investigators did not find when they came later on. As I said at the outset, there was nothing of actual visual horror about them. The trouble was in what they led one to infer. Even now I have my moments of half-doubt - moments in which I half-accept the scepticism of those who attribute my whole experience to dream and nerves and delusion.

The three things were damnably clever constructions of their kind, and were furnished with ingenious metallic clamps to attach them to organic developments of which I dare not form any conjecture. I hope - devoutly hope-that they were the waxen products of a master artist, despite what my inmost fears tell me. Great God! That whisperer in darkness with its morbid odour and vibrations! Sorcerer, emissary, changeling, outsider.. . that hideous repressed buzzing. . . and all the time in that fresh, shiny cylinder on the shelf. . . poor devil. . . "Prodigious surgical, biological, chemical, and mechanical skill.. .

For the things in the chair, perfect to the last, subtle detail of microscopic resemblance - or identity - were the face and hands of Henry Wentworth Akeley.

END
