Lawrence F. BARKER of the MEXI Station and Irving N. PEGGINS have paved the way for AMTRUNK-13's handling and safehousing in Mexico City while he awaits his recruitment opportunity. Through the excellent cooperation of MEXI, MADR and OTTA Stations, JAWAVE has been able to maintain a precise log and to establish somewhat of a pattern of flight schedule. By virtue of the fact that, during February and March, made four flights to Mexico City, it is presumed that AMTRUNK-13 should have the opportunity to attempt to recruit within two weeks of his (AMTRUNK-13's) arrival in MEXI. The false documents which show AMTRUNK-13 as a PBPRIME citizen nearly are completed and AMTRUNK -13 should be dispatched to MEXI within 10 days. In the event that AMICE-14's presence in MEXI is required to coment the recruitment pitch to false documents for ANICE-14's travel have also been requested.

4. For the time being then, AMTRUNK recruiting for MHAPRON will be restricted to the attempt against The issue of a subsequent infiltration attempt by AMTCE-14 is still in limbo. The AMTRUNK case officer, Reuben A. HANNULA, is currently investigating several leads for a subsequent two-man infiltration team to expand MHAPRON recruiting efforts under the AMTRUNK project.
