Section 40

122

Dear Section 40

Thanks for the Section 40 122 info. It looks like a good case, despite the location of the witnesses at the time!

Section 40 and Section 40 have submitted very lucid reports, obviously written independently. It's my impression that they were probably standing towards the rear of that Glastonbury Festival concert audience at the time of the sighting. It's not too surprising that no one else paid much attention to a happening overhead in those circumstances. In their diagrams the witnesses have depicted the direction of the object's circling motion differently, but then one can't be clear about the viewpoint taken by each. It's interesting that Section 40 remembers the coloured lights displayed by the object to have been square, whereas no mention of this is made by her companion. (Such differences in reports could be dependent on the relative sharpness of the eyesight of the witnesses --- and your current questionnaire doesn't ask whether glasses are usually worn or were being worn).

The timing of the event is excellent, beginning only 6 minutes after a predicted delivery from a sunset-orientated track, 54-degrees inclined. (See attached numerical computer output sheet).

By the way, I've recently taken the time to review my collection of those computer-processed runs which resulted in positive correlations with the Astronautical Model (which accounts, in part, for the slowness of this response from me). They cover the period 1950 to present day and there are 342 in total. 317 are British. Using my sort program, I've been able to identify the ground tracks most commonly followed by the hypothetical delivery/retrieval vehicles during that period of time. As you will see from the attached map, there are 26 of them -- ignoring those shown but not listed; but the favoured ground tracks are linked with only 9 of the possible 21 'orbit' options covering British latitudes. Together, these tracks relate to 293 (92.4%) of the viable sightings.

The Glastonbury happening relates (time-wise and geographically) to the tracks labelled 54°/65°E (delivery) and 58°/51°E (retrieval) on the map.

Where tracks converge it could be expected that such locations might have the characteristics of 'ufocals'. Of special interest (in view of the Sturminster Marshall, Dorset, LITS event of 9.8.93) is the convergence of tracks north of Poole. Of special interest, also, is that they've got London surrounded! My various evaluations of London events in which I've identified the tracks used should make more sense to you now. Have I convinced you yet that we really are dealing with an astronautical activity?

Section 40 Best wishes,

Section 40

24 Aug 94 -

On the evening of the 24 Aug 94 at approx 2100hrs
 Section 40 decided to look to see if she could
 see the lights again. This time she thought she
 could see 3 lights - One bright large one and 2
 smaller lights. They appeared stationary for a
 time and then began to move around.

- a) up
- b) down
- c) side to side
- d) Spiralling

12 SEP 1994

The speed was variable from looking like a
 shooting star to slowing completely down. An
 aircraft went by and they appeared to move
 out of the way. I believe it disappeared and
 came back again. This was seen with the
 naked eye. This was continued to 22.25hrs
 The evening was again clear but not as bright.

24 Aug 94 -

Section 40

Section 40

then came onto the telephone and
 informed me that he had observed this evening's
 sights through binoculars. He believed that it
 was not one light but a cluster of lights. When
 on the move it appeared to adopt a figure 'A'
 or an arrow head. It seemed to change shape.
 He went outside and there did not appear to be
 any noise coming from it but he could not
 give me a distance.

Other Witnesses:

Section 40

23 Aug 94

On the evening of the 23 Aug 94 at approx 2130 hrs

Section 40

was watching TV in their front room. The curtains were not drawn and she noticed a bright white light in the sky. She went upstairs for a better look but could not see anything. At approx 2330 hrs she went to her bedroom and noticed 2 lights in the sky near Crich stand (war memorial). Eventually one shot across the village and behind a hill were as the other remained stationary until about midnight. She could not really estimate the distance or size and she only saw it with the naked eye.

It was a clear, dry night with stars in the sky

Additional Information

1. Crick Church - illuminated spire.
2. Crick Stand - high hill with lighthouse
3. Sister Section 40 has made drawings of sightings.
4. RAF Newton is the only contact made at present.
5. There have been other sightings from people in village.
6. Father may have seen lights once previously before when walking his dog.
7. Castle Donnington Airport is near by ^{maybe a} holding pattern.
8. They believe they would recognise low flying aircraft as they have many going overhead during the day.
9. Were advised that this report would be passed over in the morning for onward transmission to relevant authorities?
10. They were welcome to contact RAF Newton & the civilian police if it was to happen again.

APS/S of S
Sec(AS)2a

LETTER FROM Section 40

Section 40

Section 40

1. Further to telecon Section 40 earlier today, I attach as promised the letter from the above initially passed to us by APS/S of S for reply that we discussed.

