

2026 WTC Dust Analysis Bombshell: Directed Energy Proven

Bob Greenyer's analysis shreds the official narrative + thermite/bomb myths with plasmoid evidence from 9/11 Jersey Girl's dust sample.

9/11's Hidden Physics: Exotic Tech or Controlled Demolition?

LENR researcher reveals microspheres, plasmoids & material anomalies that challenge everything we thought we knew, during his presentation on June 5th, 2026.

9/11 Revisionist Podcast

The 9/11 "truth" movement forgot how to count past 3. Isn't that strange?
It won't be easy for most to break their programming if they don't investigate the evidence that is NOT being discussed.

Listen on

Substack App

In this specific presentation, Bob Greenyer, *from the Martin Fleischmann Memorial Project,* focuses on his analysis of the WTC dust sample from 9/11 Jersey Girl, Patricia Casazza.

He uses high-magnification optical photos, SEM / EDS data, and an interactive deep-zoom viewer (starfire.tech) to show what he sees. Read more here.

He ties his LENR *("cold fusion")* expertise—14+ years studying plasmoids / EVOs *(Exotic Vacuum Objects)*, charge clusters, and transmutations—to argue this explains the dustification of the Twin Towers via a directed-energy / free-energy-like process, not conventional explosives, thermite, or fires.

Core Argument & Evidence from the Talk

Bob starts with background, thanks Patricia, demos the viewer, then builds his case with lab comparisons.

Key points (simplified):

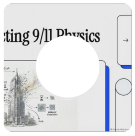

1. **The Sample Itself Looks "Processed"**
    - Fluffy dust with slag wool fibers (from the buildings), tiny spheres, strange particles, and fragile metal bits that crumble easily under finger pressure.
    - **He shows deep-zoomed images**: things like "topological monopoles" *(spheres with a hole and material spewing out the back)*, churned-up surfaces, tracks, and films. **These aren't random debris.**

What happened to...
AUG 14 • 9/11...

2. **Plasmoids / EVOs / Ball-Lightning-Like Structures Did the Damage**
    - **These are self-organized, coherent energy packets (like super ball lightning) that create intense localized effects:** nuclear-level transmutations (elements appearing/disappearing), extreme magnetic fields, and bond-breaking without massive heat/explosions.
    - **In the dust**: Holes, tracks, and "spewing" material match what he and others produce in LENR reactors (e.g., carbon arc, microwave, cavitation setups). He shows lab photos side-by-side with the WTC sample.
    - **Example:** Tiny iron-rich "krenellated" spheres with holes and output — he dismisses them as unique proof (can form in slag wool too) but says the overall pattern fits plasmoid activity.
3. **Material "Dustification" & Weakening**
    - Steel / metal in the sample is fractured along crystal grain boundaries, pitted, and weakened *(e.g., oxygen intrusion makes it brittle)*. He compares to Hutchison Effect samples *(high-voltage RF fields causing levitation, fusing, and disintegration)*.
    - **Concrete / glass / aggregates act as "fuel" for the process. Result**: Towers turn mostly to fine alkaline dust that hangs in the air or blows away easily — matches eyewitness "dust clouds" and lack of huge rubble piles/seismic signals.
4. **Transmutations & Anomalous Elements**

- **Strange mixes** *(e.g., calcium, sulfur, copper, etc., appearing where they "shouldn't")* match LENR experiments where matter reorganizes at low energy via plasmoids. He cites researchers like Matsumoto, Shoulders, Adamenko, and others who see the same signatures.
- **Lab demo**: Tungsten rod disintegrates into white smoke *(below normal melting / oxidation temps)* with similar elemental changes.

5. **Why This Points to Directed Energy / Exotic Tech**
   - Explains "cold" dust clouds, toasted cars *(selective damage)*, persistent fuming, bent steel without melting, paper surviving, and rapid "levitation" / disintegration.
   - The process is self-sustaining once started *(stimulated by light / vibration)*, hard to clean up *(needs grounding / water)*, and can be weaponized or used peacefully (material synthesis).
   - He contrasts it with thermite / nano-thermite *(critiques Harrit / Jones chips as not explosive; spheres not unique to it)*.

Bob's Conclusions (near the end):

The dust shows a real, replicable technology involving coherent energy / plasmoids that compromises structural materials from the inside.

It fits a directed-energy mechanism far better than conventional demolition.

He invites public scrutiny of the viewer and more samples for verification.

