Our Ref: UFO Report

25 November 2009

Dear Sir

I am writing with reference to your report of 'unidentified flying objects', seen on 1 November 2009 over the Cleethorpes area. I have been asked to reply as this office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

I can confirm that there were no military aircraft in the area at the time and on the date you speicified.

I am sorry I could not be more helpful.

To: Air CmdSecCS-UFO Desk1
Subject: large sighting

Dear Sir

I have just seen six UFOS whilst driving home. I am sure there is a good explanation and would like to check if you had military craft on exercise in the area to this number.

At 12:31 this evening, approx half an hour ago I saw 6 lights almost in an S shape slowly moving across the sky. I was on the road FROM Humberston (suburb of Cleethorpes) to Tetney, North East Lincs. I was on the straight just before Tetney village when I saw through my cars front window these 6 lights. I've never seen anything like them, it just looked very odd. I pulled over and got out to look further. They were moving in formation from West to north east (towards the sea). The conditions were misty in the sky, although at ground level it was clear. Then one of the lights disappeared quickly. I got back into the car to follow the lights and pulled over again further along. Only two lights remained and gradually faded out. I would like to note that there was NO sound.
I would like this to be anonymous, you are welcome to contact me discreetly but I do not want the media to know of me or my name as I run several businesses and have a reputation to consider. I have taken several photographs on my phone but can not examine them or blow them up until I get back into office as I have left cable there.

I would appreciate knowing if you had six helicopters in the area at this time or have I seen a genuine UFO formation?

Many thanks

Our Ref: UFO Correspondence

10 November 2009

Dear Section 40

I am writing with reference to your e-mail dated 31 October 2009 requesting details of any UFO Sightings reported on 24 December, past or present. I have been asked to reply as this office is the focal point within the Ministry of Defence for correspondence relating to UFOs. I note you have previously written to the MOD several times on the subject of UFO's. Your e-mails of 15, 16, 17, 21 February 2009; 5, 25 of March; and 16, 20 of May refer.

Details of UFO sightings reported to the MOD from 1997 to 2008 are available for viewing on the MOD website www.mod.uk by searching under "UFO Reports". Reports for 2009 will be published at the end of the year. Therefore any UFO reports from 24 December will be available for you to view online.

I hope this information proves useful to you.

Regards

Dear UFO Desk,

I am writing with regards to request if in your records system if there is a file/record of a any reported 'UFO' Sighting that was reported on December 24th, past or present, in which an unusual flying object was sighted and reported officially in your records systems?

?

I would greatly appreciate a copy of such reported 'UFO'.

I thank you for your time and I would greatly appreciate your response.

Yours Sincerely,

From: [redacted]
Sent: 21 May 2009 14:25
To: [redacted]
Subject: Release-Authorised: 20090521-Response to [redacted] Anti UFO Weapon-U

Thank you for your e-mail of 20 May 2009 regarding details of your weapon that could shoot down UFOs.

I can assure you that the Ministry of Defence (MOD) appreciates your concerns and takes most seriously its' departmental aim to deliver security for the people of the United Kingdom and the Overseas Territories by defending them and acting as a force for good by strengthening international peace and security.

On 26 February the MOD launched the dynamic Defence Technology Plan (DTP) available online at www.science.mod.uk to enable transparent prioritisation and coherence across MOD's R&D programme. The DTP aims to encourage fresh and innovative thinking, to demonstrate the value of the research programme to Defence and to enable more effective working across the R&D community. This is a cost-balanced expression of research priorities for the MOD that takes forward the Defence Technology Strategy (DTS), published in October 2006.

I have had my colleagues in the Science Innovation Technology area conduct an assessment of your proposal. The outcome this assessment is that they are satisfied that our capability to ensure the air defence of the UK can be delivered without the need for new equipment. My colleagues will contact you if a future requirement emerges that could be met by your weapon. Until then I trust that this concludes the correspondence on this matter.

Dear Section 40

Thank you for your e-mail of 25 March 2009 requesting that your previous correspondence on UFOs is passed directly to John Hutton, the Secretary of State for Defence.

The Secretary of State for Defence receives a great many letters and e-mails from members of the public but unfortunately does not have the time to read or answer them all himself. For this reason, the Ministers' Offices ensure that correspondence is passed to the subject matter experts within the Ministry of Defence (MoD) for them to answer.

Therefore your correspondence is passed to me to answer as my post has responsibility for UFO matters across the MoD.

Your e-mail of 5 March 2009 addressed to RAF Waddington has also been forwarded to me. As it covers much the same ground as your e-mail to me of the same date, I believe that my response of 11 March 2009 sets out the MoD position.

I know this will be a disappointing response, but I hope it explains the situation.

Subject: Release-Authorised: 20090311-Response to Section 40 Weapon-U

Dear Section 40

Thank you for your e-mail of 5 March 2009 asking if the Ministry of Defence would like details of your suggestion for a weapon that could shoot down UFOs.
The UK has a comprehensive suite of capabilities that provide its air superiority, both here at home in the UK and also on expeditionary operations. The UK's Air Policing Area is under continuous surveillance using a combination of civil and military radar installations that provide a continuous real-time "picture". Any threat would, of course, be handled in the light of the particular circumstances at the time, however, rest assured that we have at our disposal a range of capabilities that we are confident can neutralise even the most demanding of targets. Notwithstanding this, we are not becoming complacent and we continue to develop successor air defence capabilities, such as fast jet and rotary wing aircraft and smart weapons, which utilise cutting edge technologies and will see the UK well placed to handle any threat well in to the future.
In the circumstances, and whilst we note your kind offer, we will not be pursuing it any further.

Dear [redacted]

*Thank you for your your response relating to my many enquires relating to Unidentified Flying Object (UFO) activity in the United Kingdom. I **do** understand that a UFO does not necessarily mean extraterrestrial related. I have knowledge that the RAF have on more than one occasion intercepted a UFO using military aircraft.*

Therefore, the reason i am contacting you once again is that, through my research as a UFO Researcher, i believe i know how you can shoot down a UFO. Hypothectically, let's assume that these UFOs are extraterrestrial and that the RAF has tried but failed to bring down an extraterrestrial UFO. I have a suggestion for a new weapon which could and will bring down a potential extraterrestrial UFO. Actually, it has much to do with what happend regarding the Roswell UFO Incident in Roswell, New Mexico, USA back in July 1947.

If you would care to know more about my suggestion for a weapon which could and will take down a UFO craft, then i would like to speak personally with someone such as a General or high ranking official within the Royal Air Force, immediatley. It is your choice. Trust me, have faith.

I await your action.

Sincerely Yours,

[redacted]

UFO Researcher

From: [redacted]@mod.uk
To: [redacted]

Dear [redacted]

Thank you for your e-mails of 15, 16, 17 and 21 February 2009 to Secretary of State for Defence, John Hutton, expressing your belief that the Ministry of Defence (MoD) should investigate UFO sightings more thoroughly. They have been passed to this office to deal with as we have responsibility for answering questions relating to UFOs. You also wrote direct to this office on 17 February 2009 along similar lines. This response will cover all your correspondence.

As I explained in my letter of 13 February 2009, the MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial lifeforms, about which it remains totally open-minded. I should add that to date the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

The National Archives' reference DEFE 24/2452/1

The MoD is not complacent about the integrity of the UK's airspace which is maintained through continuous surveillance of the UK Air Policing Area by the Royal Air Force. This is achieved by using a combination of civil and military radar installations, which provide a continuous real-time "picture" of the UK airspace. Any threat to the UK Air Defence Region would be handled in the light of the particular circumstances at the time (it might if deemed appropriate, involve the scrambling or diversion of air defence aircraft).

From that perspective, reports provided to us of 'UFO' sightings are examined, but consultation with air defence staff and others as necessary is considered only where there is sufficient evidence to suggest a breach of UK air space. The vast majority of reports we receive are very sketchy and vague. Only a handful of reports in recent years have warranted further investigation and none revealed any evidence of a threat. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for UFO sightings if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

As I am sure you can imagine, the Secretary of State and the Chief of Air Staff are both extremely busy and it will not be possible for them to speak with you.

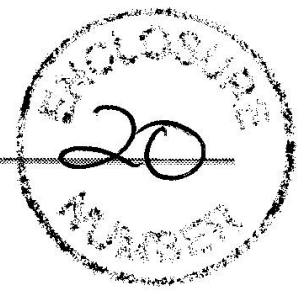

Yours sincerely,

This is not a ufo sighting report sadly,

Much more revealing than that, I'm afraid to say well lets hope so anyway and in some way beneficial to the government. I have been searching quiet afew government sights now looking for the right department.

But no luck as of yet.

I would be so greatful if you could help me out and point me in the right direction please.

If you could take a quick look at a few of the attachments I have sent.

You should be able to hopefully point to the right department.

I have tried to explain briefly an the attachments what its all about but its such a hard area to cover.

I have so many pictures at hand its also knowing which ones to choose too.

