

The Truth About COVID-19: Exposing The Great Reset, Lockdowns, Vaccine Passports, and the New Normal

A Special Interview With Dr. Joseph Mercola

By Ronnie Cummins

Ronnie Cummins:

Hello, good to be with you today. I'm Ronnie Cummins from Organic Consumers Association. We have Dr. Joseph Mercola with us from Mercola.com. Dr. Mercola and I have just published a book called "The Truth About COVID-19," that's available. You can go to the website at Mercola.com or OrganicConsumers.org for your copy of the book. I wanted to start off asking Dr. Mercola, the COVID-19 pandemic surprised a lot of people, but in researching this book, you learn that the vaccine companies and their investors had been anticipating a scenario like COVID-19 for a long time. Tell us what you learned about, Event 201. Yes.

Dr. Joseph Mercola:

So with respect to Event 201, I think it's, it was interesting. And really in my mind, objectively confirms that this was a planned event. Some people call it the "plandemic." And what was Event 201. It was an event held at Johns Hopkins in Baltimore, Maryland, I believe in October, 2019, six to eight weeks before the official pandemic was known about. It wasn't only Johns Hopkins, but Bill and Melinda Gates foundation sponsored it along with the World Economic Forum. The connections get pretty deep here, because interesting — So what was Event 201? It was an exercise in a coronavirus pandemic, and what they would do down to the details of lockdowns and masks, and everything they had in there was planned.

Dr. Joseph Mercola:

The six weeks, how could they figure that out six weeks before it was going to be launched? So let's suggest there is a very interesting origin story, and there is, and Ronnie has reviewed the answer to that question. So just to expand on that with the — Bill Gates is one of the keys here. He's certainly not the only person involved but he certainly appears to be one of the front men for this group. Obviously one of the wealthiest men in the world, and very clever, very sophisticated. But I don't think he's committed to being the altruistic philanthropist that he cleverly manipulated his media team to give him the image of. It's actually a very interesting strategy that was done by Rockefeller, John Rockefeller, about a hundred years ago because he was equally demonized and people did not like that man until he shifted to a philanthropist.

Dr. Joseph Mercola:

And interestingly though, Gates' form of philanthropy involves donating to his foundation. The foundation then invests in a trust and the trust benefits him personally, which is a legal loophole. So he can donate \$20 billion and get \$50 billion richer. And most of these investments are really directed towards really the end result of what this whole operation about, what I believe is, is, is a massive rant — not rant, but ramp up to global tyranny. And that was cleverly done. I mean, think about it. When in the history of mankind, have they been able to shut down the entire world. When? Never. The first time. I mean, certain government, certain, countries have done it

previously, but not the whole world once. And they lock down people who weren't sick, never previously done before. They only isolated people who were sick and contagious with the illness, not the non-sick people.

Dr. Joseph Mercola:

So how are they able to do it? Because of the World Health Organization that is the catalyst or the mechanism of how it was implemented. And then it's really, really crucial understand that Bill Gates is the primary funder, or at least was when Donald Trump stopped the United States funding of the World Health Organization. He's the primary funder. And he's been involved with WHO for a decade. So this is not something he just dreamed up on some weekend event. He's been planning this for well over a decade. And you know, there are many TED talks of him discussing and warning us of these pandemics. And, but we'll go on — there are other questions we want to go into, but it is important. That's the stage for understanding how we got into this mess.

Ronnie Cummins:

We've read a lot about this Great Reset. Can you tell us, what this is all about?

