Live Blood Analysis Before and After the Job

(/AnonA

Arrow - The Medical Anarchist (/AnonArrow)

May 22, 2021, 2:18:51 AM 1

From a FB friend named Cheryl:

I have a friend who is a Nutrition Microscopist. She is a expert in her field (dark field live blood analysis) and has helped me immensely! She had many clients who received the so-called Vax and asked them to come in for a free analysis! To her horror this is what she saw! The top picture is completely healthy cells before the vax. The progression of the cells changed drastically in the next few days! The third picture(white specs) shows the foreign nano particles that show up in your blood! Your body can NEVER detox from it and eventually those particles will go into every cell of your body!!!

My friend weeps over this because she understands blood! The repercussions over this will affect the health of that individual for the remainder of their life!!!

THIS EXPERIMENTAL VACCINATION IS A CRIME AGAINST HUMANITY!!!

.Below normal healthy looking Blood

Blood After the Job - red blood cells starting to loose their nice round shape

Disease Process now clearly showing in the blood. All those specs that are reported to be nano particles I think is toxic trash the body is having difficulty eliminating from a toxic reaction to the job.. They might possibly be parasites
