

The Bunker - South West Data Centre

The Newbury bunker was built for the US Forces on the Greenham Common Air Base as a command and control centre protecting people and technology from nuclear attack. The construction and security standards are what you might expect of such a purpose built fortress. It has concrete reinforced walls, steel doors and tempest shielding. Layered on top of this physical inaccessibility is a 24-hour watch, CCTV and a series of sophisticated access controls.

Bunker onsite security includes

- Steel and concrete mix reinforced blast proof walls
- Solid steel blast protection doors
- CCTV
- Tempest RFI intrusion protection
- Sophisticated access controls.

Data Floor

- Shared or dedicated partitioned areas
- Space available from a quarter rack to a dedicated suite or vault.

Power & Air Conditioning

- Redundant air conditioning units to guarantee stable temperature and humidity @ N+1
- Redundant UPS conditioned power @ N+1
- Two separate incoming power supplies with diesel generator backup.

Security

- Environmental and power monitoring
- Early Smoke Detection Apparatus
- Firetrace fire suppression system
- Motion detection CCTV system
- 24/7/365 video recording
- Visual verification of all persons entering the data floor
- On-site parking.

Secured Networks

- Multiple Internet Service Providers
- Diverse independent telco risers from public highway to data floor
- Choice of telecommunications service providers
- Satellite dish space available - subject to planning
- Microwave space available - subject to planning
- Private MPLS network.

“The UK’s most secure data centre”

Physical

Human

Digital

The Bunker Protocol

The Bunker Protocol™ is an all-encompassing methodology that secures against risk and ensures the most secure IT delivery in the UK. The Bunker Protocol™ incorporates Physical, Human and Digital security capability and processes and wraps them with a governance and standards layer that ensures that client data and clients systems are continually secure against threats to confidentiality, integrity and availability.

This is Ultra Secure

Physical - Military Grade data centres

Human - All employees are fully background checked and our culture starts and ends with security

Digital - We build and integrate systems in-house, Ultra Secure, from the source code up