Dr. Joseph Mercola:

Well, I probably mentioned it a few other places there, but I did not formally acknowledge it as the Great Reset, but essentially it's a strategy developed by the World Economic Forum, which is the group that puts together Davos and very wealthy people to attend to that summit and many world leaders and they have an agenda. They've had an agenda for a long time and they're not silent about it. They publish it. And essentially it's the transfer of wealth and assets in the entire world over into the very wealthy. And as I mentioned earlier, you know, the net worth of the billionaires, and I think there are a lot more than 3,000 billionaires, but that's what the statistics show, but the worth of those guys has doubled in the last year, doubled. So I think many of them are approaching trillionaire status. Because the thing is, how do you access this, this information? Because if you have assets that aren't disclosed, that doesn't go into the number many of these people do, they're very clever at hiding these assets. So you've got loads of income and resources, and I don't know why they would think they need so much, but they do, but that's the intention.

Ronnie Cummins:

So the vaccine companies and their investors were prepared to exploit the pandemic as an opportunity to force out onto the market their new vaccine technologies by using emergency use authorization. And what are some of the implications of being able to get those vaccines out under emergency use authorization, and why did they ignore some of the generic drugs and natural health remedies?

Dr. Joseph Mercola:

There's a lot of questions in there, but I want to focus on the first one, which is the emergency use authorization, because that is the key, absolute key, that allows them to have a normal democratic or constitutional republic converted from that into a tyrannical government. Because it essentially abolishes all the normal rights and freedoms that you have temporarily under the

guise of a public health threat that really wasn't a threat. So that is the justification that they use. And there really wasn't a justification. This was a manipulated, I'm not claiming that people didn't die, that many people didn't suffer, but when you look at it overall, it was not a risk, the high-risk event and you examine the numbers. The half-a-million people who supposedly died from this it to justify these tyrannical interventions weren't a half-a-million people because of the way they diagnosed it.

Dr. Joseph Mercola:

They diagnose it with trumped up tests, the PCR, polymerase chain reaction, which is a test that essentially analyzes a specific amount of biological material to high levels so that they can diagnose something. And every time they replicated you, you know, it gets to the point where you can actually see it in a lab. But if you replicated too much then the false positives just go through the roof. So not only were the false positives extreme, but anyone with the test, positive tests, whether it was a true test or maybe half of them that were false positive who died of anything, anything, whether they died of cancer, because they were terminally ill or they died in a car or a motorcycle accident, if they tested positive, it was designated to be a COVID-19 death.

Dr. Joseph Mercola:

So at a minimum, at a minimum, it was 25% increase. And even the CDC said 96% of the people who died with COVID-19 had comorbidities, which means that there's a high chance that most of those people died from something else, not COVID-19. It was just, just another, burden that they had that eventually contributed to their final demise. So, yeah, so ultimately those are big issues that a lot of people aren't aware of, if you haven't been watching this really carefully and listening to other sources of information because none of this information, anything that counters the official narrative, is expunged from the conventional mainstream media. And if it's done on a platform, especially a social media platform, not only is it deleted, but frequently, those people are banned from that platform.

Ronnie Cummins:

Yes. And they had to censor the effective prevention and treatment protocols that were taking place across the world. That's right. In order to get the emergency use authorization. A lot of people don't understand that.

Dr. Joseph Mercola:

Yeah. So let's go there. That was the last part of your question. So what were those alternative strategies? Well, the first one – there are two basic strategies that if you implement this and this comes in, like, I don't think it's part of the question, but there's a COVID-19 vaccine passport that's implemented. It's going to happen. You're guaranteed. This is a done deal. We're going to have them. And it's going to be used to restrict your freedoms. Unless you have a vaccination, you won't be able to go into these large events. You may not be able to fly. You may not even be able to buy groceries. Who knows? We don't know what it's going to lead to, and you're going to be marked and demonized because you're contributing to the pandemic. When in reality, there are two foundational strategies that you need to implement.