I am sorry for intrution,

The National Archives' reference DEFE 24/2452/1

I couldnt work out what was happening to me until well read...

Dear Section 40

Thanks for the images. My impression of your presentation... I believe that you are tuning in to the 'holographic' or 'fractal' nature of the universe. This is a very useful mode of perception, and can be used to gain knowledge, wisdom, and personal guidance from your guides on the inner planes. The information received can be rather subjective (i.e. relevant to your own special Path) because what you see is not necessarily what other people see. You are a unique being and have a unique perspective of the universe. The universe 'communicates' to you through the signs and symbols that you perceive in the world around you. This can lead to valuable knowledge that you can share with others, but the visual component of your perception may not resonate with other people because they are looking through different eyes. People see what they need to see. They see whatever will assist them in their own personal evolutionary journey. Regarding your own perception of the images in your presentation... you may find that the knowledge and ideas that you gain from your impressions of the images is better communicated in written language because of the necessarily subjective nature of your perspective. I agree with you that living intelligent beings can be seen in 'unexpected' places, and I think that this is an important message. The whole universe is a living mass of intertwined etheric organisms (or 'devas') who exist behind and within the surface appearance of our world. I think you are seeing the 'devas' whose living intelligent forms compose everything that exists.

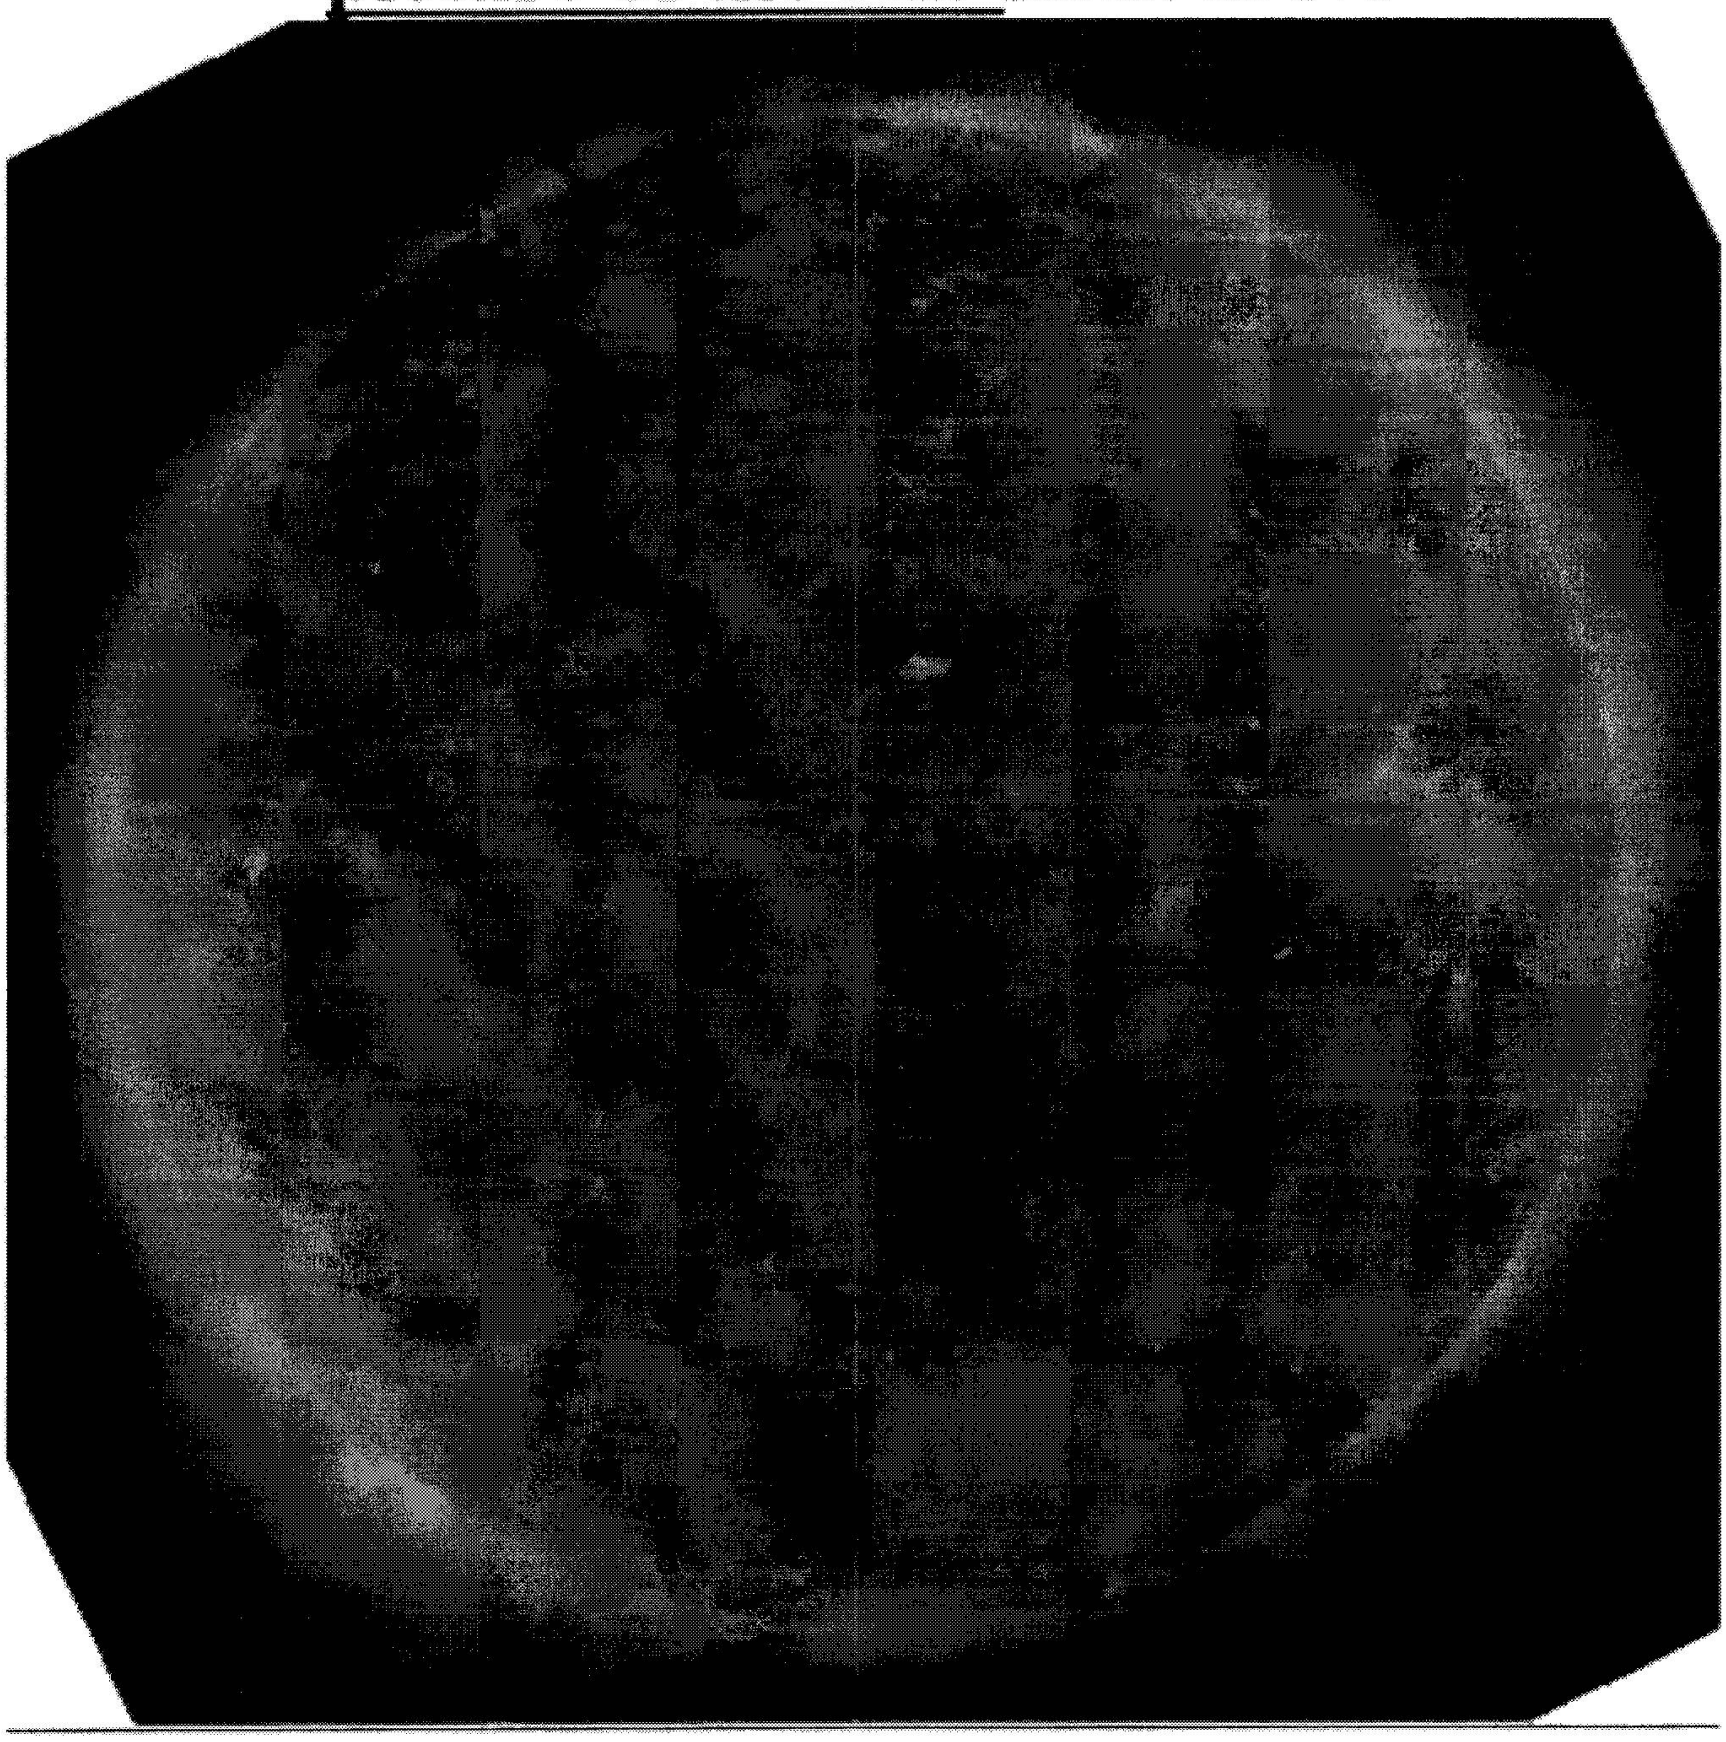

Living intelligent beings or menafestations!

In other words I am trying to show you these beings they do exist in the other world its called or hidden world that we live with.

Subject: Re: 20091007-Response to [redacted] UFOs The Lothians-U

The ufos were seen by people in the Figate Park by the pond there, Craigentinny Railway depot workers, and people happening to be in their gardens in Mountcastle Crescent.....the first ufo moved in an absolutely perfect horizontal line, roughly over the Pentlands, then without

stopping jumped vertically, with absolute perpendicularity, shooting high into the stars.....size estimation "about twice the size of a Boeing 747" ".....roughly triangular in shape, shot upwards, it was a very bright light with an orange light underneath.....then another one came in and did exactly the same.....if anythin' it wiz movin' faster than the first yin, like it wiz chasin' the first yin.....it moved up faster....."
It was an absolutely perfect right-angle that was formed by the flight pattern of both craft.

Comments were of the ilk of "Surely they saw that on radar. How have we got places like RAF Leuchars, Edinburgh Airport, aw they places, and there's been no announcement of seein' somethin' weird on the radar? I really would like to speak to these people."
I'll withhold the date of this incident for the present, and say as much as that it was in the early evening, and say that it was roughly three weeks ago or so.....have you or have you not registered unusual radar traces roundabout that time period.....it does sound like a fairly specific

Dear Section 40 [redacted]

Thank you for your e-mail of 25 September 2009 regarding UFOs. It has been passed to this office to deal with as we are the focal point for UFO matters within the Ministry of Defence (MoD).

Firstly, it may be helpful if I explain that the MoD examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

I am sorry I could not be more helpful.

From: Section 40 [redacted]
Sent: 25 September 2009 16:32
To: Section 40 @[redacted]chars.raf.mod.uk
Subject: UFO Sightings Within The Vicinity Of The Lothians

Recent spate of sightings, in particular persons have expostulated "Surely there must be radar returns on these craft", this was a former manager speaking having witnessed totally incredible manoeuvring of strange objects.

Flight pattern was initially perfectly horizontal at great speed and extremely bright, a dead stop, then shot upwards absolutely perpendicularly cutting a perfect right angle in the mind.....witnesses swear this was visibly shooting far higher than normal craft which due to it's "twice-the-size-of-a-747" quality remained visible for a long time. A first object caught people's attention, then another one did exactly the same thing within exact same spatial trajectory seconds later.

Any unusual returns?
What is the correct avenue of enquiry regarding these things?
Much obliged,

