

The Disturbing Reality of Trauma-Based Mind Control

Feb 18/11

"Multiple" Kim displays art from a few of her many "alters"
by Zen Gardner

In anyone's sincere quest for truth, they will undoubtedly come up against the area of deliberate trauma-based mind control. At first it may seem like "conspiracy theory on steroids", but as you investigate this subject further it becomes a dark, stark reality that cannot be shaken.

Fritz Springmeyer, brave whistleblower now serving jail time for false charges, says the following:

There are many dangers to the human race, some real and some imagined. I believe that the trauma-based mind control...is the greatest danger to the human race. It gives evil men the power to carry out any evil deeds totally undetected.

Over the years, I have spent thousands of hours studying the Illuminati, the Intelligence agencies of the world, and the occult world in general. The centerpiece of these organizations is the trauma-based mind control that they carry out. Without the ability to carry out this sophisticated type of mind-control using MPD (multiple personality disorder), drugs, hypnosis and electronics and other control methodologies, these organizations would fail to keep their dark evil deeds secret. You many only be able to take this subject in small doses at first as the scope and implications are truly staggering. That anyone would perform such acts on innocent children and adults for control and dominion for covert purposes is almost beyond belief. Most think psychological experimentation went out with Mengele and the Nazis, or was a strange aberration of a few

disturbed psychologists in the 50's.

No. It's alive and thriving as a social engineering tool and you're seeing it in use every day.

The usage is vast, the implications horrific.

It's on public record that MK ULTRA, the mind control research which CIA director Admiral Stansfield Turner admitted to in 1977 spent millions of dollars studying Voodoo, witchcraft, and psychics. On August 3, 1977, at a Senate hearing the then CIA director Admiral Stansfield Turner disclosed that the CIA had been conducting mind control on countless numbers of unsuspecting victims for years, without their knowledge or consent.

These CIA mind-control operations were carried out with the participation of a least 185 scientists and at least 80 American institutions, including prisons, pharmaceutical companies, hospitals, and 44 medical colleges & universities. Many of America's most prestigious institutes of medical research, had cooperated with the CIA. as well as numerous big name corporations.

Casey admitted that day that the CIA did mind-control consisting of drugs, hypnosis & electro-shock. A few of the victims of the Monarch Project were even awarded financial compensation for their misery.

But what was admitted was admitted in the spirit of covering up the extent of the full truth. The compensation was actually hush money, because victims were given "gag orders" by judges not to talk about what had happened to them. The subject is pervasive and deserves your attention. It can be depressing so take it in small doses, but don't discount it. It's an ugly Satanic Illuminati control technique woven into individuals and concepts in today's realms of the media, education, politics, the military, entertainment and science. And we all need to be aware of its extent and help expose it.

Enter Kim Noble (pseudonym)

I came across perhaps the most revealing and confirming visual evidence of mind control and related abuses I've seen yet. It's posted on the thoroughly exposing PseudoOccultMedia.org site and involves a startling MPD (multiple personality disorder) subject who has as many as 20 alters, or alter personalities, several of whom have learned to paint after working with an art therapist.

"To all intents and purposes, each of Kim's personalities is an artist in their own right: Patricia paints the solitary desert landscapes, Bonny's pictures often feature robotic dancing figures or "frieze people", Suzy repeatedly paints a kneeling mother, Judy's canvasses are large, conceptual pieces while Ria's work reveals deeply traumatic events involving children.

These disturbing images are at the root of Kim's extraordinary condition; DID is a creative mental survival strategy whereby the personality splits at a young age due to severe and chronic trauma. The number of personalities that exist often depends on how long the trauma lasts. But Kim herself has no memory of being abused as a child; she has been protected over the years by her alters." (from interview in article below)

The images in this the article linked to below are vivid and sometimes very troubling. Besides the depictions of horrible abuse that only someone who would have experienced these would know, the abstract images speak a language I find extremely compelling as to the psychological fracturing these MKUltra Monarch mind control programs cause.

The material below is not for the fainthearted. If you're a student of the subject this will only confirm what you have learned. But the fact is, these are mental snapshots of very real experiences the various alters inside Kim have experienced. There is no other explanation according to psychologists, and your own intuition as you'll find out.

The author explains:

"The paintings featured in this post are by an artist with MPD/DID going by the name of Kim Noble, who began painting after time with an art therapist, each of her alters developed their own distinctive style...Although she does not remember the abuse she suffered (her front/dominant alters anyway), it is evident from her artwork that she was pretty severely abused and seems to have been programmed (some of them are particularly graphic depictions I should warn, may be triggering)"

"She appears to have undergone occult Kabbalistic programming as evidenced by her 'Key' (of Solomon/key access to compartments of the mind, parts of her system) alter which draws Kabbalah inspired work complete with the Tree of Life and scenes of child sexual abuse charted by various occult symbols; I suspect that this is an alter that remembers some of the abuse."

Read With Caution

The following is a link to the author's article. I preface it in this fashion to emphasize it is not for everyone.

But knowledge of the reality of trauma-based mind control techniques is imperative; they are very real and being used extensively to this day. Research for yourself.
