Author/Source	Bevis Beauvais			(Where known)
Publication date:	2016	(Year)		

Description	<p>Author/s: Bevis Beauvais  Publication: Nexus Magazine  Title: Mind Over Matter - Placebos and Self-healing  Issue: Vol 23, No. 6 - page/s 49-54, and page/s 83  Date: October - November 2016</p> <p>The materialist, mechanistic, reductionist model based on Newton's scientific theories is being replaced by a new paradigm that incorporates holographic reality and the variables of mind and consciousness while acknowledging that we are all cosmically connected.</p> <p>Some clear thinking, intelligent and independently minded people, particularly if they are what is considered by conventional standards to be well educated, find it difficult to fully accept anomalous phenomena, regardless of whether such things involve psychic abilities, apparitions, UFOs or even hypnosis and the placebo effect. This instinctive scepticism, when it is self-aware and not driven by unconscious emotions, derives from the fact that institutional science has no paradigm or framework to explain how or why such seemingly atypical phenomena might occur.</p> <p>Cambridge biologist Rupert Sheldrake, a heretic to all intents and purposes, has proposed the theory of formative causation and popularised the term morphogenic fields to account for the global or holistic growth of bodies and organs.</p> <p>Both the uncertainty principle and the observer effect had hinted at the role of consciousness in shaping reality from the earliest days of quantum mechanics. Meanwhile parapsychology, which connects the two islands of physics and psychology, has evidence that minds can affect other minds through telepathy and can affect matter through telekinesis, while the experimenter effect suggests that observations in all sciences will be affected to some degree by the minds and intentions of the scientists who make them. The important finding to deduce from modern physics and parapsychology is that minds may affect both matter and other minds. Our positive thoughts, meditations and prayers are therefore a factor in health and healing, as are our negative thoughts and feelings both towards ourselves and others. In parapsychology, an observer effect is evident when the outcomes of experiments are affected by the belief system of the experimenter.</p> <p>A consistent and practical use would employ placebo when health is enhanced by positive attitudes and expectations, and nocebo when health deteriorates from negative expectations.</p>	Can be additional information where a file name has ambiguous naming. Description	<p>Author/s: Susan Larison Danz                  Publication: Nexus Magazine                  Issue: Vol 28, No. 6 - page/s 69-72                  Title: Strange times: The Prophecies of Mother Shipton                  Date: October - November 2021</p> <p>This rare collection of Mother Shipton's prophecies was sent to us by a NEXUS reader who told us that, thirty years ago [now 55 years ago], she painstakingly transcribed them and managed to smuggle them out of the Mitchell Library (now the State Library of New South Wales). They were accompanied by several of the more commonly published verses. The originals were kept in a locked room, along with many other volumes of prophetic writings deemed unsuitable for viewing by the general public. To our knowledge, this particular translation had never been made available to the public before appearing in NEXUS, first in 1991 and again in 1995. Following some background on Mother Shipton, we present the verses that were found in that book, in the order they were found, and have inserted in bold some attempts at clarifying or interpreting events past, and events to come.</p>	Can be additional information where a file name has ambiguous naming. Park  Publication: Nexus Magazine  Issue: Vol 13, No. 3 - page/s 17-21, and page 76  Title: Aches to Quakes: Sensitives who predict earthquakes suffer pain and ridicule  Date: April - May 2006</p> <p>Mysterious Earth signals that are precursors to earthquakes and volcanic eruptions can be detected by "sensitives" whose physical symptoms can provide accurate warnings. Meanwhile, new technologies are being developed that can tune into these subtle energies. Perhaps the most dramatic type of sensitive is one who can feel the earthquake's rolling precursory waves as sensations and can determine from which direction they are coming.</p>	Can be additional information where a file name has ambiguous naming. Description	<p>Author/s: Mae-Wan Ho, Ph.D  Publication: Nexus Magazine  Title: How The Mind Changes Genes Through Meditation  Issue: Vol 21, No. 6 - page/s 13-16, and page/s 80  Date: October - November 2014</p> <p>The mind-body divide has been breached in conventional western medicine, thanks to new research findings in molecular genetics which not only bridge mind and body but also East and West. Studies suggest that yogic/meditative practice gives rise to gene expression changes consistent with improved response to environmental stress. Results showed that yoga intervention not only ameliorated fatigue but also reduced the inflammatory response. There was a clear down-regulation of pro-inflammatory genes in the yoga group.</p> <p>Mae-Wan Ho, Ph.D © Institute of Science in Society, UK, Report 21 May 2014</p>	Can be additional information where a file name has ambiguous naming.
