

“Something Big Is Being Planned” – More Proof Of Upcoming ‘Disaster’ In America?

Recently my friend Matt, the owner of *MyPatriotSupply.com* was contacted by the Federal Emergency Management Agency (FEMA) by way of email, leading on that something is ready to pop off.

Matt being the patriot he is immediately contacted me with this disturbing news. He even provided screenshots of the actual email sent by a FEMA representative. The names and revealing information have been blurred out.

Matt wrote, “Here we are, August 2013 and FEMA once again is trying to [buy up large stockpiles of food](#). And they don’t want anyone to know it, and they want to take immediately delivery.

Friends...I’ve studied history. That is what got me into preparedness in the first place. History has shown us time after time that those who depend on the government to come to their aid during a disaster are the ones waiting the longest for help. Sometimes help never comes...or comes too late.

I do not believe these critical emergency food supplies should be in the hands of the government, stored in some secret warehouse only to be brought out and distributed to their own agencies first, with the rest of us getting table scraps long after we need it.

These life-saving meals belong in the hands of people like you and me. This is why I declined the opportunity to sell to the Department of Homeland Security.

But let’s not forget the most important part of this: Why the sudden sense of urgency? What do they know that we do not?

I’m not one to cry that the sky is always falling, but when DHS/FEMA make a move to quietly buy up emergency food supplies and ask how much we can ship within 24 hours...I think this is far enough outside the realm of what is “normal” to beg some questions.

Fortunately I've been in this business long enough to predict what happens next. One or more of the other "survival companies" out there will inevitably see a chance to make a quick buck from Uncle Sam (which is really paid for by us, the taxpayer). This could create a run on many of the core raw ingredients used by emergency food makers that will cause a ripple effect throughout the industry as supply chains become bottle-necked handling the FEMA/DHS request."

This is extremely disturbing to know.

What is the government gearing up for? A major disaster or war they know is coming?

I myself don't want to be left in the dark.

GPS Coordinates To FEMA Camps (Google Maps)- Very Creepy!!

This entire article below is taken from a website called Penny Pincher Personal Finance. Though this is from 2011, in light of present day events it takes on added meaning today and provides a great reference for research.

<http://pennypincherpersonalfinance.blogspot.mx/2011/05/new-fema-camps-with-gps-coordinates.html>

VERY CREEPY!! GPS coordinates to FEMA Camps

Just paste the coordinates given below into Google Maps and then separate them by using a comma. It will take right to the front door! Scary.

I've been reading rumors that FEMA has been building a lot of camps in the US. I mean a LOT. I just found a list of some of the new ones. They sound a lot more like prison camps than like refugee camps for people in disasters: Barbed wire all around, only one way in and out, guard towers.

So, what (or who) are these things for exactly? Are they expecting a revolt? From whom? And why so many? Could they be for YOU? ME?

Here's my source: I stole this off a comment below a Prisonplanet.com article. Some guy who calls himself "reconscoutsnipr" posted this. It even gives GPS coordinates of the camps. I do tend to give PP a grain of salt now and then, but I have heard about the camp in Lima, OH even before this, from people who live near there.

"Ronny baby! Let me contribute this: These FEMA camps and there exact locations are given for those here who know what actions to take. There was a great deal of time spent in locating these camps as well as other very useful info. A new set of confirmed locations came in just today about another huge set of compounds located in Florence AZ. Home of John (NWO shill) McCain. That makes a total of 16 compounds, all located within less than a one mile radius of each other. They must be expecting a lot of business. Included in this list, is the confirmed location of the HAARP site in Alaska. This list comes as a courtesy of a lot of people who gave their time, money and risked being "made". One other thing, the "terrorist camps" list, listed here in the US, will be coming out before long. (Jamaat Ul Fuqra, MOA, Hamas, CAIR, Hezbollah etc.) We are waiting for confirmation before posting it. So, with out further delay, here is the latest FEMA camp update. Does this make me a "good man"? No. Just another brick in the wall. LOL
Revised list with Latitude/Longitude coordinates posted due to request.
We are NOT adding any Federal Prisons. Federal Prisons, State prisons and County jails are all ready under FEMA authority. Read the Executive Orders and Army Regulation 210-35.

++++
++++

These are FEMA camps and are named as "Correctional Institutes". They are under Fema

Jurisdiction and are manned and ready. CCA, Halliburton and UNICOR built most of these camps.

At [http : // www . apfn . org/ apfn /camps .htm](http://www.apfn.org/apfn/camps.htm) a plethora of information can be seen as well

as the "REX 84", "Operation Garden Plot" etc. Be sure to read the "authorization for these

camps back when "Tricky Dicky" gave the "nod" for them to be built as well as the executive

orders that allow for the dictatorship of this country to come to fruition. apfn has

more than one site to research."

EDIT (4/29/12) I have looked at every one of these GPS coordinates and others that Recon gave out, and discovered they are nearly all existing federal or state prisons, with the exception of the coffin factory and HAARP. What we don't have here are new prisons being secretly built in the middle of nowhere, that someone has discovered and given coordinates for. This doesn't mean the "prison camp" scare can't be real, though. Existing prisons

generally have a lot of cleared land around them, and could be expanded with temporary buildings. There are trucks that can stretch barbed wire down the street as they drive, turning a neighborhood into a prison in minutes. And if there are covert prisons, then they are probably inside warehouse buildings or vacant hotels or something like that, that aren't zoned as prisons per se. Govbizopps just a month or two ago had an ad asking for companies that could roll out labor camps in 72 hours' notice. A few months before that they had an ad for contractors to provide things like porta-lets and catering for camps, again within 72 hours' notice. So this stuff is real, just not as easy to detect as skeptics think it should be. Actually, any skeptics probably have their blinders on at this point, because the Govbizopps posts should be proof enough for anyone.

There are also cages for men. These cages could turn any warehouse or other structure, or even an open field, into a jail pretty quickly. They're even modular.

In conclusion, I don't think we'll know exactly where any particular FEMA camp, labor camp, or improvised prison will be, until the SHTF. All they have to do is keep all the supplies for any particular camp in one place ready to be loaded on a truck, or have contractors waiting for the word. Because they've sought contractors for some of this, the stuff for the prisons will be spread out in many different places until it's assembled.

If you want to speculate as to where one might be erected in your area, look at stadiums, existing prisons, unused runway or field areas of airports, vacant warehouses, bus terminals, and likely open spaces near railroad tracks. At these places, look for new improvements like cameras and security lighting on poles, walls, barbed wire pointing in, and that sort of thing. Good luck and be careful!
