Mike,

These were two simple ones to provide. Also Tas told him I had one of them. I guess these are the ones that aren't available on web sites.

Anyway, it is done now. If he starts asking for them in dribs and drabs, I'll baulk at that.

Ben waded in with very positive comments re the CC issue. Steve's going to find it very hard to ask you to send the code. Those that say on the CC board that you should send the code, have little idea what is involved. Most are on the social science side.

Cheers

Phil

HI Phil,

Personally, I wouldn't send him anything. I have no idea what he's up to, but you can be sure it falls into the "no good" category.

There are a few series from our '03 paper that he won't have--these include the latest Jacoby and D'Arrigo, which I digitized from their publication (they haven't made it publicly available) and the extended western North American series, which they wouldn't be able to reproduce without following exactly the procedure described in our '99 GRL paper to remove the estimated non-climatic component.

I would not give them *anything*. I would not respond or even acknowledge receipt of their emails. There is no reason to give them any data, in my opinion, and I think we do so at our own peril!

talk to you later,

mike

Mike,

FYI. Sent him the two series - the as received versions. Wonder what he's up to? Why these two series? Used a lot more in the 1998 paper. Didn't want the Alerce series.

Must already have the Tassy series from Ed. I know Ed has a more recent series than we used in 1998. Got this for the 2003 work.

Cheers

Phil

Dear Phil,

Tas van Ommen has referred me to you for the version of his dataset that you used in Jones et al Holocene 1998 and I would appreciate a copy. I would also appreciate a copy of the Lenca series used in this study. Regards, Steve McIntyre