txtinforequest: In May of 1983 I encountered was witness to a UFO some twenty-feet away. time 0845, place little-paxton cambs. I observed its geometric shape as pyramidical, four blue strobic-type tubes flashing from the apex to the four base sides. Orange sphere in centre slightly obscured by a kind of uniifed green mist. On returning to GT Barford near bedford to my friends switched on local radio which announced/ Two fighter craft from mildenhall sent to reconnasaince two UFO, which were doing 1800mls.ph bank turns.. In september 1983 encountered Cage-shaped object on farmers field some twenty-feet away. Place between wisbech and kings lynn norfolk, time 2045, observed for some three minutes. Green/red/blue lights highly visible around bars of cage, object arose and dissapeared into time-corridoor after about forty-feet. I believe this to be some form of experimental time-box. On 18thdec 1992 at 2345hrs observed/encountered Oval-craft some forty-feet in length and from base to dome-shaped aperture about ten-feet. Colour rusty-red (like metal just removed from forge and allowed to cool down.) Watched as craft then some eighty-feet in air turned on orange-ports which released some kind of Unified-field, which in turn immediately "opened" a Gate/portal into spacetime. (dimensional-time) through which this craft slowly dissapeared into. None of these encounters seem to have been released in recent Information-act? Maybe because proff david clark cannot believe in truth?. He is surely no expert in UFOS thats for sure!! However MUFON have all particulars and I have also uploaded my three encounters to my site and blog. Why is the truth being withheld? Certainly I like others will participate to expose the truth with or without your assistance.

Dear Section 40

Thank you for your letter plus records of sightings since the beginning of this year 2009.

After going through them they did not give me too much information except that several say there was no noise? This I believe as this is near one of my very first full view of one that glided just above my head about 1000feet above & about 40/60 feet in diameter all black no lights @ all and no noise either just pure silence as if like a bird when it has it's wings spread out to glide, but what struck me was there was no port windows and underneath the craft had earth camouflage & two oblong box shape in the belly and thought that this is strange for an UFO that has these earth markings? Underneath and it was travelling very slow that even single engine plane could of over take or even a racing car to pass it.

The two photos above show this UFO and I mad a model of it which the UFO look like a giant Frisbee? If you like I could send you a copy of my model or even to the MOD!
First of all I'm ex- RAF & also ex-army served with 4th Royal Tank Regiment in the Middle & Far East on active service in the early 60's.

I have believed in these crafts since my school days and now I have proof of these UFO's in photo's & videos since 1996 right up to 2009 from my back door all my photos & videos are through the day of very good light and all were taken between 11-00am & 4-30pm two I spotted @ night being a very good clear moon light night in between a large gap in the clouds over Chapel Cross heading towards Edinburgh as also I made a model of this UFO as did the first one but is of a very different shape some also taken while out walking with a friend when I was in Eastriggs going over a railway bridge when it buzzed an old ww11 tempest plane thought the pilot did not know it @ the time which happened on the 1st of June 2009 @ about 12-30 & 1pm the video shows the shape and the speed I come to is of a 6th of a second of the time it came into our airspace &

© Crown Copyright

The National Archives' reference DEFE 24/2452/1

back out, this I used the time from the length of time it showed upon video & disappears after if had a good look @ the plane it also left on the dive & turning a slip stream I also made paintings taken from prints from the video I made 7 prints as which was the number of frames in the video of appearing & disappearing.

I would be happy to for any one to pay a visit to my place and I can show you all that I've taken and the most recent ones from out my back door just a few weeks ago I saw two jets leave a vapour trail in the shape of a "v", then I also notice three UFO's that look like out of "Star Wars Film" they had me glued to the ground just watching them that I nearly forgot my camera in the kitchen as I have two or three near hand 2 digitals & one SLR Camera it was the SLR one I used but the third one was too far behind I managed to get one shot and forgot to put the camera on several frames per second so I was not quick enough to take the next shot as they all disappear before I could & then could not say how they manage to disappear before my eyes it was like magic I think they were the mother of all UFO's they look like battle ships that you see in old war films.

The other two photo's are of the plane being buzzed & the others is of a RAF jet going round above my house several times on a very clod cloudy day around 4pm plus there were 4 UFO's playing with the jet I used my digital cam camera & also saw one that kept coming out from behind the clouds while the others hid behind thin layers of clouds but still saw them with my eyes as well with the camera and I followed the jet as it went round the area before heading I think for Spade Adam if that's the right spelling?

