A. MAN/135/Sy dated 23 Jan 1985

1. Reference A contained an account of a sighting of an alleged UFO in Oct 82 by a Section 40 along with some film negatives.
2. Since Section 40 visit to this Unit and the handing over to me of the negatives I have received numerous telephone calls from Section 40 asking me what was the outcome of sending the reported sighting to you.
3. I have pointed out to the Section 40 that these matters take time and further that they should not necessarily expect a reply.
4. Despite these assurances the Section 40 have persisted in contacting me and have recently requested the return of the film negatives.
5. I would be grateful if someone could please reply to them or if this is not possible, the negatives could be returned to this Unit for return to the Section 40

London,

March 14th 1985.

Dear Sir/Madam,

We have recently received a report from a headmaster and his family, of an unidentified object in the Burnley area. This object was observed originally as a very bright light over Brierfield, at 21.15hrs, Jan 23rd, 1985. As they watched it moved slowly towards them at an estimated height of 500ft. It continued slowly in a SSE direction before disappearing out of sight. Its direction of travel then was NNW to SSE. Total observation time fifteen minutes.

None of the witnesses heard any sound, even when it passed over the house, and its shape and display of lights was inconsistent with a conventional aircraft. Nevertheless, we would be grateful if you could check aircraft movements at that time and date, and inform us of your findings. Could it have been a balloon of some sort ?

We would be pleased to identify this unidentified, if there is a logical explanation. I look forward to your reply in anticipation.

Yours

Dear Sir,

I enclose a statement from Section 40 of Pencader,  
Dyfed regarding a U.F.O. sighting which she made on 16th February 1985  
and also on the following night.

Section 40

However I am not asking for any classified information to be  
divulged to me, but I would just like to reassure Section 40  
that they did in fact see something that was not a natural phenomenon  
(aurora, heavenly body etc.) but that whatever it was, it did not originate  
from a foreign country or indeed from outer space!

I would only add that the Section 40 are old friends of many  
years standing, and are most reliable and level-headed witnesses.

I would be most grateful for any reassurances along the above  
lines that can be given to me.

Yours faithfully,

Section 40

On the night of the 16th Feb. 1985 I crossed our farmyard and happened to look up at the sky as it was so clear and the stars were very bright, the first time for several weeks. Although I am not familiar with the positions and names of stars, one very bright light to the west caught my attention. It appeared about six times larger than the brightest constellation that night and seemed to hover as if dangling from a string. About every five minutes the intensity of light increased and a red glow at the base seemed to increase. The green rays on either side seemed more definite. After two minutes the light would decrease and the colours fade.

I called my husband, who was quite sceptical until he watched it for a few minutes. He said it could only be a hot-air balloon and the periodic red glow was the gas. I pointed out that there was quite a lot of wind and I did not see how a hot-air balloon could remain fairly stationary for such a long period. We debated the various possibilities and came to the conclusion that we were witnessing one of the mysterious UFO's we had previously ridiculed.

I first spotted it at 8.10pm and continued to observe it until 8.45pm. At this time it seemed to move further away, due west and then suddenly accelerated at a high speed, gaining height until it became faint and finally disappeared. This sudden move took place over a period of about 1½ minutes.

I then phoned the Air base at Aberporth and spoke to the constable on duty. He phoned me back later to say there had been no other reports of such a sighting and there was no possibility of it being a hot-air balloon or a helicopter. The weather conditions were clear so it could not be confused with inclement weather conditions. The lack of other sightings could be put down to the fact that it was a bitterly cold night with sub-zero temperatures and few people were venturing out. We only happened to see it as we had to cross the yard, to the shed where we were lambing, at frequent intervals.

The following night I looked for it again and observed it at 7pm. It was in the west and the light did not vary in intensity as on the previous night. The red glow at the base and green on either side were still visible. I did not call neighbours as I expected it to disappear before they could get here and they might have doubted my credibility had they arrived to find it gone. It moved very slowly across the sky towards the north, sinking lower on the horizon. It eventually became redder and disappeared over the horizon at 9.50pm. I rang the nearest neighbours at 9.30pm but they could not see it as it had sunk too low on the horizon to be visible from their place. I reported it to Aberporth but once more they said they had not observed it. Our farm lies at an altitude of 650 ft in rolling hills where the visibility varies considerably between different farms. The colour was more intense than that from a plane and a larger area of surrounding sky was lit up by it than from the lights of a plane.

SUBJECT: SIGHTING OF UNIDENTIFIED FLYING OBJECT.

Sir,

At 6.30pm on Saturday 16<sup>th</sup> February 1985 I spoke to a [Section 40] of [Section 40] Bucknall, Stoke-on-Trent who reported sighting an unidentified flying object. I asked her questions about this occurrence and report in paragraphs A to D below as set out for this procedure.

- A. 8.30pm FRIDAY 15<sup>th</sup> February 1985 for a duration of one hour.
- B. The object appeared to be of a mushroom shape, very bright and a glowing orange colour, No approximate size could be given although she stated it would be the same size as an aeroplane, There was no sound or smell coming from the object, and that was the only object visible.
- C. At the time of observing the object she was outside her house and standing in the front drive way.
- D. At first she saw it with the naked eye and then through a pair of binoculars. No photographs etc were taken.

Cont'd Overleaf / Sheet No.

E. The object appeared to be directly  
over her next door neighbour's house  
Bucknall.

Section 40

F. The object was directly overhead  
and quite high. She further states  
that it was about the same high  
as aeroplanes flight at.

SIGHTING OF POSSIBLE  
UFO - HUDDERSFIELD.

Divisional Officer, Kirklees (Huddersfield)

At 7.15 am on Friday 15 February 1985 I was on duty in the Control Room at Holmfirth Police Station when I received a telephone call from Section 40 Huddersfield (tel: Section 40)

Section 40 informed me that at precisely 4.02 am the same morning he had looked out of his house window and seen a strange object, which he could only describe as a bright orange ball in the sky.

The location given is above Castle Hill, Almondbury, Huddersfield. Section 40 stated that as he watched this 'object' hovering in the sky above Castle Hill, it descended, rose up again, descended onto moors, then rose up again, moved in the direction of the Emley Moor mast, Emley, Huddersfield, getting gradually higher, until it was eventually out of sight.

Section 40 called his wife, who also watched the object, he is adamant that it was not an aircraft.

I have made enquiries with Manchester Air Traffic Control, who confirmed that at that time a DC9 aircraft was over this area.

I submit this report for your information and request that it be passed to Chief Superintendent, Admin, for details to be passed to the Ministry of Defence, Department S4F (Air), Main Building, Whitehall, London, SW1A 2HB.
