Best Selling ▼

To support COVID-19 research, we produce ready-to-use recombinant SARS-CoV-2 proteins which can be used as antigen for analytic and immunodiagnostic purposes as well as for vaccine development.

Our catalog of ready-to-use SARS-CoV-2 (COVID-19) proteins comprises SARS-COV-2 S, S1 RBD, N, M, 3CL-Mpro and other relevant proteins that are associated with Coronavirus infection. All proteins can be ordered from stock and have very short delivery times.
