## Thread

# content-policy-help

**Genet Girmay** 🌴 May 29th at 4:53 PM

Hi, so I got a zendesk ticket

(<https://pinterest.zendesk.com/agent/tickets/4696044>) where they are appealing the website <https://www.liveaction.org/> to be removed from the porn domain blacklist. I don't think it should be removed, but think this warrants a further discussion because we are currently not removing pro-life/pro-choice content, but this was added to a domain blacklist.

1 reply

**Carina Iverson** 1 day ago

Hi! It is usually best to start, if possible, by following up with the person that initially blocked the domain to see if there was a specific reason other than it is abortion content.

## Config Audit History

**Zookeeper Path:** ([Config Zk Paths Lookup](#))

- Input the ZK path of a config (decider, manageddata, etc) and you will see the historical changes.
- The rule converting managed data to zk path: /config/manageddata/<LIST\_DOMAIN>/<LIST\_KEY>
- Example: Domain: link\_quality Key: link\_quality\_fatty\_links -> /config/manageddata/link\_quality/link\_quality\_fatty\_links