I could go on and on describing all in detail but it would take up a lot of pages and a lot of ink so if any one from the RAF/MOD wish to pay a visit and watch the videos and see that these UFO'S are genuine space crafts and I do not go by what the majority that seam to see them @ night and tell what lights are seen, I know that strobe lights on planes & helicopters move right round them from wing tip to tail as similar with the copter, I've seen copters almost every night in the area from the Solway coast and around Annan of Chapel Cross even high altitude planes are mistaken for them as well though they should note the speed of the plane and then they should know that it is a space craft of the speed it does from a to b take the area, time and of course if it's a very dark cloudy night or a very clear moon light night as with through the day as well, I see all the ones through the day 9 times out 10 they all seem to be around when ever there are planes it is I think rare for one to be very low and just glide as the one I first saw in 1996/98.

I may have a computer but I'm not on the internet as @ the moment I can't afford it as I'm busy doing the house and my garden plus what bills come in I hope to start some time next year so that I can't look into UFO sightings from other people in the country.

If possible to send this to the mod as I do not know which department of the MOD to send this type of letter to them I would be very happy for you to send them a copy with my permission and perhaps both you and the MOD will truly

believe I have the real thing on photo & video plus the paintings I did as well from two of the videos.

I have binders & folders of all or most UFO'S seen & claimed sine the first one that crashed in Mexico along with several cuttings from sightings by various people that make a report in the local and national papers.

Thank you for the record list of this years sightings so I'm going to try and get my dates of my lot to see if they were on the same dates as some in the list could be the same UFO or may not? As these things can travel the whole country in seconds.

Look forward to hearing from you

Yours sincerely

I have aknowledgement of the 10th april 98 sighting from you but my report was on a postcard as i wanted postmen to read it in case they knew of somebody else who had also seen it and would get in touch. Perhaps that is why you cannot trace it but if you want me to send you it again on official paper let me know considering that was a very close accounter with the triangular football pitch size craft. I have since had a second encounter with some type of probe that nearly crashed into my back garden (and would have made me very rich) before turning around and going back the way it had come. This was obviously under some intelligent control.

Dear Section 40 [redacted]

Thank you for your e-mail of 19 August 2009 concerning UFO sightings in Northern Ireland.

I have checked our records which contain sighting reports and I can confirm that the correspondence you sent regarding the sighting you made on 10 April 1998 was indeed received by the MoD but, unfortunately, details of the sighting were left off the spreadsheet on the MoD website due to human error. Please accept my apologies for this administrative oversight.

With regard to your report of 17 July 1998, I have checked our sighting report files for the period in question but I have been unable to locate a report from you of a UFO for that date.

Finally, from the information on the website, I think that the sighting of a triangular craft you refer to occurred on 16 April 1998 , rather than the 17th. Unfortunately, no location is recorded for that sighting. That said, there is reference to Regents Park and Baker Street so it may well have been in London.

I hope this is helpful.

Dear Section 40

Thank you for your e-mail of 17 August regarding your Freedom of Information request.

The site I directed you to includes reports from across the UK, including Northern Ireland. If there are no sightings shown for Northern Ireland in 1998, it would be because we did not receive any.

I have been doing this job for over two years and, during that time, UFO sightings from Northern Ireland have been quite rare. I am afraid that I have no particular explanation for this.

I am sorry that I could not be more helpful

wot you really mean is this is the official stance by the MOD, the papers recently released by the MOD are a cover story, covering up the UK govts true intentions with UFOS, theyve learnt more than they are telling you lot and us the taxpayers who pay youre wages.
yes ufos have invaded youre airspace in criminal ways, but they were there before you lot so it is their airspace more than youres and their laws over rule youres.
tell youre gun toting anti establishment govt if their secret discovery departments who are chasing UFOs and trying to get a shot at one dont cease they are gonna get shot out of the sky by a UFO.

Air CmdSecCS-RAFBusSec13 [redacted]

From: Air CmdSecCS-RAFBusSec13 [redacted]
Sent: 02 September 2009 11:19
To: [redacted]
Subject: Release-Authorised: 20090902 [redacted] UFO 2004-U

Dear [redacted]

Thank you for your e-mail of 27 August 2009 regarding your UFO sighting.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

I am sorry I could not be more helpful.

Subject: reporting youre aircraft as being aggressive towards a ufo i saw

i was hoping under the freedom of information act you would be able to tell me from which department these next detailed aircraft of youres originate from and why they were flying aggressively towards an non combat UFO craft.

im 37 and have 19 ufo sightings to date, i also have a UFO book im working on which is backed up with high quality good detail video evidence of a UFO interacting with me. when my book hits the market im going to be a household name, so i need to tell you now the MOD being told to class UFOS as serious acts of airspace criminality is a wrong move on their part. also the MOD being told to fly aggressively towards them is also a wrong move, the gap between the general public and the MOD is going to widen if before my book is released you dont stop classing UFO activity as airspace breaches of law and trying to chase them in aggressive ways.
ufos aint a threat to society, to humanity or to youre govt, but you are trying to get lucky with a UFO craft in wanting to capture one.

Faster Than Light

It was 2004, a summers evening in July, there was a little wind with large groups of clouds and larger clear sky separating them. I'd missed the last bus home from Bury to Bolton so had began walking at about 11.40pm.
Its a 15 mile walk to my home so by the time I got to the sighting area in Radcliffe, Greater Manchester, it must have been about 12.40pm. I'm unsure of the precise time because I don't use mobile phones or wear a watch. I was walking up Outwood Road towards Ringley Road, walking southwards. I was more than halfway up the long straight road when noticing clouds moving to the east which were slowly uncovering the nearly full moon. I thought to myself, " that looks nice," after watching for about 5 more seconds a sudden, bright flash of white light lit up the sky to my right and slightly in front of myself. I looked over to it then saw a streak/beam of fading light extend out from the flash from its lowest point on its easterly edge, moving to the east on a horizontal trajectory about half way up in the sky.
At the far left of that I saw a disc shaped craft, dark colour and which seemed to be slowing down its speed. Almost as soon as the beam of light disappeared for about 0.2 of a second it was covered in the heat/flames seen when a craft enters earths atmosphere. It continued slowing down then when the flames/heat disappeared it turned right and down into cloud cover. The time it took from the flash of light to when it went into the clouds was a little more than 2 or 3 seconds.

I looked across at the driver of a car who was to my left side and she too was looking into the sky with a big smile on here face.

The clouds it hid in where above the nearby city of Manchester, again facing me and was roughly south of me and to the East side of the moon, it was in front of me to the south again. I continued walking up the road then about 20 or 30 seconds later I saw a large jet diving out of high altitude which was becoming visible quite slowly. First I saw its bright red and green light, each being on the underside of each wing, then I saw the rest of the plane become visible as it got closer to me. When at the same level the strange craft had been it slowly levelled out then followed the same route into the clouds. I found a place to stand away from the road so I didn't look suspicious due to it being between 12 and 1 in the morning then waited to see what else would occur. I could hear the large jet but couldn'
t see it, the strange craft was totally silent throughout the sighting.
About one minute after the large jet entered the clouds it exited them from the other side and then turned right in a circle while lowering its altitude then re-entered the clouds. It continued with this corkscrewing down, in and out through the clouds for about 20 or 30 minutes when then a dark coloured, unmarked, small

Catalogue Reference:defe/24/2452/1

© Crown Copyright

The National Archives' reference DEFE 24/2452/1

ish streamlined helicopter arrived on the scene.
The jet was similar looking to a small passenger airliner jet but being dark coloured and unmarked. Or [redacted] be the dark sky was preventing me from seeing any markings but it was a fairly well lit up night sky due to the near full moon which was now totally out of cloud cover.

The helicopter flew easterly under the clouds till I could no longer see it while the large jet then flew near me and then turned at me who was by now stood in a field watching while giving them a 2 fingered hand signal.
When the plane turned away from flying towards me I then reckoned they'd clocked me so walked the rest of the miles home.

Surely the strange craft was braking speed from above light speed before entering earths atmosphere then hid in the clouds knowing full well the military would be on their trail immediately. The crafts crew for sure appeared 5 to 8 seconds after I thought about the moon and clouds looking nice because well their craft capabilities looked nicer. It was by far the most amazing sighting id ever seen up till now in 2009 and all my sightings are amazing. And then the pilot skills and manoeuvres of his large jet were pretty impressive too but his equipment couldn't find the craft. Somehow he didn't know where it was and him corkscrewing his plane down, in and out of the clouds looked like he was using radar equipment to scan all around and in them clouds. Their attempts to track and follow it looked pathetic, I wonder at why do they even bother when this craft can travel faster than light, it entered earths atmosphere in less than half a second and turned 90 degrees in less than half a second and while travelling more than 2000 MPH.
Military and government aircraft are by a long way outclassed in every way and it's a similar scenario to compare their attempts at chasing and capturing an SFC to a guinea pig trying to catch a Ferrari which is half a mile in front. UK military they must be hoping to get lucky and the craft either breaks or crashes, that is if their fighter jets can't get hold of them.

