PERMANENT MISSION
OF THE RUSSIAN FEDERATION TO THE
INTERNATIONAL ORGANIZATIONS
IN VIENNA

Erzherzog-Karl-Strasse 182
A-1220 Wien

Tel. (043-1) 282 53 91, 282 53 93
Fax (043-1) 280 56 87

№ 4551-н

The Permanent Mission of the Russian Federation to the International Organizations in Vienna presents its compliments to the Secretariat of the International Atomic Energy Agency and has the honour to inform about the real situation at the Zaporozhskaya NPP (ZNPP) as of November 28, 2023.

From November 21 to November 27, 132 aerial vehicles launched by Ukraine with the aim of attacks and provocations against the ZNPP and the town of Energodar were suppressed.

The ZNPP's power unit № 1 is under scheduled maintenance; № 2, № 3, № 5 and № 6 – in a state of cold shutdown; № 4 – in a state of hot shutdown.

The off-site power for the ZNPP own needs is supplied via high-voltage lines “Dneprovskaya” (750 kV) and “Ferrosplavnaya-1” (330 kV).

Stocks of diesel fuel required for the operation of the plant's emergency power supply systems are sufficient for more than 19 days of operation.

As of 07:00 on November 27, the water level in the supply channel of Zaporozhskaya TPP is 10.61 m, the water level in the cooling pond of ZNPP is 15.68 m.

THE SECRETARIAT OF THE
INTERNATIONAL ATOMIC ENERGY AGENCY
Vienna

Radiation background at the plant site and beyond does not exceed the established standards. Radiation background at the ZNPP and around the site is within 8 to 12 microR/hour.

Recruitment of personnel at the ZNPP continues. There are enough employees at the ZNPP to carry out its safe operation in the cold and hot shutdown modes, as well as to carry out scheduled maintenance work.

Federal state supervision in the field of the use of nuclear energy is carried out at the ZNPP site in the regime of constant supervision by the Russian regulatory authority – Rostechnadzor.

Four specialists from the IAEA Secretariat are at the plant upon the IAEA Director General request and with the consent of the Russian Federation. From November 19 to November 24, the IAEA experts walked with a radiation monitoring device across the site, nine modular boilers, reactor compartment of power unit № 6, back-up diesel electro-stations of power units № 5 and № 6, fuel compartments of power units № 3 and № 4. The IAEA representatives observed the emergency drill and met with the specialists from the ZNPP divisions of electric maintenance and hydro technical buildings.

ZNPP employees continue to receive compulsory health certificates (during the period from November 20 to November 24, 107 certificates were issued). As of November 27, 3 990 ZNPP employees have been covered by the voluntary health insurance programme.

From November 20 to November 24, 9 ZNPP employees and members of their families were sent to sanatorium retreat. 29 plant employees and members of their families are in sanatorium retreat facilities now.

Data on the situation at the plant is available at ZNPP website (<https://znpp.ru/>), in the section “Current status of the Zaporozhskaya NPP” with daily updated information.

The Permanent Mission of the Russian Federation requests the Secretariat to circulate this information among all IAEA Member States as soon as possible.

The Permanent Mission of the Russian Federation avails itself of this opportunity to renew to the IAEA Secretariat the assurances of its highest consideration.

Vienna, "30" November 2023
