

Leaked Documents Confirm NATO Plans To Destroy Kakhovskaya Dam In Kherson Region

Illustrative Image

The Russian military has been constantly warning of the terrorist warfare of the Ukrainian military, which threatened the civilians of their own country as well as the entire Europe. The claims of the Russian top military officials are always ignored by the mainstream media as well as by the so-called international community, including, the UN Security Council.

The reason why the West does not hear Russia is clear: the US and NATO militaries are preparing and orchestrating all operations of the Armed Forces of Ukraine, including those that threaten the world with catastrophes or, at least, can claim the lives of hundreds of civilians at once.

Before the recent withdrawal of Russian troops from the western bank of the Dnieper River in the Kherson region, Moscow together with the local officials claimed that the Ukrainian military was preparing attacks on the Kakhovskaya dam which could destroy dozens of settlements located along the large Dnieper River. This was one of the main reasons for the timely evacuation of civilians from the western bank region, including from the large city of Kherson.

The newly leaked documents of the NATO military confirmed that the Kakhovskaya dam, which was secured by Russian forces, was considered as one of the military targets for the Ukrainian and NATO military.

An anonymous team of hackers “Joker DPR” has recently published a new batch of secret NATO documents which they achieved after having hacked the notorious US [DELTA military command and control system](#).

You may read the newly released documents [HERE](#). You may also read the first part of the leaked documents [HERE](#).

The publication was provided with the following sarcastic comments by the Joker:

Here is another batch of secret NATO documents that my hackers pulled out of the Ukrainian-American DELTA command and control program. In general, it is very interesting. NATO gives Ukrainians almost all intelligence data and targets to defeat, not to mention weapons, equipment and soldiers. Without the participation of NATO, the Ukrainian army would have ceased to exist long ago. So don't be surprised that they are praying for NATO. But it would be better to pray for the Joker, then there would be a chance to stay alive.

The leaked documents confirmed that the Kakhovskaya dam was among the targets to destroy. The satellite imagery and the targets in the area were provided by the US intelligence back in summer.