The UK government haven't ever shared with the public all their SFC finds, evidences and witness statements from their airspace operatives who'
ve seen these craft so for whatever reason they are trying to get one of these craft it isn't to help us the taxpayers. It's somehow to help themselves the government and it's easy to work out they want this technology for military purposes and to send their paper authority wherever in space these craft can take them.

SFC crew have reckoned to me loads of times that governments are always taking wild shots at their kinds, may be if they don't stop an SFC will fire back. It would be the first time governments have seen one shoot back and to me and SFC crew would just be classed as a self defence.

Above light speed they had to have been slowing down from, no other explanation can explain the flash and streak of fading light. And I've only heard of one plausible explanation how any craft or object could travel above light speed and that explanation entered my thoughts only after I asked (in thoughts) for SFC crew to explain how they travel at such speeds.
I did explain that earlier in this book but will mention it again here, they do that by almost instantly creating an object the length of the journey they are to travel, it appears at the back of the craft so propels it forward almost instantly.

They really do make sure I have lots to tell of themselves and it's usually of stuff not heard of before. I have read a lot of UFO books and witness statements but I never found anything to do with light speed propulsion systems. The 6 different kinds of SFC I've seen to date they have all been mentioned in independent witness statements and other books about the subject. The saucer type and strange light emitting objects I've seen being the most commonly sighted kinds. I saw a bell shaped craft once, something drew me to the window when there I started to look into the sky and there it was, hovering while spinning clockwise. They are quite rare to be seen, I did find references of them in other peoples claims of SFC, them saying they are rarely seen and usually in North America.

There weren't many books written about the subject which were written from only one persons experiences, most I came across were compilations of the best accounts available. Whitely Strieber was one author who was writing about his own experiences, well in the 2 books of his I read he was.
Those were called Communion and Breakthrough. He knew his subject too so I can recommend these two books. He had a lot of strange goings on with lights in the sky and the grey type beings so I found myself agreeing with all of what he wrote into those books. I didn't find any other books which were only concerned with one persons sightings but there will be some. I saw a few which dealt with a persons few sightings, or a or a few encounters, never though did I hear of one person who had seen as many SFC as me.

Catalogue Reference:defe/24/2452/1

© Crown Copyright

Then I've come across a few peoples works which so obviously to me looked like fake claims, tis hard en[redacted] working out who is truly seeing SFC and who was mistaken without having to consider the people who lie about SFC sightings just to get into the fast growing market of books concerned with the supernatural.

Since 2001 I've been asking in thoughts for them to let me video and photo their craft and they always said not until after I've wrote a book about them. I saw 6 sightings of strange craft in the sky between the years of 2001 and now in July of 2009, all were amazing sightings but not much chance of me getting good video or photo evidence cause each sighting was either far away and sometimes in the night sky or was a sighting of a short time duration. Plus I never had a video camera till this year in 09 so if going off all my previous sightings when they do give me chance to photo and video their craft its going to be even more amazing than the last mentioned sighting with the flash of light and disc type craft. They actually want me to be a public figure with these craft, that's why they made sure I have vast experience of them. Coupled with the photo and video evidence of the quality and kind I'll have soon after finishing this book there will be no competition to this book. It for sure will be seen as the best quality photo and video evidence ever seen.

The UK airspace militaries must have loads of equipment monitoring the sky near me, I've even seen em patrolling with a brand new Euro Fighter jet!
For them to be using fighter jets over heavily populated areas that can only mean two things, on mission and trying to get a shot at something. They don 't train their fighter jet pilots over heavily populated areas so for sure it was on mission.

If the disc shaped craft had only entered earth's atmosphere then the only light to be seen would have been when it was engulfed in fire, (section B in picture on previous page). Every person who saw this event would have been sure it had outside of earths atmosphere braked from above light speed before hitting earths atmosphere. The picture depicts it slightly rising in its movement across the sky but it was more level than the picture shows, it was travelling a bit away from me though so it did a bit look like it was climbing slightly but only because it was moving away from me.

While checking the Internet for UFO related articles I found an advertisement asking for people to send in their UFO sightings to be included into a book. Straight away I knew this encounter would be good enough for inclusion, so I wrote up a version and sent it off, within a day or two the author was replying and saying he was to use my accounts. That was Pat Regan's UFO - The Search for Truth.

The UFO crew had again displayed their tendencies to use clouds as cover, then the air force pilot in the jet displayed that whoever has written his orders they already knew UFOs use clouds as cover. The pilot must have known how to scan the clouds in that corkscrew fashion before he had entered them. They must have put their large jet into a steep dive as soon as the flash and streak of light appeared because they were entering the clouds about 30 seconds after the SFC had. It only stopped searching after the helicopter arrived on the scene, so again who ever was the highest rank above the pilots they know how fast SFC disappear from their equipment and soldiers. They way in which they searched and manoeuvred suggests they have lots of experience with these craft, the royal air force themselves probably sighting more craft than me. They should release into the public all they know about these things but I know they will not do that. Its shameful behaviour them chasing and trying to shoot at them then hiding all these sightings from the public and well we do live in police/military USUK states so I don't ever expect anything less or more from them. These governments never stop being caught lying in the public, hiding the truth or being how we the tax payers don't want them to be so please believe me when I say USUK govts have more evidence of these craft than I but they wont share those evidences with you.

One video I did see on the Internet shows a NASA satellite shooting at a flying saucer type craft with an electrical pulse or laser of types, this is not how we want our governments to perform but that is how most USUKUN governments are to these craft. The people who never believed in SFC were sceptical because of our govts hiding their evidences.

txttelephone: ----------
txtinforequest: i did see either US or UK military aircraft trying to chase a UFO craft i also saw one night, it being only one of the 19 sightings throughout my life.
If you the MOD cannot identify these military aircraft then its even secret to yourselves. In relation to this query is there any department i can report this UFO sighting to directly? Plus is there any way for me to enquire as to what department these military aircraft originate from.
It is going to be in the best interests of the MOD to be totally truthful with me, when my book is released with video and photo evidence of a UFO interacting with me the words i use to describe MOD policy will push a bigger gap between the public and the MOD. My book is going to big, im going to become a household name for this UFO video evidence which is better quality than anything anywhere else see.

so anyways, here is my sighting, if its been sent to the wrong department dont worry about, i want all youre personnel to read this chapter of writing, so you have my permission to circulate it amongst all UK govt depertment operatives, their friends, family and whoever else you want to send this next chapter of writing to.

Faster Than Light

It was 2004, a summers evening in July, there was a little wind with large groups of clouds and larger clear sky separating them. I'd missed the last bus home from Bury to Bolton so had began walking at about 11.40pm. Its a 15 mile walk to my home so by the time I got to the sighting area in Radcliffe, Greater Manchester, it must have been about 12.40pm. I'm unsure of the precise time because I don't use mobile phones or wear a watch. I was walking up Outwood Road towards Ringley Road, walking southwards. I was more than halfway up the long straight road when noticing clouds moving to the east which were slowly uncovering the nearly full moon. I thought to myself, " that looks nice," after watching for about 5 more seconds a sudden, bright flash of white light lit up the sky to my right and slightly in front of myself. I looked over to it then saw a streak/beam of fading light extend out from the flash from its lowest point on its easterly edge, moving to the east on a horizontal trajectory about half way up in the sky. At the far left of that I saw a disc shaped craft, dark colour and which seemed to be slowing down its speed. Almost as soon as the beam of light disappeared for about 0.2 of a second it was covered in the heat/flames seen when a craft enters earths atmosphere. It continued slowing down then when the flames/heat disappeared it turned right and down into cloud cover. The time it took from the flash of light to when it went into the clouds was a little more than 2 or 3 seconds.

I looked across at the driver of a car who was to my left side and she too was looking into the sky with a big smile on here face.

The clouds it hid in where above the nearby city of Manchester, again facing me and was roughly south of me and to the East side of the moon, it was in front of me to the south again. I continued walking up the road then about 20 or 30 seconds later I saw a large jet diving out of high altitude which was becoming visible quite slowly. First I saw its bright red and green light, each being on the underside of each wing, then I saw the rest of the plane become visible as it got closer to me. When at the same level the strange craft had been it slowly levelled out then followed the same route into the clouds. I found a place to stand away from the road so I didn't look suspicious due to it being between 12 and 1 in the morning then waited to see what else would occur. I could hear the large jet but couldn't see it, the strange craft was totally silent throughout the sighting. About one minute after the large jet entered the clouds it exited them from the other side and then turned right in a circle while lowering its altitude then re-entered the clouds. It continued with this corkscrewing down, in and out through the clouds for about 20 or 30 minutes when then a dark coloured, unmarked, small ish streamlined helicopter arrived on the scene. The jet was similar looking to a small passenger airliner jet but being dark coloured and unmarked. Or may be the dark sky was

Catalogue Reference:defe/24/2452/1

© Crown Copyright

The National Archives' reference DEFE 24/2452/1

preventing me from seeing any markings but it was a fairly well lit up night sky due to the near full moon w[redacted] was now totally out of cloud cover.

