

# EXPLORING THE MYSTERY OF THE NORWAY SPIRAL

*The phenomenal white spiral with a central helical blue ray shooting up from ground level, as seen over northern Norway on 9 December 2009, was not the result of a failed Russian missile test but more likely of an ionospheric heating experiment.*

A remarkable structure appeared in the skies over northern Norway on 9 December 2009—a stunning aerial formation that was massive in size and hung there, rotating in space for 10 to 15 minutes straight. If the visual sight of this Spiral wasn't interesting enough, the context certainly was: it showed up the day before US President Barack Obama was set to receive his Nobel Peace Prize, in the very same country. Also, on that very same day, 9 December 2009, hundreds of eyewitnesses reported—and two of them filmed—a gigantic, triangular, pyramid-shaped UFO that hovered over the Kremlin in Moscow, Russia, for hours—from daylight on into darkness.

## Cover story makes no sense

Let's discuss some very basic, common-sense thoughts about the Norway Spiral sighting itself, before we get into the scientific proof that the "official explanation" must be a lie.

If you still believe the official story that the Spiral was nothing more than a Russian Bulava missile, as almost all mainstream media outlets now suggest, isn't it interesting that the Russians would have chosen 9 December 2009, in skies that were visible over Norway, to do a nuclear missile test—knowing they had decisively failed on every preceding attempt with this prototype, as all the articles said?

Why would the Russians have set themselves up for such an obvious and epic military failure—in an area on which the entire world's attention was momentarily focused? Couldn't they have waited for a less-conspicuous day to try it out, if there were even the slightest chance it was going to screw up in such a tremendously embarrassing fashion?

Did you also notice that the video of the Spiral that was aired by Russia Today—one of the mainstream Russian television networks—was much, much clearer and stranger-looking than the grainy, brief versions shown in Western mainstream television media? Watch the good-quality Russian version first, followed by the type of plausible-deniability version shown in Western media, and see for yourself.

If it were *only* a missile, why did the American mainstream media stick to grainy, short clips of it that denied the viewer the full impact of what was really being seen in the Norwegian sky—making it much easier to believe it was merely a rocket malfunctioning, and therefore keeping their audience from understanding what all the fuss was about?

## Pyramid-shaped UFO over the Kremlin

Strangely enough, what appeared to be a gigantic pyramid-shaped UFO hovering over the Kremlin appeared on *the very same day* as the Norway Spiral. Despite the overwhelmingly strange appearance of the Spiral

Speculations about what the Spiral is, and "whodunnit", are as wide and far-reaching on the Internet as the formation itself was over the Norwegian sky. Thanks to the research of our correspondent Arash Amini, we now have irrefutable scientific proof that the Norway Spiral could *not* have been a missile. [See [www.divinecosmos.com](http://www.divinecosmos.com) for a detailed analysis. Ed.]

If the Spiral was caused by a missile launched from the White Sea, as the conventional explanation insists, the missile would have had to be rotating at more than 20 miles per second! The

speed of sound is clocked at 761.2 miles per hour. Anything over the speed of sound would have caused tremendous sonic booms—but the Spiral was completely silent.

So, if it's not a missile, then what are we left with for an explanation?

#### A Strum of the HAARP?

As I pointed out on our 10 December 2009 Whistleblower Radio program, researcher Richard C. Hoagland discovered that the island of Tromsø, where the Spiral was most visible, "just so happens" to be directly northwest of a

major HAARP installation called EISCAT—the European Incoherent Scatter Scientific Association ionospheric heating facility, which is capable of

creating a viral-video sensation, the Kremlin Pyramid video shot to the number-one position on the Russian YouTube's most-viewed list.

This then created a mainstream-media television news story on Russia Today, posted on their website on 11 December.

The giant pyramid—actually a tetrahedron, since it has a triangular base rather than a square one—lazily turns in the air like a hot-air balloon, never makes any sudden, jerky moves unlike other alleged UFO sightings, looks fairly grainy in both the daytime and night-time videos that were shot, and may be an excellent fake. [See the website [www.divinecosmos.com](http://www.divinecosmos.com) for more details. Ed.]

speed of sound is clocked at 761.2 miles per hour. Anything over the speed of sound would have caused tremendous sonic booms—but the Spiral was completely silent.

**...HAARP experiments had indeed created a complex visual apparition of "surprising irregular luminescent bands [that] radiated out from the centre of the bull's-eye".**

#### Debunking the missile theory

The Norway Spiral attracted vastly more attention and analysis than the Kremlin Pyramid. No matter where you were, all throughout Norway, it was quite visible—and very, very strange-looking.

The images here were taken from the island of Tromsø, facing the southeast, hence you can see the Sun starting to rise on the horizon.

The blue corkscrew spiral, hanging in the air for 10 to 15 minutes, with the concentric white circles staying completely white, never dissipated or faded until after it opened out into a curious, perfectly round "black hole" shape.

transmitting over one gigawatt (1 GW) of effective radiated power (ERP). In case you don't already know, HAARP stands for "High-frequency Active Auroral Research Program" and its purpose is to shoot huge amounts of energy into the charged particles of the ionosphere for "ionospheric heating". It has long been suspected of having far greater functions and abilities than those which are openly acknowledged.

Hoagland says that the high-tech Norwegian "HAARP antenna farm" is "specifically designed to broadcast powerful beams of microwave energy high into space...thereby also creating blatant HD/torsion side-effects in the Earth's highly electrified upper 'plasma' atmosphere (ionosphere)". The facility is officially supported by Norway, Sweden, Finland, Japan, China, the UK and Germany.