Dr. Joseph Mercola:

One is be metabolically flexible. What does that mean? That means your body seamlessly can transition between burning fat or carbohydrates as its primary fuel. And why is it important? Because it means you, you're not insulin-resistant. And when you're insulin-resistant, you're more likely to have complications such as immune insensitivity. You'll be obese. You have high blood pressure hike, distorted cholesterol patterns and your risk will be dramatically increased to developing COVID-19. So that's one thing, you want to be metabolically flexible, which is easy to do if you understand how to eat your food. And then the second is that you need to have enough vitamin D. Those two things together are probably at least 10 to 100 times more effective than this vaccine. Have enough vitamin D on board. And we have, there's not enough time to go into the details, but essentially the only way you know you're getting enough vitamin D is that you're getting a blood test.

Dr. Joseph Mercola:

For most people who's not exposed to the sun that's about 8,000 units a day. The blood levels in the United States are 60 to 80 nanograms per milliliter. Overseas, or in Canada, it's a 100, 150 nanograms per milliliter. And if you're below that, you're at increased risk and the studies are – I wrote a paper on this in October of last year, it was published in a peer-reviewed journal called Nutrients. And it went into all the details and the relationship to COVID-19. And then there's a free website called StopCOVIDCold, all one word, .com, that goes in free downloads. It doesn't capture email or anything. You won't get spammed and goes into great detail. So those are the two things. And anytime, anytime, a health site or someone on Twitter, YouTube tries to tell people about this, though, that post is usually deleted and many channels have been banned for sharing this information, because it conflicts with the – one of the primary motivations for this contrived pandemic is initiation of these worthless, dangerous, ineffective vaccines.

Ronnie Cummins:

And can you comment on what we've seen since the vaccine, since these experimental-

Dr. Joseph Mercola:

Yeah. And that's a great point because to call it a vaccine is inaccurate because this is an experimental gene treatment. This is not a traditional vaccine. These have never been used as vaccines in the history of the world. Most of them are using messenger RNA that's coded to have your body create the spike protein of the coronavirus, which supposedly will give you an immunity. But even at all these trials, the conclusion was they never provided immunity. All it was supposed to do was lower the side effects of the disease, so that you have less serious disease. But now they're being claimed it provides immunity. And we needed a certain threshold to have herd immunity. And it just doesn't do that. It's not what they're designed to do. And here's a more egregious crime – the people behind this, I firmly believe, should be imprisoned.

Dr. Joseph Mercola:

They should be imprisoned for the rest of their lives for the atrocious crimes they are committing against humanity. What is this? They are recommending this worthless vaccine that has never been tested or used in children and pregnant women. This is reprehensible medical malpractice. And there are many women who were suffering from this and had miscarriages and children who are suffering. With children, why is it such a reprehensible medical malpractice? They are not

even at risk for the disease. At the risk, there are less than a few hundred kids in the entire country who have died of COVID. And again, that's with these inflated statistics. It's not even the top 10 causes of death, not even the top 10. I mean, more kids are dying of respiratory disease than dying from COVID and let alone car accidents, and a variety of other ways that kids die. So no attention is being given to that. It's all being focused on creating the fear and driving the justification for having everyone be immunized.

Ronnie Cummins:

Yes. And these people, these experimental drugs that they're pushing out on the public, a lot of people don't understand that government officials like Dr. Fauci, and so-called philanthropic organizations like the Bill and Melinda Gates Foundation, and the scientists at the National Institutes of Health, are actually allowed under U.S. law to profit off of these patented drugs that they're forcing down people's throats while they're censoring natural health and dietary engineered drugs that actually work around the world.

Dr. Joseph Mercola:

Yeah. And there's footage of Bill Gates, when he's at Davos, talking to one of the correspondents there and interviewing him and saying, "Well, you know, what's your best investment?" "Well, my best investment is vaccine. I got a 20-to-1 return." Twenty-to-one. So he's heavily invested with this. The GAVI is one of the organizations she founded and I think they took his name off of it. I forget what the G stands for, but it's definitely, it's his organization and the World Health Organization. And you're right. The CDC (Centers for Disease Control and Prevention) benefits from this stuff too. So it's, it's just atrocious what they're getting away with. I mean, it's literally tens of billions of dollars when in the scope of things. I mean, it sounds like a lot of money. Billions of dollars. I mean, I'm from Illinois, and Senator Everett Dirksen said, "You know, a billion here, a billion there," I think he maybe said a million. But before you know it, it adds up, but they're turning printing trillions of dollars, tens of trillions of dollars, just created out of thin air, created out of thin air to inflate everything, which contributes to one of them.