The helicopter flew easterly under the clouds till I could no longer see it while the large jet then flew near me and then turned at me who was by now stood in a field watching while giving them a 2 fingered hand signal. When the plane turned away from flying towards me I then reckoned they'd clocked me so walked the rest of the miles home.

Surely the strange craft was braking speed from above light speed before entering earths atmosphere then hid in the clouds knowing full well the military would be on their trail immediately. The crafts crew for sure appeared 5 to 8 seconds after I thought about the moon and clouds looking nice because well their craft capabilities looked nicer. It was by far the most amazing sighting id ever seen up till now in 2009 and all my sightings are amazing. And then the pilot skills and manoeuvres of his large jet were pretty impressive too but his equipment couldn't find the craft. Somehow he didn't know where it was and him corkscrewing his plane down, in and out of the clouds looked like he was using radar equipment to scan all around and in them clouds. Their attempts to track and follow it looked pathetic, I wonder at why do they even bother when this craft can travel faster than light, it entered earths atmosphere in less than half a second and turned 90 degrees in less than half a second and while travelling more than 2000 MPH. Military and government aircraft are by a long way outclassed in every way and it's a similar scenario to compare their attempts at chasing and capturing an SFC to a guinea pig trying to catch a Ferrari which is half a mile in front. UK military they must be hoping to get lucky and the craft either breaks or crashes, that is if their fighter jets can't get hold of them.

The UK government haven't ever shared with the public all their SFC finds, evidences and witness statements from their airspace operatives who've seen these craft so for whatever reason they are trying to get one of these craft it isn't to help us the taxpayers. It's somehow to help themselves the government and it's easy to work out they want this technology for military purposes and to send their paper authority wherever in space these craft can take them.

SFC crew have reckoned to me loads of times that governments are always taking wild shots at their kinds, may be if they don't stop an SFC will fire back. It would be the first time governments have seen one shoot back and to me and SFC crew would just be classed as a self defence.

Above light speed they had to have been slowing down from, no other explanation can explain the flash and streak of fading light. And I've only heard of one plausible explanation how any craft or object could travel above light speed and that explanation entered my thoughts only after I asked (in thoughts) for SFC crew to explain how they travel at such speeds. I did explain that earlier in this book but will mention it again here, they do that by almost instantly creating an object the length of the journey they are to travel, it appears at the back of the craft so propels it forward almost instantly.

They really do make sure I have lots to tell of themselves and it's usually of stuff not heard of before. I have read a lot of UFO books and witness statements but I never found anything to do with light speed propulsion systems. The 6 different kinds of SFC I've seen to date they have all been mentioned in independent witness statements and other books about the subject. The saucer type and strange light emitting objects I've seen being the most commonly sighted kinds. I saw a bell shaped craft once, something drew me to the window when there I started to look into the sky and there it was, hovering while spinning clockwise. They are quite rare to be seen, I did find references of them in other peoples claims of SFC, them saying they are rarely seen and usually in North America.

There weren't many books written about the subject which were written from only one persons experiences, most I came across were compilations of the best accounts available. Whitely Strieber was one author who was writing about his own experiences, well in the 2 books of his I read he was. Those were called Communion and Breakthrough. He knew his subject too so I can recommend these two books. He had a lot of strange goings on with lights in the sky and the grey type beings so I found myself agreeing with all of what he wrote into those books. I didn't find any other books which were only concerned with one

Catalogue Reference:defe/24/2452/1

© Crown Copyright

The National Archives' reference DEFE 24/2452/1

persons sightings but there will be some. I saw a few which dealt with a persons few sightings, or a or a few encounters, never though did I hear of one person who had seen as many SFC as me. Then I've come a[redacted]s a few peoples works which so obviously to me looked like fake claims, tis hard enough working out who is truly seeing SFC and who was mistaken without having to consider the people who lie about SFC sightings just to get into the fast growing market of books concerned with the supernatural.

Our Ref:
UFO Correspondence

19 August 2009

Dear Section 40

Thank you for your recent note enclosing a DVD of lights you had seen in the sky.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

We have examined your DVD and whilst given the above policy we are unable to tell you what you have filmed, there is no evidence that there is a particular defence concern. I am returning the DVD to you with this letter.

I am sorry I could not be more helpful.

Yours sincerely

Sent: 19 August 2009 09:30

To: Section 40

Subject: Release-Authorised: 20090819-Response to Section 40 UFO Sighting Israel-U

Dear Section 40

Thank you for your e-mail of 17 August 2009 regarding the UFO video you placed on YouTube.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

Since it would seem the sighting took place in Israel, it is not a matter for the UK Ministry of Defence and you should consider contacting the authorities in that country.

I am sorry I could not be more helpful.

The National Archives' reference DEFE 24/2452/1

This is an object that appeared South-East to Kfar-Saba, Israel, on Aug-12, 2009, circ 9-10pm. Most of time there were more than one there, usually a pair of them appearing one after another in a distance and difference of heights b/w 'em, hanging in one point still for minutes, then disappearing momentarily. One time a 'triangle' formation of near a dozen of those appeared as well, with one of them hanging aside off the triangle ('the admiral ship'). Unfortunately, I was busy looking for fresh batteries for my camera and this was the only sample capture I was able to take until the camera died.
The object was perfectly still, all the movements while zoomed-in are due to my hands' shaking.
Please comment if you have something smart to contribute to enlightening the phenomena

To: Section 40
Subject: Release-Authorised: 20090818-UFO Report Section 40

Dear Section 40

Thank you for your e-mail regarding a UFO sighting you made in 1997.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

Given the length of time since your sighting, we do not intend to investigate the matter.

I am sorry I could not be more helpful.

I appreciate that this report is old information, (see attached letter) but it was written by me shortly af
1997 and, as this was to us a very unusual sight in the sky also as it was during the day without any cl
all this time it would be better to be logged by yourselves.

RESPONSE BUT DO NOT
REPLY IN USE ATTACH

Regards

[redacted]

[redacted]

It all started on this warm, sunny cloudless evening on the 8th August 1997 at 6.
were just finishing our meal in the garden, then for some reason I glanced up at
the sky just above the roof of our house, and saw what I thought at first was a
cluster of silver balloons 8 in total of various sizes tethered together high in

somewhere towards the N.E.
Four of the objects were very large and kept together and the other 4 were much

smaller about 4 times smaller and very white/silver in colour, three of them move

to one side and formed a triange and the other one moved out to the other side in

a fixed postion as they all moved upwards.

As I was trying to gather what direction the balloons were
travelling, I saw them all moving apart again into fixed positions then
move to another, which made me think balloons can't do that so precisely.

I said to my family to look up there at these balloons and tell me what do you
see, my son of 22 & daughter of 19 looked and said they look like those
silver foil balloons, as they were reflecting the suns rays, just like a prism
does with rainbow colours.

Because they kept forming the same positions over and over again,
then reforming into a tight group as they drifted over the sky,
we became more suspicious of the first thought, and more convinced they were
under some control.
I must point out we have never seen anything like this before, and we all know
what balloons look like in the sky, as I used to sell & fly all kinds of
balloons including silver foils, so we have some idea from our experiences over
the years what to look for to identify the object and it's distance in
relation to other things around.

But because it was a cloudless sky that day, there was only a number of gliders
around to judge how high they were and the size of them, our opinion through
binoculars was that they were very large of various sizes and very high in the
sky, we estimated that they started off when I saw them at about a few hundred

feet to eventually about 40,000 feet or more.

After about 20 minutes of taking turns through the binoculars tracking them
across the sky, they disappeared out of sight right above us.

The National Archives' reference DEFE 24/2452/1

I also thought as we live near the Research Establishment at Aldermaston, these objects seemed to be above that site and moving in a south east direction towards Basingstoke, Hampshire.

It must have been about ten minutes after the objects had gone, when we were looking around the sky to see if we could spot them anywhere else, then suddenly from the north very low in the sky, two silver grey round objects one above the other shot across my line of sight it was very amassing to see these objects so close up and moving in tandem together, as if they were letting us see them and moving closer together and apart again, just to show they were under control, both objects seem to have a flash of light surrounding them on one side as if they were spinning, and they were completely quiet,they disappeared as suddenly as they appeared, just if they switched them selves off like a light.

They reminded me of two large ball bearings, as far as size, this is difficult to judge when you have not seen anything like this before, so is the problem of height in the sky, I would hazard a guess and say the objects were about 10feet across and about one thousand feet high, and travelling at about a hundred miles

You may wonder why I haven't sent this to you before,

I didn't know this site until recently, but I have sent this

letter over the years to various organizations in the past with no response,

I wish to this day we had got photo's but we were worried

that if one of us rushed inside for a camera, we would miss them.