In the face of all the scientific evidence to the contrary, some will *still* undoubtedly want to believe that missile exhaust could do 40 perfectly concentric layers that would hold up in the Earth's ionosphere without dissipating for up to 15 minutes. That's fine.

The bigger question becomes this: is there any *other* technology that could have potentially created this formation? The answer is...most definitely...yes.

### Ionospheric heating

An interesting article from the *India Times* of 4 October 2009 revealed that publicly announced HAARP experiments had indeed created a complex visual apparition of "surprising irregular luminescent bands [that] radiated out from the centre of the bull's-eye". Sound familiar?

Bear in mind, this is only what we hear from the mainstream media. In classified programs, the technology could be far more sophisticated than this. Also pay attention to the fact that they only needed 3.6 megawatts to make it visible—and the EISCAT facility can do 1,000 megawatts. This is an extract from the article:

"...HAARP's high-frequency radio waves can accelerate electrons in the atmosphere, increasing the energy of their collisions and creating a glow.

"The technique has previously triggered speckles of light while running at a power of almost 1 megawatt.

"But since the facility ramped up to 3.6 megawatts—roughly three times more than a typical broadcast radio transmitter—it has created full-scale artificial auroras that are visible to the naked eye.

"But in February last year, HAARP managed to induce a strange bull's-eye pattern in the night sky.

"Instead of the expected fuzzy, doughnut-shaped blob, surprising irregular luminescent bands radiated out from the centre of the bull's-eye, according to Todd Pedersen, a research physicist at the US Air Force Research Laboratory in Massachusetts, who leads the team that ran the experiment at HAARP.

"The team modelled how the energy sent skywards from the HAARP antenna array would trigger these odd shapes.

"They determined that the areas of the bull's-eye with strange light patterns were in regions of denser, partially ionized gas in the atmosphere, as measured by ground-based high-frequency radar used to track the ionosphere..."

### A zap from EISCAT

The same article, more or less, can be found on BritainNews.net—but hardly any other mainstream site on the Net covered it in such specific detail.

The article says that these curious bull's-eye, luminous-banded patterns will appear where you have *partially ionised gas in the atmosphere*. Tromsø is at the very northern tip of Norway, close to the North Pole, and there are a great deal of ionised particles in the atmosphere near the poles, forming the aurora borealis.

Therefore, we already have the proper conditions in the sky over Norway to create a visual manifestation of a "bull's-eye" with "surprising irregular luminescent bands radiated out from the centre".

Continued on page 81

## Exploring the Mystery of the Norway Spiral

Continued from page 25

And since EISCAT's gigawatt is equivalent to a thousand megawatts, and the above formation started taking shape at only 3.6 megawatts, you can start to imagine what wonders you could create when you now control 277 times more power than it took to create Dr Pedersen's HAARP bull's-eye with luminescent bands.

Given that the bottom of the Norway Spiral is precisely above EISCAT, is there any doubt that EISCAT was responsible for the Norway Spiral?

Still not convinced? The EISCAT ionospheric heating facility documented a major surge of power usage—right as the apparition was happening.

The power surged up to the maximum level that the EISCAT facility is capable of generating—nearly a gigawatt.

Look at the bottom of the graph

on the previous page to confirm that it was indeed the morning of 9 December 2009.

EISCAT was zapping the mesosphere with very high frequency (VHF) radiation so it could light up the sky like a "Tequila Sunrise", and they would then record plasma density and temperature in the area.

The timing of the experiment was chosen for when there would be a maximum amount of charged particles in the atmosphere, thanks to the "meteor dust" from the polar mesosphere winter echoes (PMWE)—thereby making the glow even brighter, since these conditions were quite literally ideal for creating any airborne projection. ∞

### Editor's Note:

This article is comprised of selected extracts from David Wilcock's paper "Disclosure Endgame", which can be freely downloaded from

<http://www.divinecosmos.com>. We encourage readers to examine the complete paper so as to understand the context of these extracts.

### About the Author:

David Wilcock is a professional lecturer, filmmaker and researcher of ancient civilisations, consciousness science and new paradigms of matter and energy.

From a very early age, he showed amazing psychic abilities.

He is the subject and co-author (with Wynn Free) of the book *The Reincarnation of Edgar Cayce?* (see review in 12/02), which explores the remarkable similarities between David and Edgar Cayce, the "sleeping prophet", and features many of David's most inspiring psychic readings.

His Divine Cosmos website, <http://www.divinecosmos.com>, contains thousands of pages of scientific and spiritual information.

## CATAclysm 2012?

### WORLD CATAclysm IN 2012:

Maya Calendar  
Countdown

by Patrick Geryl

In this book the author reveals the millennia-old codes of the Maya and the Old Egyptians, which refer to a coming super-disaster. The Dresden Codex of the Maya contains secrets of the sunspot cycle, and the conclusions are staggering—at a certain moment, when the sun's magnetism reaches a crucial point, the sun's surface will be subjected to immense storms, causing a super-catastrophe on earth.

## How to Survive 2012

### HOW TO SURVIVE 2012

by Patrick Geryl

Geryl urges mankind to prepare and endure. The outlook is bleak, but the obstacles are not insurmountable. In this book, Geryl provides the blueprint for those wishing to survive the disaster to prepare themselves and prevail. He explains in detail the myriad problems survivors will encounter, and the precautions that need to be taken to overcome them.
