TOPIC TAGS: unidentified flying object, optics

ABSTRACT:
 More than any other person in the USSR, Y. Zigel, a doctor at the Moscow Aviation Institute, has uncovered evidence showing that intelligent life probably exists on other planets of our solar system. The astronomer said that UFO's have been appearing in ever-increasing numbers during the last two years, and that they have been observed in 10 countries. It is becoming apparent that this is not an optical illusion. In the USSR there is now a UFO observation service. The observers first establish the speed and acceleration of the UFO, which cannot be achieved by modern aircraft.