Subject: UFO photos
Attachments: IMG_3381.JPG; IMG_3382.JPG; IMG_3383.JPG

Dear **Ministry of Defence**

I just share those three photos because I saw the news from CNN and it said I could send to your Ministry of Defense.

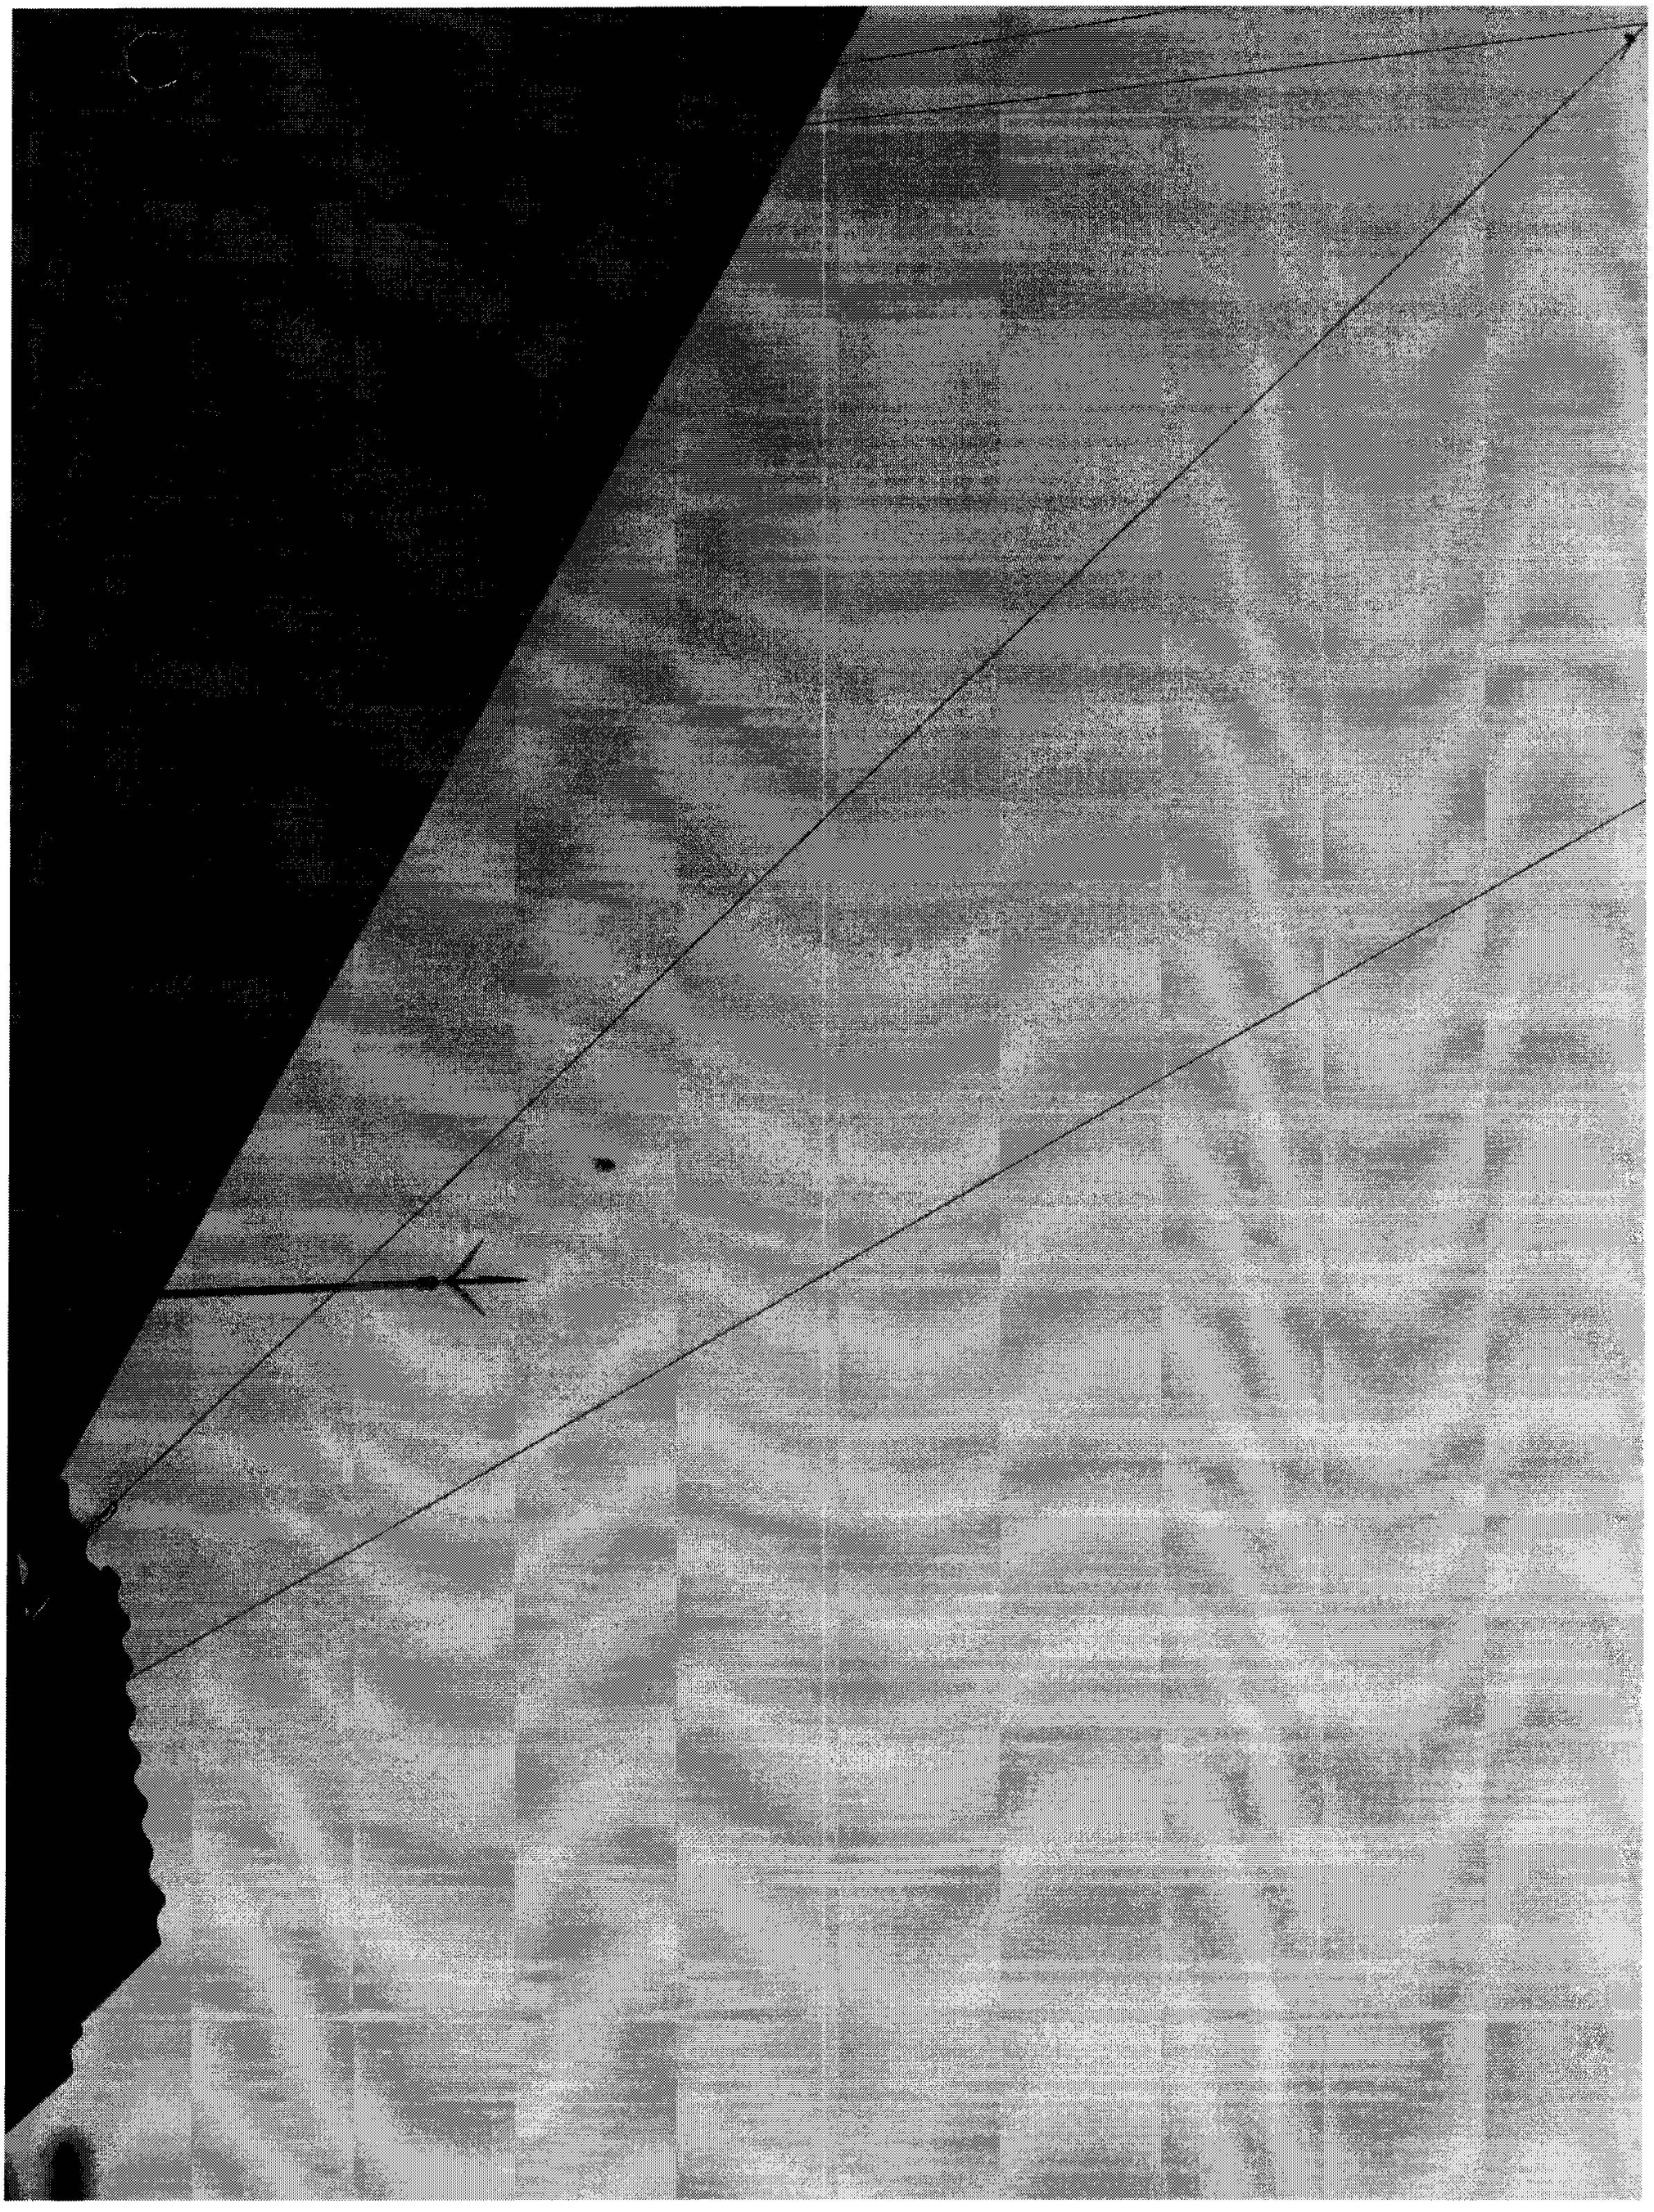

I saw that UFO (Unidentified Flying Object) in the morning around 7:30 AM on JULY 18, 2008 (Last year) (Thailand's Local Time, GMT + 7:00) near Assumption University's Huamak Campus while I was working at a computer. First, I thought a helicopter! but later I just noticed that it was not our traditional flying vehicles. While looking at the spot object, I was shuffling a couple of questions and answers in my mind. "Helicopter?" "No, because it doesn't have propellers, no spinning blades and helicopter always makes noise". So, it turned to "Balloon?" I whispered "No" because this object has like fork-shaped legs and the body is quite flat one like a fish facing upward and heading to North-East to North-West. Even that one doesn't emit gas or smoke but I am sure one thing is that is not a balloon. I had never seen the flying objects like that type of flat shaped with fork legs before even in the science fiction movies. Then, I called to my brother and asking him to take the pictures immediately.

Anyway, this was the second time in my life I had seen the UFO (Unidentified Flying Object) at the vast wonderful sky. I love and I believe so much for it.

(**Remark**: All pictures are taken from ABAC Condo 2, near Assumption University Huamak Campus, Thailand)

From: Section 40 [redacted]
Sent: 18 August 2009 01:44
To: Air CmdSecCS-UFO Desk1
Subject: sighting in 1996

Hi,

I saw an article in the London Paper about a sighting of a UFO at Glastonbury in 1994. In the spring of 1996 I saw what I believe to be the same object about four metres above my house in Cheshire moving slowly with the same lighting as described in the newspaper report (I've not read the official report). I was alerted to the object by a very low-pitched steady whoomf whoomf whoomf whoomf (much like the low frequency noise of a wind-turbine). I have written a short story about what I saw and what I think it means, what I think it was made out of etc and am trying to work this into a novel. To summarise, it seemed to be made of some kind of pewter coloured material that was like nothing I know of on earth. It was no material I have seen before. It was water, taught, but also like tin-foil, as thin as tin foil. The lights were somehow part of it rather than being attached to it.

I'm very curious about Switzerland both with the CERN experiment and the other research happening in laborotories on workings of the mind and chemical imput, which no doubt will lead to rapid advancement between what you might call 'power of mind' and technology. The pictures in Crop Circles: I should like to find one with intricate flower-shaped discs and a solar-system, as google search turns a excess of images. I wonder about the ethics of time travel/ inter-dimensional travel.

I heard the low-pitched noise another time shortly before sightings in Falmouth, Cornwall. Also, I reported a mutilated cow I found on the Roseland Peninsula in Cornwall to UFO people there as it fitted the description of other animals in the area that were allegedly 'abducted'.

I would be prepared to undergo hypnosis to elaborate on what happened in '96. I'm also prepared to make an offical report on the incident.

Best regards,

Section 40 [redacted]

P.S. What an extraordinary career you have!

6/8/09.

Dear Sir or Madam,

This is an account of what I think is the Bright star which I think is a planet which can be seen in the south East near the moon, around 11 PM.