Dr. Joseph Mercola:

So we get back to the first question, you know, was this plan? Yeah. One of the reasons the World Health Organization and Klaus Schwab planned this thing is to transfer wealth from most of the world to the very rich. And I think the billionaires in the last year have doubled their net worth, doubled their net worth, doubled that isn't been true for the rest of the population. Most of the middle-class is disappearing into the lower class. We're going to have a two-tier society before long, which is tragic.

Ronnie Cummins:

Well, in spite of all their censorship, they have not shut down groups like ourselves. And in fact, our readership people are getting larger every day. And this book looks like it's going to be a best seller coming.

Dr. Joseph Mercola:

I would disagree with that. Ronnie. They have shut us down. I mean, I know they've taken you out of the Google search engine, and Google is part of this. This is, let me just go into this, but

this is a big reason why they were able to do it. This has been very clever, very sophisticated, strategically planning. Google, and you may not be aware of this, but look at my site and type in Robert Epstein, who is a sociologist at Harvard. He's well-documented this, and he's testified before Congress. They have been collecting data on you and most of the world. Ninety-two percent of the searches done in the world are done on Google. And all of that information is captured by their servers. They take this information, they feed it to their deep learning algorithms, artificial intelligence, since they know precisely the buttons to press to trigger the most powerful emotion known to man to cause and change behavior.

Dr. Joseph Mercola:

And what is that emotion? Fear. They know exactly the scenario to paint, down to the last detail and what to do. So this wasn't just some wild thing they thought up on a weekend. This was planned for years. Google is a big part of the problem. So getting back to your point that they haven't censored us, yes they have. They've taken us out of the search engine. The only people who know us are typically people who knew about us before the censorship occurred. So yeah, that doesn't mean our traffic — I mean, it hasn't affected our business at all, but because the people who know about us are already staying, but our ability to spread this truth to the rest of the world has been severely compromised. So that's part of the challenge.

Dr. Joseph Mercola:

And I do think it's going to continue to get worse and they could take us out, Ronnie. They have the tools to essentially eliminate us from the internet. And I don't want to go into details, but they can do that. So we are working on really — I mean, all this is, I don't want to be Debbie Downer because there are some really powerful things we can do. We need to shift that focus because people are going to get depressed and want to, you know, just end it all. I'm just telling you, this is real danger and some of the issues are around. If there are things that can be done, one of them is a long-term plan. It is understanding that the existing type of internet we have is called a centralized internet. That means the servers that push the data are in a few places controlled by a few organizations.

Dr. Joseph Mercola:

But there are no — so you can have the alternative is something like Bitcoin, which is a decentralized system where it's on servers all over the world, maybe millions, tens of millions, hundreds of millions of servers on people's cell phones. And that can never, never, never be shut down. Never. So that's what we need to go to. It's in the works. I'm telling you, there are a number of groups working on this. We will have it and they can never take you out like they can now. I know they haven't taken us out yet completely. I mean we still exist online, but they can shut us out any day they want. And if things continue to progress, they very well may do this. And we may be targeted as criminals, domestic press terrorists, because we're recommending not to take this vaccine. That's under the guise of public health safety. That's the justification of you and they've done it in a way that people believe it because they've been taking the data, stealing the data from you, for the last two decades.

Ronnie Cummins:

Yes. Well, we definitely have a big challenge ahead. I am happy though, that a significant proportion of the world's population don't believe the official story of COVID-19.

