STATES:-

About 2040 hours, Tuesday 2nd April 1996, I was driving northwards on the A1, about 30 miles south of Edinburgh (near large cement works), when I saw two Orange/Red coloured circular lights in the sky one on top of the other. They appeared to be flying at the height of an airliner, they shot across the sky in a westerly direction but I would say their speed was at least eight times faster than a normal jet.

I pulled into a layby to watch these objects, after I had parked up I noticed one of the objects had disappeared. The other appeared to be hovering, I couldn't understand how it had come to stop so quickly due to the speed it travelled across the sky. The object then began to move slowly southwards and the whole thing was flashing in and out. I watched it until it disappeared out of sight.

The sky was clear and the weather was fine.