The talk is technical but visual-heavy *(he shares screens of images / comparisons)*.

It's a continuation from a prior session, so it jumps into details assuming some familiarity.

Patricia confirms the sample's chain of custody *(collected near Ground Zero, stored sealed for decades, handed directly to Bob)*.

This little edit I did, pointing to the contentious 2009 dust sample study, of Harrit and Jones, **which was proven to be scientifically flawed.** YT upload (16 minutes)

You seem to care enough to leave this useless comment.

Lastly, with regards to the technology used on 9/11, MOST are missing the bigger picture!

Just as the hazardous and wasteful technology behind a “nuclear bomb” can also be used to provide hazardous and wasteful nuclear power, the technology which caused the clean and effortless molecular dissociation of the twin towers could also be used to give the whole world effortless clean energy.

Exposing this clean free energy technology means and end to the ruling elite's ability to control and exploit the general population through scarce, expensive, dirty and inefficient resources such as oil, coal, nuclear and "renewables".

Any group with an interest in maintaining the current paradigm of artificial scarcity and crappy energy technologies, which keeps the general population enslaved, would have an interest in helping to maintain the 9/11 cover up, because exposing the crime also exposes the TECHNOLOGY to commit it.

Maybe the people who did 9/11 operate under a code of conduct where they have to show this technology to the people, so they have the opportunity to claim it.

And if the people are too stupid or apathetic to show any interest, they will then feel justified in keeping it for themselves and continuing to control and exploit the human herd, like the

A whole industry has been created - A whole "truth" movement, to have people NOT look at the evidence presented TO COURT in 2007, all whilst they are gaslighting good intentioned truth seekers with stories of remote-controlled planes or drones, CGI TV video fakery, bombs, and thermite for a controlled demolition or even buried or mini nukes.

Making sure people NEVER look at the anomalies with the 9/11 orphans, buildings 3, 4, 5, 6 and the Bankers Trust building, because if people do, they will immediately see the problems with the 9/11 truther narratives that are being SOLD to them.

Good intentioned truth seekers are FUNDING the greater cover-up of the truth of what happened on 9/11.

Have a listen and read the 2007 court filings you're NOT supposed to know about..

Dr Reynolds' 2007 whistle-blower case against NIST, was for the fraudulent WTC plane impact reports: https://nomoregames.net/2011/06/12/request-for-correction-by-nist-for-its-invalid-wtc-jetliner-animations-and-analyses/

Dr Wood's case was for the destruction at the WTC complex: https://www.doctorjudywood.com/articles/NIST/Qui_Tam_Wood.html

I met her ONCE at the SF Tesla society meeting in 2014, got her DVD, that's why I'm enthusiastic, since until then I believed in the official version of 9/11 gasoline burnout!!!! It

changed my life, in regard to that topic, which later on lead me to Prof. Judy Wood, the final convincing version of everything! Never followed BH after that, or her connections, so just do not know.

Sorry for your loss in the fires, but keep in mind, that it's important to differentiate between "Hot DEW" and "Cold DEW" - the tech that destroyed the WTC on 9/11 generates little to no heat, whereas in the Maui and California fires, it's a bit different - with much more evidence of heat, but anomalous fires.

It's important not to speculate and mix together different bits of evidence because it looks similar. Some folks do this to a much greater extent.

The other important evidence to study is that relating to Hurricane Erin on 9/11.

Please see the original material at http://www.doctorjudywood.com/ and http://tinyurl.com/911ftb and http://tinyurl.com/911htb as well as

Hi Norman, Raul here.

In the Simpson titled The City of New York Vs Homer Simpson, they said that the event of 9/11 had to take place between 9 and 5, because it was planned to be like that. When the building 7 started it's process of dustification it was after the collapse of the South Tower and lasted several hours, so the idea of initiating the process and then self sustained is in my opinion not correct. I dont know if you know the reason why the they hit the North Tower on top and the South Towers at 3/4 on the right, and why it took long for building 7, but has to do with a rite. Lert me know if you are interested in knowing it. thanks.

LIKE (1) REPLY (1) SHARE

9/11 Revisionist 9 Jun

Author

Hi Raul

Building 7 was dustifying all day, one could relate it to putting something in your microwave at "low heat" in order to "cook your food" over a longer period of time...

The Twins however had the setting on "high cook", thus taking so much less time to go down.

