Publication date:	2019	(Year)

Description	<p>Author/s: Shawn Hamilton  Publication: Nexus Magazine  Issue: Vol 26, No. 6 - page/s 65-72  Title: Hopi history: hi-tech clan warfare in the Americas  Date: October - November 2019</p> <p>Shawn Hamilton completes his series of articles on Hopi history shared by Clan of the Bear tribe historian "White Bear" Fredericks, discussing Kásskara, clan wars and technology used in the Americas, including references to spaceships and aeroplanes.</p> <p>General observation shows us that nature operates in cycles, so it shouldn't be too difficult to consider as possible White Bear's assertion that humankind has developed advanced technological civilisations in the distant past. Modern people seem to be locked within a 10-thousand-year time bubble that causes us to misidentify all scientific discoveries as novel. Thus, we fail to recognise and appreciate the scope of ancient knowledge that has accumulated over vaster spans of time.</p>	Can be additional information where a file name has ambiguous naming.
