Dear Safe Genes Community:

The National Academies is partnering with several organizations to organize a workshop in Hanover, Germany in October on Assessing the Security Implications of Genome Editing Technology. One of the partners is the Volkswagen Foundation which is offering a travel award for young investigators. They extended the application deadline to June 30th which is open to PhD students and recent graduates (within five years). More information and the online form are available on the website below. Members of the DARPA team plan to be in attendance.

<http://nas-sites.org/dels/events/ge-security/>

Please forward to other members of the Safe Genes community, as appropriate.

Best regards,

Renee