There is also speculation that Flight 93 might have been destined for Building 7, but maybe something went wrong with the 3D Volumetric Projection Technology, which caused the operators to come up with another plan?

We do know that Flight 93 ended up being the "hero" event to have people's perceptions managed, as it's a good way to have a "hero event" as part of a greater trauma based, physcological event to have people fixate on...

Pertaining to the numerology, and 9/11 Psychological Priming, you'd enjoy the following.

9/11 Alchemy: A Big Idea - https://rumble.com/v4irvwr-911-alchemy-a-big-idea.html

Thank you Norman,

Recentely I focused on elements that are not related with the technical aspect on 9/11 and I found many clues that can help you Mark, Mystic and Math and the rest of the group. For example I thought like you about a problem with flight 93, but then I found a very very interesting video broadcasted 1 and a half year prior, and it seems they planned for a plane to fall because of passengers where fighting, so they planned ahead the Flight 93 event. Will check your suggestion 9/11 about numerology, thanks. Also I did a full analysis of the Simpson Cartoon and there you will find many clues, like for example, they planned to destroy first Then south tower and Then the North (that is explained in the scene where Homer finds the toilet of the South Tower out of Order and has to go to the North Tower.

Thai is also another clue that the process is not automated when the process is enabled, but there is the need of a source that continue to push the process. I send the 2 links. I know many other things during my investigation. One day if you want we can have a chat if you wish. Cheers! Raul

Here the link for the Simpson Analysis titled THE CITY OF NEW YORK VS HOMER SIMPSON
https://www.youtube.com/watch?v=if022UkBaIA

And the link of the video where you can find the how flight 93 was possibly planned ahead, the first part. Betsy Lee Mcgee, the author of this video is very important as she understood the connection with the symbols of Jesus..but I went deeper and understood the reason for the first plane, the second plane and why it took so long to dustify Building 7. https://youtu.be/zCjeAt-TgQ8?si=ngRND-Cq0fqCmiQ3

There are 3 issues most people have when faced with the truth regarding the events of 9/11;

1. Problem solving skills

2. Group Think

3. They just can't handle the implications

Some of these people are just brainwashed, due to a very well orchestrated smear campaign against Dr Morgan Reynolds & Dr Judy Wood, after filing their whistleblower cases in 2007, that was pushed out like people like James Fetzer, Steven E. Jones, Richard Gage and the rest of the COINTELPRO talking heads, that infiltrated the 9/11 truth movement in 2005, with the formation of the "Scholars for 9/11 truth"....

You just need the talking heads, and then the good sheep, and conspiracytainment consuming thruth seekers, just outsource their thinking to these talking heads on their soapboxes, withoout thinking about what is being presented to them...

Andrew Johnson's two books, linked in my articles, chronicles all of this from 2025 to 2019.....

Read throught the following.....

Given that slicing through a row of 12-15 0.5m thick outer beams on one end, then a row of 6-8 1.3m thick inner beams, then another of each through the other side would require, in the time needed to cause instantaneous collapse, 10s of GW/cm^2)!), and we know that at 1MW/cm^2 there is beam ionization, we should have seen enormously bright ionised beams that blinded the video cameras from their intensity, sweep across the building across multiple levels at once. I can only conclude that Greenyer is not very familiar with energy beams, plasma, or the power technology involved in the use of DEWs. This would be far more difficult, and far more spectacularly obvious, than some Mossad and Yakuza demolition specialists with thermite.

Except your ignoring facts that can be explained by electron beams, so that's a bit moot. If you think there is evidence that disproved thermite, (and I have seen none convincing, plus we have witlessness to the thermite installation), than you should look for s something else that satisfies that criteria that is not electron beams, because there are basic facts of material science and engineering that make electron beams as impossible as jet fuel.

I have the CIA documents on scalar weapons. Maybe you should actually read what they are yourself. They are not small scale, precision target weapons, they are not beam weapons, and they do not cut materials. If you wanted to cause an earthquake in New York, or a severe storm, they'd be handy, but they have no relevance to precisely cutting support beams. Your fundamental ignorance of the science and technology you are trying to discuss is Flat Earther level.

Also, if the West has such amazing powerful DEWs, why don't they use them instead of getting their arse kicked in Ukraine and the Persian Gulf? Asking for Russian and Iranian friends. If you understood the actual state of development of DEWs in the West and how far it lags behind Russia, and lagged behind the USSR, you would know how ridiculous this sounds.