Dr. Joseph Mercola:

Oh, let me give you a little story on that, too. I don't know if you knew this but because this vaccine is not approved, it only has an emergency use authorization, right? Because of that, the U.S. military has the option to opt out of the vaccine. I don't know if you knew that and the latest data I've seen is that the Marines, the United States Marines, 40% of the Marines are opting out.

Ronnie Cummins:

Yeah. And I think that, I think a lot of people who understand the importance of organic food and, cleaning up the environment and having a healthy lifestyle, they just simply haven't understood thoroughly yet that our best defense against chronic disease or best defense against a biological trigger like COVID-19 is what we've been saying for decades, which is eat healthy, organic food, drink clean water, get exercise, get out there in the sun. If you need to take a quote "medicine," natural health medicines and supplements are very effective 99% of the time.

Dr. Joseph Mercola:

In the book, we go into specific details. There is a strategy using nebulized peroxide and this format does not allow me to go into details. But just know it exists. It's very, very safe, it's almost free, costs you less than a penny. The only investment you have to make is to get the nebulizer to do it. And I have detailed video instructions on my site. So that would, I mean, unless you were terminally ill with other diseases, I mean nothing's 100% but this thing is really highly effective. Personally, I've never seen it fail. Dr. David Brownstein is a family physician who has been doing this. He's one of the pioneers in this. He started 25 years ago and he treated over 200 patients with COVID-19 and it worked on every one of them, so incredibly safe. So that's just one of them, looking at your vitamin D levels, becoming metabolically flexible, using something called time-restricted eating, where you're limiting the number of hours you're eating between six and eight hours.

Dr. Joseph Mercola:

Those are all things that you can do that are far more effective than the vaccine that will not only cause side effects, potentially terminal, but will improve your overall health. Interestingly, we'll never know how many people died from this vaccine. We'll never know, because they're all — I mean, we have celebrity sport, legends like Hank Aaron and Marvin Hagler, the pro boxer who literally died — Hagler, I think it was a few hours after the vaccine, and Hank Aaron was two weeks, and it was all dismissed. They were able to get the pathologists out. "There's no connection, no connection," but I guarantee you, 100%, if they had a positive COVID-19 test last year and they died, would have been COVID-19, 100%. It would have been COVID-19 deaths, but they get a vaccine, die two weeks later or hour later, no way it's connected, cannot be the vaccine.

Dr. Joseph Mercola:

So the point of sharing that is we'll never know because all this information piece is oppressed. But even with those stringent contingencies, we have 2,500 people dying from the vaccine

reported this year. 2,500. 2,500. That's the VAERS (Vaccine Adverse Event Reporting System) database, the VAERS database we know between only 1% and 10% of the adverse events are reported to that database. So that means the 2,500 could be 25,000 to 250,000. And I'm pretty confident that ultimately more people will die from this vaccine than died from COVID. If you truthfully analyze the correct statistics. Because again, the number of COVID deaths reported last year are inflated probably by at least 100%. So half a million, but might've been 100,000 to 200,000. We don't know. We'll never know because they bastardized the statistical reporting.

Ronnie Cummins:

Well, okay. I think that you've said it for, for quite a long time, we've got to take charge of our health.

Dr. Joseph Mercola:

Take control, take control. We actually own that trademark. For 20 years we've had it.

Ronnie Cummins:

And tell everyone you know to tune into Dr. Mercola and OrganicConsumers.org and buy our book.

