ATC OCCURRENCE REPORT - REPORT OF MISSILE TYPE OBJECT -
21 APR 91**Reference:**

A. CAA 91/01151 dated 10 May 91.

1. At Reference you requested military comment on the title Occurrence Report.

2. All the information was passed to the MOD and was examined by the departments responsible for the air defence of the UK. We are advised that those departments have not been able to confirm the identity of the object sighted by the Alitalia MD80 crew.

3. The MOD were able to rule out the possibility that the object was a missile from the Army firing ranges in the Lydd area. Additionally, MOD has no report of any space related activity which could provide an explanation, and the description does not correspond with that expected if the object had been a meteorological balloon.

4. In the absence of any clear evidence which could be used to identify the object, we are informed that MOD will treat this sighting like that of any other Unidentified Flying Object and therefore will not be able to undertake any further investigation into the sighting. We now propose that this Occurrence Report is closed.