I told my Brother years ago about the 10TH planet, I call planet Cougar. But he took no notice of me, Like he wanted to shut me up. I have Two A4 size books on possible Alien seneios. Aliens being PROCYON ANDROMEDON'S IRRI-SHELLI-AKE ZARG. space craft triangular, oval, and other typs of U.F.O.

Procyon Andromedons from 61 cygni the star system stayes the same but the planet is on a course towards our planet. Planet Earth. The bright star in the sky could be planet Cougar, the 10TH planet. Guided by Large Triangular spacecraft. Is this Fact or Fiction. ???

I fist saw in the southern Hemispere what looked like venus could it have been planet cougar. The 10TH planet. Thanking you for your Kind attention.

Yours Faithfully

Dear Section 40

Thank you for your comments, which have been noted.

You might be interested to know that the MOD has already released a great deal of information about UFOs which is available for public viewing. MOD files were routinely destroyed after being held for five years until 1967, when they were generally preserved for The National Archives. A few have survived before 1967 and these together with records up to 1992 are now available for public viewing. They can be contacted at Ruskin Avenue, Richmond, Kew, Surrey TW9 4DU or telephone, 020 8876 3444. The National Archives also have a website giving information about the records they hold and how to access them. This can be found on the internet at www.nationalarchives.gov.uk.

Additionally, we are part way through a three year programme to release UFO files from the Directorate of Air Staff and the Defence Intelligence Staff covering the period from the late 1970's to 2007 and details of UFO sightings reported to the MoD for the period 1997-2008 are available for viewing by searching under "*UFO Reports*" on the MoD website at www.mod.uk.

I hope this is helpful.

2 August 2009

An unusual experience

I'm sure this will sound weird to you, just as it seems really strange to me to be putting it in writing after all this time.

Back in the summer of 1978 an event happened to me which I can recall in vivid detail. At the time it was quite terrifying and lasted for around 30 seconds and immediately afterwards a corroborating event lasted for about 60 seconds. This second event (I have always assumed) was intended to validate that the first actually happened. This event did not originate on Earth - this I am sure of.

There was nothing in the newspapers or on TV at the time so I assumed that this event was intended for me personally for some reason. I have told very few people about this in the last 30 years as I knew how it would sound.

Over the last eight years or so a small number of events of synchronicity have occurred which I knew were related to my first experience - but I still couldn't understand what the purpose was. Eight weeks ago a relatively insignificant event occurred which helped me to put the first event into context. I now understand the purpose of the first event and I think something of significance is about to happen. This will be a positive event if we interpret it the right way.

I believe that I should speak to a relevant Government authority such as yourselves at the MoD to see how they would interpret/investigate the first event and perhaps even validate it.

Does: **2665613-8** mean anything to you of relevance?

I'm a well qualified professional engineer living in Surrey and recognise that to many people this may sound a little crazy, so may I ask you to keep any communications 'low key' in nature.

Many thanks and warm regards