Dr. Joseph Mercola:

Yeah. Well, it's not Dr. Mercola, it's Mercola.com, although I think we may own the DrMercola.com domain. I don't know. But it's Mercola.com. You can remember, this is key. If you want the truth, you want details like this because I mean, there's so much information we can share with you and we do, we don't charge you for it. You get it free, but you got to know that you got to go to the site and ideally the simplest way is to get our newsletter but you will never find our information on Google search engine or most of the search engines, because almost all use Google as their infrastructure. It's an excellent search engine but it censored, it's manipulated. They only tell you what you want to see. We were able to get away with, you know, a free internet for —

Dr. Joseph Mercola:

I mean, our site has been online for since 1997, that's 24 years. It's almost a quarter of a century and they only really, for the last two years, have censored us. So we got 21 years of information out there. So we have a large following. We've helped over a hundred million people easily, probably significantly more than that, but it's going to be hard to reach more people now. So you know, the key is to learn more information, get up to date. Because this is a moving target. We have no idea what they're going to do. And this is, this is only the beginning. They have far more things up their sleeve. Especially with this vaccine passport, you've got to know, you got to understand this. So definitely tie in because the book is a great resource, but it's kind of like documenting history.

Dr. Joseph Mercola:

What we need to be concerned about is what to do, what do we prepare for for the future so they don't – and this is the key – they're not allowed to take away our personal freedom and liberty? Our ancestors over 250 years ago sacrificed their entire lives. The people who signed the

Declaration of Independence, they signed it with the understanding that if they lost the war, they were dead men, they were dead men. People commit their entire lives to give you and me freedom. This is a battle for freedom, folks. Everything's on the line.

Ronnie Cummins:

And how can we tell people to fight these vaccine passports? What's your recommendation on this? Besides getting aware of what's coming down right then?

Dr. Joseph Mercola:

Well, as I said, the vaccine passports is like the first step of the plan. There's absolutely no need for them because of the vaccine does not provide immunity or immune protection. It's just a scam. It's an absolute scam. And there are many people who believe this is the first step of the process that China has implemented, which is a social credit system, which I'm sure many of you have heard of and China uses to essentially control the country. And this is going to be the first step, because it's not just going to be the vaccine passport. Remember what they did with the Patriot Act and 9/11 and Homeland security. Homeland security. Think about it. Think about Homeland, what other country that had the "Homeland?" That was Germany and World War II.

Dr. Joseph Mercola:

So, um, this is like, this is one of the things. And interestingly, IBM is involved with this passport. And IBM was also involved in the identification of many individuals who were eventually exterminated in Nazi Germany. So it's the same company. So eventually this is going to be used to control the masses and you don't have to participate in it. They may make it very, very difficult not to, but this is when you have to understand that our ancient – not ancient. These might be great, great grandfathers. Many of you have them who started this country, came over from Europe and England to escape tyranny. They sacrificed their lives to give us personal freedom and liberties. They sacrificed their lives. So the least that we can do is go through a little inconvenience and not contribute that contributed to capitulate and surrender and go with these vaccine passports.

Dr. Joseph Mercola:

I assure you, I will never get a vaccine passport. It is not happening. So I would encourage you to take the same strategy. Now this is a new event. It is not been implemented. I don't think it's been formally deployed. There's a few states that are in the process of doing it. I think in New Jersey and California, but to the best of my knowledge, it's not formally deployed. So we don't know what it's going to look like yet. We have some ideas and concerns, certainly. So that's why you want to keep in touch, my website, Mercola.com. You can sign up for the newsletter and we'll give you the latest as soon as we know about it. Because we typically know about it either right before they do it or shortly after it's done. So then you need to know what to do. It's just hard to give you a very specific, solid recommendation at this point.

Ronnie Cummins:

Okay. Well, thank you very much.

Dr. Joseph Mercola:

You're welcome.

Ronnie Cummins:

This is going to be the battle of our lives.

Dr. Joseph Mercola:

Well, not the battle of our lives, but it's definitely going to be a battle. But you know what? There is not a micro-doubt in my mind that we stop them. They will not be successful, but you got to be committed. You have to understand this is a battle. This is a major battle, but we will win. And not so much win, because they're always going to be out there and they're big. They're the Goliath. But we can stop them.

Ronnie Cummins:

Okay. Well thank you very much. And the conversation will continue. Tell everyone to subscribe. Don't look for us on Google or social media, go direct. Yeah. Thanks a lot.
