Mexico Station Coverage of Soviet and Guban Embassies (1963)
Mons
Coverage:
From the time the Regico Station was openeduntil
the arrival of Mr. Win Scott as Chief of Station the Station had
developed a support apparatus to exploit leads from the Soviet Embassy in
Mexico City. This umbrella type project (LIPSTICK) consisted of multiline
phone taps, three photographic sites, a mobile supple illance team and a
mail intercept operation.
Telephone taps (LIFEAR) were placed by
handled by a Station case officer. The number
of lines tapped was dimited only by the availability of a listening post
nearby and the availability of langauge (English, Spanish, Soviet, Polish,
Czech, etc.) transcribers. Generally, these were Mexican or Mexican-
American recruited agents.
Three photographic sites were handled by a Station case officer
assisted by technicians on TDY from Hearthyarters who advised the Station
on the best types of cameras frimes and concea ment devices. These
operations had sub-crypts under project (IPSTICK (namely: LIMITED, LILYRIC
and LICALLA). LIMITED was a fixed site directly opposite the Soviet Em-
bassy (across the street) which had both a vehicle and a pedestrian en-
trance. The gate to the Soviet Embassy was on the northwest corner of the

Soviet compound and the LIMITED site was diagonally across a double laned street on the southeast corner of that block (See attached diagram). LIMITED was the first photo base and operated strictly on an experimental basis in the early stages This base, however, was closed when the Station received word that the photograph the "unidentified man" was being released by the Warren Commission. LILYRIC was an alternate photographic base. It was located in an upper story of an apartment building on the same side of the street as the LIMITED site but in the middle of the block south. It had a planted view of the front gate of the Soviet Embassy. LICALLA, the third photographic sites was located in one of a row of four houses on the south state of the Soviet Embassy compound. This site overlooked the back garden of the Soviet Embassy compound. The purpose of this operation answas to get good identification photographs of Soviet personnel. The three photographic sites were managed by a recruited agent who was a Mexican citizen, the son of an American mother and Mexican father (deceased). This agent and the film from the LIMITED and LILYRIC sites three times all week! The film was then developed and printed into a k to contact Anthic strips. LICALLA film was originally processed in the Station portlin early nation of a technician, this film like that of LIMITED and LILYRIC was processed on the outside by a recruited agent.

SEPRINCIPAL

Mobile surveillance was conducted by two American staff officers. These two officers organized a surveillance team of six recruited agents which used late model cars and a panel truck for surveillance. The team could be activated by redio from the DIMITED site whenever someone of interest left the gate of the sowiet Embassy. These agents were aware of the LIMITED site since they had been issued LIMITED photographs for identification purposes.

the Station also conducted a mail white	cept operation,
LIBIGHT, which was handled by an American case of ticer.

for translation and typing. Mr. Boros Warnsoff did the Russian translations but because of the volume of Russian conversations, the translations usually ran about a week behind the date of the conversation.

As soon as the Station learned that an American identifying himself as Lee Oswald phoned the Soviet Embassy, Miss Ann Goodpasture of the Station started screening all photographs. However, here again, there was a backlog because the photographs were picked up three times a week but those picked up were usually for dates a few days before since the technician who was processing the film, did so on a night-time basis. Further, photographs were not made initially until a complete roll of film was used. Later this was charged and the operator cleared the camera at the end of each day regardless of amount of unused film remaining. The instructions were to cover the entire work day (office hours) and to photograph all Soviets, their families, all foreigners, and cars with foreign license plates. Human error did occur but generally the agents were conscientious. The Cuban Embassy coverage had more sophisticated equipment using a public families which predictly developed mechanical difficulties.

Oswald came to the attention of the listening post operators from a tap of the Soviet line. It was picked up and taken to Mr. Boris

Tarasoff for translation because the carrier was trying to speak in Russian. There was some delay because Station personnel waited to compare the photographs with the typed transcript And transcripts were made in either Spanish or English since the Chief of Station could read only these two languages and because he personally screened the transcripts for operational leads.