2. As you can see, the writer touches on a wide range of issues some of which might be seen as "scientific" eg. anti-gravity, flying saucers, etc.. Clearly however the main thrust of his letter is his desire for a job and what appears to his belief that "C Summers" (?) has rejected his application for a "career in the Security Services".

3. As discussed therefore it seems more appropriate for CM to lead in replying.

4. For the record, we are not aware of any research into "anti-gravity" at British Aerospace Preston or elsewhere. As for "the enigma of the so called flying saucers" possibly Sec(AS)2a, to whom I have copied this correspondence, may have some views.

Section 40

MRB(F&S)2

Section 40

SECRETARY OF STATE

Section 40

Head of

MRB (F&S)

29/8

I attach letter(s) which the Secretary of State has received from members of the public, and which ~~have~~/have not been acknowledged by this office.

2. I should be grateful if you would arrange for the appropriate action to be taken, including a reply as necessary. Since the Secretary of State attaches importance to such letters addressed to him being answered promptly, any reply should be sent within two weeks of the date of this minute. If, exceptionally, this should prove impossible an interim reply should be sent within the same timescale.

3. The Open Government Code of Practice came into force on 4th April 1994. You should ensure that all replies to members of the public are provided in accordance with the procedures as set out in the Code. A full explanation of the Code of Practice is contained in DCI(Gen) 112/94; further information is available from Man S(Org)1 telephone extension **Section 40**

Section 40

For APS/Secretary of State

Section 40

5, august 1994.

Section 40

The Right Honourable Malcolm Rifkind M.P.,
House of Commons,
LONDON.

Dear Mr. Rifkind.

I recently wrote to: Section 40
The C.V. was simple and to the point, I was applying after
£72,000 of education to go into my well prepared for and well
sought after career in the Security Services.

Section 40

the point is Mr. Rifkind they have said there are no suitable
vacancies, with all that education and knowledge I clean some
ones house and mow lawns for less than two pounds fifty an hour.

The point I am making to you is simple why has all £72,000 of
education been paid for by Lancashire County Council and when
I reach fruition I can not put my self to working for the society
that has paid for me for the last twenty two years.

How do you feel that £72,000 of your tax money has gone into educating
myself and now I am not allowed to get some work done?

I have offered to do something for them for free to show
them that I am legitimate in my yearn to work in National Security
they can't even take the trouble to send me a security pass to
do some research for them.

Will you try to resolve this dispute, i.e. that they will at least
give me a contact and an interview so that I may be of some value
to the society, after all I have been wanting to do the job for
twelve years and worked hard.

I take this opportunity to congratulate you on making the changes
you did recently in reducing the size and capability of our defences;
this will pave the way for a better, safer future, where peace
will be the watch word and not war.

Your duty to our country is very demanding at best and I
sympathise with you that often progress is difficult to forge,
but for those who are willing to work for our National Security
through a sense of loyalty and patriotism please let them do so.

I further, take this chance to wish you every success in imple-
menting further changes to radically reform our defence, for a
long time things have been running "inefficiently" with many people
chasing paper in the MOD and you have weeded them out, good on
you.

Second Page, Final Page.

I wish there was more I could do for my country but if the Security Services won't even interview people before passing judgment, then I can't foresee that our projects of a sensitive nature will ever be secure. Too many secrets find their way under the door, I don't like that and I deerly would like to do something about it; sadly the people who could give me the opportunity are being difficult.

The research that I would like to access at British Aerospace at Preston in Lancashire concerns anti-gravity. The application could be made practical within the next thirty years, and I believe we may solve the enigma of the so called fling saucers simultaneously.

You have always been a hard worker Mr. Rifkind, and so you can appreciate that it greaves me that I have worked hard and can't seem to embark on the career I am destined for.

I am your obedient servant,

Wolhan and Borders Police,
Police Station, Armadale,
West main Street,
Armadale, West Lothian.

