Ukraine needs your help

Ukraine is in the middle of a humanitarian disaster. Hundreds of children have died. Thousands of adults have died. The people will continue their fight for freedom, but they need more ammunition and necessities.

Help Ukraine with BTC, ETH, USDT, SOL, DOT, and other cryptocurrencies. The funds will be used for the support of humanitarian aid programs and the Armed Forces of Ukraine.

Got questions? We have answers!

Why did we make this site and how does it work?

The crypto community does not want to stand aside and watch Ukrainians suffer from the unprovoked aggression by the Russian Federation and the subsequent humanitarian disaster unseen in Europe since the Balkan war.

Everstake and Kuna are Ukraine-based companies. We wanted to give the crypto community a viable option to efficiently stand with Ukraine. Having seen our goals align and more and more blockchain companies wishing to get on board, we merged our initiatives under the common name of **Aid For Ukraine**.

Aid For Ukraine is cooperating with the cryptocurrency exchange FTX which converts crypto funds received into fiat and sends the donations to the National Bank of Ukraine. This marks the first-ever instance of a cryptocurrency exchange directly cooperating with a public financial entity to provide a conduit for crypto donations.

Is it legit?

Yes! The initiative is powered by the [Everstake](#), [FTX](#), [Kuna](#) and [Ministry of Digital Transformation of Ukraine](#). [Everstake](#) has verified the initiative on his Twitter, and so did the Minister of Digital Transformation of Ukraine [Mykhailo Fedorov](#).

How will the funds be used?

All funds raised through this effort go directly towards aiding Ukrainians. The donations are sent directly for procurement through volunteer organizations and various ministries, and to the dedicated account with the National Bank of Ukraine. Here is the [first report](#).