Yeah, no, the US can't even field a 100KW laser. This is right up there with "they have alien tech". No, they don't. Scholastic, politicized, nepotistic, for-profit educational systems do not support the development of such technology. USSR was ahead because of more rigorous educational standards where the goal was education, and maybe ironically to Western capitalists, less politicized sciences. The West has been leading the world in outright scientific fraud in the realm of physics for a century+. That doesn't give you this kind of tech. Neither to educational courses with 1/2 to 1/3 the core credit hours in core subjects, which is the ratio between Wes and Russia/USS in hard sciences and engineering. Technology doesn't appear from nowhere. It is supported by the education of the pool from which the scientists and engineers are drawn. When you have a lazy, anti-intellectual, profit-drioven imperialist society were educated proles are seen as a threat to the ruling class, you simply don't get the same level as you do in a society with humanistic purpose-driven utility value motivations.

You are just further exposing your ignorance. I am familiar with scalar weapons, which, again, USSR/Russia has always been 25-40 years ahead in by CIA's reckoning. You obviously do not understand what a scalar weapon is, if you think it applies in any way to this. Hint: they are not beam weapons, and do not cut materials in this way, nor are they easily containable. The cause earthquakes and storms, they do not cut building beams.

No, they really haven't, quite the opposite. Furthermore, that's completely irrelevant, because scalar weapons do no apply! They do not cut materials! They are not beams! They cannot slice through support columns! You don't even understand what scalar weapons are! All you do is spam links, because you don't understand any of this yourself. It's all vibes. You found some people who can technobabble in a way you find thrillingly confusing, on subjects you know nothing about, and you use that technobabble thrill to subconsciously justify the fact that underneath that it's all vibes, and you really have no idea.

Ok, let's dumb it down...

The dawn of a new age - "Somebody" has the ability to direct energy to disrupt the molecular bonds of matter. Direct or control, where it goes & what it does. This technology exists... The whole world saw it. - Dr Judy Wood

Were the towers destroyed by a gravity collapse? The evidence says no.

Were the towers destroyed by explosives? The evidence says no.

Were the towers destroyed by thermite? The evidence says no.

Were the towers destroyed by nukes? The evidence says no.

The answers to these questions can easily be found by studying the evidence.

The problem is NOT a shortage of evidence.

The problem is nobody wants to LOOK at the

evidence and think for themselves.

Instead, everyone wants to be TOLD WHAT TO THINK by "experts" in the MSM, alternative media, the scientific community, the government, and the "truth" movement, but these "experts" spend the whole time covering up and muddling up the evidence.

Here is a 20-minute video that most can follow: https://rumble.com/v5jnndx-understanding-the-911-evidence.html

Absolutely. This technobabble which is utter nonsense. He just drones on and on with supposed technical terms which he doesn't explain. Then throws in the odd irrelevant aside. Why are the other people there? They clearly haven't a clue what he is talking about. His delivery is scattergun, like throwing technobabble at a wall. Hilarious. This has got nothing whatsoever to do with mainstream media coverage of the towers

being destroyed, allegedly by hijacked planes.

You seem to have not listened to the presentation, then you'd know why the other people are there...

Ok, so YOU want to say that a Nobel Peace Prize nominee, with the LENR research that he's doing, and the research tools he's creating is techno babble, just because you can't understand it, LOL - You're a joker.

Here go do some more reading...

In April 2004, Lt. Col. Tom Bearden (ret.) sent this detailed historical briefing on

This is one of the most intelligent/logical discussions, I have heard about how 911 happened. It makes so much sense. What is really creepy for me...the end of discussion, when Bob stated there was no evidence of plane or human in the dust sample he studied. Wow 😳

Now those same criminals are buying up America and the World using all manner of DEWS. There are many kinds and it depended on their target. We are Under a very hot war attack right now now. Hundreds of DEW fires during up America and DESTROYING ALL GAS POWERED CARS AND PARTS DOZENS OF VITAL SALVAGE YARDS ARE NOW VAPORIZED.

NEW CARS to have a Kill switch and biometric to track and trace you and turn off your car if it. 'thinks'. you are unable to drive. Start telling all your fire chiefs that DEWS are the source, and make them realize that you know. They KNOW. Or we are toast. Got that?

Thanks Norman. Bob is superbly well-versed on this technology, and the argument that it was used on 9/11 is extremely cogent.