RECEIVED
PLOTTED
DISSE

About 23.50 hours on Saturday 30th July, 1994, the aforementioned was watching an electrical storm from the playing fields at Armadale Academy, West main Street, Armadale when his attention was drawn to what he describes as a large round object in the sky travelling towards him from the south. Although unsure of dimensions when pressed his witness estimate that this object was some 30-40 feet in the air and about 10 feet in length. As this moved towards the witness it stopped some distance away for only a few seconds and thereafter continued southwards out of sight. Obviously intrigued by this the witness drove his vehicle to an isolated road known locally as the

Parkings Road this morning. As
 the towns Armadale and Blackridge. As
 he drove onto the from the west he
 is aware of the same object passing
 his vehicle moving northward at the
 height as before. He alighted from
 vehicle and watched as the object
 moved north stopping approximately 1/2 mile
 away. At this the object moved towards
 ground up again and speed off
 towards. The witness contacted the police
 on a mobile phone he came. During
 incident also, the vehicle and torchlight
 had suffered electrical failure.
 at no time was there sound or light
 coming from the object.
 weather conditions were good, a high
 cloud cover and good visibility.

REPORT OF AN UNIDENTIFIED FLYING OBJECT

a. DATE TIME AND DURATION OF SIGHTING (Local times to be quoted)

0225 Local 18' August

About 10 seconds

b. DESCRIPTION OF OBJECT (Number of objects, size, shape, colours, brightness, sound, smell etc).

Circle, with small wings on the side

Green / Orange Green towards edges

c. EXACT POSITION OBSERVED (Geographical location, indoors or outdoors, stationary or moving).

Outdoors, field drive to Westbrook Warrington

Section 40

d. HOW OBSERVED (Naked eye, binoculars, other optical device, still or movie camera).

Naked Eye

e. DIRECTION IN WHICH OBJECT WAS FIRST SEEN (A landmark may be more useful than an estimated bearing).

N to South

f. ANGLE OF SIGHT (Estimated heights are unreliable).

Passed Directly Overhead.

g. DISTANCE (By reference to a known landmark wherever possible).

h. MOVEMENT (Changes in R, P, Q may be of more use than estimates of course and speed).

Moving Very Fast Coming towards you -
then going away

1. METEOROLOGICAL CONDITIONS DURING OBSERVATIONS (Moving clouds, haze, mist etc.)

Mostly clear, one or two clouds - Object went behind a cloud

2. NEARBY OBJECTS (Telephone lines, high voltage lines, reservoir, lake or dam, swamp or marsh, river, high buildings, tall chimneys, steeples, spires, TV or radio mast, airfields, generating plant, factories, pits or other sites with floodlights or other night lighting).

None known

3. TO WHOM REPORTED (Police, military organisations, the press etc).

Liverpool Airport

4. NAME AND ADDRESS OF INFORMANT

Section 40

Section 40

5. ANY BACKGROUND ON THE INFORMANT THAT MAY BE VOLUNTEERED

6. OTHER WITNESSES

3 friends in Wigan also saw it

7. DATE AND TIME OF RECEIPT

0523 local 18 August

The above details are to be telephoned immediately to AIS (Military), LATOC or extensions Section 40

The completed form is to be despatched to:

REPORT OF U.F.O. SIGHTING

DATE: Sunday 14th August 1994

PLACE: Southampton City Centre

TIME: Approximately 11.15 pm

DURATION: 10 minutes

HEIGHT: Approximately 1000 feet

WEATHER: Clear and no wind

Dr: Section 40

Section 40

and myself noticed two bright lights hovering over Southampton City. They were extremely close together - without beam and like balls of light. Being an ex-RAF I thought it could only be a harrier or helicopter. The lights did not get nearer or larger, no hovering was deduced. I grabbed my camera and the flash took ages to warm up which was unusual as I had been using it okay whilst on holiday two days previously. About a minute later, at approximately 11.20 pm, leaning out of the window, the picture was taken and then the film jammed - shot 31 out of 36 which was strange. As soon as the flash went off, the craft rose smoothly and quickly upwards, paused and then flew at great speed towards and over the flats from where we were watching. As it passed overhead, and the camera was jammed, it appeared to have a few red lights underneath. These lights were not flashing as per normal aircraft. The sound it made was of a jet-like quality, not a helicopter, but was more of a deep, resonating force.

Eastleigh airport was closed at 9pm and no night flights should have been passing over. Southampton City police reported that their spotter plane was not over the city and no air ambulances were about either. Bournemouth International was also closed at 9pm and Gatwick and Heathrow report that if there were any flights using Southampton airspace, it would not have been low. Only West Drayton have the facilities to monitor the airspace above Southampton when Eastleigh is closed. Before going to the press, we would like to know what West Drayton's radar report at that time concludes. Following is a diagram and the photo. We look forward to your call as soon as possible.

Yours sincerely
